COMMISSIONER OF INTERNAL REVENUE

1963 annual report

FOR THE FISCAL YEAR ENDED JUNE 30, 1963

INTERNAL REVENUE SERVICE • UNITED STATES TREASURY DEPARTMENT

NOTES: All yearly data are on a fiscal year basis, unless otherwise specified. For example, data headed "1963" pertain to the fiscal year ended June 30, 1963, and "July 1" inventory items under this heading reflect inventories as of July 1, 1962.

In many tables and charts, figures have been rounded and may not add to the totals which are based on unrounded figures.

COMMISSIONER CAPLIN AND HIS ADVISORY GROUP (see p. 59)

This Committee which represents professional and other private groups concerned with Federal taxation provides constructive criticism of Internal Revenue policies and procedures and suggests ways in which the Service can improve its operations.

U. S. TREASURY DEPARTMENT

Commissioner of Internal Revenue

WASHINGTON 25, D. C.

September 27, 1963

Honorable Douglas Dillon
Secretary of the Treasury
Washington, D. C.

Dear Mr. Secretary:

Attached is the annual report of the Internal Revenue Service for fiscal year 1963 describing its 100th year of operations. Noteworthy is that gross Internal Revenue receipts surpassed the $100 billion mark for the first time in history--reaching a total of $105.9 billion. This figure reflects the vitality of our free society, the growth of our economy, and the high level of tax compliance of American citizens. It is a testimonial to the honesty and integrity of our people, as well as their industry and creativity.

Almost every one of our activities set new records of achievement. But, as you well realize, raw statistics do not tell the full story. Just as important as our direct enforcement results were the expansion of our compliance efforts and the improvement reflected in compliance patterns. The favorable public response and the results achieved to date confirm the soundness of our 1961 decisions to focus our efforts on improving voluntary compliance.

We have continued to emphasize professional standards throughout the Service--in our recruiting and training, promotion criteria, rules of conduct, and in the day-to-day performance of our various duties. Integrity and fair dealing have become guiding principles, and emphasis has been placed upon courtesy and a commonsense approach in our contacts with taxpayers. In striving for a professional level of performance, we have also sought a higher quality of work throughout Internal Revenue. This is being done not for quality's sake alone, but because we believe it will contribute to better taxpayer compliance and to improved direct enforcement results.

We have also kept in the forefront a vigorous enforcement program. A large part of our efforts continues to be placed on curbing tax abuses and excesses, and in participating in the organized crime drive in cooperation with the Attorney General. We are examining a greater number of returns of exempt organizations and are giving special attention to their problems. Our examination of tax returns of U.S. citizens and U.S. businesses operating in foreign countries is also being expanded, and we are reshaping our entire foreign program to meet the new administrative responsibilities created by the Revenue Act of 1962.

1963 marked another step forward in converting Internal Revenue operations to an automatic data processing system. The Atlanta Regional Service Center is fully operative, and the computer center in Martinsburg, West Virginia, is building up its nationwide master file record for both business and individual accounts. The Philadelphia Regional Service Center began processing business returns in January 1963; the Cincinnati and Dallas Regional Service Centers will begin in January 1964; and in January 1965 the remaining regions will enter the system when our existing three area service centers are converted to ADP. In addition, in 1966 we plan on opening the IRS data center in Detroit, Michigan, to relieve regional service centers of processing activities not directly related to the ADP master file--for example, payrolls, operating reports, and statistical data for the entire Service.

You know of the emphasis we have been placing on equal employment opportunities for every citizen, regardless of race or religion. A steady rise continued throughout the year in minority group employment, with increases occurring at all grade and salary levels. Positive steps were taken to assure equal rights and opportunities to incumbents as well as to prospective employees. In addition to broadened job opportunities in general, minority group members now occupy technical positions in almost every area of the country. Of great import was the accomplishment of these gains without giving preferential treatment or interfering with the merit system.

Finally, I would like to mention our management improvement program which set an all-time record this year with annual recurring savings of more than $11 million. Improvements adopted will result in more effective deployment of manpower, better use of new mechanical and technical equipment, streamlining training programs, and modernizing work techniques.

Most significant was the decision to realign Internal Revenue districts and regions, which I believe will yield a variety of benefits for many years to come. This was recommended by our Committee on Resources Utilization, but would not have become a reality without your wholehearted approval and support. Not only does the realignment permit the channeling of savings into two vital areas--taxpayer services and assistance as well as enforcement--but reducing executive and administrative overhead will allow operational efficiency by improved lines of communication and authority.

The President has emphasized the need for "increasing the productivity of the Federal work force" and has made it clear that this is "urgent national business." The size and scope of Internal Revenue's operations, in concert with a constantly expanding workload, make it imperative that we respond fully to the President's direction and seek further economies to free resources for front-line work. I am confident that our efforts in fiscal 1964 will be as rewarding as our accomplishments were in 1963.

Mortimer M. Caplin

Commissioner of Internal Revenue

1 Interpretation and Communication of Tax Law to Taxpayers

GENERAL

The objective of the Internal Revenue Service is to administer the tax laws vigorously but also reasonably. The confidence of the citizen in reasonable, impartial, and honest administration of the law is an American tradition which serves as the underpinning of our unique self-assessment tax system. To broaden voluntary compliance under this system, it is incumbent upon the Service to fully apprise taxpayers of their rights and obligations under the tax laws, and to accommodate administrative procedures to the interests and convenience of taxpayers. These aims are accomplished through a series of programs, including preparation and distribution of regulations, rulings, tax forms, and instructions; publication of numerous tax guides covering separate tax situations; dissemination of information to taxpayers by a broad public information program through different news media, and by a taxpayer assistance program conducted in district and local offices.

TAXPAYER PUBLICATIONS

This is basically a self-help program for taxpayers. In addition to providing instructions with the tax return forms, the Service issues approximately 50 publications in plain everyday language for the information and guidance of taxpayers on practically all aspects of Federal taxation (see page 62). Continuing the Service's "New Direction" for greater emphasis on voluntary compliance through an informed taxpaying public, numerous improvements and expansions of the program were accomplished during the year and scheduled for the near future.

Forty-one other taxpayer assistance documents ranging in size from 1 to 24 pages were distributed free to taxpayers. Distribution of the various documents ranged from 1,000 to 110,000 copies. Each publication contains detailed and easy to understand explanations of the laws applicable to a particular problem area. Objectives of this program are to expedite and increase the effectiveness of our Taxpayers Assistance Program, and to minimize the necessity for individual assistance by Service personnel. The booklets are used as inserts by the National Office and by field offices in replies to requests from taxpayers, and are also available upon request in local offices of district directors. They are also used as supporting statements for adjustments made in revenue agents' reports. These booklets are listed on page 63.

The Service conducted a program of personally delivering the "Mr. Businessman's Kit" to new businessmen to acquaint them with their obligations under the Federal tax laws. Revenue officers in conjunction with their other duties delivered 107,000 of these kits during the year.

PUBLIC INFORMATION PROGRAM

General.—Utilizing the Centennial observance as a point of interest, the Service conducted an accelerated public information program throughout the year. Extended efforts were directed toward increased public understanding of the Federal tax laws and the rights and obligations of taxpayers.

In addition to the needs reflected by the areas of automatic data processing and taxpayer assistance in general, the liberalization of depreciation guidelines and the effect of the Revenue Act of 1962 created sharply increased demands for mass dissemination of information.

The keen public interest which developed in the tax aspects of travel and entertainment expenses, retirement plan contribution of self-employed persons, investment credit, foreign investment, etc., caused news media inquiries and requests to increase substantially. With the cooperation of both print and broadcast media, the Service strengthened its program of information thereby contributing toward a better-informed public.

News Releases and Inquiries.—Reflecting the Service's growing public information effort, a record 97 technical and 138 general news releases were issued by the National Office during the year. In addition, suggested releases for local adaptation were provided to field offices which, in turn, developed releases for issuance to media in their areas.

More than 600 requests for information concerning speeches, Service publications and issuances of various kinds, information about tax exempt organizations, offers in compromise, and other technical matters were answered. Approximately 30,000 inquiries were handled by telephone, by letter, or through personal visits by representatives of news media, national organizations, and field offices. Many of these required extensive research, and in some cases meant drafting background material on which would be based feature articles, radio and television scripts, and speeches.

Films, Radio, and Television.—A record number of television spot announcements—reports indicate blanket coverage by both network and individual stations—brought information and tax hints to taxpayers during the year, with a concentration of scheduling during the individual income tax filing season. An estimated audience of 64.5 million viewers on television, in theaters, or in groups, saw the Service's documentary films. These included a specially produced motion picture, "Then and Now," which received wide exhibition in hundreds of civic showings, as well as in theaters and on TV. In addition, a set of 3 films dealing with preparation of Federal tax returns, found ready acceptance. Dozens of radio spot announcements were used by networks and individual stations. National Office officials as well as field officials made appearances on numerous radio and television programs providing tax information through interviews, panel discussions, and other means.

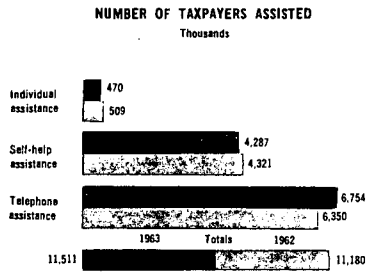
Other.—A new 301-page book, "The American Way in Taxation," with a foreword by Commissioner Caplin, was published by Prentice-Hall, Inc. Much of the background material was provided by the Service.

TEACHING TAXES PROGRAM

Public and private school and college participation in the "Teaching Taxes" program continued to grow. More than 3 million student handbooks were distributed to approximately 23,000 educational institutions during the year.

Indicative of the widespread success of the Program was the survey finding that in the Omaha Region more than 93 percent of all high schools included the Program in their curricula. This intensive coverage is largely the result of publicity through exhibits at educational conventions and visits to and correspondence with state and local school officials.

TAXPAYER ASSISTANCE PROGRAM



A basic component of the Service's program of fostering voluntary compliance is the Taxpayer Assistance Program. Taxpayers are assisted by specially selected individuals who have demonstrated their technical proficiency and their ability to deal effectively with the public.

During the filing period, 11.5 million taxpayers received aid in preparing their tax returns, an increase of 331,000 over last year. Assistance furnished taxpayers by telephone rose from 6.3 million in 1962 to 6.8 million in 1963. Taxpayers receiving individual assistance numbered 470,000 compared with 509,000 last year, but the number furnished self-help assistance in 1963 (approximately 4.3 million) was substantially unchanged from 1962.

Although the total number of taxpayers assisted increased 3.0 percent over 1962, the number of man-days expended on this program decreased 9.9 percent from 131,518 in 1962 to 118,546 in 1963. This saving in time expended was made possible by placing greater emphasis on assistance furnished by telephone.

TAX RETURN FORMS PROGRAM

The Service found itself hard pressed to meet the demands for improving designs and simplifying many of the more than 250 return forms and instructions used in carrying out the tax program. With the constant revisions required as a result of new legislation and regulations, varying effective dates as well as legislation currently pending in the Congress, the Service was under a heavy burden to complete its production schedules by the required target dates. As the number of returns filed is approaching 100 million and the laws continue to become more complex, the drafting and publishing of forms and instructions which will accurately reflect all sections of the Internal Revenue Code has become a massive undertaking.

Members of the Forms Committee, cognizant of the impact of automatic data processing on the design and use of tax return forms, visited service centers and held conferences with ADP specialists in order that problems involving processing of data from the many forms would be minimized. There was also close coordination with the Social Security Administration and other Government agencies as well as with State tax officials in matters of mutual concern. Many suggestions received from professional groups, the public, and Service employees were evaluated and utilized.

New and Revised Tax Forms.—Several new forms were designed as a result of legislative changes. Among these were Form 3468, Computation of Investment Credit, used to compute the credit against tax for investments in certain depreciable property, and Form 3520, United States Information Return (With Respect to the Creation of or Transfers to Certain Foreign Trusts). Forms were eliminated when possible or several forms combined into one as in the case of Form 941, Employer's Quarterly Federal Tax Return. Forms either new or containing significant changes are listed on page 64.

Form 3435 was designed as a result of the enactment of Public Law 87–397 which requires recipients of dividends, interest, and other payments to furnish identifying numbers to payers who are required to report such payments to the Service. Part 1 is used by the payer to obtain the payee's number and Part 2 is a request for an application for an account number by a payee to whom a number has not been assigned. Form 3468 was designed to enable taxpayers to compute the credit allowed against the tax for investments in certain depreciable property acquired after December 31, 1961. Form 3491 was designed for the use of certain consumer cooperatives desiring to obtain exemption from the filing of information returns on Forms 1096 and 1099 provided by section 6044(c) of the Internal Revenue Code. Form 3520 was designed by reason of the requirement under section 6048 of the Code that a grantor in the case of an inter vivos trust, the fiduciary of an estate in the case of a testamentary trust, or the transferor, as the case may be, must file such return on or before the 90th day after (1) the creation of any foreign trust by a United States person or (2) the transfer of any money or property to a foreign trust by a United States person.

Of the forms revised significantly, Form 941, which formerly consisted of 3 different types and a separate Schedule A, was so designed that all necessary information is contained in one form. The format and content of Form 959 were completely revised to develop the additional information required by section 6046 of the Code. Form 990–A was revised so that additional information can be made available to the public and assist in disclosures of exemption abuses. Form 1041–A was made a duplicate form in order that information relative to trusts claiming contribution deductions under section 642(c) could be made available to the public as required by section 6104 of the Code. Forms 1087, 1096, and 1099, information returns, were revised considerably to meet the additional reporting requirements contained in the Revenue Act of 1962 with respect to payments of dividends, interest, etc. A die cut was added to the Form 1120 corporate package for use in the Atlanta Region as a pilot project to test the practicability for ADP purposes of having the Service preaddress the return by attaching a label showing the name and address under which the prior return was filed. Also drafted were a number of sample forms and tax rate tables illustrating the effects of proposed legislation.

REGULATIONS PROGRAM

General.—Fifty-three Treasury Decisions, 9 Executive Orders, and 44 notices of proposed rulemaking, relating to matters other than alcohol and tobacco taxes, were published in the Federal Register. These regulations were issued under provisions of the Internal Revenue Code of 1954 as originally enacted, subsequent public laws, or on the basis of an administrative determination.

Twenty-one public hearings on the provisions of the proposed regulations, which were published this year, were held in accordance with the provisions of the Administrative Procedure Act. Approximately 1,900 taxpayers or their representatives participated.

The more important regulations, Treasury Decisions, and Executive Orders are described on pages 64–66.

Alcohol and Tobacco Taxes.—Regulations in 26 CFR Part 198, "Production of Volatile Fruit-Flavor Concentrate," were modernized and reissued to provide simplified requirements for qualification, construction, and operation of volatile fruit-flavor concentrate plants. Regulations in 26 CFR Part 295, "Removal of Tobacco Products and Cigarette Papers and Tubes, Without Payment of Tax, for Use of the United States," were reissued to provide specific standards under which tobacco products and cigarette papers and tubes may be removed without payment of tax for use of the United States.

DEPRECIATION

Revenue Procedure 62–21, Depreciation Guidelines and Rules, released on July 12, 1962 (C.B. 1962–2, 418; also IRS Publications 456 and 457), has redirected the emphasis of depreciation so as to give greater effect to anticipated obsolescence and less to the historical experience of taxpayers. This move to liberalize the depreciation deduction carries out the announced objective of the President and the Secretary of the Treasury, and follows intensive studies of the subject conducted by the Treasury Department with the assistance and cooperation of Service engineers.

Instruction courses have been conducted to familiarize field agents with the objectives and application of the procedure and many inquiries from taxpayers and from the field offices have been handled by Service engineers. National Office employees and field officials and employees have been called upon to appear before many organizations and groups to explain the depreciation procedure and to answer questions.

Continuing studies are being conducted to keep the revenue procedure up to date with corrections and clarifying statements when necessary. To date there have been two amendments to the revenue procedure and a series of clarifying questions and answers have been released.

INTERNAL TECHNICAL DEVELOPMENT AND GUIDANCE

Tax Briefs for Revenue Agents and Office Auditors.—"Tax Briefs" is issued every 4 weeks to revenue agents and office auditors in field offices and to technical personnel in the National Office. It serves as a convenient medium for keeping Service personnel engaged in technical work abreast of the latest technical developments with a minimum of time. It permits them to readily identify those matters which affect their particular areas of work and mitigates the necessity for reading commercial letters and similar technical publications. It reports currently, in digest form, selected court decisions, published rulings, and other technical developments. All important favorable court decisions are reported as well as important adverse decisions of the Tax Court when acquiescence or nonacquiescence is announced. Also, important adverse decisions of other courts may be included with a cautionary statement regarding the Commissioner's position. To make it more convenient for Service personnel to carry this publication with them for reading at opportune times, its size was changed during the past year from notebook to pocket size.

Engineering Citator.—An engineering citator is being prepared by the engineering branches as a looseleaf compilation of annotations and citations of published tax law precedents. It is designed for use as a basic reference source on tax treatment of engineering issues. The natural resources section of the citator was released on April 15, 1963, and other sections are in process of preparation. The citator will be kept up to date with periodic supplements.

Engineering Area Field Conferences.—Four area field conferences for engineers were held in cooperation with the Audit Division. All field engineers, with rare exceptions, and other selected field representatives attended one of the conferences.

These conferences provided a valuable forum for the discussion and clarification of numerous engineering issues, including intensive consideration of the Depreciation Guidelines and Rules as established by Revenue Procedure 62–21.

These area field conferences were a substitute for the Annual Engineering Institute held in Washington in some prior years. These 3-day conferences were held in Dallas from May 15 through 17, in San Francisco from May 20 through 22, in Chicago from May 27 through 29, and in New York from June 10 through 12.

Annual Technical Review Institute.—This is a seminar-type program which consists of a series of tax articles discussing the more important developments in Federal taxation. Its purpose is to give Service agents and other technical employees the benefit of a detailed discussion of the more important and complex developments as soon as possible after they occur. Discussion topics for the institutes are selected and written by experienced technicians in the National Office, and are delivered in the field by discussion leaders. The discussions for the 1962 institutes were distributed to the field offices in October 1962. They reviewed many difficult topics, such as "kickback" payments; depreciation on assets in year of sale; real estate investment trusts; collapsible corporations; and many other developments of equal complexity. A complete set of the discussions was furnished every revenue agent for his guidance and information.

TAX RULINGS AND DETERMINATION LETTERS

Tax Rulings.—During the year, 37,929 requests from taxpayers for rulings and requests from field offices of the Service for technical advice were processed in the National Office. These included 34,967 requests which had been received from taxpayers or their representatives and 2,962 requests from field offices. At the close of the year, 7,150 requests for rulings and technical advice were on hand.

In connection with the processing of rulings and technical advice, 11,350 formal and informal technical conferences were held with taxpayers and their representatives.

An analysis of the rulings and technical advice processed, by subject matter, follows:

Requests for tax rulings and technical advice processed

Subject	Total	Taxpayers' requests	Field requests
Total	37,929	34,967	2,962
Income and excess profits taxes	29,072	28,003	1,069
Employment and self-employment taxes	1,239	1,219	20
Estate and gift taxes	718	579	139
Alcohol and tobacco taxes	4,164	3,087	1,077
Other excise taxes	2,192	1,661	531
Engineering questions (depreciation, etc.)	544	418	126

Determination Letters.—During 1963, 11,602 determination letters involving the initial qualification or termination of employee benefit plans were issued by district offices. The National Office received on appeal 46 applications, of which 26 were decided for the taxpayer, 5 partially in his favor, and 15 against the taxpayer. In addition, district offices issued 5,199 determination letters to organizations seeking to establish exemption from Federal income taxes. Of this total, 328 determinations were adverse to the organization.

The following table shows the types of determinations and benefit plans involved during fiscal 1963:

Determination letters issued on employee benefit plans and exempt organizations

Item	Employee benefit plans			Exempt organizations
	Profit-sharing	Pension or annuity	Stock bonus	
Initial qualifications:				
Approved	5,133	5,428	6	4,871
Employees participating under plan	477,675	451,814	7,480	
Total number employed	1,055,265	1,058,753	14,021	
Disapproved	74	75		328
Terminations	421	464	1	
Closed without issuance of determination letter	360	386	3	1,102

Closing Agreements.—Closing agreement cases involving the tax status of prospective transactions are considered by the Tax Rulings Division of the National Office. Two cases were received during the year, 2 were closed and 21 are pending. Eighteen of the pending cases are related and are awaiting legal action on a key case.

Publication of Rulings, Procedures, and Announcements.—Two hundred and fifty rulings and 40 procedures were published, as follows:

Revenue rulings and procedures published

Type	Number
Total	290
Income tax	127
Administrative and miscellaneous	25
Alcohol and tobacco taxes	51
Other excise taxes	77
Employment taxes	7
Engineering issues	1
Estate and gift taxes	2

The more significant rulings and procedures are summarized on page 66.

In addition to notices with respect to proposed regulations, 187 announcements of general interest were published in the Internal Revenue Bulletin. The more important ones are described on page 67.

Ninety-eight technical information releases were issued. Thirteen announced the position of the Service as the result of court decisions having widespread effect on tax administration. See page 68 for summaries of the more significant releases.

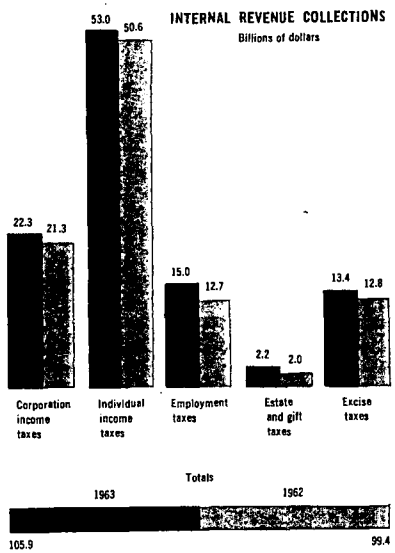
The Cumulative List of Organizations described in section 170(c) of the Internal Revenue Code of 1954, Publication No. 78, has been revised through December 31, 1962. At the same time, a new system has been established for issuing supplements to this publication. They will be issued bimonthly as separate pamphlets and will be on a completely cumulative basis for each calendar year. The new publication and the pamphlet supplements are available for purchase by the general public. Supplements to Publication No. 78 will not be duplicated in the Internal Revenue Bulletin.

Because of the heavy volume of printed matter resulting from legislation enacted during the Second Session of the 87th Congress, a separate bulletin, Cumulative Bulletin 1962–3, was published to contain such matters, and is available for purchase. It contains (1) a digest of internal revenue legislation enacted from January through December 1962; (2) Public Laws, or excerpts thereof, pertaining to internal revenue matters enacted on or after May 24, 1962; (3) Committee and Conference reports, or excerpts thereof, related to those Public Laws; and (4) a topical index to the provisions of those Public Laws.

The Service has reviewed its Revenue Rulings and Procedures pertaining to tobacco products and listed those which have been determined obsolete (Rev. 62–172, CB 1962–2, 352).

2

Internal Revenue Collections and Refunds



GENERAL

A record $105.9 billion was collected in fiscal year 1963, an increase of $6.5 billion, over 1962. This was the first year in which revenue collections exceeded $100 billion. Collections from all major sources were higher than last year. The increases were: Income taxes $3.4 billion, 4.7 percent; employment taxes $2.3 billion, 18.1 percent; estate and gift taxes $0.15 billion, 7.5 percent; and excise taxes $0.66 billion, 5.2 percent.

There are definite indications that substantial improvement in voluntary compliance contributed to the sharp rise in internal revenue collections. Service programs dealing with taxpayer information and assistance (including publications for taxpayers) were expanded and improved. In the enforcement area the number of delinquent returns secured and the total amount of taxes assessed were larger than ever before; greater care was exercised in selecting returns, and a quality audit was stressed and improved audit techniques were applied in the examination program with the result that recommended increases in tax liabilities reached an alltime high. Preventive measures were also taken to protect the revenue by pursuing a more vigorous collection procedure for trust fund accounts in notice status with a consequent 82 percent increase in collections from that source. In addition, the conversion to Automatic Data Processing had a salutary effect on taxpayers who had not been measuring up to their tax responsibilities. During the year many taxpayers came into district and local offices to voluntarily disclose unreported income, pay prior year taxes, and state that they wanted to get their taxes current before ADP was fully implemented. These measures in concert with a general improvement in economic conditions were major factors underlying the $6.5 billion increase in receipts over 1962.

The increase in income taxes was the combined effect of a $2.3 billion rise in individual income taxes and a $1.0 billion rise in corporation income taxes. The gain in individual income taxes, 36.1 percent of the increase in total collections,

reflected both greater voluntary compliance and a continued rise in the national level of personal income, particularly in wages and salaries. The 4.9 percent gain in corporation income taxes resulted in a new high for collections from this source, and is attributed to improved voluntary compliance and the increase in corporation profits in calendar year 1962.

Employment taxes accounted for 35.4 percent of the increase in total revenue which reflected not only the higher level of personal income, but also increases in tax rates referred to below.

Refunds of all classes of taxes totaled $6.5 billion, an increase of $0.3 billion over fiscal year 1962. Gross collections less refunds were $99.4 billion in 1963, compared with $93.2 billion in 1962. The increase in net revenue was nearly $6.2 billion, 6.6 percent.

A comparison of gross collections in 1963 and 1962 by principal categories is shown below. Internal revenue refunds are compared by year and by type on page 12.

Gross internal revenue collections

[In thousands of dollars. For details see table 3, p. 86]

Source	1963	1962
Grand total [1]	105,925,395	99,440,839
Income taxes, total	75,323,714	71,945,305
Corporation	22,336,134	21,295,711
Individual, total	52,987,581	50,649,594
Withheld by employers [2]	38,718,702	36,246,109
Other [2]	14,268,878	14,403,485
Employment taxes, total	15,004,486	12,708,171
Old-age and disability insurance [2]	13,484,379	11,686,231
Unemployment insurance	948,464	457,629
Railroad retirement	571,644	564,311
Estate and gift taxes	2,187,457	2,035,187
Excise taxes, total	13,409,737	12,752,176
Alcohol	3,441,656	3,341,282
Tobacco	2,079,237	2,025,736
Other	7,888,844	7,385,158

[1] Collections are adjusted to exclude amounts transferred to the Government of Guam. For details see table 1, p. 77 and footnote 3, p. 88.

