Introduction

The Internal Revenue Service was reorganized in 1982 to improve the effectiveness of top management and make the agency more responsive to the growing and changing needs of the tax system. Three new associate commissioners—for operations, policy and management and data processing—are responsible for developing, overseeing and controlling policy in their respective areas. They form a group small enough to be an effective policy-review body, yet with enough breadth of responsibility to cover all IRS functions. The associate commissioners are the senior officials the deputy commissioner and I rely on for advice in applying the IRS's resources and programs to the changing needs of tax administration.

In the reorganization, we elevated our enforcement functions—examination, collection and criminal investigation—to the assistant commissioner rank to correspond to the important role they play in the continued success of our voluntary compliance system. Under this new arrangement, these enforcement activities are receiving more sharply focused, top-level attention, and the new alignment has helped us to coordinate better our overall enforcement program.

The reorganization also transferred two rulings divisions and the appeals division to the office of Chief Counsel. These changes were made to increase efficiency and coordination, achieve maximum effective use of our technical resources and align more closely administrative settlement policies with our litigating position.

We re-examined and revised our settlement procedures in tax shelter cases in an effort to give earlier and more effective recognition to litigation issues. This already has proven helpful in reducing the backlog in our administrative appeals system as well as the Tax Court. We have revised our examination procedures in an effort to close shelter cases at the lowest possible level. We have made it clear, however, that we will use vigorously the enforcement and compliance provisions of the 1981 and 1982 tax acts to assure taxpayers that others are paying their share.

During 1982 we examined in depth our priorities in planning and preparing for the rest of this decade and beyond. Computer technology is the backbone of our operations, and the program for modernizing and replacing our outmoded data processing equipment is well underway. Also underway are plans to computerize our collection process and certain aspects of our examination activities. Computerization will reduce the enormous amount of time and resources consumed by current labor intensive manual procedures in both these areas and will allow us to use our limited resources in these and other areas to the best advantage.

Our self-assessment system remains the most successful tax system the world has ever seen. As stewards of the public trust, we at the IRS are dedicated to the administration of that system as efficiently and effectively as possible.

Roscoe L. Egger, Jr.
Commissioner of Internal Revenue

Introduction

This year has been one of innovation and change for the office of Chief Counsel. We welcome to Counsel our colleagues in the appeals, individual tax and corporation tax divisions, who came to us as a result of the overall IRS reorganization. The realignment of the office of Chief Counsel has brought under common management such related activities as administrative appeals, litigation and regulations and rulings.

To ensure efficient administration of the reorganized office, a deputy chief counsel was designated to assist me in the overall supervision of Counsel activities and in the development and execution of programs. The operations division now reports to the deputy chief counsel.

The new associate chief counsel (technical) will use the new structure to improve coordination and timeliness and to reduce duplicative efforts in the legislation and regulations, employee plans and exempt organizations, corporation tax, individual tax and interpretative divisions. Similarly, all National Office litigation divisions—tax litigation, criminal tax, general litigation, disclosure litigation and general legal services—now report to a new