[2] Estimated.—Collections of individual income tax withheld are not reported separately from old-age and disability insurance taxes on wages and salaries. Similarly, collections of individual income tax not withheld are not reported separately from old-age and disability insurance taxes on self-employment income. The amount of old-age and disability insurance tax collections shown is based on estimates made by the Secretary of the Treasury pursuant to the provisions of sec. 201(a) of the Social Security Act as amended, and includes all old-age and disability insurance taxes. The estimates shown for the 2 classes of individual income taxes were derived by subtracting the old-age and disability insurance tax estimates from the combined totals reported.

Note.—Calendar year figures by regions, districts, States, and other areas, for selected types of taxes, may be obtained from the Public Information Division, Internal Revenue Service, Washington, D.C., 20224.

INCOME TAXES

Corporation and individual income taxes together accounted for 71.1 percent of total internal revenue in 1963.

Corporation taxes comprised 29.7 percent of all income taxes and 21.1 percent of all internal revenue. Collections from this source in 1963 increased 4.9 percent, and set a new record. Refunds of corporation income taxes were $15.8 million less in 1963 than in 1962, the net effect of a decrease of $80.8 million in refunds representing tentative carrybacks of operating losses and a $65.0 million rise in refunds due to excessive prepayments and regular adjustments. Gross corporation tax collections less refunds (principal only) resulted in net revenue from this source of $21.6 billion in 1963 compared with $20.5 billion in 1962.

Individual income taxes accounted for 70.3 percent of all income taxes and one-half of total internal revenue. The amount collected by withholding on salaries and wages was 6.8 percent higher in 1963 than in 1962 and represented 73.1 percent of all individual income taxes.

More than 96.8 percent of individual income tax refunds were attributable to excessive prepayment of tax, mostly in the form of overwithholding. In 1963, refunds of excessive prepayment totaled nearly $5.4 billion, 5.6 percent more than the preceding year. Gross collections of individual income taxes less refunds of excessive prepayments resulted in a net revenue from this source of $47.6 billion in 1963 compared with $45.6 billion in 1962. Refunds of other individual income and old-age and disability insurance taxes were approximately $0.2 billion in each year.

EMPLOYMENT TAXES

Employment taxes, which accounted for 14.2 percent of all internal revenue, increased 18.1 percent in 1963 and accounted for 35.4 percent of the increase in total revenue.

Old-age and disability and survivors insurance taxes, comprising 89.9 percent of total employment taxes, rose $1.8 billion, 15.4 percent over 1962. This results in part from the increase from 6¼ to 7¼ percent in the combined rate on employers and employees which became effective January 1,

1963. Although the combined rate increase was only 1 percent, a difference of 1¼ percent actually existed between the rates applicable to the last 6 months of this year (7¼ percent) and the first 6 months of last year (6 percent). Unemployment insurance taxes rose $0.5 billion, or 107.3 percent. This increase was due primarily to the rise in the tax rate to 3.5 percent on taxable wages paid during calendar year 1962 from the 3.1 percent rate in effect during calendar year 1961. Since the State credit is 2.7 percent, the net Federal tax increased from 0.4 percent to 0.8 percent. Collections under the Railroad Retirement Tax Act increased slightly.

EXCISE TAXES

Excise tax collections, which represent 12.7 percent of total collections, increased $657.6 million, or 5.2 percent in 1963; this is approximately the same dollar amount of increase as in 1962. Depositary receipt purchases accounted for slightly more than half of the total amount collected.

The Federal use tax on highway motor vehicles amounted to just under $100 million, 24.7 percent more than the amount collected last year. Receipts from the Federal tax on passenger automobiles, chassis, bodies, etc., were up $259.1 million, or 19.9 percent.

The excise tax on transportation of persons was repealed effective November 16, 1962, except the tax on air travel which was reduced to 5 percent. Collections from this source dropped $28.8 million or 11.0 percent, to $233.9 million.

Refunds of Federal excise taxes dropped slightly from $218.0 million in 1962 to $215.6 million in 1963. Gross collections less refunds increased from $12.5 billion in 1962 to $13.2 billion in 1963, a rise of 5.3 percent.

ESTATE AND GIFT TAXES

Estate and gift taxes combined comprised 2.1 percent of total internal revenue. An increase of $152.3 million, 7.5 percent, occurred in 1963. Estate taxes, which accounted for 90.1 percent of the estate and gift tax total, rose $175.4 million. This increase more than offset a $23.1 million decrease in gift taxes. Gross collections of estate and gift taxes less refunds amounted to nearly $2.2 billion in 1963 compared with $2.0 billion in 1962.

NET BUDGET RECEIPTS

SOURCE OF BUDGET DOLLAR – 1963

Net Budget Receipts $86.4 billion

"Net budget receipts" represents the amount of total collections by the Federal Government which is available to finance the many operations and programs included in the President's annual budget. To arrive at net budget receipts, gross collections of internal revenue, customs duties, and receipts from miscellaneous sources are reduced by transfers to trust fund accounts, refund of receipts, and interfund transfers. The following table reflects the source of gross receipts, deductions, and net budget receipts:

Gross collections, deductions, and net budget receipts

[In thousands of dollars]

Source	Gross receipts	Trust fund transfers	Refunds	Interfund transactions	Net budget receipts
Individual income taxes:					
Withheld	38, 718, 702				
Other	14, 268, 878				
Total	52, 987, 581		5, 399, 593		47, 587, 988
Corporation income taxes	22, 336, 134		757, 234		21, 578, 900
Excise taxes:					
Highway trust fund	3, 411, 813	3, 286, 067	125, 745		
Other	9, 997, 925		89, 874		9, 908, 051
Total	13, 409, 737	3, 286, 067	215, 619		9, 908, 051
Employment taxes:					
Old-age and disability insurance	13, 484, 379	13, 344, 954	139, 425		
Railroad retirement	571, 644	571, 535	109		
Unemployment insurance	948, 464	945, 125	3, 339		
Total	15, 004, 486	14, 861, 614	142, 873		
Estate and gift taxes	2, 187, 457		20, 192		2, 167, 265
Total internal revenue	105, 925, 395	18, 147, 682	6, 535, 511		81, 242, 202
Customs	1, 240, 538		35, 088		1, 205, 450
Miscellaneous receipts	4, 424, 208		701	513, 397	3, 910, 110
Total	111, 590, 141	18, 147, 682	6, 571, 300	513, 397	86, 357, 762

INTERNAL REVENUE REFUNDS

In 1963, refunds increased in number and in amount. The number totaled 40.7 million, an increase of 0.7 percent, and the amount, including interest, was $6.6 billion, a 4.9 percent increase. Interest allowed on all types of refunds was $73.9 million, an increase of $6.1 million, or 8.9 percent.

In 1963, individual income tax refunds resulting from excessive prepayments comprised 93.9 percent of the number and 81.0 percent of the total amount.

Corporation refunds accounted for one-fourth of one percent of the number, and 12.2 percent of the total amount refunded in 1963. There were about 1.4 million gasoline tax refunds to farmers, transit systems, and users of nonhighway vehicles aggregating $125.7 million, a 4.6 percent decrease in amount. The following table compares refunds in the past 2 years, by type of tax:

Internal revenue refunds, including interest

[For refunds by region and district, see table 5, p. 90]

Type of tax	Number		Amount refunded (principal and interest—thousand dollars)		Amount of interest included (thousand dollars)	
	1963	1962	1963	1962	1963	1962
Total refunds of internal revenue [1]	[2] 40,652,377	[r] 40,366,231	[2] 6,609,442	6,302,993	73,931	67,868

[4] Includes drawbacks and stamp redemptions.

[5] Includes narcotics, silver, wagering (excise and stamps), capital stock, and other excise tax refunds.

*Less than $500.

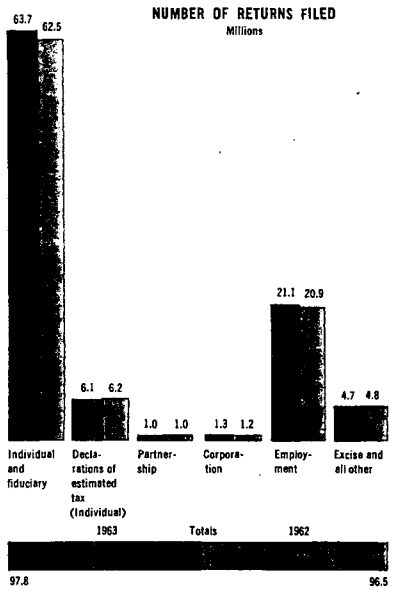
[r] Revised.

3 Receipt and Processing of Returns and Related Documents

NUMBER OF RETURNS FILED

A total of 97.8 million tax returns of all classes were received. This was an increase of 1.3 million or 1.4 percent over the number received in 1962. The number of Forms 1040 and 1040A individual income tax returns increased 1.1 million, or 1.8 percent over last year. Declarations of estimated individual income tax numbered 6.1 million, a decrease of 111,000 or 1.8 percent from 1962.

The total of 21.1 million employment tax returns was an increase of 208,000 or 1.0 percent over 1962. Nearly one-half of the increase was in employers' returns for household employees. Excise tax returns totaled 4.0 million, a decrease of 1.4 percent from 1962. A comparison of the number of returns filed in fiscal years 1963 and 1962 follows:



Number of returns filed, by principal type of return

[Figures in thousands. For details, see table 6, p. 91]

Type of return	1963	1962
Grand total	97,833	[r] 96,511
Income tax, total	72,559	[r] 71,402
Individual and fiduciary, total [1]	63,679	[r] 62,487

Other	364	401

[r] Revised.

[1] Individual and corporation returns filed in Puerto Rico and the Virgin Islands, formerly included in other income tax returns, are now included in corporation and all other individual and fiduciary income tax returns.

INFORMATION RETURNS

Over 327 million information returns were received. Slightly under two-thirds of these were Forms W-2 (employer's statements of wages paid and tax withheld) including copies filed by employers, and by employees as attachments to their income tax returns. Forms 1099 (information returns on payments of dividends, interest, and various other items) accounted for one-third of the information returns received. The remainder included nearly 5 million Forms 1087 (Ownership Certificates—Dividends on Stock).

A 4 percent decrease in total information returns reflects a decrease in the number of Forms 1099 received in the last half of fiscal year 1963, due to discontinuance of the practice previously permitted by the Service of filing such returns on a quarterly basis.

SERVICE CENTER FUNCTIONS

The 3 area service centers and the Atlanta Regional Service Center processed 57.5 million individual income tax returns. This number represents a decrease of 3.0 million returns, 5.0 percent, below the preceding fiscal year. The decrease was due substantially to the accelerated returns processing program maintained by area service centers in the last half of fiscal year 1962, which reduced the number of 1961 tax returns carried over to the first half of fiscal year 1963 by more than 2.6 million from the same period last year. Of the returns processed this year, 49.2 million were 1962 returns filed during the 1963 filing period and 8.3 million were 1961 returns filed during the 1962 filing period but processed after June 30 of that year.

In addition, 4.9 million declarations of estimated individual income tax were processed. Accounts receivable were established for appropriate individual income and estimated tax returns. Area service centers performed the mailing and delinquency check operations for all employers' returns (Forms 940 and 941) for the district offices which they service. The Atlanta and Philadelphia regional service centers performed all processing, accounting, mailing, and delinquency check operations for the following ADP business returns filed in these regions: Forms 940, 941, 720, 1120, 1120ES, 7004, and CT-1 (Atlanta for the full fiscal year; Philadelphia for the last half of the fiscal year). Beginning January 1963, the Atlanta Regional Service Center assumed responsibility for processing ADP individual income tax returns filed for tax year 1962, and declarations of estimated individual income tax filed for tax year 1963.

The transfer of work from the area service centers to regional service centers under the automatic data processing program continued as the mailing and delinquency check operations related to employers' returns for the Philadelphia Region were shifted from the Northeast Service Center to the new Philadelphia Regional Service Center. The processing of individual income tax returns and declarations of estimated income tax for the Atlanta Region was transferred from the Midwest Service Center to the Atlanta Regional Service Center during the second half of fiscal year 1963.

From January 1 through June 30, 1963, the service centers received a total of 57.2 million individual income tax returns, or 91.7 percent of the total filed. This was an increase of 1.4 million or 2.6 percent over the revised total of 55.7 million received in the same period last year.

CARRYBACK ALLOWANCES

There was a decrease in applications for tentative adjustments of prior years' income taxes to give effect to operating loss carrybacks. The decrease reflects the net effect of fewer filings by corporations and an increase in filings by individuals.

The number of applications adjusted decreased 2.9 percent and the dollar allowance decreased nearly $0.1 billion, or 15.0 percent.

The number of applications pending was approximately the same as in 1962. A comparison of the carryback applications received and adjusted for 2 years follows:

Receipt and disposal of tentative carryback applications

Status	Number		Amount (thousand dollars)			
			Claimed		Adjusted	
	1963	1962	1963	1962	1963	1962
Pending July 1	7,118	6,530	48,133	53,880		
Applications received	70,663	73,351	565,545	679,010

Pending June 30	7,157	7,118	41,027	48,133		

n.a.—Not available.

AUTOMATIC DATA PROCESSING

Automatic machine processing of tax returns, reported a year ago as being installed on a carefully phased basis with major attention being given to avoiding adverse effects on employees to be redeployed, is proceeding on schedule. The Atlanta Regional Service Center, after one year of experience in the processing of business returns under the master file concept, was expanded and took on the more voluminous operation of processing individual income tax returns in the past filing period. The Philadelphia Regional Service Center successfully undertook the processing of business returns in January 1963.

Even in the short span of its operation, and with its limited application, the system has demonstrated its capabilities and worth in the way of protecting the revenue and insuring fairer distribution of the tax burden. This has been accomplished by detecting failures to file required tax returns, detecting instances of multiple filing of overpayment returns by the same taxpayer, and mechanically applying overpayments, otherwise refundable, against outstanding taxes due from the claimants.

Plans for 1964 call for introducing the Dallas and Cincinnati regions into the system. Service centers for the two regions were activated in 1963 and will begin processing business returns under the master file concept in January 1964.

With a view to relieving regional service centers of all processing not directly related to the master file, a decision was made and approved to establish an Internal Revenue Service Data Center in Detroit. Its duties and responsibilities will include, but not be limited to the preparation of (1) payrolls and reports for the entire Service, (2) material for the Statistics of Income, and (3) data for State and local governments in accordance with the reciprocal agreements for exchange of tax data between such entities and the Service. The Center will be operational in 1966.

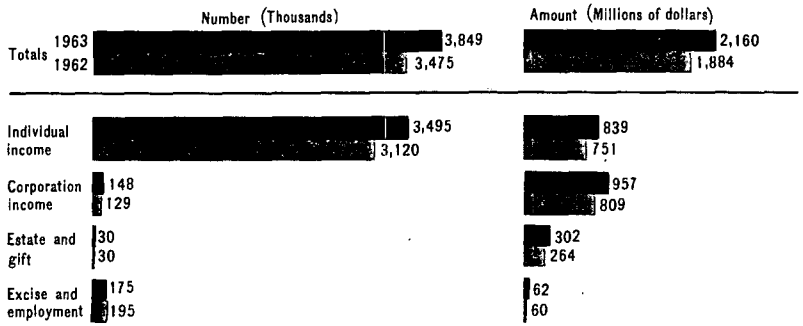
acceptable solutions. Reactions of industry participants were favorable, resulting in establishment of effective working relationships and dissemination of tax information through trade publications. Future meetings will be held at the National, regional, or district levels on an "as needed" basis.

Numerous conferences were held with taxpayers, computer specialists, and professional organizations to develop guidelines for maintaining tax records within data processing systems. In substance, the proposed guidelines will identify the records that the taxpayers must maintain in order that the Service can make a determination of the accuracy of reported tax liability.

Classification and Selection of Returns for Examination.—An integral part of direct enforcement efforts is a classification program to select for examination tax returns having a high frequency of error (those representing the greatest known areas of noncompliance).

To assure a well-rounded audit program, returns are selected from each type and category of returns filed. Of the 25.7 million income, estate, and gift tax returns classified by district audit divisions, about 3.8 million were selected for examination. Further progress was made in programming basic selection criteria into the ADP system.

NUMBER OF TAX RETURNS EXAMINED AND ADDITIONAL TAX AND PENALTIES RECOMMENDED



Number of Returns Examined.—During the year 3.8 million returns were examined, an increase of 10.8 percent over 1962. As a result of expanded use of correspondence audit techniques, office audits rose 420,000 to nearly 3.1 million and accounted for all of the increase.

Field audits decreased 46,000, or 5.7 percent. More thorough examinations embodying quality audit principles resulted in an increase in the time needed to complete the field examinations.

In addition to the number of returns examined, 909,103 returns were closed without an audit.

Number of tax returns examined

[Figures in thousands]

Type of return	Total [1]		Field audit [1]		Office audit	
	1963	1962	1963	1962	1963	1962
Grand total	3,849	3,475	760	806	3,089	2,668
Income tax, total	3,644	3,249	588	614	3,056	2,635
Corporation	148	129	147	127	1	2
Individual and fiduciary	3,495	3,120	441	487	3,055	2,633
Estate and gift tax	30	30	27	27	3	3
Excise and employment tax	175	195	145	164	30	31

[1] Includes all examined exempt organization returns.

Additional Tax and Penalties Recommended.—The 3.8 million examinations resulted in over $2.1 billion of recommended additional tax and penalties, an increase of $275.8 million over last year. This is the first year that recommended tax deficiencies have exceeded $2 billion. The amounts recommended exceeded those of the previous year in every tax area except gift tax. Additional assessments recommended on corporation income tax returns increased $147.6 million and recommendations on individual and fiduciary returns were greater than those of 1962 by $88.6 million.

The average additional tax and penalties recommended per field examination increased from $2,054 in 1962 to $2,531 in 1963.

Claims for Refund.—District audit divisions completed action on 348,921 claims for refund. Of these, 137,867 were closed after examination and 211,054 were closed without examination. The total amount claimed was $1,101 million of which $152 million was allowed and $948 million disallowed.

In addition to the number of claims closed by the audit divisions 4,235 were protested and transferred to the appellate divisions for further consideration.

The following table shows the number and amounts involved:

Claims for refund disposed of by district audit divisions

Class of tax	Closed by audit divisions				Protested—transferred to appellate divisions			
	Number	Amount (thousand dollars)			Number	Amount (thousand dollars)		
		Claimed by taxpayer	Allowed	Disallowed		Claimed by taxpayer	Recommended by audit divisions	
							Allowed	Disallowed
Total	348,921	1,100,522	152,082	948,441	4,235	119,468	29,562	89,906
Individual income	290,021	104,226	72,014	32,212	2,081	11,307	1,064	10,243
Corporation income	25,922	794,553	64,551	730,002	802	101,378	28,378	73,000
Estate	1,643	18,693	7,478	11,214	90	3,390	92	3,298
Gift	249	1,058	288	771	53	1,144		1,144
Excise	17,435	179,281	6,019	173,262	1,054	1,869	21	1,848
Employment	13,651	2,711	1,732	980	155	380	7	373

Overassessments of Tax Exclusive of Claims for Refund.—Exclusive of claims for refunds, examination of taxpayers' returns resulted in $163 million overassessment recommendations by district audit divisions. The following table shows the amount of overassessments recommended by tax area:

Overassessments of tax exclusive of claims for refund

Type of tax	Amount recommended (thousand dollars)
Total	163,000
Individual and fiduciary income	35,194
Corporation income	118,552
Estate	7,339
Gift	507
Excise	1,026
Employment	382

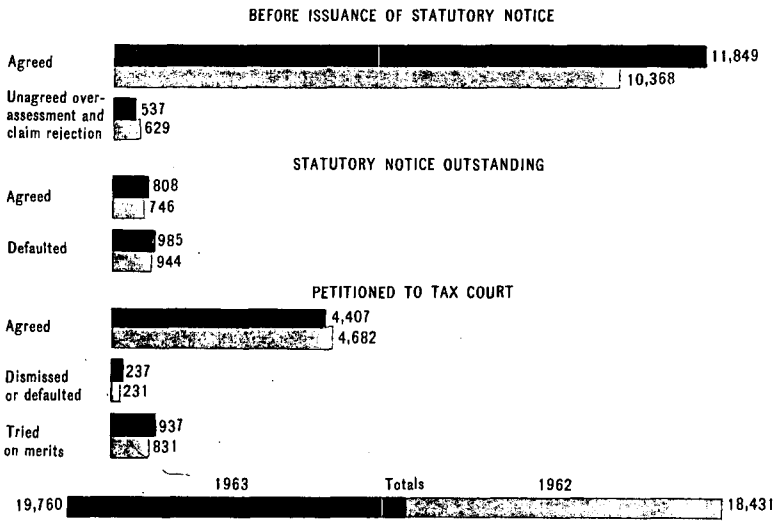
APPEALS

GENERAL

The appeals procedure of the Service provides the taxpayer who does not agree with a proposed adjustment to his tax liability with the opportunity to promptly obtain an independent administrative review of his case.

The appeals function is decentralized and operates at both district and regional levels. When a taxpayer does not agree with the findings of the examining officer he may request an informal conference in the district director's office. If an agreement is not reached at the district level, he may ask that his case be considered by the appellate division of the regional office. Conferences are also available in the appellate division after the taxpayer's case has been docketed in the Tax Court of the United States.

APPEALS (Income, Profits, Estate, and Gift Tax Cases)
Method of Disposal



The jurisdiction of both the audit division and the appellate division extends to all internal revenue taxes except those involving alcohol, tobacco, firearms, narcotics, and wagering, and their jurisdiction applies to disagreements involving overassessments as well as deficiencies.

INCOME, PROFITS, ESTATE, AND GIFT TAXES

Cases not before the Tax Court (pre-90-day cases).—When agreement is not reached between the Service and the taxpayer at the district level, the director issues a preliminary notice, commonly called a "30-day letter," informing the taxpayer of the proposed determination of tax liability and advising him of his right to file a protest and request a hearing in the appellate division. These cases are referred to by the appellate division as "pre-90-day cases." The processing of these cases by the appellate division during 1962 and 1963 is summarized below. (For additional information, see table 15, page 98.)

Appellate Division receipts and dispositions of protested income, profits, estate, and gift tax cases prior to issuance of statutory notice of deficiency (pre-90-day cases)

Status	Number of cases	
	1963	1962
Pending July 1	10,732	9,711
Received	17,774	15,513
Disposed of, total	15,853	14,492
By agreement with taxpayers	11,849	10,368
Unagreed overassessments and claim rejections	537	629
By issuance of statutory notices—transferred to 90-day status	3,467	3,495
Pending June 30	12,653	10,732

With pre-90-day case receipts being higher than in the previous year, the number of cases on hand June 30, 1963, was also larger.

Cases not before the Tax Court (90-day cases).—A statutory notice of deficiency is issued to a taxpayer if his case is not settled at the district level, or if he files a protest but no settlement is reached at the appellate level during pre-90-day consideration. This notice is frequently referred to as a "90-day letter," because the taxpayer is allowed 90 days from the date of the letter to petition the Tax Court of the United States. The following table shows the results of processing 90-day cases in the appellate division. (Additional details are shown in table 16, page 98.)

Appellate Division receipts and dispositions of protested income, profits, estate, and gift tax cases in which statutory notices of deficiency were outstanding (90-day cases)

Status	Number of cases	
	1963	1962
Pending July 1	1,073	1,211
Received, total	4,019	3,786
Statutory notices issued by Appellate Division [1]	3,348	3,336
Statutory notices issued by district directors and received during 90-day period	671	450
Disposed of, total	3,933	3,924
By agreement with taxpayers	808	746
By taxpayer default	985	944
By petition to the Tax Court—transferred to docketed status	2,140	2,234
Pending June 30	1,159	1,073

[1] Difference from preceding table is caused by cases being combined or split for the purpose of issuing the statutory notice, cases in transit, etc.

The number of 90-day cases petitioned to the Tax Court after receiving appellate consideration was lower than any year since 1953.

Cases petitioned to the Tax Court (docketed cases).—The Tax Court of the United States is an independent agency of the Government and has no connection with the Internal Revenue Service. In a case involving income, profits, estate, or gift taxes a taxpayer may file a petition with the Tax Court asking for a redetermination of his tax liability when he does not agree with a deficiency determined by the Service and included in a 90-day letter. The Service refers to these cases as "petitioned" or "docketed."

After a case has been docketed in the Tax Court, a taxpayer may still discuss the possibilities of settling his case with the Service regardless of whether he has previously availed himself of conference opportunities with the audit division of the district office, or with the appellate division at the regional level. Settlement negotiations in docketed cases may be conducted by the appellate division at any time before the case is called for trial by the Tax Court. Since a settlement at this level requires concurrence of the Regional Counsel he may also be represented in such negotiations.

The following table shows the processing of docketed cases. (For additional information see table 17, page 99.)

Appellate Division receipts and dispositions of income, profits, estate, and gift tax cases petitioned to the Tax Court (docketed cases)

Status	Number of cases	
	1963	1962
Pending July 1	8,965	9,957
Received, total	5,247	4,752
Petitions filed in response to—		
District directors' statutory notices	3,303	2,657
Appellate Division's statutory notices [1]	1,944	2,095
Disposed of, total	5,581	5,744
By stipulated agreement with taxpayers	[2] 4,407	4,682
By dismissal by the Tax Court or taxpayer default	237	231
Tried before the Tax Court on the merits	937	831
Pending June 30	8,631	8,965

[1] Difference from number shown as petitioned in preceding table is caused by excluding district directors' statutory notices considered by Appellate in 90-day status, cases in transit, etc.
[2] Difference from the number shown in the preceding table and in table 19, p. 99, is due to cutoff dates in respective reporting systems.

The number of docketed case disposals exceeded receipts for the fourth consecutive year, and the number of cases on hand June 30, 1963, was lower than any year since 1956.

EXCISE AND EMPLOYMENT TAXES

The 1,394 excise and employment tax case receipts were about the same volume as last year. There were 1,306 case disposals and 865 cases on hand at the end of the year.

CLOSING AGREEMENT CASES

Final closing agreement cases relating to completed transactions are considered by the appellate division. During the year, 72 cases were received and 81 processed to a conclusion. There were 7 cases on hand at the end of the year. (Rulings on proposed closing agreements involving prospective tax transactions are discussed on page 7.)

OVERASSESSMENTS REPORTED TO JOINT COMMITTEE

A total of 440 cases involving overassessments of $344.0 million was reported to the Joint Committee on Internal Revenue Taxation in accordance with

the provisions of section 6405 of the Internal Revenue Code of 1954 which requires a report to the Committee of all refunds and credits of income, war profits, excess profits, estate, or gift tax exceeding $100,000. These figures compare with 439 cases involving $238.2 million reported in the preceding year.

CIVIL LITIGATION

Litigation Results.—The Supreme Court decided 9 tax cases, wholly sustaining the Government's position in 8 of them and deciding the ninth case partly for and partly against the Government.

The circuit courts of appeals decided 349 tax cases (exclusive of bankruptcy, receivership, insolvency, compromise, and liquor cases). The Government's position was supported in 229 of these.

In most cases a taxpayer who has paid a disputed tax can, if he wishes, sue for refund in the Court of Claims or in a United States district court. This year the district courts decided 166 cases for the Government, 200 for the taxpayer, and 56 partly for the Government and partly for the taxpayer. The Court of Claims decided 34 cases for the Government, 12 for the taxpayer, and 18 partly for each.

At the close of the year 2,778 civil cases (principally suits for refund of taxes, other than those relating to alcohol, tobacco, and firearms taxes, but also including erroneous refunds, perpetuation of testimony, and damage actions) involving tax questions were pending in district courts, and 471 in the Court of Claims.

The Tax Court decided 293 cases in favor of the Government, 109 for the taxpayer, and 159 cases partly for the Government and partly for the taxpayer.

For details as to civil litigation see page 37 and tables 21 and 22 on pages 100–101. For descriptions of Supreme Court decisions in civil tax cases see pages 68 through 70.

Adverse Tax Court Decisions.—There were published in the Internal Revenue Bulletin acquiescences of the Commissioner in 82 adverse decisions of the Tax Court and nonacquiescences in 32 adverse decisions during the year. Acquiescences and nonacquiescences were announced as to separate issues in 5 of these adverse decisions.

DELINQUENCY INVESTIGATIONS AND DELINQUENT RETURNS

It was possible to devote more manpower to delinquent returns work this year, and, as a result, 981,000 delinquent returns were secured reflecting $186.6 million of previously unreported tax. This was an increase of 46,000 delinquent returns and $22.1 million over last year.

Delinquency investigations resulting primarily from a check of office records of previously filed returns constitute one of the major methods of detecting non-filers. This year over 1.7 million delinquency investigations were conducted, an increase of 17.1 percent over the record number of 1.5 million in 1962.

A special effort was made to achieve optimum enforcement of the highway use tax through the examination of both internal and external source records. A record number of 140,000 delinquent highway use tax returns representing $21.2 million were secured.

Plans were developed and initial steps taken for a nationwide survey of selected geographical areas to ensure that proper special tax stamps are purchased for coin-operated amusement and gaming devices with special emphasis upon "multiple odds" pinball machines. The survey will be completed by September 30, 1963.

In addition, in examining tax returns, district audit divisions secured 61,000 delinquent returns compared with 73,000 in 1962. Tax and penalties on these returns amounted to $48.7 million, an increase of 24 percent.

TAX FRAUD INVESTIGATIONS

The fraud investigation program in 1963 was directed to increased realization of the overall Service mission of encouraging and achieving maximum voluntary compliance with Internal Revenue laws by all taxpayers. Particular attention was given to areas of flagrant tax abuses among all categories of taxpayers, with special emphasis on ferreting out tax law violations in situations involving political corruption and organized crime.

The Service continued its close coordination with the Department of Justice in its drive on organized crime. Many tax investigations involving racketeers were initiated, and criminal tax

cases against several notorious racketeers were successfully concluded. Among those prosecuted for criminal tax violations were: Frank "Screw" Andrews, Newport, Kentucky; Daniel E. Graham, Jr., Fayetteville, North Carolina; Meyer Sigal, Pittsburgh, Pennsylvania; and Joseph Conforte, Wadsworth, Nevada.

Continued emphasis on the identification of cases of substance and the maintenance of a balanced enforcement program together with improved utilization of special agent manpower resulted in the completion of considerably more full-scale investigations and in the initiation of a somewhat greater number of preliminary investigations than in the preceding year. Criminal prosecution was recommended in more cases than in 1962, with the increases in the fraud and wagering categories more than offsetting the decline in prosecution recommendations for coin-operated gaming device violations.

A summary of investigations by special agents follows:

Tax fraud investigations

Type	1963	1962
Grand total	14,521	13,698
Unnumbered (preliminary) investigations, total	10,873	10,229
Fraud	8,590	8,342
Wagering	1,804	1,547
Coin-operated gaming devices	304	228
Miscellaneous	175	112
Numbered (full-scale) investigations, total	3,648	3,469
Prosecution recommended, total	2,208	2,128
Fraud	994	955
Wagering	1,133	1,031
Coin-operated gaming devices	35	98
Miscellaneous	46	44
Prosecution not recommended, total	1,440	1,341

The Service continued to conduct nationwide coordinated raids, as well as independent raids, against violators of the wagering tax laws, making raids at 696 locations throughout the country. As a result, 939 persons were arrested and $377,000 in currency and 188 automobiles were seized. A nationwide raid was also made against violators of the coin-operated gaming device tax law. Simultaneous raiding action was taken in 174 cities which resulted in the seizure of $25,000 and 772 coin-operated gaming devices for which the occupational tax, at the rate of $250 per year, had not been paid.

The training program initiated in 1958 has now provided all incumbent special agents with a knowledge of new investigative techniques and procedures through formal and on-the-job training. To maintain a high level of special agent proficiency, the training program will be continued, to provide basic classroom instruction and on-the-job training for newly appointed agents and to afford refresher and selected on-the-job training, as needed, for experienced agents.

CASES INVOLVING CRIMINAL PROSECUTION

Additional taxes and penalties of $121.9 million were involved in cases received in the Chief Counsel's Office with recommendations of criminal prosecution. This was an increase of $13.8 million over the amount involved in the preceding year.

An analysis of criminal tax cases of all types (other than wagering-occupational tax cases handled at the district level) flowing from the Assistant Regional Commissioner, Intelligence, through the Office of the Chief Counsel and the Department of Justice follows:

Receipt and disposal of criminal cases in Chief Counsel's office

Status	1963	1962
Pending July 1 [1]	2,813	2,506
Received, total	2,123	2,003
With recommendations for prosecution	1,969	1,798
With requests for opinion, etc.	154	205
Disposed of, total	1,980	1,696
Prosecution not warranted	151	165
Department of Justice declined	77	77
Prosecutions	1,405	1,143
Opinions delivered	120	103
All other closings	227	208
Pending June 30 [1]	2,956	2,813

[1] Includes cases awaiting action in Department of Justice exclusive of wagering tax cases referred by Intelligence Division.

A total of 855 income and miscellaneous criminal cases, with prosecution recommendations involving 831 prospective defendants were forwarded to the Department of Justice. Compared with last year this was a decrease of 16.3 percent in the volume of referrals. Indictments in such cases were down 2.3 percent and the total disposal of cases in those categories in the district courts was increased 10.9 percent.

In income, excise, and wagering tax cases reaching the courtroom, 1,117 defendants pleaded guilty or nolo contendere, 176 were convicted after trial, 73 were acquitted, and 230 were nol-prossed or dismissed.

A comparison of indictments and court actions for the last two years follows:

Results of criminal action in tax fraud cases

Action	Number of defendants	
	1963	1962
Total		
Indictments and informations	1,856	1,702
Disposals, total	1,596	1,437
Plea, guilty or nolo contendere	1,117	1,013
Convicted after trial	176	178
Acquitted	73	65
Nol-prossed or dismissed	[1] 230	181
Income and miscellaneous cases [2]		
Indictments and informations	817	836
Disposals, total	814	734
Plea, guilty or nolo contendere	565	529
Convicted after trial	83	94
Acquitted	49	41
Nol-prossed or dismissed	[1] 117	70
Wagering tax cases		
Indictments and informations	1,039	866
Disposals, total	782	703
Plea, guilty or nolo contendere	552	484
Convicted after trial	93	84
Acquitted	24	24
Nol-prossed or dismissed	113	111

[1] Includes cases dismissed for the following reasons: 18 because of death of principal defendant, 9 because of serious illness, and 76 because principal defendant had pleaded guilty or had been convicted in a related case.
[2] Includes income, estate, gift, and excise taxes other than wagering, alcohol, tobacco, and firearms taxes.

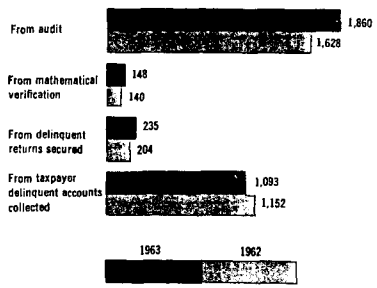
Criminal action is also taken against violators of the laws covering alcohol, tobacco, and firearms. The number of indictments and disposals are shown in the following table:

Results of criminal action in alcohol, tobacco, and firearms cases

Action	Number of defendants	
	1963	1962
Indictments and informations	5,747	5,979
Disposals, total	6,027	5,854
Plea, guilty or nolo contendere	4,256	4,250
Convicted after trial	714	688
Acquitted	369	337
Nol-prossed or dismissed	688	579

SUMMARY OF ADDITIONAL TAX FROM DIRECT ENFORCEMENT

ADDITIONAL TAX FROM DIRECT ENFORCEMENT
(including interest and penalties)
Millions of dollars



Despite the excellent record of voluntary compliance with the tax laws by the American taxpayer under our self-assessment system it is nevertheless incumbent upon the Service to maintain direct enforcement programs to insure that all taxpayers receive equitable treatment and pay their just share of tax. During the year the amount of additional tax, penalties, and interest resulting from these programs totaled $2.2 billion, a new record.

Additional assessments resulting from examination of tax returns increased $232.4 million over last year and amounted to $1.9 billion. These assessments are not comparable with tax increases on returns examined during the current year as they represent the correct tax liability determined upon examination or after appeals action or court decision. When agreements are not reached at the audit division level the time required for consideration of administrative appeals or litigation may delay settlement for a year or more. Consequently these amounts reflect assessments on examined returns but do not accurately measure results from current year audit operations.

Mathematical verification of individual income tax returns resulted in an increase in additional tax of $7.8 million over last year, and tax, penalties, and interest on delinquent returns secured increased $31.6 million.

The following table shows the additional tax, penalties, and interest, by source:

Tax, penalties, and interest resulting from direct enforcement
(In thousands of dollars)

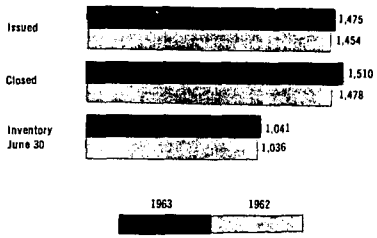
TAXPAYER DELINQUENT ACCOUNTS

Nearly 2.9 million delinquent account assemblies were issued, 9.7 percent fewer than the number issued in 1962. However, the amount of delinquent tax involved, $1,475 million, was $21.2 million more than last year, due principally to a few very large delinquent accounts.

Emphasis on reducing inventories was continued and at the end of June 968,000 delinquent accounts were pending, a reduction of 8.4 percent from last year. The amount of delinquent taxes involved in the accounts pending at the close of the year aggregated $1,041 million, only $4.8 million more than last year. This increase is less than the increase in

TAXPAYER DELINQUENT ACCOUNTS
Millions of dollars



amount of assemblies issued on new accounts, and thus reflects the particular attention given to closing large accounts.

The decrease in number of new accounts is attributable in part to the continued effectiveness of the accelerated procedures put into effect last year for collecting trust fund taxes. Under those procedures, immediate contacts are made to collect withholding and similar trust fund taxes from employers and excise taxpayers who failed to pay the tax due on returns filed or failed to obtain depositary receipts evidencing payment to the Government on a timely basis. Additional taxpayers were brought under these procedures this year and a larger number of accounts were closed while in notice status (before delinquent account assemblies were issued). In fact, in 1963, accounts collected while still in notice status exceeded by 65,000 and $84.9 million the number and amount collected in 1962. The decrease in new accounts may also reflect to some extent the increased educational and enforcement efforts of the past 2 years.

The delinquent accounts activity (including activity related to the accelerated collection of trust fund taxes while in notice status) is shown in the following table:

Taxpayer delinquent accounts

Status	Number (thousands)		Amount (thousand dollars)	
	1963	1962	1963	1962
Issued	2,879	3,187	1,474,762	1,453,568

[1] Includes disposals due to uncollectibility and erroneous and duplicate assessments.
[2] Does not include additional collections of unassessed amounts and on accounts previously written off.

WORK FLOW IN THE SERVICE AND COURTS

It is impossible for the Service to complete the processing of all tax returns during the year in which they are filed. However, a comparison can be made of the volume processed at each administrative level of the Service and in the courts by considering the workload for any given year. In evaluating the work flow it is necessary to consider the unit count at different levels. Returns filed and the processing through audit divisions is on a return basis while processing by appellate divisions, intelligence divisions, and the courts, is on a case basis which may involve one or more returns. As the major administrative burden is on the processing of income, estate, and gift tax returns, especially at the appellate and court levels, the following tabulations, with the exception of returns filed and internal revenue collections, are confined to these types of returns:

Work flow in the Internal Revenue Service and the courts, fiscal years 1963 and 1962

Item	1963	1962
	Returns	
Tax returns filed, total	97,832,977	r 96,511,219

Prosecution not recommended	29	22

[1] Includes excise taxes.

OFFERS IN COMPROMISE

The final phase of the compromise decentralization program was completed on June 14, 1963. Effective July 1, 1963, district directors will assume responsibility for final acceptance of substantially all tax and penalty offers involving liabilities up to $100,000. The Chief Counsel has redelegated the responsibility for furnishing legal opinion on these offers to the regional counsels.

To prepare field offices for this increased responsibility, district enforcement personnel were given additional training by advisory memoranda, periodic analyses and evaluations, seminars, and indoctrination courses.

The overall compromise workload on June 30 consisted of 3,569 cases awaiting consideration at all Service levels. This is considered a minimal figure and not susceptible to further material change.

Compromise cases closed are shown in the following table:

Offers in compromise disposed of

Type of tax or penalty	Number		Amount (thousand dollars)			
			Liabilities		Offers	
	1963	1962	1963	1962	1963	1962

Specific penalties	30	40			5	11

COLLECTION LITIGATION LEGAL SERVICES

For the past 5 years the legal work connected with the functions of the district directors' offices has maintained the level of activity it reached in fiscal 1958. The number of cases received during the current year was 11,366 as compared with 10,374 in 1962. The number of cases disposed of was 10,922 as compared with 10,380 last year. The inventory of pending cases stands at 4,829, an increase of 444 from the 4,385 cases pending at the end of 1962. For a detailed report of the cases received and disposed of see tables 23–25 on page 101.

Aside from the legal work which can be reported on a caseload basis, the informal assistance to the district directors' offices, rendered by lawyers who handle collection litigation cases, in the regional counsels' offices continued as in prior years. This, together with the assistance rendered during the periodic visits to district directors' offices by these same lawyers as a part of a continuing visitation program, is a result of the reorganization program begun some years ago under which much of this legal work was decentralized to the regional counsels.

As in prior years, the lawyers in the regional counsels' offices participated in the continuing in-service training programs developed by the Service to train and give guidance to the personnel in the district directors' offices dealing most directly with collection litigation matters. The value of this in-service training is continually apparent to the lawyers of the regional counsel through the constantly improved reports which are received by them in collection litigation cases.

Two cases pertaining to problems considered in connection with collection litigation legal work were decided by the United States Supreme Court. For a summary of these cases see pages 68 and 69.

FEDERAL-STATE COOPERATION

Gratifying progress was made in extending the area of Federal-State cooperation. Seven new cooperative exchange agreements were concluded with Arkansas, Illinois, Iowa, Maryland, Virginia, West Virginia, and the District of Columbia. This brings to 20 the number of such agreements now in force. Negotiations of 9 additional agreements were at various stages of active development between State tax officials and the Service at the close of the fiscal year.

The benefits stemming from these agreements have been steadily increasing, both to the Service and to the States. In the area of delinquent taxes, the flow of information from the States is yielding Federal revenue at the rate of about $22 million annually. Also, information furnished by the States to the Service, reflecting the results of audit of State tax returns, led to the assessment of $2 million additional Federal revenue, at a cost of approximately $45,000 during the year. Reports by State tax officials indicate that comparable benefits to State revenue are being obtained through information furnished systematically by the Service.

P.L. 87–870, enacted this year, provides for special services to be performed for States and other specified agencies on a reimbursable basis. The States are likely to have particular interest in contracting for special statistical compilations and in arranging for the admission of State tax officials to the training courses of the Service. Efforts are now underway to achieve a mutually satisfactory meshing of diversified State needs with the training resources available to the Internal Revenue Service.

INFORMANTS' REWARDS

Including those pending July 1, 1962, informants' claims for reward considered during fiscal 1963 numbered 9,196. Of these, 753 were approved with payments to the informants of $458,688. Of the 4,266 claims disposed of, 3,513 were rejected either because the claim could not be substantiated or the eligibility requirements of the regulations were not satisfied.

From information furnished by informants, the Service recovered $12.7 million in taxes, penalties, and interest.

Below is a table comparing activity in this area for the past 2 years:

Receipt and disposal of claims for informants' rewards

Status	1963	1962
Pending July 1 ... number	5,000	4,774
Received ... do	4,196	4,147
Disposed of, total ... do	4,266	3,921
Rejected ... do	3,513	3,256
Allowed ... do	753	665
Pending June 30 ... do	4,930	5,000
Amount allowed on claims disposed of ... dollars	458,688	587,256

ALCOHOL AND TOBACCO TAX ENFORCEMENT

Intensive concentration on the perfection of criminal cases under the Major Violator Program against the principals responsible for large-scale illicit distilling activities, resulted in effective prosecutive and trial action in most areas. During the year, 591, or approximately 37 percent of the 1,573 listed major violators were arrested or indicted. Noteworthy is the favorable attitude of the courts toward the objectives of this Program which continues to be reflected in the severity of imprisonment sentences imposed upon the financial backers of illicit operations. This is regarded as a significant crime deterrent factor.

The Mandatory Preventive Raw Materials Program continues to be an important adjunct to the law enforcement effort in preventing to a considerable extent the acquisition by illicit distillers of sugar, yeast, and containers essential to the production and packaging of nontaxpaid distilled spirits. It is encouraging to note that wholesale and retail dealers in such commodities, cognizant of the tax fraud potential are, for the most part, cooperating with the Government by establishing merchandising policies designed to deny liquor law violators or suspicious persons access to large quantities of sugar even though premium prices are frequently offered therefor.

Fourteen southern States accounted for 92.6 percent of the stills and 95.3 percent of the mash seized in 1963. Seizures in all categories declined with the exception of nontaxpaid wines. The volume of mash seized in the country as a whole, a significant index of the trend of illicit production, was reduced by 9.7 percent, as shown in the following table:

Seizures and arrests for alcohol, tobacco, and firearms violations

Item	1963	1962
Seizures:		
Stills ... number	6,213	6,886
Nontaxpaid distilled spirits ... gallons	149,940	174,572
Nontaxpaid wines ... do	6,530	2,930
Mash ... do	3,092,617	3,424,472
Vehicles ... number	2,431	2,621
Property (appraised value) ... dollars	2,110,380	2,252,718
Arrests [1] ... number	8,507	9,126

[1] Includes 2 arrests for tobacco violations and 358 arrests for firearms violations in 1963 compared with 2 and 398, respectively, in 1962.

Note.—Includes seizures and arrests in cases adopted, as well as originated, by the Internal Revenue Service.

As an adjunct to the seizure and forfeiture of property (principally vehicles, pinball machines, and cash) because of its use or intended use in violation of the alcohol, firearms, and wagering laws, the Service was required to investigate and rule on 489 petitions for remission or mitigation filed by persons who alleged an interest in the forfeited property.

FIREARMS PROGRAM

Public hearings on legislative proposals to amend the Federal Firearms Act were held by the Senate Subcommittee on Juvenile Delinquency during the year. These hearings were attended by representatives of the Service and of the firearms industry. The proposed amendments, in addition to increasing the license fees for dealers and manufacturers of firearms, would place restrictions on the availability of pistols and revolvers to juveniles, particularly through so-called "mail order" sales. This legislation is designed to be helpful to law enforcement agencies in the field of crime prevention.

A study of devices designed to fire either tear gas or flares, or both, but which are also capable of firing fixed ammunition, resulted in Service rulings that required manufacturers to make radical changes in such devices to preclude their falling within the category of firearms controlled by either the National or Federal Firearms Act. Studies made of a number of types of so-called semi-automatic rifles imported into the United States, brought about the classification of such weapons as machineguns, the importation of which will hereafter be subject to the registration and other provisions of the National Firearms Act.

Registration of firearms totaled 537,132, compared with 349,311 in 1962. The increase was due chiefly to the production of a greater number of automatic weapons required by the Armed Forces. Investigation of violations of the National and Federal Firearms Acts and the Act of August 9, 1939 (49 U.S.C. 781) resulted in the perfection of 358 criminal cases, 352 arrests, and the seizure of 115 vehicles and 725 firearms.

The decision of the Court of Appeals for the Ninth Circuit in *Russell* v. *United States*, 306 F. 2d 402 (1962) temporarily posed a serious threat to enforcement of the National Firearms Act. In this case, the Court set aside defendant's conviction

on a charge of failure to register a firearm on the ground that compliance with the registration requirement of the Act would have violated his constitutional guarantee against self-incrimination.

However, when the Court was faced with subsequent cases involving the review of convictions on charges of possession of an unregistered firearm, it upheld the convictions, distinguishing the *Russell* case on the ground that here the substance of the offense lay in the defendant's possession of the firearm and not in any failure on his part to have registered it (see *Starks* v. *U.S.*, 316 F. 2d 45, and *Frye* v. *U.S.*, 315 F. 2d 491). Other circuits have since taken similar action. Hence, unless *Frye* should be reversed by the Supreme Court, the problems anticipated as a result of the *Russell* decision seem to a large extent to have proved illusory.

5 Supervision of the Alcohol and Tobacco Industries

GENERAL

The Liquor Law Revision Committee, which was established on March 1, 1962, continued its studies of the industrial alcohol and liquor tax laws. The objectives of the Committee are to achieve the utmost simplification in revenue control and tax determination so that more economical government supervision can be attained and the industries will have the greatest degree of operating latitude consistent with effective revenue protection.

In order to cooperate with other departments of the Government the Service granted special authorizations permitting the mingling and storage (under conditions not contemplated by internal revenue regulations) of several million gallons of distilled spirits produced from California grapes which were declared by the Grape Crush Administrative Committee of the U.S. Department of Agriculture to represent surplus production. Under the pertinent USDA regulations, the "setaside" distilled spirits produced from such surplus grapes were not to be disposed of for beverage purposes. Arrangements were completed for the "setaside" spirits to be converted to industrial alcohol.

The Service also required specific identification of all food colors and other additives which industry members have proposed to include in their formulas for rectified products and wine, for the purpose of assisting the Department of Health, Education, and Welfare in familiarizing industry with the requirements of the Food and Drug Administration concerning such additives. Approval of any formulas which were found to include injurious additives or injurious proportions of additives was withheld.

As the result of efforts between the Alcohol and Tobacco Tax Division and the Joint Committee of the States on Alcoholic Beverage Advertising, The National Conference of State Liquor Administrators and the National Alcoholic Beverage Control Association, Inc. have resolved to urge the individual States to adopt uniform regulations (similar to the Federal requirements) governing the advertising of distilled spirits and wines in newspapers and magazines.

AUTHORIZATION OF INDUSTRY OPERATIONS

An indication of the extent of activities relating to the authorization of industry operations may be obtained by reference to statistical tables. Permit actions are shown in tables 10–12, on pages 92–93, and the number of establishments qualified to engage in the production, distribution, storage, or use of distilled spirits and alcoholic liquors, is shown in table 8, page 92. Corresponding figures relating to cigarettes, tobacco products, and tobacco materials, are shown in table 9, page 92.

In administering the provisions of the Federal Alcohol Administration Act and its related regulations, 46,949 applications for label approval or exemption from label approval (19,943 applications for distilled spirits, 25,090 for wines, and 1,916 for beer) were processed during the year, compared with 44,861 applications during 1962 or an increase in workload of 4.7 percent. A total of 20,392 periodicals and 3,429 radio and television "commercials" were examined to determine whether alcoholic beverages advertising contained therein complied with the Act and Regulations. In addition, 1,060 proposed advertisements and projected advertising campaigns which were voluntarily submitted, were reviewed prior to publication as a service to industry, and 282 conferences were held with industry members, their attorneys, or advertising agencies concerning advertising matters.

The provisions of procedural rules dealing with the disclosure of information (26 CFR 601.702) were amended, effective March 25, 1963, to permit the Director, Alcohol and Tobacco Tax Division, upon proper written application, to furnish information to interested persons concerning the issuance of certificates of label approval, or exemption from label approval, under the Federal Alcohol Administration Act.

The National Office processed 1,112 formulas for rectified products and 158 formulas for wine, as compared with 684 and 127, respectively, in 1962. The food additive control program was largely responsible for the increase in the number of formulas for rectified products which were reviewed. The National Office also reviewed 3,642 qualifying documents; issued to Government agencies a total of 26 permits to use tax-free spirits and 16 permits to use specially denatured spirits; approved 88 distinctive liquor bottles; and acted on 70 offers in compromise involving violations of Internal Revenue Laws, and 16 under the Federal Alcohol Administration Act.

ON-PREMISES SUPERVISION

Pilot operations initiated near the close of last year and completed this year demonstrated the feasibility of further improvements and streamlining in the methods used by the Government to supervise distilled spirits plants. Using the new procedures as guidelines, a nationwide survey of inspector (on-premises) manpower requirements was carried out. Study of the results indicates, in certain regions, the possibility of eliminating a limited number of inspector (on-premises) positions, as they become vacant. Increased use would be made of inspectors (general) for on-premises supervision during periods of peak plant activity. The policy of not filling vacancies, except for emergency situations, resulted in savings of approximately 59 man-years in inspector positions.

Inspector (on-premises) supervision was provided at distilled spirits plants whose operations and activities involved transactions in distilled spirits, as follows: Production, 800.8 million tax gallons; denaturation, 517.8 million tax gallons; warehousing, 1,054.1 million tax gallons; and tax-payments, 188.6 million tax gallons. In addition, 87.6 million proof gallons of distilled spirits and wines were rectified, and 220.2 million wine gallons of distilled spirits were bottled.

INSPECTION OF ESTABLISHMENTS

Quality inspections, utilizing additional audit techniques were emphasized. Authority to regions to select premises to be inspected in accordance with indicated needs, rather than by rigid schedule, was formalized at the beginning of the year. As a result the scope and depth of selected inspections increased materially. In the closing months of the year, all regions concluded field tests of a proposed brewery inspection handbook. Time devoted to these tests and increased use of audit techniques in inspections contributed to an increase in man-days per inspection and a corresponding decrease in number of inspections completed, from 32,260 in 1962 to 28,966 this year.

CHEMICAL ANALYSIS AND RESEARCH

The continuing emphasis being placed on research is typified by a contractual agreement with the Atomic Energy Commission whereby the National Office laboratory will carry out research in the field of neutron radio-activation analysis in criminalistics for the benefit of the Internal Revenue Service. Other research activities resulted in the publication of 6 scientific papers in internationally recognized chemical journals.

The rapidly expanding use of forensic chemistry as an adjunct to criminal investigative work led to the establishment of a physical evidence unit in the National Office laboratory to serve the Enforcement Branch of the Alcohol and Tobacco Tax Division.

Approximately 39,600 samples were examined in the National and regional laboratories, of which about 8,600 were illicit spirits and 8,300 were narcotics. In the National Office laboratory, in the categories of foods, flavors, and medicines using taxpaid spirits, 2,825 new formulas were approved and 623 samples were analyzed. In addition, 3,904 formulas and 4,219 samples were examined and approved for products and processes using specially denatured alcohol. Labels were approved for 9,211 products produced with specially denatured alcohol. An increase of some 2,000 narcotic samples caused the total volume of samples to exceed the previous year's total by about 1,700.

6 Legislative Activities

GENERAL

The fiscal year was marked by much Congressional activity in the area of tax legislation. Principal activities were directed to enactment of the Revenue Act of 1962 and to the major tax revision program which was submitted to the Congress on January 24, 1963. In addition, study, research, and assistance were carried on relating to particular revenue measures enacted by Congress or still pending. The regular and recurring functions in connection with the Department's legislative program, reports on bills, drafting of legislation, and other technical work were continued.

LEGISLATIVE PROGRAM

The Service submitted 74 items to the Assistant Secretary for Tax Policy for consideration in the formulation of the Department's legislative program. These suggestions dealt principally with tax inequities, loopholes, and administrative problems. They were developed from reports submitted by offices throughout the Service; from research and study projects undertaken to develop information about tax inequities, abuses, and administrative problems which seem to warrant corrective legislation; from suggestions made by Members of Congress and the public; and from suggestions submitted by employees through the incentive awards program.

There was much activity in the Technical Coordination Program. It is through this program that the field offices report to the National Office on actual taxpayer cases involving tax abuses, inequities, and administrative problems. These reports were studied and evaluated in order to determine what legislative suggestions the Service should make to the Department.

LEGISLATIVE ASSISTANCE

The Committee on Finance conducted hearings on H.R. 10650, the Revenue Act of 1962. Some of the more important sections provided for a tax

incentive credit to encourage modernization and expansion; withholding tax on dividends and interest; more equitable taxation of mutual thrift institutions, mutual casualty insurance companies, and cooperatives; the removal of much of the preferential treatment accorded foreign income; and the disallowance of certain travel and entertainment expenses. The Committee substituted for the withholding on dividends and interest a provision requiring the filing of information returns covering the payments of such income. Representatives of the Service attended both the public hearings and the executive sessions before the Committee and assisted in drafting changes proposed by the Committee. The Act was passed by the Senate and on October 16, 1962, it was signed by the President and became Public Law 87-834.

The President in his tax message to the Congress on January 24, 1963, recommended a reduction in individual and corporate income tax rates and also structural revision and reform. The reform program is directed toward the relief of hardship and encouragement of growth, base broadening and equity, and revision of capital gains taxation. The Service assisted the Treasury Department in developing the Administration's tax program. Work on this program included research, technical analyses, and the gathering of information regarding tax matters covered by sections of the Internal Revenue Code which are under consideration. Also, representatives of the Service attended both the public hearings and executive sessions before the House Committee on Ways and Means, and assisted in drafting legislative language to carry out tentative decisions of the Committee in regard to the President's recommendations, and the Committee report.

Representatives of the Service attended the public hearings and executive sessions of Congressional Committees on the enacted and pending bills listed below. They also rendered other technical assistance in drafting the legislation and related Committee reports.

Information reports, technical reports, drafts of bills and accompanying technical explanations, and other data relating to legislative matters were prepared for the Office of the Secretary of the Treasury. Included were 47 formal reports on Congressional bills which dealt with proposals to amend the Internal Revenue Code and other legislative matters, including private relief bills.

Eight technical memoranda on pending bills or legislative proposals were prepared and forwarded to the Secretary of the Treasury. These bills and legislative proposals included recommendations to amend the Internal Revenue Code in respect to liquor, tobacco products, and firearms, and to amend the customs laws, the Federal Firearms Act, and the Administrative Procedure Act, as well as private relief bills in the alcohol and tobacco tax area.

LEGISLATION ENACTED

Congress enacted a number of public laws relating to tax matters, the most important of which (other than the Revenue Act of 1962) are listed and summarized below:

Public Law 87-682 extends to fishermen the same treatment accorded farmers in relation to estimated income tax.

Public Law 87-710 provides a 7-year net operating loss carryover for certain regulated transportation corporations.

Public Law 87-768 modifies the application of the personal holding company tax in the case of consumer finance companies.

Public Law 87-792 extends many of the favorable tax benefits of qualified retirement plans established by employers for employees to plans established by and for self-employed persons.

Public Law 87-859 continues for an additional 3-year period the existing suspensions of the tax on the first domestic processing of coconut oil, palm oil, palm-kernel oil, and fatty acids, salts, combinations, or mixtures thereof.

Public Law 87-863 increases the maximum limitations on the amount allowable as a deduction for medical, dental, etc., expenses. Another section of this Law provides that a State or political subdivision which operates retail liquor stores shall not be required to pay more than one special tax as a retail dealer in liquors, regardless of the number of such stores operated by the State or political subdivision. The provisions of this section of the Act were made retroactive to July 1, 1962, which necessitated the allowance of claims for refund of the special retail tax for additional stores, if already paid for the fiscal year which began July 1, 1962.

Public Law 87-870 provides for the elimination of certain tax inequities through the permissive

taxation of certain jointly owned railroad terminal and switching facility corporations as partnerships.

Public Law 87–876 provides for an increase in the retirement income credit.

Public Law 88–4 provides that the deduction for child care expense shall be available to a wife who has been deserted by and cannot locate her husband, on the same basis as a single woman.

Public Law 88–9 provides a deduction for payment of redeemable ground rent.

Public Law 88–31 provides for a reduction in the rate of the Federal unemployment tax for the calendar year 1963.

Public Law 88–36 repeals the silver purchase acts and the related transfer tax on silver bullion.

Public Law 88–52, the Tax Rate Extension Act of 1963, in general postpones until July 1, 1964, reductions in the corporate normal tax rate and certain excise tax rates, and termination of the excise taxes on general telephone service and transportation of persons by air, which would have become effective on July 1, 1963.

LEGISLATION PENDING

Tax bills passed by the House at the end of the fiscal year and awaiting action by the Senate were as follows:

H.R. 780, to provide a credit against the estate tax for Federal estate taxes paid on certain prior transfers in the case of decedents dying after December 31, 1947.

H.R. 3297, to exempt from income taxation certain nonprofit corporations and associations organized to provide reserve funds for domestic building and loan associations.

H.R. 6246, relating to the deductibility of accrued vacation pay. A bill containing tax provisions, S. 1, had been passed by the Senate at the close of the fiscal year and was awaiting House action. The purpose of the bill is to establish a youth conservation corps. H.R. 5131, a similar bill, has been reported to the House.

LEGISLATIVE IMPLEMENTATIONS

The Service developed and began carrying out plans for the implementation of tax legislation enacted during the year. These plans included the issuance of new and amendatory regulations, revisions of tax return forms and instructions, issuance of publicity primarily through news and technical information releases, revision of Service publications, and issuance of special instructions and procedures to field offices. In some instances immediate action, particularly publicity, was required to assist taxpayers to comply with requirements of legislative amendments or to take advantage of tax relief afforded.

Some of the more important publicity releases on tax legislation enacted during the fiscal year include:

TIR–413 (November 13, 1962) calling attention to the provision in Public Law 87–834 which requires certain persons who either create a foreign trust or transfer money or property to a foreign trust to file an information return on or before the 90th day after the creation or transfer takes place.

TIR–416 (November 16, 1962) calling attention to the provisions in Public Law 87–834 relating to the taxation of stockholders of foreign investment companies and to certain acts to be performed by such companies.

TIR–423 (December 17, 1962) reminding taxpayers of the provisions in Public Law 87–397 requiring them to use their identifying tax account numbers on Federal tax returns and related documents filed in 1963 and subsequently, and announcing a new information booklet entitled "Questions and Answers Regarding Identifying Numbers."

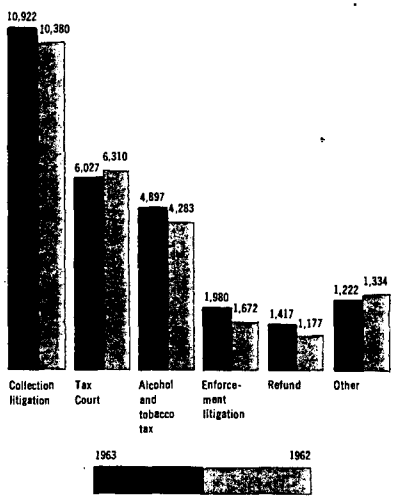
TIR–428 (December 24, 1962) calling attention to the provision in Public Law 87–863 which allows taxpayers a new option to deduct intangible drilling and development costs as expenses in the case of oil or gas wells.

TIR–443 (January 13, 1963) directing attention to the provision in Public Law 87–834 which reduces the exemption from income tax allowable under prior law with respect to persons qualifying under the "bona fide foreign residence" test.

TIR–481 (June 7, 1963) calling attention to Public Law 88–31 which reduces the rate of Federal unemployment tax for the calendar year 1963 from 3.5 percent to 3.35 percent.

7 Legal Activities

CASE DISPOSALS BY OFFICE OF THE CHIEF COUNSEL



CASELOAD DISPOSAL ACTIVITY

The total caseload disposals in the Office of the Chief Counsel increased to 26,465 from the total of 25,156 in 1962. At the close of the year the total caseload pending was 22,434, an increase of 496. Caseload receipts increased to 26,961, up 9.6 percent from the 24,600 received last year.

CIVIL LITIGATION

The Government won, in whole or in part, all of the 9 civil tax cases decided by the Supreme Court, compared with 5 of 7 in 1962. The Government also won, in whole or part, 271 of the 349 civil tax cases decided by courts of appeal (exclusive of bankruptcy, receivership, insolvency, lien, compromise, and liquor), compared with 301 of 414 such cases decided in 1962. In 1963 the Government's position was wholly or partially sustained in 77.7 percent of courts of appeal cases, compared with 72.7 percent in 1962.

In the trial courts (Tax Court, Court of Claims, and U.S. district courts) the record of Government wins, losses, and partial wins appears as follows:

Trial court cases won, lost, or partially won by the Government

Action	Tax Court		Court of Claims		District courts	
	1963	1962	1963	1962	1963	1962
Won	293	275	34	27	166	192
Lost	109	93	12	23	200	213
Partially won	159	163	18	6	56	44
Percent won or partially won	81	82	81	59	53	53

TAXES IN LITIGATION

Both at the beginning of the fiscal year and at the end there were nearly $1.5 billion involved in cases wherein taxpayers sought to contest their liabilities for taxes (and penalties). Actions for refunds of taxes and penalties are handled at the National Office level and actions for redetermination of proposed deficiencies in the Tax Court are handled by the 9 regional counsels.

In the trial or settlement of cases in the Federal district courts, the Court of Claims, and the Tax Court, $120.5 million was successfully defended in refund suits, and $171.8 million was successfully defended as proposed deficiency assessments, for a total of $292.3 million of revenue saved for the Government (see the table below).

Taxes in litigation
[In thousands of dollars]

Status	Total	Tax Court		Refund litigation
		Deficiencies	Overpayments	
Pending July 1	1,446,898	810,537	195,581	440,780
Received	570,598	439,173	12,782	118,643
Disposed of	547,846	323,291	66,941	157,614
Pending June 30	1,469,649	926,419	141,421	401,809
Amount saved	292,289	110,976	60,831	120,482

PERSONNEL

On June 30, 1963, the Office of the Chief Counsel had a total employment of 1,290 persons, composed of 644 attorneys and 646 nonattorney employees. This represented a slight decrease in staff from the preceding year. The 644 attorneys were assigned to the National Office and regions, as follows:

Office	*Number of attorneys*
National Office	263
Atlanta region	41
Boston region	22
Chicago region	42
Cincinnati region	42
Dallas region	32
New York City region	59
Omaha region	34
Philadelphia region	51
San Francisco region	58

TORT CLAIMS

The Service adjudicates all administrative claims under the Federal Tort Claims Act arising out of negligent acts of Service employees, and assists the Department of Justice in the defense of suits brought under that Act for damages caused by the negligence of Service employees. During the year 99 administrative claims (as compared with only 48 for 1962) and 14 suits were disposed of.

During the year also, the authority to recommend the institution of suits to recover for damage to Service property where the amount claimed does not exceed $1,000 and the incident from which the claim arises did not result in personal injuries was transferred to the regional offices in view of the decentralization of these suits by the Department of Justice to the United States attorneys.

SUMMARY

Legal services play a key role in all facets of tax administration and therefore are a vital part of many of the Internal Revenue Service's operations. Criminal prosecution cases, civil litigation cases, legal services in collection litigation, and work flow of cases in the Service and the courts are shown under Enforcement Activities. Detailed statistics on legal activities are shown in statistical tables 18–26 on pages 99–101, and the most important court decisions are included in the Appendix.

8 International Activities

GENERAL

As the world around us shrinks in size, the scope of the Service's responsibilities and operations overseas steadily enlarges. The overseas affairs of the Internal Revenue Service divide into three broad areas—furnishing technical assistance to developing countries in the strengthening and modernization of their tax systems; participation in the negotiation of tax conventions with foreign governments and the preparation of regulations under these pacts; and the administration of Federal tax laws affecting mainly U.S. citizens and business organizations abroad. The program for assisting the developing countries in strengthening their tax systems is carried out in the immediate office of the Commissioner of Internal Revenue through the Foreign Tax Assistance Staff; Service responsibility for tax treaties and regulations is assigned to the Assistant Commissioner (Technical); and responsibility for the overseas administration of Federal tax laws is in the Office of International Operations under the Assistant Commissioner (Compliance).

FOREIGN TAX ASSISTANCE STAFF

Following the pledge of the Secretary of the Treasury at Punta del Este in 1961, the Internal Revenue Service organized a program to extend technical assistance for tax administration modernization to developing foreign countries. Responsibility for the program is vested in the Foreign Tax Assistance Staff in the immediate Office of the Commissioner of Internal Revenue. The Staff's activities are conducted in close collaboration with the Agency for International Development of the U.S. Department of State. The Service's immediate efforts are oriented mainly to Latin America under the Alliance for Progress, although several countries in other hemispheres have requested and are receiving assistance in tax administration modernization.

The overall program is divided into two broad but integrated efforts. One deals with the selec-

tion of tax specialists, not only from within the Service, but also from selected State and local governments, for overseas assignment at the invitation of foreign countries. The second involves arrangements for foreign tax officials to observe and study in the United States the organization and operation of the Service.

The activities of Internal Revenue Service Tax Teams overseas range from broad surveys of existing tax administrations and recommendations for improvement, to long-term programs for assisting tax officials of foreign governments in devising and installing tax administration modernization on a broad front. The scope depends on the desire of each country. Activities include programs involving audit, collections, tax fraud, systems, training, data processing, organization and management, personnel and budget administration, etc. During the year 27 Service tax specialists were assigned to 10 countries in Latin America on short- and long-term tours.

Observation and study programs in the United States for visiting foreign tax officials range in time from one day to several months, and in scope from a single Internal Revenue program, to a study of the entire administrative structure and the major Service programs. Visits are made to the National, regional, and district offices. The status of foreign visitors range from those at high policy levels to technicians at the working level, although most occupy positions carrying supervisory and program responsibility. During 1963 the Service received over 200 foreign visitors from more than 35 countries.

TAX CONVENTIONS

Discussions took place abroad with four countries with a view to the conclusion of one new income tax convention and three conventions supplementing those already in existence. The texts of such agreements were in various stages of development at the close of the year.

A supplementary protocol to the Japanese income tax convention was signed on August 14, 1962, and an income tax convention with Luxembourg on December 18, 1962.

The proposed income tax conventions with India, Israel, the United Arab Republic, and Luxembourg, as well as the proposed supplementary protocols modifying the convention with Japan, were pending ratification in the United States Senate on June 30.

INTERNATIONAL OPERATIONS

In addition to the operation of the foreign posts at Paris, France; London, England; Ottawa, Canada; Mexico City, Mexico; São Paulo, Brazil; and Manila, Philippine Republic, the Office of International Operations conducted a taxpayer assistance and educational program with 21 revenue agents from its own and from district offices. This program involved the actual preparation of 3,583 returns reporting a total tax of $915,284. A total of 13,134 persons were assisted under the program. The agents traveled in excess of 110,000 miles, visiting 98 cities in 51 foreign countries. Agents also conducted 11 schools for military tax instructors who, in turn, assisted armed forces personnel stationed abroad.

The Director of the Office of International Operations consulted with foreign tax authorities in the disposition of 5 cases involving double taxation.

Representatives in foreign posts submitted a total of 143 collateral information requests, 72 for Intelligence Division, and 71 for other offices and divisions of the Service.

The Operational Research Staff continued studies on improvement of all phases of operations, including need for legislation, regulations, special studies, and dissemination of information in the foreign area.

Special studies regarding tax abuses in foreign tax areas resulted in several suggestions for changes in legislation, regulations, technical information releases, and manual supplements.

A study on the effectiveness of Section 6046, as revised by Congress in 1960, resulted in a further amendment of Section 6046 to require an "inventory" of foreign stockholdings under certain conditions. As a result of this legislation, by the end of 1963, the Service should have, for the first time, a complete and current picture of the number and amount of investments in controlled foreign corporations.

With the completion of the first full fiscal year of coordinated examinations of United States and foreign affiliated entities, the value of the efforts are shown by the following figures:

Cases referred to Office of International Operations	610
Cases accepted for coordinated examination	411
Examinations completed	342
Additional tax recommended	$145,000,000

The Office of International Operations now has a total of 80 audit specialists in Washington, New York, Chicago, and San Francisco. Three technical specialists comprise a special advisory group on problems of pricing and allocation under section 482 of the Code.

The Office of International Operations continued to render assistance to territorial, protectorate, commonwealth, and possession governments in regard to social security taxes and other tax administrative matters as requested. It also performs much of the administrative work connected with the exchange of information provisions of the tax treaties with foreign countries and also collects the income tax from nonresident alien individuals, partnerships, and foreign corporations. Income tax is withheld in accordance with the rates set forth in the treaties.

Taxes withheld by domestic withholding agents, taxes remitted by foreign governments, and the number of information documents filed are listed in the following table:

Tax withheld from payments to nonresident alien entities of treaty and nontreaty countries

	Number of information documents	Thousand dollars		
		Tax withheld by domestic withholding agents	Tax from foreign governments or withholding agents [1]	Total
Total	408,580	79,740	13,358	93,098
Australia	2,498	204		204
Austria	676	43		43
Belgium	8,559	2,138	167	2,305
Canada	153,585	14,471	833	15,304
Denmark	1,256	114		114
Finland	363	27		27
France	32,195	2,824	22	2,846
West Germany	7,889	1,335		1,335
Greece	1,775	177		177
Honduras	289	102		102
Ireland	2,847	290		290
Italy	4,923	517		517
Japan	1,283	392		392
Netherlands	4,742	4,774	228	5,002
Netherlands Antilles	2,659	1,956	6	1,962
New Zealand	542	47		47
Norway	3,019	209		209
Pakistan	95	24		24
Sweden	2,997	436		436
Switzerland	27,146	19,249	11,895	31,144
Union of South Africa	614	147		147

Other:				
Nontreaty countries by Form 1042S	61,641	11,768		11,768
By coupon bond information documents:				
Tax treaty countries	40,232	699		699
Nontreaty countries	5,477	468		468

[1] Includes tax from coupon bond information documents; separate data not available.

Note.—Domestic withholding data distributed by country represents Form 1042S data for tax treaty countries only.

9 Planning Activities

GENERAL

Planning is an integral part of tax administration and is accomplished at every organizational level of the Service. The Long-Range Plan is the vehicle that translates all planning into a comprehensive system thereby producing a synthesis of program requirements, operational capabilities, and resources under different time frames which provide top management with a framework of carefully developed priorities for decision making.

The purpose of a tax system is to guarantee the long-run fiscal soundness of the policies and programs of Government. The purpose of tax administration is to fully implement the tax system. For the long-run, this means collecting all of the legislated taxes at least cost. In the short-run, it means optimizing the revenue collectible with the resources the Government makes available to the Administrator. Attainment of these objectives requires the development of an overall plan which includes both the strategy of long-range planning and tactical current-year operational plans or programs that are consistent with the long-range plan.

SHORT-RANGE OPERATIONAL PLANNING

Provision is made for short-range planning within the Long-Range Plan by developing specific program guidelines and priorities for the 2 years immediately ahead, which will enable the Service to progress toward its long-range objectives. Revisions to short-range guidelines and priorities are made after appropriation of funds for the next year's operations so that the final work-plans conform with available resources.

Detailed work-planning and control systems are employed in the Service's accounting, returns processing, delinquent accounts and delinquent returns activities for analyzing and appraising the work which must be done in determining short-range manpower requirements. These provide for the step-by-step listing of each operation, periodic evaluation of the various steps, assignment of

appropriate priorities to the various work phases, and the allocation of manpower to meet predetermined priorities.

The principal device for allocating manpower is the Financial Plan which translates annual appropriations into allotments for the Service's various offices and activities. This is the final step in the Service's budget cycle and represents the culmination of planning which begins with the Long-Range Plan and preparation of annual budget requests. The Plan is subject to modification during the year as needs arise and to the extent that compensating or supplementary resource changes are possible.

LONG-RANGE PLANNING

The Long-Range Plan is a coordinated action program designed by all components of the Service to eliminate operating deficiencies and anticipate and prepare for the future needs of an adequate Federal tax administration system. The Plan constitutes the Service's basic planning document and provides the foundation for the development of the Service's work plans and budget requests.

The Service's initial Long-Range Plan was developed in 1959 and is updated each year. The 1963 edition developed by the National Office in conjunction with regional and district officials, covers the 10-year period from 1961 through 1970. This plan includes objectives for all of the operational aspects of the Revenue Service, together with estimates of the manpower requirements and costs to reach desired objectives. It also includes estimated tax yields resulting from increased enforcement effort.

In order to develop the Plan most effectively, more detailed information must be obtained in a number of problem areas where information is lacking. These areas involve (1) the size and nature of the total tax administration workload; (2) the portion of the total tax administration job that is accounted for by current operations; (3) the portion of the total tax administration job that is left undone; or the gross tax administration gap; (4) the level of taxpayer compliance; (5) changes in the level of taxpayer compliance, and whether compliance is increasing or decreasing under existing programs; (6) the effectiveness with which current operations are being conducted; and (7) the net tax administration gap, or that portion of the gross tax administration gap that is worth closing.

To obtain data relating to these problem areas, the Service has developed a Taxpayer Compliance Measurement Program (TCMP), which will provide new information in at least 3 areas: (1) delinquent accounts, (2) delinquent returns, and (3) correctness of returns filed. Also, the informational aspects of TCMP include bringing together and coordinating into one comprehensive system all information required to measure the dimensions of Federal tax administration workloads, their trends and projections; the related requirements, such as manpower, training, equipment, and buildings; and the basic economics involved, such as costs, direct and indirect tax yields, and improvements in existing cost-yield ratios. TCMP is the Service's long-range research program designed to provide the information needed to implement the Service's Long-Range Plan and optimize Federal tax administration.

RESOURCES UTILIZATION

On December 17, 1962, the Committee on Resources Utilization submitted its report to the Commissioner. The report contained 72 recommendations relating to the organization and procedures of both National and field offices. By the close of the fiscal year, action had been taken on those recommendations which concerned the organization of field offices (see page 48). Evaluation of other suggestions of the Committee is to follow implementation of these field realignments.

The Service is currently making plans to establish a permanent resources utilization program with coordination responsibility centralized in the office of the Deputy Commissioner. Under this program, selected divisions of the National Office would undertake regular programs of research and analysis to assist the Commissioner in evaluating the activities and costs of the Service, and in allocating resources among them. Also, manpower utilization would receive increased emphasis in the National Office Review Program, and the several management development programs.

SYSTEMS REVIEW AND COORDINATION

Continuing attention was given to the modernization of tax administration through the planning

and design of total systems for implementing legislation and for improving current or proposed programs. Systems development projects during the past year included the following:

(1) *The Introduction of Advanced Equipment into the Service.*—Projects in this category relate both to the introduction of new types of advanced equipment into the Service as well as to the study of the equipment already scheduled as part of the automatic data processing system. Examples of the former are the development of specifications and the analysis of manufacturers' proposals for the procurement of a microfilm printer, the acquisition of a desk size computer for small, specialized, computational applications and preliminary studies of devices for electrical data transmission and optical character recognition.

Examples of the latter are the development of testimony for Congressional hearings on automatic data processing, studies of lease versus purchase of computers, and cooperative studies with operating personnel of computer components and procedural improvements in the Service's ADP system.

(2) *New Uses in Tax Administration for Advanced Equipment.*—The projects in this area include both consideration of the entire range of tax administration problems the solution of which might lie in the use of advanced equipment, as well as the achievement of new purposes from the Service's ADP system. Examples of the former include the use of information retrieval techniques in the legal and related administrative aspects of the Service's operations, an operations research system, a quality control system, and an integrated budgeting, personnel, and payroll data processing system.

Examples of the latter include ways of improving the identification of delinquent taxpayers under the ADP system, the conversion of Statistics of Income processing from Census Bureau equipment to Internal Revenue Service equipment, improved methods of classifying and selecting tax returns for audit examination, the use of information returns under the Service's ADP system, and orientation of the depositary receipt system in light of that system.

(3) *Systems Studies Not Involving Advanced Equipment.*—These studies include a number of systems design projects in which improvement may be achieved by readily available electrical or mechanical equipment.

(4) *Public Compliance Aspects of Tax Administration Systems.*—Projects in this area involve consideration of ways in which compliance by the taxpaying public may be directed toward maximum benefit to the systems used in tax administration.

The major projects in this area are the public compliance aspects of the taxpayer identifying number system and the expanded information return system enacted in 1961 and 1962. Other studies relate to the possibilities of receiving information returns in magnetic tape form from certain employers and payers of dividends and interest; and, in the alternative, of receiving such information in paper form readable by optical character recognition equipment.

(5) *Advisory and Educational Activities.*—These include consultation with tax administrators representing State taxing agencies or foreign countries, dissemination of systems information to Service officials, and exchanges of information with persons both in and out of the Service concerned with systems work.

CURRENT RESEARCH PROGRAM

Research activities were both accelerated and broadened in order to meet expanding demands. The needs for analysis of administrative facets of current legislative proposals continued, as in prior years, to absorb a major portion of research resources. This year, however, increasing consideration was given to internal management and operating problems, which stemmed from two sources: the planning necessary for following up various aspects of the 1962 tax legislation, and the problems encountered in the wake of expanded application of the automatic data processing system.

Numerous studies of the administrative impact of 1963 proposals for new tax legislation included such matters as changes in the treatment of deductions, optional tax tables, withholding methods, and averaging of fluctuating incomes.

Expanded information reporting for interest, dividends, and patronage dividends, required by the Revenue Act of 1962, focused attention on the need for new, integrated techniques for achieving more effective utilization of all information documents. An experimental program has been developed to provide streamlined techniques to

resolve apparent discrepancies resulting from mass computer comparisons of information documents and tax return data, and to furnish a comprehensive system of compliance follow-up. Additionally, plans are being developed for utilizing information returns from domestic owners of 5 percent or more of stock of foreign corporations.

Studies designed to provide information for dealing with operating and compliance problems included a survey of the nondistribution-of-income practices by complex trusts; a survey of the frequency and characteristic uses of different classes of tax returns within the Service; and the drafting of implementing regulations, together with designing of standard forms, to give effect to the recommendations made last year for simplification in the use of powers of attorney by taxpayer representatives.

STATISTICAL REPORTING

In preparing and publishing Statistics of Income reports as required by Section 6108 of the Internal Revenue Code of 1954, the Service during fiscal year 1963 continued to add to the statistical information available about the operation of our tax system. A planned byproduct of the measurements needed for fiscal policy determination was the financial profile of taxpayers drawn from tax return data. A list of Statistics of Income reports published during the year appears on page 72.

An increasing proportion of more complex returns characterizes taxpayer response to the operation of our tax system. Individuals itemized deductions on 41.1 percent of the returns they filed for 1961; the comparable figure was 33.7 percent for 1957. There is continued growth in the number of returns with schedules needed to summarize the varied aspects of business activity. The following tables reflect these and other characteristics of returns filed which, by adding to the complexity of the work, constitute one growth factor in the Service workload.

Under the terms of Sections 7515 and 7809 of the Internal Revenue Code as amended by Public Law 87–870 (87th Congress, Second Session) the Service was permitted to receive reimbursement for special studies and compilations furnished to private organizations and nonfederal government agencies. The Service may prepare special statistical studies and compilations involving data from tax returns and use the payments to reimburse the appropriation which bears the cost of such work. The authority to make these studies and compilations is evidence of Congressional recognition of the wealth of statistical information available on tax returns and related documents. Already 14 users availed themselves of the provisions of this new public law.

Individual income tax returns: Number of returns and sources of income

Item	Income year				
	1961	1960	1959	1958	1957
A. Number of returns	(Thousands)				
All individual returns, total	61,499	61,028	60,271	59,085	59,825
Taxable	48,583	48,061	47,497	45,652	46,865
Nontaxable	12,917	12,967	12,774	13,433	12,960
Returns with itemized deductions, total	25,262	24,083	22,510	20,811	20,155
Taxable	23,258	22,185	20,761	19,054	18,569
Nontaxable	2,004	1,898	1,749	1,758	1,586
Returns with standard deduction, total	36,238	36,945	37,761	38,274	39,670
Taxable	25,325	25,876	26,736	26,598	28,296
Nontaxable	10,913	11,069	11,026	11,675	11,374
B. Sources of income	(Million dollars)				
All individual returns:					
Adjusted gross income, total	329,861	315,466	305,095	281,154	280,321
Salaries and wages	266,902	257,918	247,370	227,551	228,077
Business or profession	22,630	21,072	21,431	20,674	20,339
Dividends received	9,890	9,530	9,356	8,741	9,124
Interest received	5,683	5,057	4,395	3,659	3,319
Rents and royalties	3,264	3,312	3,235	3,227	3,259
Other income	21,492	18,578	19,307	17,304	16,202

Note.—Returns classified as taxable are those reporting income tax after credits.

Receipts and profits reported by businesses

Item	Income year

n.a.—Not available.

Note.—The income year 1961–62 covers accounting periods ended July 1961 through June 1962. Other income years cover corresponding periods.

The Service awarded a contract to Dr. W. Edwards Deming, consultant in statistical services, Washington, D.C., for an evaluation of sampling procedures used by the Service to obtain tax return data and for his recommendations for improving the quality of estimates published in Statistics of Income. Dr. Deming completed his report in June 1963. The Service also awarded a contract to the National Planning Association, Washington, D.C., for developing the historical and projected economic series required for preparing projections of the number of returns to be filed in each State. The National Planning Association also provided detailed methodology useful in updating the projections of the economic series.

A library of computer tapes was expanded. This library makes available to research workers a flexible source of data to supply information on items, classes, and relationships that will vary from time to time. The library consists of a complete file of the Statistics of Income sample of returns. It will be maintained for a 3-year period and, in addition, a subsample of the Statistics of Income files which can be referred to as a model will be kept indefinitely.

The Treasury-Internal Revenue Service Committee on Statistics, established last year to advise

on the content of statistical publications, standards of quality, and timeliness of publication, was continued during 1963. The names and affiliations of the members of the group are listed in the 1962 Annual Report. The group met on four occasions: March 30–31, 1962; May 25–26, 1962; October 1, 1962; and April 29, 1963. At each meeting there was a careful review of the statistical program and an evaluation of proposed changes and recommendations regarding selected courses of action. In compliance with provisions of Executive Order 11007, the Committee terminated on June 30, 1963.

10 Management Activities

GENERAL

The goal of the Service during the year has been, in the words of President Kennedy, to operate "a lean, fit, and efficient" organization. Emphasis was placed on good management, with particular attention to economy, efficiency, and effectiveness. More specifically our efforts have been directed toward eliminating unnecessary overhead, shortening communication lines, and channeling maximum manpower to frontline enforcement and revenue producing activities.

MAJOR MANAGEMENT IMPROVEMENTS

Increased stimulation and leadership in management improvement efforts resulted in an alltime record of over $11.6 million in annual recurring savings in 1963. These savings reflect a cooperative effort spearheaded by top management officials actively supporting the objectives of the Management Improvement Program.

The Service also actively seeks to keep its managers in touch with new and improved methods by participating in management courses, seminars, and institutes conducted by other Government agencies, universities, and professional associations. In 1963 approximately 125 officials attended such outside training sessions. In addition, the Administrative Intern Program designed to recruit and train promising participants for future high-level duties, stresses the importance of management improvement in formal courses and on-the-job training.

Many management improvement actions result in improved operations rather than measurable savings. However, below are several of the more significant accomplishments initiated during 1963 which resulted in tangible savings and which are a partial indication of the vitality of the Management Improvement Program.

Realignment of Field Offices.—Secretary Dillon gave final approval on May 17, 1963 to the following field office realignment plan, effective January 1, 1964:

(1) Reduction in the number of regions from 9 to 8. This was accomplished by combining the Chicago and Omaha regions and redistributing certain districts to the Dallas, Cincinnati, and Philadelphia regions. The new lineup of States in the affected regions is—

(a) Chicago Region—Illinois, Iowa, Minnesota, Missouri, Nebraska, North Dakota, South Dakota, and Wisconsin;

(b) Cincinnati Region—Indiana, Kentucky, Michigan, Ohio, and West Virginia;

(c) Dallas Region—Arkansas, Colorado, Kansas, Louisiana, New Mexico, Oklahoma, Texas, and Wyoming;

(d) Philadelphia Region—Delaware, Maryland, New Jersey, Pennsylvania, Virginia, and the District of Columbia.

(2) Reduction in the number of districts from 62 to 58. This was accomplished by merging the Camden District into the Newark District, the Syracuse District into the Buffalo District, and the Kansas City District into the St. Louis District; and dividing the Scranton District between the Philadelphia and Pittsburgh districts.

When fully implemented the realignment of field offices is expected to yield recurring annual savings of approximately $3.5 million with no decrease in taxpayer services or overall effectiveness.

In addition, a program was initiated to reduce overhead supervisory and administrative costs in the districts—particularly the smaller districts—to minimum operating requirements. Under this program, each division or branch chief vacancy in a district office is to be examined for the essentiality of the position before it is filled.

Cathode Ray Tube Equipment.—A contract was awarded for procurement of an electronic microfilm printer and 75 associated high speed film viewers. By use of this equipment filmed registers and directories will be substituted for mechanically printed lists. Eventual savings are estimated at $600,000 per annum, $520,000 of which will be saved on equipment and supplies, when fully implemented.

Variable Key Punching of Data from Individual Returns.—A method of key punching tax data on a variable basis, as opposed to a "fixed field" technique, resulted in an estimated $250,000 savings to date. By 1967 it is anticipated that annual recurring savings of $1 million will accrue by use of this new method which utilizes the principle of punching only data reported by the taxpayer that is needed for processing purposes.

Streamlined Training Programs.—The Service continued to take a critical look at training programs with a view toward refining and improving them without diminishing their quality. As a result, numerous courses have been shortened to the extent that approximately $1.9 million will be diverted to productive enforcement activities each year.

Use of Technical Aids in Investigative Work.—A study was initiated to determine the use and value of technical aids such as portable photocopiers, tape recorders, microfilm readers and printers, portable microfilmers, handie talkies, and cameras. The study indicated that the Service is making extensive use of these aids thereby saving at least $688,000 annually. As a further benefit, technical aids in the investigation of cases assisted in securing evidence which otherwise would not have been obtainable.

Reports Program.—A continuing review of reporting requirements to insure quality reports at the least possible cost resulted in redirecting manpower worth $1.4 million from the preparation and use of reports to other operations. Changes in reporting ranged from modification of record cards to major revisions in some areas of the Service's reporting system.

The Reports Program is designed to take full advantage of mechanized and electronic systems, while keeping in mind that some types of reporting are more adaptable to manual processes.

Intangible Savings.—Many management improvement actions not readily adaptable to measurement of exact monetary savings nevertheless release substantial manpower and other resources for use in more critical areas. Noteworthy examples are the work planning and control systems in accounting, returns processing, delinquent accounts, and delinquent returns activities. These systems include a step-by-step listing of each operation, periodic evaluation of the various steps, assignment of priorities to phases of work, and allocation of manpower to meet the priorities. The constant review of these systems and subsequent improvements have led to standardized work achievements in all districts and regions and the channeling of available manpower to tasks of the highest priority.

A new program, known as the National Office Review Program, involves a shift in emphasis

707-151 O—63——5

from "mass" team visits to field offices, to visits by a small group of top officials. In addition to improving management review and control of field operations, this new program is expected to result in substantial savings in manpower and travel funds, and will eliminate several lengthy, formal reports.

There has been an increased use of mass communications media to inform taxpayers of tax laws and regulations and to create confidence in the voluntary compliance system. Although difficult to measure, there is no doubt that this increased dissemination of information has led to increased voluntary compliance.

Disposition of Savings.—Savings resulting from management improvement projects, both tangible and intangible, are channeled into work areas where the application of additional manpower serves to strengthen the enforcement effort, reduce backlogs, and improve taxpayer service.

PERSONNEL

The personnel administration program was highlighted by efforts to improve manpower utilization and maintain the high level of employee morale. Significant changes and innovations were made in the incentive awards program, and continued progress was made in ADP redeployment, the summer student program, and employee-management relations.

Automatic Data Processing Staffing and Redeployment.—Considerable progress was made in the redeployment of employees affected by the conversion to automatic data processing. To date, 2,500 employees have been redeployed successfully out of an estimated 5,500 who will eventually be redeployed as a result of the installation of the ADP system. Of particular interest was the significant advance made in staffing the first regional data processing service center in Atlanta, which now has 754 permanent employees. Part-time employees reached a peak of 954 in February.

The Labor Department's Bureau of Labor Statistics completed a study of the "Impact of Office Automation in the Internal Revenue Service." The report describes in detail the initial stages of conversion to ADP, and comments favorably on the Service's redeployment program. It will be published later this year.

Attitude Survey.—An attitude survey, similar to one which proved successful in the Philadelphia District as a tool for highlighting areas requiring management attention, was conducted in the Milwaukee District. The survey showed that employees generally had a strong dedication to the mission of the Service and were satisfied with their work. It also spotlighted certain weaknesses in the promotion program and in first-line supervision. Actions have been initiated to deal with areas requiring further attention. Plans have been made for extension of the survey program to other offices.

Recruitment.—Emphasis continued in recruiting at colleges and universities for entrance-level professional positions. Recruiting brochures were mailed directly to about 60,000 students, in addition to those distributed by district and regional offices. These pamphlets describe the benefits and opportunities of a career in the Internal Revenue Service.

An earlier suggestion that district directors encourage schools to call on them for speakers before student groups and classes was reemphasized as a public service as well as a recruitment device.

The number of employees at the close of the year and the man-years realized are shown in the following table:

Personnel summary

Location and type	Man-years realized		Number on rolls at close of year	
	1963	1962	1963	1962
Service, total	59,711	56,481	59,486	56,510

[1] Includes terminal leave man-years for entire Service.
[2] Includes Office of International Operations.
[3] Includes overseas employees hired locally (4 in 1963 and 3 in 1962).

Civil Service Commission Program Review.—The Civil Service Commission in its coordinated nationwide review of personnel management in the Internal Revenue Service, found that the Service's recruitment, ADP redeployment, program review and evaluation, and career planning and systematic employee development programs were noteworthy. It recommended classification changes in only 0.4 percent of the positions, compared with a governmentwide rate of 4.0 percent. Of special note was the Commission's overall summary that ". . . personnel management is woven into the total management fabric of the Internal Revenue Service to a remarkable degree, and it is characterized by a professional approach on the part of the responsible managers."

Executive Selection and Development Program.—The Service continued its well-established Executive Selection and Development Program as the source of appointments to all positions of assistant district director and assistant service center director. During the annual selection process, 424 qualified persons from the Service, as well as a number of managers from other agencies, were considered. Of these 10 were selected to participate in the program.

Summer Student Assistant Program.—The summer student program which proved successful last year was expanded this year to provide for increased participation in field offices. On the basis of faculty recommendations and scholastic records, 60 law and undergraduate students were selected to work in the National Office and over 100 in field offices.

Employee-Management Relations.—Primary emphasis was placed on strengthened employee-management relations, including relationships with organized employee groups. This program consisted, in part, in setting up an election process for handling requests for exclusive recognition from organized employee groups, and issuing a pamphlet for all employees explaining the features of the program. Also issued, and later refined, was the Service's policy and procedure to ensure an affirmative approach in dealing and consulting with organized employee groups. Under the established election process, elections have been held in 31 Internal Revenue Service offices. Through open elections, 29 chapters of the National Association of Internal Revenue Employees won the right to exclusively represent 146 units, made up of 13,038 employees in the 31 offices.

A department-wide training course for hearing officers was developed to insure that employee appeals of adverse action would be handled in accordance with new procedures prescribed by the President and the Civil Service Commission.

To give officials more personnel management responsibilities, Assistant Commissioners have been delegated authority to take final action in adverse action cases involving employees under their jurisdiction and to approve outstanding performance ratings.

Incentive Awards Program.—A major accomplishment was realized this year in strengthening administration of the Incentive Awards program. Approval of awards with intangible benefits, together with authority to take final action, was delegated to the lowest practicable level. Suggestions and award recommendations are now reviewed through functional, rather than administrative, channels. In addition, processing procedures were simplified and reporting requirements reduced. Another development was the establishment of the Commissioner's Award—the Service's first exclusive honor award.

Equal Employment Opportunity Program.—The Service has continued its emphasis on appointing and promoting qualified minority people to high level positions. In the South the number of Negro employees in professional and technical positions increased from 11 to 22. Albuquerque, Austin, Little Rock, Oklahoma City, Birmingham, Columbia, Jackson, and Jacksonville, have now been added to the list of offices that have Negroes in revenue agent, revenue officer, and tax technician positions.

Recruitment trips to predominantly minority group schools have succeeded in arousing interest in employment opportunities and have brought to the attention of school officials the Service's occupational requirements so that they may alter their curriculum to better qualify their graduates.

TRAINING

A new Law (Public Law 87-870) provides that representatives of local, State, and foreign governments may participate in Internal Revenue Service training courses. With the assistance of the National Association of Tax Administrators ex-

plorations were begun to determine to what extent and on what basis the Service can assist State governments in meeting their tax enforcement training needs.

A "Tax Administration Orientation for Foreign Tax Officials" program was launched to make official visits of foreign tax officials more meaningful and helpful. The program developed by the Foreign Tax Assistance Staff and the Training Division, includes presentations by the Commissioner and other top officials. Approximately 50 foreign tax officials from 25 nations participated during the year.

Plans for establishing experimental training centers were initiated by setting aside funds for installation of the first regional training center in the San Francisco Region in 1964. Establishment of an experimental national training center awaits only the selection and availability of an appropriate site.

The Commissioner's Committee, set up in 1962 to survey training needs in the collection enforcement area, completed its study and submitted a report proposing a comprehensive career training plan. Action was immediately begun to implement the Committee's recommendations.

Courses were planned or developed to train (1) alcohol and tobacco tax special investigators in laws, regulations, techniques, and procedures, (2) office audit group supervisors in functional management techniques, (3) audit personnel in revised standards and procedures used for determining depreciation for tax purposes, and (4) key punch supervisors in their management problems, and certain administrative personnel in specialized fields. Other new programs were launched (1) to familiarize collection personnel with the impact of automatic data processing on that activity, (2) to train special agents assigned to the Organized Crime Drive, (3) to train internal auditors in the effects of automatic data processing on their work, and (4) to train audit specialists in the examination of exempt organizations.

The 3 basic accounting correspondence courses (fundamental, constructive, and corporation) were converted to machine scoring to expedite the return of graded papers to the students and to accommodate the increased number of enrollments resulting from automatic data processing redeployment.

In June 1963, a committee of 4 distinguished training consultants, appointed by the Secretary of the Treasury to review the total training effort of the Service, submitted its report. It described the program as a whole as "very commendable," and made a number of recommendations for further improvements.

FACILITIES MANAGEMENT

Space.—Most regional and district offices are now in, or have firm commitments for, good space. Many of those offices having firm commitments for new space will move next fiscal year; others are awaiting the completion of new Federal office buildings and will move during the next 2 or 3 years. This progress is particularly gratifying and significant in retrospect. Approximately 2 years ago comparatively few Service offices were properly housed.

Additional space was obtained for 209 offices to relieve crowded conditions and accommodate staff expansion. The following offices were moved into new or modernized buildings: Birmingham, Toledo, Burlington, Hartford, Parkersburg, Philadelphia, and Jacksonville.

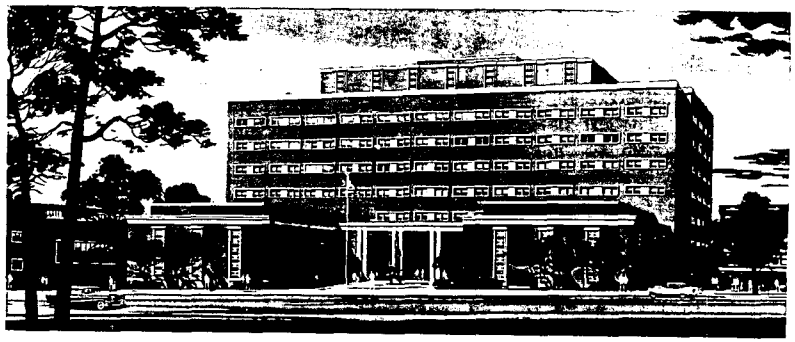
A significant accomplishment was the beginning of construction of a 21-story, 374,000 square foot leased building for the Manhattan District. The problem of proper housing for some 3,000 employees in Manhattan has been pressing for several years. Construction has proceeded rapidly and the building is expected to be ready for occupancy by November 1, 1963.

Progress is also being made toward correcting acute space problems of the offices in Chicago, Wilmington, Miami, Brooklyn, Cincinnati, Denver, San Francisco, Seattle, Dallas, Hollywood, and Aberdeen.

Construction was started on the regional service center buildings in Austin and Philadelphia. Each building, containing over 200,000 square feet of floor area designed for automatic data processing operations, will be ready for occupancy in early fiscal year 1964. Negotiations with the General Services Administration are nearing completion for the major renovation of an existing Government-owned building in Kansas City, Missouri, which will house the Chicago Regional Service Center. The GSA has requested Congressional approval to construct Federally-owned buildings for the Boston and Cincinnati regional service centers and the National Service Center to be located in Detroit.

MODERN OFFICE BUILDINGS PROVIDE MORE EFFICIENT FACILITIES FOR INTERNAL REVENUE SERVICE FIELD OFFICES

Internal Revenue Service Building
Birmingham, Ala.



U.S. courthouse and Federal office building, Hartford, Conn.

Federal office building, Toledo, Ohio

Working cooperatively with the GSA, the Service is revising and expanding its Space Occupancy Guide, to cover local and branch offices as well as regional and district offices. This publication, when reissued in fiscal year 1964, will also reflect significant changes in partitioning requirements for revenue agents and officers, office auditors, and special agents. The new bank-type partition cubicle concept, which has been adopted by the Service, will provide work privacy for a large number of technical employees as well as interview privacy for taxpayers.

Records and Paperwork.—This year's records and paperwork management activities were directed toward keeping abreast of the steadily increasing accumulation of tax returns, related working papers, and other documentary materials received and produced by increased returns processing and revenue enforcement workloads. More than 252,950 cubic feet of records were retired or destroyed, thus making available for reuse urgently needed space and equipment valued at more than $1 million. Because of this continuing emphasis on records disposition and vigorous controls applied to the creation of official records, there was a net increase of less than 1 percent in total records holdings, even though almost a million more tax returns were filed and records produced by IRS reached an all-time high with the installation of additional phases of the automatic data processing system. Records holdings and dispositions are shown in the following table:

Records holdings and disposition activities

Status	Volume of records (cubic feet)	
	1963	1962
In Internal Revenue Service custody, beginning of year	579,618	601,251
Disposed of, total	252,952	229,396
Destroyed	107,301	100,356
Retired to Federal Records Center	145,651	129,040
In Internal Revenue Service custody, end of year	583,687	579,618

Continued attention was given to the development and standardization of needed forms and form letters and the elimination of unnecessary ones. As a result, local forms and form letters have been completely eliminated in 18 district offices; district prescribed forms decreased by 7.0 percent, and regional standardized forms decreased by 0.9 percent; however, service center prescribed forms and National Office prescribed forms increased 25.0 percent and 19.0 percent, respectively. The Service-wide net increase of 3.5 percent in the forms inventory is directly attributable to the conversion to data processing and increased emphasis on taxpayer compliance.

The Internal Revenue Service Envelope Handbook, a first in the Federal Government, is receiving favorable comments by users throughout the Service as a valuable timesaving reference. This publication identifies and illustrates all Service standardized envelopes; specifies the form, form letter, correspondence, or document to be mailed in each envelope; designates usage points and lists sources of supply. Its development has eliminated many proximate sizes formerly used and has permitted centralized contracting for the standardized envelope sizes.

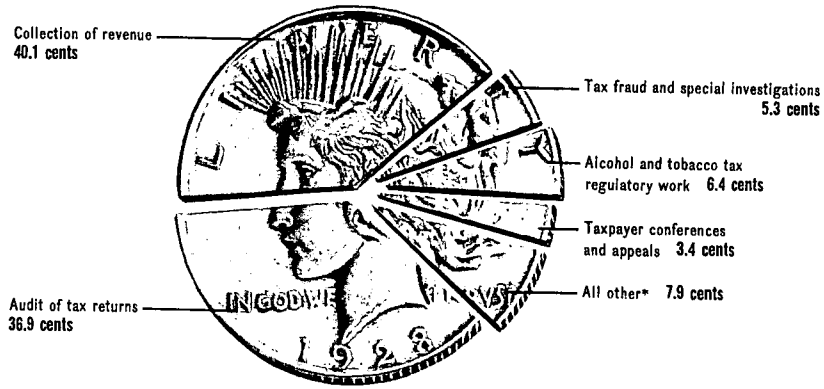
FISCAL MANAGEMENT

The Internal Revenue Service appropriation for 1963 amounted to $503.1 million, consisting of an initial appropriation of $486.0 million and a supplemental appropriation of $17.1 million. The supplement covered the major portion of the cost of the pay increase authorized by Congress in Public Law 87–793, about $1.4 million of which was absorbed by the Service. The Service also absorbed the added cost of postal rate increases, estimated at $400,000, authorized by Public Law 87–793.

The total amount appropriated was $51.1 million more than the 1962 appropriation. After current staff maintenance cost increases were provided for, the remaining funds were sufficient to finance only a portion of the planned increase scheduled for 1963 in the Service's Long-Range Plan. Provision was made in the Financial Plan for continuing the conversion of returns processing to the Master File ADP system (including activation of regional service centers at Cincinnati and Austin); for part of the initial requirements of the Taxpayer Compliance Measurement Program; and for some increase in enforcement and related staffs to keep up with the growing taxpayer population and workload.

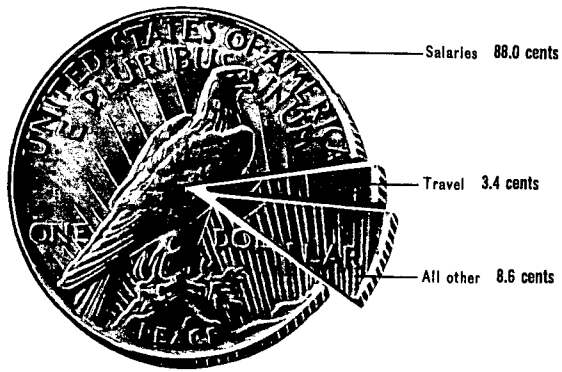
Total obligations in 1963 amounted to $501.7 million (including $0.9 million actual transfer to General Services Administration) compared with

OBLIGATIONS BY ACTIVITY



*Includes rulings, technical planning, and special technical services, 1.6; legal services, 2.5; inspection, 1.6; statistical reporting, 0.9; executive direction, 1.3.

OBLIGATIONS BY OBJECT OF EXPENDITURE



total obligations of $451.2 million in 1962 (including $1.1 million actual transfer to GSA). This is an increase of $50.5 million in actual obligations. Man-years realized totaled 59,711 compared with 56,481 in 1962. This is an increase of 3,230 in man-years actually realized. Table 27 on page 102 shows obligations by object of expenditure and by location. The distribution of expenditures by activity in fiscal year 1963 is shown in the following table:

Obligations incurred by the Internal Revenue Service

[In thousands of dollars]

Activity	Total		Personnel compensation and benefits		Other	
	1963	1962	1963	1962	1963	1962
Total	500,804	450,080	440,542	396,853	60,262	53,227
Rulings, technical planning, and special technical services	7,836	7,068	7,085	6,411	751	657
Collection of revenue	200,901	179,912	170,153	153,529	30,748	26,383
Audit of tax returns	184,867	165,631	171,429	152,921	13,438	12,710
Tax fraud and special investigations	26,577	23,989	22,815	20,616	3,762	3,373
Alcohol and tobacco tax regulatory work	32,139	29,943	26,395	24,821	5,744	5,122

Inspection	7,750	6,610	6,348	5,444	1,402	1,166
Statistical reporting	4,320	3,455	3,256	2,718	1,064	737
Executive direction	6,600	6,044	5,296	4,665	1,304	1,379

Detailed studies were made of 2 significant budgetary programs of the Service. The first study was to determine whether present practices concerning per diem and related costs for employees in recruit training programs are in the best interests of the Government and are reasonable and equitable from the standpoint of new employees, or whether need exists for modification of present practices. The payment of per diem and related travel expenses to recruit trainees constitutes a sizable budgetary item, particularly during the period of staff expansion. Final decisions on the recommendations resulting from the study will be effected next year.

The second study had the objective of determining whether improvements could be made in the methods of estimating, budgeting, controlling, and reporting grade structure changes. This annual program, including advancement of trainees to the journeyman level, requires a substantial budgetary outlay. As a result of the study, a number of changes will be made in 1964 which will provide a more effective and uniform control to insure that an equitable structure, as funded by Congress, will be maintained.

INSPECTION ACTIVITIES

The Inspection activity provides for an independent review and appraisal of the effectiveness and efficiency of Service operations through its internal audit function, as well as an internal security program to assure maintenance of the highest standards of employee integrity.

Inspection was founded as an independent activity to assist top mangement with the problem of internal control by gathering and reporting facts pertaining to offices and individuals. Often these reported facts form the basis upon which management takes action to improve operations and the integrity of the Service.

Internal Audit.—An annual independent review and appraisal of Service operations as a protective and constructive service to the Commissioner and all other levels of management is carried out through the internal audit program. All field organizations and activities are covered by internal audit to determine whether policies, practices, procedures, and controls adequately protect the revenue and are being efficiently and effectively carried out. The expansion of the automatic data processing activity to the present National Computer Center and 5 service centers, which utilize high-speed electronic computers and related peripheral equipment, has increased the internal audit responsibilities of Inspection. Emphasis in Internal Audit is placed on examination of the Service functions which are most closely connected with collection of the revenues and enforcement of the tax laws, and on coordination with Internal Security to carry out the integrity program of the Service.

During the year 355 internal audit reports were issued, compared with 303 in 1962. The increase was caused primarily by the separate reporting on audits of the Organized Crime Drive functions of the Intelligence activities.

In addition, Internal Audit carried out a number of special assignments, including participation in the annual audit of the Treasury Department's Exchange Stabilization Fund, and provided follow-up assistance to the Tax Division of the Virgin Islands Department of Finance, which was reorganized as a result of the comprehensive survey completed in 1962.

Internal Security.—Successful administration of the voluntary self-assessment system of taxation depends a great deal on integrity of taxpayers and their representatives as well as integrity and impartiality among officials and employees of the Service. The Service continued the vigorous efforts started the previous year to promote understanding among its employees, taxpayers, and practitioners regarding the importance of integrity and the need to expose corruption wherever discovered.

Forty-six cases of actual or suspected bribery by taxpayers or their representatives were reported by Service employees to Inspection. Investigations resulted in indictments of 10 taxpayers or their representatives, and additional prosecutions are contemplated in a number of pending cases. This makes a total of 20 persons indicted for attempting to bribe Internal Revenue employees during the past 2 years. To date 15 have been convicted.

Investigations completed during the year totaled 10,011, which was 11.8 percent more than in the preceding fiscal year. This is the highest number completed in the 11-year history of Inspection. In addition, police checks were made on 3,413 employees given short-term temporary appointments.

A tabulation of the various types of investigations and disciplinary actions follows:

Investigations and disciplinary actions

Type of investigation and action	1963	1962
Total investigations closed	10,011	8,956
Personnel investigations		
Number of cases closed, total	8,626	7,701
Character and security investigations	5,036	5,017
Conduct investigations	771	665
Special inquiries	2,819	2,019
Actions taken by Service management officials as a result of personnel investigations		
Disciplinary actions, total	848	639
Separations, total [1]	271	215
Bribery, extortion, or collusion	16	5
Embezzlement or theft of Government funds or property	17	15
Failure of employee to pay proper tax	17	15
Falsification or distortion of Government reports, records, etc.	89	69
Unauthorized outside activity	11	8
Failure to discharge duties properly	9	14
Refusal to cooperate	13	
Divulgence of confidential information	1	2
Acceptance of fees or gratuities	3	4
Personal and other misconduct	95	83
Suspensions from duty and pay	42	34
Reprimands, warnings, reassignments, transfers, or demotions	535	390
Nondisciplinary actions	7,778	7,062
Other investigations		
Number of cases closed, total	1,385	1,255
Applications for admission to practice before the Internal Revenue Service	636	647
Charges against enrollees	117	98
Federal tort claims	168	153
Attempted bribery	47	19
Discrimination	2	3
Investigations for other Treasury bureaus	415	335

[1] Includes resignations, retirements, or other separations while employees were under investigation or before administrative decision was made on disciplinary action where investigation disclosed derogatory information.

ENROLLMENT OF PRACTITIONERS AND DISCIPLINARY ACTIONS

General.—The Office of Director of Practice continued its program of revitalization, which resulted in various changes in regulations governing practice, a modification of the Special Enrollment Program, and increased vigilance with respect to the ethics of all types of practitioners.

Amendments to Treasury Department Circular 230 (Revised 1958).—In order to conform the eligibility requirements for practice, as set forth in 31 CFR Part 10 (Circular 230), more closely with the various State rules governing qualification for the practice of law and accounting, amendments were made to Sections 10.3(d) (1) and (2); 10.4(d); 10.29; and 10.51(b)(28). Two basic changes were effected: (1) Attorneys and certified public accountants are no longer subject to the requirement that they be engaged in the active practice of their respective professions; and (2) the former

ineligibility of persons who are full-time employees of corporations, or of individuals or partnerships not engaged in the practice of law or accounting, was eliminated. In addition, the amendments clarified the provision in Circular 230 which relates to solicitation of practice in any unethical or unprofessional manner.

Enrollment and disciplinary cases

Type of cases	1963	1962
Enrollment applications:		
Approved, total	6,782	5,603
Attorneys	3,734	3,021
Agents	[1] 3,048	[2] 2,582
Withdrawn or abandoned:		
Attorneys	3	-------

Enrollee attorneys	57	[3] 55
Enrollee agents	96	

[1] Includes 2,516 CPAs, 75 former IRS employees, and 457 Special Enrollment Examination candidates.
[2] Includes 1,971 CPAs, 141 former IRS emloyees, and 470 Special Enrollment Examination candidates.
[3] For 1962, there is no breakdown between attorneys and agents.

Special Enrollment Examination Program.—The annual cost to the Treasury Department of enrolling persons to practice before the Internal Revenue Service by means of the Special Enrollment Examination in recent years has been more than double the receipts obtained from examination candidates. By statutory enactment, Congress has decreed that programs of this nature shall be self-sustaining, insofar as possible, and that the fees charged shall be fair and equitable in relation to the costs involved and interests served.

After careful analysis, it was determined that an examination fee of $25 is an equitable charge to candidates who take the Special Enrollment Examination, authorized by Section 10.3(e) of Circular 230. Public announcement of this determination was made on April 17, 1963, and the $25 fee is applicable to candidates who take the examination to be held in September 1963.

This year, 457 persons were enrolled as a result of the Special Enrollment Examination, compared to 470 in 1962.

Renewal of Enrollment Cards.—The year showed a normal decrease in the total of renewed enrollment cards from 1962, which was the second peak year of the cycle established 10 years earlier for periodic renewal of enrollment cards at 5-year intervals. Of those who enrolled or who renewed their cards in 1958, there were approximately 3,200 who did not renew in 1963.

Approved Enrollment Applications.—Original applications for enrollment approved this year total 6,782, and exceed last year's total by more than 1,000, as shown in the table. At the end of the year approximately 73,500 persons were enrolled to practice before the Service, an increase of approximately 3,500 over the previous year's total.

Derogatory Information Cases.—After complete processing and closing of 223 derogatory information cases, the Office had pending 237 cases at the end of the year, or approximately three times the number of cases pending at the end of the preceding year. This increase is, again, an indication of continuing awareness of what is expected of the tax practitioner, and of the vigilance being exerted to properly regulate practice, especially with respect to the ethical behavior of practitioners.

Representation by Former Employees.—Enactment of Public Law 87-849, the so-called Conflicts of Interest Statute, effective January 21, 1963, and coded Title 18, U.S.C., 201-218, has made necessary certain changes in Treasury Department Circular 230, as it relates to practice before the Internal Revenue Service in particular matters by former officers and employees of the Service.

Pending issuance of amended regulations and pursuant to the provisions of the new law, a procedure was devised whereby a "declaration" is required to be filed by the former officer or employee, indicating (1) whether he ever participated personally and substantially in the matter at hand; and (2) whether the case was under his personal consideration within one year prior to the termination of his Service employment. After

investigation of the declaration, the former employee is no longer given or refused a "consent" to appear in the matter, but instead is advised whether or not any information in the Service indicates that his representation of the taxpayer might be violative of the new statute.

This temporary procedure has been of considerable value in maintaining a normal work-flow in this particular type of case, without detriment to the practitioner in the form of undue time-lags while steps required to revise Form 901 and to amend Circular 230 are in process.

Unenrolled Preparers.—Unenrolled preparers of tax returns—those preparers who, under limited circumstances, may represent their clients before revenue agents and office auditors without enrollment—have evidenced an increased awareness of the ethical conduct required of them. Persons exercising this limited privilege of practice are required to maintain the same level of compliance to ethical standards as that required of enrolled practitioners.

Authority to deny the privilege of limited practice to such individuals not so deporting themselves is vested in the various district directors, with the right of appeal to the Director of Practice. Adherence to a system of cooperative exchange of information between the district offices and the Office of Director of Practice has served to curb abuses in this area, and to increase compliance with, and regulate activity under, the rules governing activities of unenrolled preparers of tax returns.

ADVISORY GROUP

In keeping with the practice of periodically changing the membership, the Commissioner appointed a new Advisory Group in November 1962. The Group—whose purpose is to provide constructive criticism of Service policies, procedures, and programs and suggest ways in which the Service can improve its operations—met 3 times during the year: December 19-20, 1962, March 14-16, 1963, and June 6-8, 1963. The members of this Group are as follows:

Walter Blum
University of Chicago
Chicago, Ill.

Marvin K. Collie
Vinson, Elkins, Weems & Searls
Houston, Tex.

Louis Eisenstein
Arnold, Fortas & Porter
Washington, D.C.

Richard B. Goode
The Brookings Institution
Washington, D.C.

W. Croft Jennings
Roberts, Jennings, Thomas and Lumpkin
Columbia, S.C.

Hover T. Lentz
Dawson, Nagel, Sherman, & Howard
Denver, Colo.

Eugene J. Patton
Peat, Marwick, Mitchell Company
New York, N.Y.

Mark E. Richardson
Lybrand, Ross Bros. and Montgomery
New York, N.Y.

Wilbur J. Schraner
Van Nuys, Calif.

Louis Schreiber
E.I. du Pont de Nemours & Co.
Wilmington, Del.

Henry L. Shepherd
Shepherd, Murtha & Merritt
Hartford, Conn.

James F. Thornburg

TAXPAYER PUBLICATIONS

Your Federal Income Tax, IRS Publication No. 17, is written for individual taxpayers. A new style of type, which allows more letters per line but does not detract from readability, was adopted for the 1963 edition in order to include latest changes in law, regulations, etc. without increasing the size of the booklet. In addition to covering in detail the run-of-the-mill problems of the average taxpayer, the 1963 edition furnished simplified explanations of the more complex problems which the average taxpayer may encounter and brief explanations of some new provisions of the laws. A filled-in sample of the individual return appears in the front of the book. All parts of the return are keyed to page numbers in the booklet where detailed explanations and examples can be found. The 1963 edition contains 144 pages and sold for 40 cents a copy by the Government Printing Office and local Internal Revenue offices. This book ranks among the best sellers of Government publications. Approximately 865,000 copies were sold this year, representing an increase of about 165,000 copies over last year. In addition, 90,000 copies were used in the Teaching Taxes Program, the Taxpayer Assistance Program, and in various training programs.

Tax Guide for Small Business, IRS Publication No. 334, is written especially for sole proprietorships, partnerships, and corporations. This booklet, like *Your Federal Income Tax*, is an important segment of the Commissioner's program for more effective taxpayer assistance and education. Income, excise, and employment taxes are explained and numerous examples are used to illustrate the application of the laws. A check list, of particular interest to new businessmen, shows, at a glance, the taxes for which different kinds of business organizations and business activities may be liable and what the business should do about them. A tax calendar for 1963 is also provided to assist businessmen in keeping track of when various actions should be taken during the year with respect to all their Federal taxes. As in the case of *Your Federal Income Tax*, a new style of type which allows more letters per line but does not detract from readability was adopted for the 1963 edition in order to include the latest changes in law, regulations, etc., without increasing the size of the booklet. Brief explanations of new laws taking effect during the current year, were included in this edition, so that the businessmen could make necessary preparations for filing their 1963 returns. The booklet contains 144 pages and is sold for 40 cents a copy by the Government Printing Office and local Internal Revenue offices. This year over 275,000 copies were sold and 40,000 copies were used by the Service.

Farmer's Tax Guide, IRS Publication No. 225, explains the tax problems of farmers. This booklet features a tax calendar devised especially for farmers, to help them keep track of their tax obligations throughout the year. The booklet discusses income, employment, and self-employment taxes and contains numerous examples illustrating the rules. It contains 64 pages, and 1,250,000 copies were distributed through Internal Revenue offices and agricultural extension agents of the Department of Agriculture.

Tax Guide for U.S. Citizens Abroad, IRS Publication No. 54, a 31-page pamphlet written especially for U.S. citizens residing or working abroad, explains their obligations under the Internal Revenue laws. It tells the conditions under which income earned abroad may be exempt from taxation, the requirements for filing Federal income tax returns, and methods of determining whether earned income is wholly or partially exempt from tax. U.S. consulates, embassies, and Office of International Operations distributed approximately 76,000 copies.

U.S. Tax Guide for Aliens, IRS Publication No. 433 (also known as Information Guide No. 9) is a 28-page pamphlet which explains the U.S. tax provisions applicable to both resident and nonresident aliens. It contains a general discussion of the provisions of the U.S. tax treaties and the basis for determining whether or not an alien is engaged in trade or business in the United States. Approximately 32,000 copies were sent for free distribution to U.S. embassies, consulates, and district offices.

Tax Return Filing Requirements for U.S. Citizens Abroad, IRS Document 5357, a 6-page pamphlet outlining briefly the requirements for filing tax returns by U.S. citizens abroad, was published for distribution to U.S. citizens through U.S. consulates and embassies abroad.

Information Guides—International Operations

No. 1—Fulbright Grants and U.S. Income Tax

No. 2—Income Tax Deductions of Members of the Foreign Service Department of State

No. 3—Dual-Status Tax Years of Alien Taxpayers (Formerly known as Change of Status Year for Nonresident Alien Taxpayers)

No. 4—Claims for Recovery of Manufacturer's Excise Tax on Exported Articles

No. 5—Social Security Coverage for Clergymen and Religious Workers Abroad

No. 6—Preparation of Form 1040B

No. 7—Tax Advice for Foreign Scholars and Visitors on Official Educational and Cultural Exchange Programs (Formerly known as Foreign Scholars and U.S. Income Tax)

No. 9—U.S. Tax Guide for Aliens (Described above as IRS Publication No. 433)

Motor Fuel Tax Pamphlets explain the latest rules in regard to the various Federal motor fuel taxes. There are 3 such pamphlets:

Federal Use Tax on Highway Motor Vehicles, IRS Publication No. 349

Federal Gasoline Tax Refund for Nonhighway and Transit Use, IRS Publication No. 378

Farmer's Gasoline Tax Refund, IRS Publication No. 308

Teaching Taxes, IRS Publications Nos. 19, 21, 22, and 27, is a program to acquaint high school and college students, and others with the basic principles and rules underlying the Federal self-assessment system of taxation. Over 2,250 thousand students participated in the program last year.

Decedents, IRS Document No. 5446, is a new 4-page pamphlet which has been added to other free taxpayer assistance material available to the public. Published for the benefit of surviving widows, widowers, and others charged with the responsibility of handling the affairs of the deceased, the pamphlet provides information needed for filing the final return of the decedent. It explains when and by whom the final return must be filed and what income must be included. It also discusses the taxability of income received by a survivor in respect of a decedent, and explains how to determine the basis of inherited property..

Investment Income and Expenses, IRS Document No. 5448, is a new free pamphlet for the assistance of taxpayers. This 24-page document brings together all of the information needed by an individual whose income is derived from stocks, bonds, or other investment property. Included are discussions of fully taxable, partially taxable, and tax exempt interest; dividends and the dividends exclusion and credit; gains and losses on sales of investment property; the basis of the property; the special treatment afforded investors in small business investment company stock; the tax treatment of investment clubs; and the deductibility of expenses incurred in connection with investment property.

Income Tax Regulations

Treasury Decision 6604 contains the amendment to regulations issued under section 213 of the Code, which provides that a capital expenditure directly relating to medical care is deductible as a medical expense to the extent that the expenditure exceeds the increase in the value of the related property. Published July 24, 1962.

Treasury Decision 6606 contains the regulations, issued under Public Law 87–397, which provide for the requesting and furnishing of identifying numbers, and the inclusion of identifying numbers in returns, statements, and other documents made with respect to most taxes. Published August 25, 1962.

Treasury Decision 6621 contains the regulations, issued under sections 318 and 6038, which require all U.S. persons in control of a foreign corporation or a chain of foreign corporations to submit an annual information return for each controlled foreign corporation, the annual accounting period of which begins after December 31, 1962. Published December 1, 1962.

Treasury Decision 6623 contains the regulations, issued under section 6046, which require an information return on Form 959 from each U.S. citizen or resident who on or after January 1, 1963, is an officer or director of a foreign corporation, if 5 percent or more in value of the stock of such foreign corporation is owned by a U.S. person, and from a U.S. person who on or after January 1, 1963, owns or acquires 5 percent or more in value of the stock of a foreign corporation, for each additional 5 percent interest acquired. Published December 1, 1962.

Treasury Decision 6628 contains amendments to the regulations, issued under sections 6041, 6042, 6044, 6049, 6652, and 6678, as amended or added by section 19 of the Revenue Act of 1962. These amendments provide for the filing of information returns with the Service with respect to payments of interest, dividends, and patronage dividends, and to the furnishing of statements concerning such payments to recipients. Published December 28, 1962.

Treasury Decision 6630 contains the regulations, issued under section 274(d) of the Code, as added by the Revenue Act of 1962, which provide that travel, entertainment, and gift expenses must be substantiated by adequate records or by sufficient evidence corroborating the taxpayer's own statement in order for such expenses to be allowed as a deduction under section 162 or 212; and which provide specific rules for substantiating such expenses. Published December 29, 1962.

Treasury Decision 6631 contains the amendment to the regulations, issued under section 37, as amended by sections 1 and 2 of Public Law 87–876, which provides for an increase in the maximum amount of retirement income with respect to which the retirement income credit is allowable from $1,200 to $1,524. Published January 15, 1963.

Treasury Decision 6643 contains the regulations, issued under sections 1381 through 1388 of the Code, as added by the Revenue Act of 1962, which provide rules with respect to the tax treatment of cooperatives and their shareholders. Published April 2, 1963.

Treasury Decision 6645 contains the amendments to the regulations, issued under sections 6033 and 6104, which require the submission of additional information by certain exempt organizations and provide for fuller and more convenient disclosure of information to the public. Published April 2, 1963.

Treasury Decision 6659 contains the regulations, issued under section 274 of the Code (other than subsection (d)), as added by the Revenue Act of 1962, which provide substantive rules for determining whether travel, entertainment, and gift expenses which meet the requirements of section 162 or 212 will or will not be disallowed as deductions. Published June 25, 1963.

Temporary Regulations

Treasury Decision 6619 contains the temporary regulations, issued under section 46 of the Code, as added by the Revenue Act of 1962, which provide rules as to the apportionment of the $25,000 investment credit limitation among members of an affiliated group; and rules pertaining to the election of a lessor of new "section 38 property" to treat the lessee as the purchaser. Published November 20, 1962.

Employment Tax Regulations

Treasury Decision 6654 amends the regulations relating to the withholding of income tax from wages, to conform to the Foreign Service Act Amendments of 1960, the Mutual Educational and Cultural Exchange Act of 1961, the Peace Corps Act, and the Self-Employed Individuals Retirement Act of 1962. Published May 28, 1963.

Treasury Decision 6658 amends the regulations relating to the Federal Unemployment Tax Act to conform to legislation enacted during and before the fiscal year. Of particular importance were the provisions of the Social Security Amendments of 1960 under which a taxpayer's credit against the Federal unemployment tax may be reduced if advances made to a State under title XII of the Social Security Act are not repaid by the State within a specified time. Published June 27, 1963.

Excise Tax Regulations

Treasury Decision 6612 contains the regulations, issued under section 4021 of the Code, and relates to the application of the retailers' excise tax on the sale of toilet preparations. Published October 11, 1962.

Treasury Decision 6618 contains the regulations, issued under sections 4261 through 4264 of the Code, as amended by the Tax Rate Extension Act of 1962 (Public Law 87–508). These regulations relate to the application of the tax on the transportation of persons by air which transportation begins after November 15, 1962. These regulations also contain rules relating to the exemption from tax on the U.S. portion of air transportation which is part of uninterrupted international air transportation. Published November 14, 1962.

Treasury Decision 6635 contains the regulations, issued under section 4216(f) of the Code, as added by section 1 of Public Law 86–781. These regulations relate to the exclusion of charges for local advertising for purposes of determining the price on which the manufacturers' excise tax is to be computed. Published February 7, 1963.

Treasury Decision 6650 contains the regulations, issued under section 6416 of the Code, providing rules of special application relating to credits and refunds of the retailers' and manufacturers' excise taxes. Published May 2, 1963.

Alcohol and Tobacco Regulations

Treasury Decision 6606 amended regulations in 26 CFR Parts 179, 194, 196, 197, 201, and 245 to authorize the requirement of employer identification numbers in connection with special tax returns.

Treasury Decisions 6607 and 6608 amended regulations in 26 CFR Parts 201, 240, 245, 270, and 285 to require identification numbers on commodity tax returns.

Treasury Decision 6634 amended regulations in 26 CFR Part 212 to provide for the use of alternate denaturants in completely denatured alcohol and in specially denatured alcohol Formula No. 40, and to authorize the use of certain specially denatured alcohol formulas in the manufacture of synthetic resins.

Treasury Decision 6644 amended regulations in 26 CFR Part 251 to eliminate specific sizes for barrels and kegs of imported beer, and to make it clear that the tax must be computed on the quantity actually imported.

E.O. 11109	Inspection of returns by House Committee on Un-American Activities.	5/30/63

SIGNIFICANT REVENUE RULINGS AND PROCEDURES

The Service has outlined the deductibility, under section 162 of the Code, of "payola" payments made to disc jockeys of radio or television musical programs (Rev. Rul. 62-133, C.B. 1962-2, 45).

One free meal per day furnished an employee by his employer represents an appreciable part of the employee's remuneration, the value of which is "wages" for Federal employment tax purposes (Rev. Rul. 62-150, C.B. 1962-2, 213).

The Service has discussed the deductibility, as business expenses under section 162 of the Code, of expenditures for advertising designed to encourage employees or the general public to register and vote or to contribute to campaign funds of a political candidate or party, or for sponsoring a public debate by candidates for an office, etc. (Rev. Rul. 62-156, C.B. 1962-2, 47).

For purposes of the manufacturers' excise tax on automobile "parts or accessories," the restoration of unserviceable automobile bumpers is a "rebuilding" (manufacturing) operation (Rev. Rul. 62-162, C.B. 1962-2, 241).

Based upon the current situation in the industry, a new administrative test has been established for presumptively determining the applicability of the manufacturers' excise tax to gas water heaters (Rev. Rul. 62-168, C.B. 1962-2, 242).

The Service has set forth guidelines and some examples for computing deductions which an employee may claim for expenses attributable to the portion of his personal residence which he is required to use in the performance of his services as an employee (Rev. Rul. 62-180, C.B. 1962-2, 52).

The documentary stamp tax on conveyances of realty sold applies to the transfer of real property by a company to the trustee of its pension plan for the purpose of funding the past service costs under the plan (Rev. Rul. 62-186, C.B. 1962-2, 279).

Kickback payments made in violation of a Federal or State law or regulation are not deductible by the payer (Rev. Rul. 62-194, C.B. 1962-2, 57).

The Service has discussed the tax treatment of losses arising from the confiscation by the Government of Cuba of properties in Cuba owned by United States citizens or corporations (Rev. Rul. 62-197, C.B. 1962-2, 66).

An "exclusive club or organization" may be a "social, athletic, or sporting club or organization" for purposes of the tax on club dues even though it is privately owned and operated for profit (Rev. Rul. 63-3, I.R.B. 1963-1, 15).

Guidelines have been furnished for determining whether reimbursement arrangements and per diem or mileage allowance practices of employers satisfy the substantiation requirements of the income tax regulations (Rev. Rul. 63-13, I.R.B. 1963-4, 20).

The Service has set forth criteria for determining whether obligations by a corporation, formed under the general nonprofit corporation laws of a State to stimulate industrial development in a political subdivision thereof, are issued "on behalf of" that subdivision (Rev. Rul. 63-20, I.R.B. 1963-5, 7).

The Service has explained the rules for the special tax treatment of losses suffered by property owners as the result of major disasters and has identified the 1962 disasters which give rise to such treatment (Rev. Rul. 63-21, I.R.B. 1963-8, 12).

In order to provide guidance in the uniform application of the manufacturers' excise tax on automobile "parts or accessories," the Service has set forth taxable and nontaxable lists containing

brief descriptions of numerous articles not specifically covered by previously published rulings (Rev. Rul. 63-23, I.R.B. 1963-9, 7).

A merger may qualify as a reorganization under section 368(a)(1)(C) of the Code even though the business conducted by the acquiring corporation after the merger is not the same as it had conducted prior thereto (Rev. Rul. 63-29, I.R.B. 1963-10, 9).

A list of countries which have been found by the Secretary of Commerce to allow or not allow substantially reciprocal privileges in respect of aircraft registered in the United States, for purposes of exemption from the manufacturers' excise taxes and certain retailers' excise taxes, has been updated (Rev. Rul. 63-62, I.R.B. 1963-14, 14).

Interview expense allowances paid to an individual by a prospective employer are not subject to the withholding of income tax and, to the extent that they cover actual expenses, are not includible in gross income (Rev. Rul. 63-77, I.R.B. 1963-19, 18).

The maximum limitation for medical expenses provided by section 213(g) of the Code is available to a taxpayer age 65 or over and disabled, even though he has never been engaged in any substantial gainful activity (Rev. Rul. 63-101, I.R.B. 1963-22, 11).

The Service published new depreciation guidelines, rules, and illustrative questions and answers (Rev. Proc. 62-21, C.B. 1962-2, 418).

The Service revised its procedures relating to the issuance of rulings and determination letters, furnishing technical advice to district directors, processing requests for exemption under sections 501 and 521 of the Code, and processing requests for the qualification of pension, annuity, profit-sharing, and stock bonus plans under section 401(a) of the Code and the exemption of related trusts under section 501(a) of the Code (Rev. Procs. 62-28, 62-29, 62-30, and 62-31, C.B. 1962-2, 496, 507, 512, and 517).

SIGNIFICANT ANNOUNCEMENTS OF GENERAL INTEREST

A self-cover pamphlet, IRS Publication No. 456, which contains the new guidelines and rules for depreciation, has been prepared and made available for purchase from the Superintendent of Documents, Washington, D.C., 20402 (Announcement 62-69, I.R.B. 1962-30, 51).

Three complete tables have been prepared for use in the application of Revenue Procedure 62-21, relating to the new depreciation guidelines and rules (Announcement 62-82, I.R.B. 1962-38, 12).

Additional questions and answers were issued to serve as an aid in applying the new depreciation guidelines and rules outlined in Revenue Procedure 62-21 (Announcement 62-84, I.R.B. 1962-40, 33).

1962 income tax returns reflect recent tax law revisions—also many improvements both in the forms and their instructions (Announcement 62-103, I.R.B. 1962-48, 74).

Good record-keeping practices will be vital to the allowance of business travel, entertainment, and gift expenses (Announcement 63-8, I.R.B. 1963-4, 35).

"Your Federal Income Tax," "Tax Guide for Small Business," and the "Farmer's Tax Guide" have been prepared for 1963 (Announcement 63-15, I.R.B. 1963-5, 46).

The index to administrative and procedural matters, other than those related to the alcohol, tobacco, and firearms taxes and those prescribed by regulations, which have been published in the Internal Revenue Bulletin since 1952, has been brought up to date (Announcement 63-21, I.R.B. 1963-7, 5).

The Service has listed all taxpayer information pamphlets and other publications on specific tax subjects which are available from local offices of the Service (Announcement 63-25, I.R.B. 1963-8, 22).

The Service announced the availability of Document No. 5049, containing an explanation of the rules regarding the substantiation requirements of travel, entertainment, and gift expenses claimed as deductions on income tax returns (Announcement 63-37, I.R.B. 1963-13, 25).

A brief summary of the various records required to be retained for Federal tax purposes has been published in the Federal Register as the current Guide to Record Retention Requirements (Announcement 63-43, I.R.B. 1963-15, 21).

A new series of supplements to the Cumulative List of Exempt Organizations has been established for bimonthly cumulative publication in pamphlet form (Announcement 63-60, I.R.B. 1963-23, 32).

SIGNIFICANT TECHNICAL INFORMATION RELEASES

A new form has been prepared for the use of business and financial institutions in requesting tax identifying numbers from depositors and investors (T.I.R. 401, 9–26–62).

There will be a reduction in the amount of credit against the Federal unemployment tax to be allowed to employers of 4 or more with respect to 1962 wages for services performed in Alaska and Michigan (T.I.R. 421, 11–29–62).

The Service will apply existing provisions of the regulations in its consideration of the qualification of deferred compensation plans under new provisions of section 401(a) (7) and (8) of the Code (T.I.R. 425, 12–18–62).

Amendments to the regulations have been proposed to require additional information from certain exempt organizations and to provide for a fuller and more convenient disclosure of information to the public (T.I.R. 435, 12–30–62).

Commercial fishermen are now treated the same as farmers with respect to the filing of estimated income tax returns and the payment of estimated tax for taxable years beginning after 1962 (T.I.R. 440, 1–4–63).

Proposed regulations under section 964(c) of the Code would impose certain record-keeping requirements on U.S. shareholders with respect to each controlled foreign corporation; requirements explained (T.I.R. 461, 3–23–63).

For years after April 10, 1963, Maryland redeemable ground rents will be treated as mortgages for purposes of acquisition, holding, and transfer of property subject thereto; for 1962 and subsequent years, rental payments under such a redeemable ground rent are deductible as interest (T.I.R. 465, 4–10–63).

Rulings and determination letters will not be issued with respect to the tax status of professional service organizations pending the issuance of amendments now being drafted to the applicable regulations (T.I.R. 471, 5–8–63).

SUPREME COURT DECISIONS

Civil Cases

In *Braunstein* v. *Commissioner*, decided on June 10, 1963, 374 U.S. 65, the Supreme Court rejected an argument by the taxpayers that section 117(m) of the 1939 Code did not require that gain from the sale of stock of a collapsible corporation be treated as ordinary income where, if the shareholders had not operated in corporate form, gain on the sale of the underlying assets (apartments) would have been treated as capital gain. The Court acknowledged that the purpose of section 117(m) was to close a loophole that had been used to convert ordinary income to capital gain, but said the plain meaning of the statute covered the transaction precisely. Neither the language of the statute nor its legislative history supported the additional requirement which taxpayer sought to impose on the Courts of determining in each case whether the corporate form had been used for tax avoidance purposes.

On January 7, 1963, the Court, in *United States* v. *Buffalo Savings Bank*, 371 U.S. 228, reversed the decision of the New York Court of Appeals and remanded the case for further proceedings. The Court of Appeals had held that local property taxes were "expenses of sale" in a foreclosure action brought by the mortgagee, and consequently the local tax liens, which accrued later than the federal tax liens, were accorded priority in the distribution of proceeds of the foreclosure sale. The Supreme Court rejected this contention, and held that the case was governed by the doctrine enunciated in *United States* v. *New Britain*, (1954) 347 U.S. 81, that "first in time is first in right." Since federal tax liens were prior in time to the local tax liens, the federal taxes were entitled to payment ahead of the local property taxes. The Court also indicated that the State may not avoid the priority of the federal tax lien by the formalistic device of characterizing subsequently accruing local tax liens as expenses of sale.

In *Riddell* v. *Monolith Portland Cement Company*, decided January 14, 1963, 371 U.S. 537, the Court overruled a number of lower court opinions holding that manufacturers of cement using their own raw materials could, for years prior to 1961, compute percentage depletion on gross income from the sale of cement. By upholding the Government's contention that a uniform test of the first commercially marketable product must be applied to determine the cutoff point in the treatment process of each general mineral classification, the Court's decision assured that manufacturers with captive sources of minerals would not get larger depletion deductions than would be allowable in the case of extraction and sale of the crude minerals. This

case is proving dispositive of similar outstanding controversies involving salt, brick and tile clay, dimension stone, and minerals used in the manufacture of light weight aggregates. It appears to have checked a trend in some jurisdictions toward the judicial erosion of the principles enunciated in *United States* v. *Cannelton Sewer Pipe Company* (1960) 364 U.S. 76.

On February 18, 1963, the Supreme Court issued similar opinions in 2 tax cases, and considered a third.

In *United States* v. *Gilmore*, 372 U.S. 39, the Court held that legal expenses incurred by a taxpayer in defense of a divorce action were not deductible as expenses incurred for the conservation of income-producing property. The taxpayer's primary concern was the protection of his controlling interest in 3 corporations from which an all but negligible amount of his income was derived in the form of corporate salary and dividends. The Court thus set forth the test for deductibility of legal expenses as the origin and character of the claim in connection with which the expense was incurred, rather than the potential consequences should the claim not be successfully resisted. The Court also found that the legal expenses at issue were not connected with the taxpayer's profit-seeking activities even though the wife's claims might have been paid out of income-producing properties.

On the same date, in *United States* v. *Patrick*, 372 U.S. 53, the Court held that legal fees relating to a property settlement incident to divorce were nondeductible. The Court believed that the principles of the *Gilmore* case governed. Such fees were nondeductible since they arose from the marital relationship, even though they were paid for arranging transfers of stock, leasing property, and creating a trust, rather than for litigation.

In *Schlude* v. *Commissioner*, 372 U.S. 128, the Court again considered the problem of an accrual basis taxpayer's attempt to defer reporting of prepaid income. Under the taxpayer's method of accounting, only "earned income" (computed on the hours of dance instructions given to students) and income from cancellation of contracts was reported currently. The Commissioner determined that the method of accounting used did not clearly reflect income and he included all advance payments received in cash and the full face amount of notes and contracts executed by students. He retreated somewhat from this position in the Supreme Court and conceded that the contracts should not be included at face value but only the amounts that became due in the taxable years or for which dance instructions had been furnished. In a five to four opinion the Court sustained the Commissioner's position, stating that the issue was squarely controlled by *American Automobile Association* v. *United States* (1961), 367 U.S. 687.

In *Maximov* v. *United States*, 373 U.S. 49, decided on April 29, 1963, the Court held that a United States trust, all of whose beneficiaries are British subjects and residents, cannot be considered a "resident of the United Kingdom" for purposes of determining whether its retained capital gains are exempt from United States income tax by virtue of Article XIV of the Income Tax Convention between the two countries, which Convention exempts capital gains of United Kingdom residents. The decision overrules *American Trust Company* v. *Smyth* (C.A. 9th 1957), 247 F. 2d 149, and adopts the long-standing rule that a trust is a separate taxable entity from its beneficiaries.

In *Whipple* v. *Commissioner*, 373 U.S. 193, decided on May 13, 1963, the Court held that although the taxpayer devoted his fulltime to the affairs of several corporations, such activities did not constitute a trade or business. Accordingly, it was held that bad debts resulting from loans by the taxpayer to his controlled corporation were not deductible as business bad debts. However, the case was remanded to the Tax Court to determine whether the bad debt was proximately related to the taxpayer's real estate business.

On June 10, 1963, the Court decided the case of *United States* v. *Pioneer American Insurance Co., et al.*, 374 U.S. 84, reversing The Supreme Court of Arkansas and remanding the case for further proceedings. The Arkansas Supreme Court had held that the attorney's fee incurred by the mortgagee in foreclosing its mortgage was prior to the federal tax lien. The mortgage itself was conceded to be prior to the federal tax lien. The Arkansas court reasoned that under the Arkansas statute the attorney's fee was enforceable as a contract of indemnity and therefore the right to the attorney's fee became choate prior to the date of the filing of the first notice of tax lien since the default entitling the mortgagee to enforce the indemnity contract occurred prior to that date. The U.S. Supreme Court rejected this argument and held that, since the amount of the claim for the attorney's fee was

undetermined and indefinite when the notices of tax lien were filed, the claim for the attorney's fee was inchoate at the date of the filing of these notices. The Court once again applied the federal rule for determining the specificity of a lien competing with the federal tax lien and stated that, although the lienholder and the property subject to the lien were definite, the amount of the lien was not since such amount must be established by court decree in the foreclosure proceedings. That being the case, the attorney's lien was inchoate and inferior to the tax liens.

Criminal Cases

In the case of *Shotwell Manufacturing Company* v. *United States*, 371 U.S. 341, decided January 14, 1963, the Supreme Court held, with respect to an alleged voluntary disclosure made prior to the revocation of the Treasury's voluntary policy, that the taxpayer defendants were not entitled to any benefit from their alleged disclosure because they had not acted in good faith. The income tax evasion convictions for all defendants were upheld. In December 1962, 368 U.S. 946, the Court had granted certiorari to review the findings of the lower court that the original conviction of the defendants for failure to report black market receipts was not vitiated by their alleged voluntary disclosure.

In *Namet* v. *United States*, 373 U.S. 179, decided May 13, 1963, the petitioner and his co-defendants had been charged with violating the federal wagering tax law. Co-defendants after pleading guilty were called as government witnesses to testify concerning their relationship with the petitioner, although the prosecutor had advance notice they would claim their constitutional privilege against self-incrimination. The trial court sustained their privilege as to certain questions asked them. The Supreme Court held that there had been no reversible error under the circumstances involved, including the fact that the prosecutor had a bona fide belief that because of the pleas of guilty the witnesses could not assert privilege.

On May 27, 1963, the Court, in *Lopez* v. *United States*, 373 U.S. 427, affirmed the conviction of the defendant for attempted bribery of a revenue agent by holding that evidence of conversations recorded by an electronic device concealed on the person of a Government agent was properly admissible and that the revenue agent's apparent feigned willingness to accept the bribe did not constitute entrapment as a matter of law.

In the alcohol and tobacco tax field the Court refused to review all 7 of the cases in which writs of certiorari had been sought by convicted defendants.

In 3 cases the refusal of the lower court to suppress evidence resulting from an allegedly illegal search was urged as the grounds for review, *Wiggs* v. *United States* (C.A. 5th), 371 U.S. 904 (also involving the Government's refusal to disclose identity of informer); *Denton* v. *United States* (C.A. 6th), 371 U.S. 923 (question of entrapment also raised); and *Lee* v. *United States* (C.A. 9th), 372 U.S. 907.

In 2 cases the sufficiency of the Government's evidence to support the conviction was challenged (i.e., *Ragland* v. *United States* (C.A. 4th), 371 U.S. 949; *Lemons et al.* v. *United States* (C.A. 4th), 371 U.S. 968).

In *Hall* v. *United States* (C.A. 5th), 371 U.S. 952, the admission into evidence of a tape recording of a telephone conversation made with the consent of one of the parties to the conversation was urged as a basis for the Court's review. The District Court's reliance on the statutory presumption that defendant's unexplained presence at the moonshine still as sufficient evidence to support his conviction for possessing an unregistered still (26 U.S.C. 5601(b)(1)) was challenged in *Ivey* v. *United States* (C.A. 4th), 372 U.S. 929.

No petitions for certiorari were filed by the Government in alcohol and tobacco tax cases this year.

Actions of Lower Courts

In *Metro M. Holovachka*, the Court of Appeals for the Seventh Circuit affirmed the defendant's conviction for evading over $39,000 in income taxes for the years 1955 to 1957, inclusive, based on a net worth-expenditure determination. It held that the jury was warranted in rejecting such defense claims as cash on hand, funds given or borrowed, and that money he disbursed for loans and political purposes was not his. Holovachka had been prosecuting attorney of Lake County, Indiana, from January 1953 through December 1958, and had served as Gary city comptroller during 1952.

The Court of Appeals for the Second Circuit, in *United States* v. *Woodner*, affirmed the conviction of Ian Woodner for evading income taxes for 2 years. It held, in view of the indicia of fraud, that the jury reasonably could reject Woodner's defense argument that because of the size of his operations and the large amounts of money necessarily involved he could not have had intent to evade his taxes. The Court referred to the use of nominees and currency, the lack of usual business records, the commingling of funds, and the personal use of funds as pointing to a scheme of evasion.

Joseph Conforte, Wadsworth, Nevada, following a mistrial due to a hung jury, and thereafter pleading guilty to a charge of income tax evasion, was sentenced to a term of 3 years. Conforte has been publicly referred to as a "former Nevada vice lord."

In *Gorin* v. *United States*, 313 F. 2d 641, the Court of Appeals for the First Circuit reversed the convictions of a former Service employee and 2 practicing attorneys on conspiracy and bribery charges and remanded the case for a new trial. The case involved an attempt to bribe Service employees to recommend against criminal prosecution of Nathaniel Bergman, an attorney, for tax evasion. The Court held that an erroneous charge on the issue of claimed entrapment had been given at the trial. The appellants' petition for certiorari on the ground that the evidence established entrapment as a matter of law has recently been denied by the Supreme Court. Bergman, who had been convicted with the employee and the 2 other defendants, dismissed his appeal and subsequently pleaded guilty to evading his taxes. As a result of these prosecutions he received prison sentences.

George Chacharis and *Harold Zweig*, respectively mayor and city engineer of Gary, Indiana, and *Willmar Chulock*, an accountant, were indicted on various charges of income tax evasion and conspiring to defraud the Service in the operation of its functions, such charges stemming from construction payoffs. In December 1962, Chacharis interrupted his trial to plead guilty to conspiracy. Chulock was later found guilty by a jury of the same charge. Zweig pleaded nolo contendere to evading his income tax for the year 1956. All three were given prison sentences.

The authority of the Service to deny alcoholic beverage permits to persons who had previously associated with racketeers has recently received decisive judicial support. In *Seaway Beverages, Inc.* v. *Dillon et al.* (decided April 11, 1963, 319 F. 2d 722), the Court of Appeals for the District of Columbia decided in the Government's favor an issue under the Federal Alcohol Administration Act which has not been heretofore judicially resolved. The Court held that evidence as to the former association of an applicant with a racketeer (the notorious Tony Accardo) supplied a sufficient basis for denying the permits sought.

In the alcohol and tobacco tax field, action at the court of appeals level was generally favorable to the Government, with the notable exceptions of: (1) *Russell* v. *United States*, 306 F. 2d 402, in which the Ninth Circuit Court upset the defendant's conviction for failing to register a firearm on the ground that the registration requirement of the statute infringed on his constitutional right against self-incrimination (see however *Starks* v. *United States*, 316 F. 2d 45, and *Frye* v. *United States*, 315 F. 2d 491, in the same circuit, which narrowly limit the scope of this decision to the particular offense charged); (2) *Williamson* v. *United States*, 311 F. 2d 441, where the Fifth Circuit Court reversed the defendant's conviction of possessing liquor in unstamped containers and selling liquor without paying the special occupational tax on the testimony of an informer who had been hired by the Government on a contingent fee basis to obtain evidence against him; and (3) *Blumenfield* v. *United States*, 306 F. 2d 892, where the Eighth Circuit Court reversed the defendant's conviction of abetting in the making of a false retail liquor tax return (Form 11) by reporting as "owners" persons held by the Court to be nominal and partial owners of the retail businesses.

In the search and seizure and forfeiture areas, which are of particular importance in illicit liquor enforcement, several decisions favorable to the Government have been reached by the courts of appeals. For example, where state troopers discovered illicit liquor in the trunk of the defendant's car after arresting her for reckless driving, in checking her statement that the erratic behavior of the car resulted from a trunkload of furniture, the Sixth Circuit upheld the search as reasonable in that it was incident to the valid arrest (*United States* v. *Stokely*, (C.A. 6th) 311 F. 2d 593). Similarly, where the defendant's car was wrecked, disclosing the moonshine, in defendant's attempt to elude pursuing state

troopers, the same Court held that no search was involved nor was there an arrest until after the liquor was exposed to public view (*United States* v. *Williams*, 314 F. 2d 795).

As to forfeitures, the Fifth Circuit Court, in a decision of great importance to the success of the Service's program to curtail the flow of raw materials to moonshiners, upheld the judicial forfeiture of a tractor and trailer on the evidence that they had been used to deliver some 12 loads of sugar (383,500 pounds) for approximately $32,000 in cash sales, where a fictitious consignee had been reported to the Service after defendant had been served with a demand letter. The Court, however, ordered the return of the sugar contained in the trailer at the time of seizure on the ground that there was no evidence that it was intended for an illegal use (*Utley Wholesale Co.* v. *United States* (1962), 308 F. 2d 157).

In the field of petitions for the remission of forfeiture of seized vehicles, the Tenth Circuit Court reversed the judicial granting of a petition filed by a bank on the ground that, when it financed the purchase of the vehicle, the bank should have made an inquiry as to the record and reputation of the true owner of the vehicle whose identity it knew and who was a reputed liquor law violator even though title to the vehicle was taken by a straw purchaser of good repute (*United States* v. *One 1958 Pontiac Sedan* (1962), 308 F. 2d 893; see also *United States* v. *One 1959 Pontiac Bonneville 2-Door Sedan* (U.S.D.C. 1962), 206 Fed. Supp. 892).

STATISTICS OF INCOME RELEASES

- Sales of Capital Assets reported on Individual Income Tax Returns, 1959, Supplemental Report (21 pp., 25 cents)
- Individual Income Tax Returns, 1960, Preliminary (22 pp., 20 cents)
- Individual Income Tax Returns, 1960 (165 pp., $1)
- Corporation Income Tax Returns with accounting periods ended July 1959–June 1960 (334 pp., $1.75)
- Corporation Income Tax Returns with accounting periods ended July 1960–June 1961, Preliminary (35 pp., 30 cents)
- U.S. Business Tax Returns with accounting periods ended July 1959–June 1960, Sole Proprietorships, Partnerships, and Corporations (182 pp., $1)
- U.S. Business Tax Returns with accounting periods ended July 1960–June 1961, Sole Proprietorships, Partnerships, and Corporations, Preliminary (29 pp., 25 cents)

Statistics of Income publications are for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C., 20402.

STATISTICAL TABLES

707-151 O—63— 7

NOTES: *All yearly data are on a fiscal year basis, unless otherwise specified. For example, data headed "1963" pertain to the fiscal year ended June 30, 1963, and "July 1" inventory items under this heading reflect inventories as of July 1, 1962.*

In many tables and charts, figures have been rounded and may not add to the totals which are based on unrounded figures.

Internal revenue districts are listed in this section by the names of headquarters cities. Each district is identical with the boundaries of the State in which the headquarters city is located except for the States recapitulated at the bottom of tables 1, 5, 6, and 14. A map of the districts appears on page xiv.

STATISTICAL TABLES

COLLECTIONS, REFUNDS, AND RETURNS FILED

Table — *Page*

1. Internal revenue collections by sources and by internal revenue regions, districts, States, and other areas . . . 77
2. Internal revenue collections by sources and by quarters . . . 85
3. Internal revenue collections by sources . . . 86
4. Internal revenue collections by principal sources, fiscal years 1940–1963 . . . 88
5. Internal revenue refunds including interest . . . 90
6. Number of returns filed by internal revenue regions, districts, States, and other areas . . . 91
7. Internal revenue tax on manufactured products from Puerto Rico . . . 92

ALCOHOL AND TOBACCO TAXES

8. Establishments qualified to engage in the production, distribution, storage, or use of alcohol and alcoholic liquors . . . 92
9. Establishments qualified to engage in the production or exportation of tobacco products . . . 92
10. Permits relating to distilled spirits under chapter 51, IR Code . . . 92
11. Permits for operations relating to alcoholic beverages under the Federal Alcohol Administration Act . . . 93
12. Permits relating to tobacco under chapter 52, IR Code . . . 93
13. Label activity under Federal Alcohol Administration Act . . . 93

STAMP TAXES

14. Number of occupational tax stamps issued, by class of tax and by internal revenue regions, districts, and States . . . 94

CASES RECEIVING APPELLATE CONSIDERATION OR IN LITIGATION

Table — *Page*

Appellate Division

15. Receipts and disposition of protested income, profits, estate, and gift tax cases prior to issuance of statutory notice (Pre-90-day cases) . . . 98
16. Receipts and disposition of protested income, profits, estate, and gift tax cases in which statutory notices were outstanding (90-day cases) . . . 98
17. Receipts and disposition of income, profits, estate, and gift tax cases petitioned to the Tax Court (docketed cases) . . . 99

Office of the Chief Counsel

18. Processing of income, profits, estate, and gift tax cases in the Tax Court . . . 99
19. Results obtained in income, profits, estate, and gift tax cases disposed of in the Tax Court . . . 99
20. Receipt and disposal of Tax Court cases in courts of appeals and in Supreme Court . . . 100
21. Receipt and disposal of suits filed by taxpayers in Federal courts and actions by the United States for recovery of erroneous refunds . . . 100
22. Decisions of courts of appeals and Supreme Court in civil tax cases . . . 101
23. Receipt and disposal of collection, injunction, summons, and disclosure cases . . . 101
24. Receipt and disposal of insolvency and debtor proceedings . . . 101
25. Receipt and disposal of miscellaneous court cases, lien cases not in court, noncourt collection litigation cases, and appeal cases . . . 101
26. Caseload report . . . 101

COST OF ADMINISTRATION

27. Obligations incurred by the Internal Revenue Service . . . 102
28. Quantity and cost statistics for printing . . . 103

Table 1.—Internal revenue collections by sources and by internal revenue regions, districts, States, and other areas

[In thousands of dollars. See table 3, p. 86, for tax rates and further breakdown of national totals by sources]

Table 3.—Internal revenue collections by sources, fiscal years 1963 and 1962—Continued

[In thousands of dollars]

Source of revenue	Fiscal year 1963 (1)	Fiscal year 1962 (2)
Excise taxes total—Continued		
Tobacco taxes, total—Continued		
Cigars, total—Continued		
Small cigars, 75 cents per thousand	137	124
Prepayments	(*)	17
Tobacco materials, tobacco products, and cigarette papers and tubes (Customs) [21]	1,434	2,052
Manufactured tobacco, 10 cents per pound [8]	16,381	16,696
Cigarette papers and tubes, papers ½ cent per 50; tubes 1 cent per 50	662	735
Tobacco materials—Violations, sec. 5731, Internal Revenue Code of 1954	4	1
Stamp taxes on documents, other instruments, and playing cards, total	149,069	159,319
Issues and transfers of bonds of indebtedness or capital stock, foreign insurance policies, and deeds of conveyance: [22]		
Sales by postmasters	45,687	42,327
Sales by district directors	94,685	108,313
Playing cards, 13 cents per pack	8,574	8,625
Silver bullion transfers, 50 percent of profit	124	55
Manufacturers' excise taxes, total [23]	5,610,309	5,132,949
Gasoline, 4 cents per gallon	2,497,316	2,412,714
Lubricating oil, etc., 6 cents per gallon; cutting oil, 3 cents	74,410	73,012
Tires (wholly or in part of rubber), inner tubes, and tread rubber:		
Tires, highway type, 10 cents per pound, other, 5 cents per pound, except laminated tires (other than type used on highway vehicles), 1 cent per pound	355,767	322,381
Inner tubes, 10 cents per pound	19,478	17,112
Tread rubber, 5 cents per pound	23,615	22,068
Motor vehicles, chassis, bodies, parts, and accessories:		
Passenger automobiles, chassis, bodies, etc., 10 percent	1,559,510	1,300,440
Trucks and buses, chassis, bodies, etc., 10 percent	303,144	257,200
Parts and accessories for automobiles, trucks, etc., 8 percent	224,507	198,077
Radio and television sets, phonographs, components, etc., 10 percent	184,220	173,024
Refrigerators, freezers, air-conditioners, etc., 5 percent; self-contained air-conditioning units, 10 percent	61,498	54,638
Electric, gas, and oil appliances, 5 percent	68,171	66,435
Pistols and revolvers, 10 percent	1,618	1,774
Phonograph records, 10 percent	27,421	24,342
Musical instruments, 10 percent	20,175	19,081
Sporting goods (other than fishing rods, creels, etc.), 10 percent	18,099	15,541
Fishing rods, creels, etc., 10 percent	6,300	6,090
Business and store machines, 10 percent	74,845	81,719
Cameras, lenses, film, etc., 10 percent; household type projectors, 5 percent	25,205	25,307
Electric light bulbs and tubes, 10 percent	35,998	33,998
Firearms (other than pistols and revolvers), shells, and cartridges, 11 percent	16,235	14,915
Mechanical pencils, pens, 10 percent; lighters 10 cents per lighter ($1 or more); 10 percent (less than $1)	8,674	8,413
Matches, 2 cents per thousand (but not to exceed 10 percent of selling price); fancy wooden or colored stems, 5½ cents per thousand	4,102	4,667
Retailers' excise taxes, total [23]	443,558	421,163
Luggage, etc., 10 percent	74,019	69,384
Jewelry, etc., 10 percent	181,902	176,023
Furs, 10 percent	29,287	31,163
Toilet preparations, 10 percent	158,351	144,594
Miscellaneous excise taxes, total [23]	1,619,656	1,570,258
Admissions taxes, total	82,583	74,775
Theaters, concerts, athletic contests, etc.:		
Admissions, 1 cent for each 10 cents or major fraction thereof of the amount paid in excess of $1 [24]	41,688	38,100
Ticket brokers' sales, 10 percent of amounts in excess of box office price [24]	552	582
Leases of boxes or seats, 10 percent of the amount for which similar accommodations are sold [24]	422	304
Admissions sold by proprietors in excess of established price, 50 percent of such excess	127	183
Roof gardens, cabarets, etc., 10 percent of total paid for admissions, services, etc.	39,794	35,606
Club dues and initiation fees, 20 percent (if dues or fees are in excess of $10 per year)	71,097	69,452
Toll telephone service, telegraph, cable, radio, etc., 10 percent	339,246	325,111
Wire mileage service, 10 percent; wire and equipment service, 8 percent	25,372	25,455
General telephone service, 10 percent	515,987	492,912
Transportation of—		
Oil by pipeline, 4½ percent; repealed, effective Aug. 1, 1958	9	49
Persons, 10 percent; repealed, effective Nov. 16, 1962, except on air transportation which was reduced to 5 percent	233,928	262,760
Property, 3 percent of amount paid, except coal which is 4 cents per ton; repealed, effective Aug. 1, 1958	451	568
Use of safe deposit boxes, 10 percent	6,514	6,679
Coconut and other vegetable oils processed, 2 cents per pound	12	6
Sugar, approximately ½ cent per pound	99,903	96,636
Diesel and special motor fuels, 4 cents per gallon (in some instances 2 cents per gallon)	113,012	105,178
Narcotics and marihuana, total [24]	1,153	1,089
Narcotics	1,085	1,040
Marihuana	68	49
Coin-operated amusement and gaming devices, $10 and $250 per device, per year	20,253	19,617
Bowling alleys, pool tables, etc., $20 per alley or table, per year	4,897	4,184
Wagering taxes:		
Occupational tax, $50 per year	531	580
Wagers, 10 percent of amount wagered	5,167	5,349
Use tax on highway motor vehicles weighing over 26,000 pounds, $3.00 per 1,000 pounds per year (installment privileges permitted)	99,481	79,761
Adulterated and process or renovated butter, filled cheese, unadulterated butter and oleomargarine (domestic and imported) [25]	7	32
Firearms transfer and occupational taxes [27]	54	66
Unclassified excise taxes:		
Unapplied collections [23]	3,710	3,117
Undistributed depositary receipts [7]	62,541	98,351

Footnotes on p. 88.

See footnotes below.

Footnotes for tables 1-4

NOTE.—Calendar year figures, by regions, districts, States, and other areas, for selected types of taxes, may be obtained from the Public Information Division, Internal Revenue Service, Washington, D.C., 20224. Floor stocks taxes are reported separately only during the periods in which the collections are of significant amounts. Relatively small amounts collected in subsequent periods are merged with the amounts shown for the related class of tax.

*Less than $500.

r Revised.

[1] The receipts in the various States do not indicate the Federal tax burden of each, since in many instances, taxes are collected in one State from residents of another State. For example, withholding taxes reported by employers located near State lines may include substantial amounts withheld from salaries of employees who reside in neighboring States.

[2] Includes tax on unrelated business income of exempt organizations.

[3] Beginning with fiscal year 1957, the United States total is adjusted to exclude withheld individual income and corporation taxes transferred to the Government of Guam in accordance with the provisions of Public Law 630, approved Aug. 1, 1950 (64 Stat. 392). This adjustment amounted to $3,816,961 for 1963.

[4] Collections of individual income tax not withheld include old-age and disability insurance taxes on self-employment income. Similarly, the collections of income tax withheld are reported in combined amount with old-age and disability insurance taxes on salaries and wages. Estimated separate national totals for individual income tax and for old-age and disability insurance taxes are shown in the text table on p. 9 and in table 4. Amounts of old-age and disability insurance tax collections, classified by States, are compiled by the Social Security Administration as a by-product of its wage and income record-keeping operations and are published periodically in the Social Security Bulletin.

[5] Effective for taxable years beginning after 1960, self-employment tax and taxes imposed by the Federal Insurance Contributions Act are applicable with respect to Guam and American Samoa. Amounts of such taxes collected in Guam and American Samoa are combined with similar taxes reported for Office of International Operations—Other.

[6] Includes railroad employment compensation tax and tax on railroad employee representatives.

[7] Tax payments made to banks, under the depositary receipts system, are included in internal revenue collections for the period in which the depositary receipts are issued. However, such payments are not classified by internal revenue districts (nor by tax subclasses to which excise tax payments relate) until the depositary receipts are received in internal revenue offices with tax returns. Accordingly, the items shown as "Undistributed depositary receipts" represent the amount of depositary receipts issued, less the amount of depositary receipts received with returns and distributed by district and tax class.

[8] Amounts of taxes collected on Puerto Rican products coming into the United States are covered into the Treasury of Puerto Rico under the provisions of sec. 7652(a)(3) of the Internal Revenue Code of 1954. Such amounts are included in overall collections results (tables 1 through 4), beginning with 1955, and are shown separately in table 7.

[9] Includes occupational tax on manufacturers of stills, rectifiers, wholesale liquor dealers, retail dealers in liquor or medicinal spirits, and nonbeverage manufacturers of spirits.

[10] Includes seizures, penalties, etc., and tax on stills or condensers manufactured.

[11] Includes occupational taxes on wholesale and retail dealers in wines or in wines and beer.

[12] Includes occupational taxes on brewers and wholesale and retail beer dealers.

[13] Includes taxes on cigarette papers and tubes, court fines, penalties, and taxes on leaf tobacco sold or removed in violation of sec. 5731, Internal Revenue Code.

[14] Includes taxes on pistols and revolvers; phonograph records; musical instruments; sporting goods; fishing rods, creels, etc.; business and store machines; cameras, lenses, film, and projectors; electric light bulbs and tubes; firearms, shells, and cartridges; mechanical pencils, pens, and lighters; and matches.

[15] Includes taxes on ticket brokers' sales, on leases of boxes or seats, and on admissions sold by proprietors in excess of established prices, as well as general admissions tax.

Footnotes for tables 1-4—Continued

[16] Transportation of persons: Rate 10 percent; repealed, effective November 16, 1962, except on air transportation which was reduced to 5 percent.

[17] Includes taxes on transportation of property and oil by pipeline (repealed, effective August 1, 1958); adulterated and process or renovated butter, filled cheese, and imported adulterated butter and oleomargarine; firearms transfer; and occupational taxes.

[18] Corporation income tax rates: First $25,000 of net income, normal tax of 30 percent; net income in excess of $25,000, combined normal tax and surtax of 52 percent. Normal tax and surtax rates also apply to net income derived by certain exempt organizations from unrelated trade or business.

[19] Rates of tax are as follows:

Individual income tax: Graduated rates from 20 percent on first $2,000 of net income in excess of exemptions to 91 percent on amount over $200,000.

Old-age and disability insurance taxes on self-employment taxable income, 5.4 percent for taxable year 1963, and 4.7 percent for taxable year 1962.

[20] Rates of tax are as follows:

Income tax withheld: 18 percent on wages in excess of exemptions.

Old-age and disability insurance taxes on salaries and wages: Employers' and employees' tax each 3⅝ percent beginning January 1, 1963, 3⅛ percent for 1962, and 3 percent for 1961, both imposed on taxable portion of wages.

[21] Collected by Customs beginning October 1, 1961, as authorized by Part 275.62 of Title 26, Code of Federal Regulations. Prior to October 1, 1961, Customs collections were divided into (1) those paid direct to the U.S. Treasury Department and (2) those cleared through the various Internal Revenue Service district offices. Collections in the first instance, which were relatively small, were included in domestic class E cigars. In the second instance they were reported in the applicable classes of tobacco tax as part of the districts' collection data.

[22] Issues of stock: 10 cents per $100 or major fraction thereof of actual value, except that such rate shall be 4 cents per $100 if issued after April 8, 1960, by a corporation which qualifies as a regulated investment company or a real estate investment trust. Issues of bonds: 11 cents per $100 face value. Transfers of stock: 4 cents per $100 or major fraction thereof of actual value; transfers of bonds, 5 cents per $100 face value. Foreign insurance policies: 1 cent or 4 cents per $1 of premium. Deeds of conveyance: $100 to $500, 55 cents; each additional $500 or fraction thereof, 55 cents.

[23] Revised to allocate unapplied collections pending as of June 30, 1962.

[24] In the case of certain racetracks, the following rates apply:

Admissions: 1 cent for each 5 cents of amount paid.

Ticket brokers' sales: 20 percent of excess charges.

Leases of boxes or seats: 20 percent.

[25] Narcotics, 1 cent per ounce; narcotics order blanks, $1 per hundred. Marihuana, $1 per ounce; marihuana order blanks, 2 cents each. Amounts shown also include occupational taxes levied on manufacturers, dealers, and practitioners. For classes and rates of occupational taxes see table 14.

[26] Adulterated butter: 10 cents per pound. Process or renovated butter: ¼ cent per pound. Domestic filled cheese: 1 cent per pound. Imported filled cheese: 8 cents per pound. Imported adulterated butter and oleomargarine: 15 cents per pound. Occupational taxes are levied on manufacturers or dealers in these products and are included in the amounts shown.

[27] Transfers of machineguns, short-barreled firearms, silencers, etc., $200 each; certain guns with combination shotgun and rifle barrels, and other special types of firearms, $5 each. Occupational taxes are levied on manufacturers, importers, or dealers in firearms and are included in the amounts shown.

[1] Includes 80,274 forms 1040 B, NB, NBA, PR, and VI which are included in "All other individual and fiduciary" returns in the table on p. 13.

Table 7.—Internal revenue tax collected in Puerto Rico on manufactured products coming into the United States, by objects of taxation

[In thousands of dollars]

Objects of taxation	1963	1962
Total	42,465	33,328
Distilled spirits	36,524	28,424
Distilled spirits rectification tax	979	743
Wines	----	(*)
Beer	32	30
Cigars, large:		
Class A	(*)	----
Class B	1	1
Class C	467	435
Class D	7	7
Class E	2,869	2,076
Class F	1,480	1,503
Class G	107	110
Cigars, small	----	----
Cigarettes, large	----	(*)
Cigarettes, small	----	----
Manufactured tobacco (chewing, smoking, and snuff)	(*)	(*)

*Less than $500.

Note.—Amounts of taxes collected in Puerto Rico on tobacco and liquor manufactures coming into the United States are covered into the Treasury of Puerto Rico under the provisions of section 7652(e)(3) of the Internal Revenue Code of 1954. Such amounts are included in overall collections results (tables 1 through 4), beginning with 1955.

Table 8.—Establishments qualified to engage in the production, distribution, storage, or use of alcohol and alcoholic liquors

Class of establishment	As of June 30— 1963	1962
Distilled spirits plants:		
Plants (net number)	360	362
Facilities:		
Production	188	192
Warehousing	267	259
Bottling in bond	59	56
Denaturing	48	45
Taxpaid bottling	144	139
Rectifying	125	121
Denatured and tax-free products (dealers, users, etc.):		
Dealers in specially denatured alcohol and denatured rum	42	43
Users of specially denatured alcohol and denatured rum	3,685	3,725
Reprocessors, rebottlers, etc., of specially denatured alcohol articles	1,122	1,128
Users of tax-free alcohol	7,476	7,467
Beer: Breweries	198	213
Wines:		
Bonded wine cellars	448	458
Taxpaid wine bottling houses	103	106
Vinegar: Vinegar factories using vaporizing process	4	4
Beverage dealers:		
Importers	1,806	1,723
Wholesale dealers in liquors	3,772	3,783
Wholesale dealers in beer	7,133	7,293
Retail dealers in liquors	282,351	276,650
Retail dealers in beer	145,051	145,142
Other:		
Manufacturers of nonbeverage products (drawback)	918	942
Fruit-flavor concentrate plants	46	42
Bottle manufacturers	107	111

Table 9.—Establishments qualified to handle tobacco materials, or to engage in the production or exportation of tobacco products and cigarette papers and tubes

Class of establishment	As of June 30— 1963	1962
Manufacturers of tobacco products	505	553
Manufacturers of cigarette papers and tubes	4	4
Dealers in tobacco materials	2,112	2,169
Tobacco export warehouses	128	118

Table 15.—Appellate Division receipts and dispositions of protested income, profits, estate, and gift tax cases prior to issuance of statutory notice of deficiency (pre-90-day cases)

A. Progress of work

Status	Number of cases	Amount stated in revenue agent's report (thousand dollars)		
		Deficiency in tax	Penalty	Overassessment
	(1)	(2)	(3)	(4)
Pending July 1	10,732	729,693	37,793	108,248
Received	17,774	607,632	29,438	151,958
Disposed of, total	15,853	501,064	25,183	100,735
By agreement with taxpayers	11,849	329,520	16,220	95,040
Unagreed overassessments and claim rejections	537	213	7	1,676
By issuance of statutory notices—transferred to 90-day status	3,467	171,330	8,956	4,018
Pending June 30	12,653	836,261	42,048	159,471

B. Results obtained in dispositions

Method	Number of cases	Appellate determination (thousand dollars)		
		Deficiency in tax	Penalty	Overassessment
	(1)	(2)	(3)	(4)
Disposed of, total	15,853	312,505	15,012	96,837
By agreement with taxpayers	11,849	123,886	6,357	95,016
Unagreed overassessments and claim rejections	537	68	7	884
By issuance of statutory notices—transferred to 90-day status	3,467	188,551	8,648	937

Table 16.—Appellate Division receipts and dispositions of protested income, profits, estate, and gift tax cases in which statutory notices of deficiency were outstanding (90-day cases)

A. Progress of work

Status	Number of cases	Amount stated in statutory notice (thousand dollars)		
		Deficiency in tax	Penalty	Overassessment
	(1)	(2)	(3)	(4)
Pending July 1	1,073	70,550	4,380	128
Received, total	4,019	204,957	10,919	883
Statutory notices issued by Appellate Division[1]	3,348	192,546	9,808	880
Statutory notices issued by district directors and received during 90-day period	671	12,411	1,111	3
Disposed of, total	3,933	223,337	10,933	745
By agreement with taxpayers	808	14,935	120	86
By taxpayer default	985	35,001	2,616	183
By petition to the Tax Court—transferred to docketed status	2,140	173,401	8,197	476
Pending June 30	1,159	52,170	4,366	266

[1] Difference from table 15—transferred to 90-day status—is caused by cases being combined or split for the purpose of issuing the statutory notice, cases in transit, etc.

B. Results obtained in dispositions

Method	Number of cases	Appellate determination (thousand dollars)		
		Deficiency in tax	Penalty	Overassessment
	(1)	(2)	(3)	(4)
Disposed of, total	3,933	219,086	10,857	791
By agreement with taxpayers	808	10,684	44	132
By taxpayer default	985	35,001	2,616	183
By petition to the Tax Court—transferred to docketed status	2,140	173,401	8,197	476

Table 17.—Appellate Division receipts and dispositions of income, profits, estate, and gift tax cases petitioned to the Tax Court (docketed cases)

A. Progress of work

Status	Number of cases	Amount petitioned (thousand dollars)		
		Deficiency in tax	Penalty	Overassessment
	(1)	(2)	(3)	(4)
Pending July 1	8,965	813,815	83,429	10,119
Received, total	5,247	455,942	41,992	443
Petitions filed in response to—				
District directors' statutory notices	3,303	319,845	35,035	333
Appellate Division's statutory notices[1]	1,944	136,097	6,957	110
Disposed of, total	5,581	317,710	30,740	1,178
By stipulated agreement with taxpayers	4,407	260,672	24,258	938
By dismissal by the Tax Court or taxpayer default	237	5,292	1,486	(*)
Tried before the Tax Court on the merits	937	51,747	4,996	240
Pending June 30	8,631	952,047	94,681	9,384

[1] Difference from table 16—transferred to docketed status—is caused by excluding district directors' statutory notices considered by Appellate in 90-day status, cases in transit, etc.

*Less than $500.

B. Results obtained in dispositions

Method	Number of cases	Appellate determination (thousand dollars)		
		Deficiency in tax	Penalty	Overassessment
	(1)	(2)	(3)	(4)
Disposed of, total	5,581	138,246	13,630	7,018

[1] The number of cases disposed of does not agree with the number of cases in which decisions were rendered by these courts during the year, due to settlement by stipulation, dismissals, and time required for retrial, recomputation of tax, etc. In the Court of Claims, the number of decisions was 64, of which 34 were for the Government, 12 against the Government, and 18 partly for and partly against the Government. In the district courts 422 decisions were rendered, of which 166 were for the Government, 200 against the Government, and 56 partly for and partly against the Government. For decisions by the courts of appeals and Supreme Court, see table 22.

Table 22.—Office of Chief Counsel—Decisions of courts of appeals and Supreme Court in civil tax cases

Court	Total	For the Government	Against the Government	Partly for and partly against the Government
	(1)	(2)	(3)	(4)
Total	358	237	78	43
By courts of appeals, total	349	229	78	42
Originally tried in—				
Tax Court	204	119	52	33
District courts	145	110	26	9
By Supreme Court, total	9	8		1
Originally tried in—				
Tax Court	3	2		1
District courts	3	3		
Court of Claims	1	1		
State courts	2	2		

Note.—Except for Supreme Court cases, the cases covered by tables 24 and 25 are not included.

Table 23.—Office of Chief Counsel—Receipt and disposal of collection, injunction, summons, and disclosure cases

Status	Number of cases
Pending July 1	1,389
Received	1,737
Total	3,126
Disposed of	1,659
Pending June 30	1,467

Note.—This table includes cases handled at national and regional levels which are under consideration for suit or are in suit in Federal and State courts. It does not include cases relating to alcohol, tobacco, and firearms taxes, nor to insolvency and debtor proceedings (table 24), or appeal and other cases which are included in table 25.

Table 24.—Office of Chief Counsel—Receipt and disposal of insolvency and debtor proceedings

Status	Total	Reorganizations proceedings [1]	Bankruptcy and receivership proceedings [2]	Miscellaneous insolvency proceedings [3]
	(1)	(2)	(3)	(4)
Pending July 1	1,738	897	434	407
Received	3,296	1,658	1,033	605
Total	5,034	2,555	1,467	1,012
Disposed of	2,955	1,385	983	587
Pending June 30	2,079	1,170	484	425

[1] Proceedings instituted under the following section or chapters of the Bankruptcy Act: Sec. 77 (railroad reorganizations) and chs. X (corporate reorganizations), XI (arrangements as to unsecured indebtedness), XII (real property arrangements), and XIII (wage earners' plans), which involve tax claims and other rights and interests of the United States.
[2] Bankruptcy liquidation proceedings and Federal or State receivership proceedings which involve tax claims of the United States.
[3] Proceedings relating to corporate dissolutions, insolvent banks, assignments for the benefit of creditors, or administration of estates of decedents, which involve tax claims of the United States.

Note.—Includes cases handled at national and regional levels.

Table 25.—Office of Chief Counsel—Receipt and disposal of miscellaneous court cases, lien cases not in court, noncourt collection litigation cases, and appeal cases

Status	Total	Miscellaneous court cases [1]	Lien cases not in court [2]	Noncourt collection litigation cases [3]	Appeal cases [4]
	(1)	(2)	(3)	(4)	(5)
Pending July 1	[5] 1,258	299	126	664	169

Total	7,591	1,054	2,245	3,774	518
Disposed of	6,308	761	2,135	3,069	343
Pending June 30	1,283	293	110	705	175

[1] Includes suits for foreclosure by mortgagees or other secured creditors, and suits to quiet title to which the United States is made a party.
[2] Primarily applications for discharge of property from tax liens.
[3] Primarily memorandums on collection litigation matters from regional counsel to district directors which are not related to court proceedings or lien cases.
[4] Includes cases in Federal and State appellate courts relating to insolvency and debtor proceedings, lien cases in court, and collection, summons, and injunction cases.
[5] Includes appeal cases formerly shown in a separate table.

Note.—Includes cases handled at national and regional levels.
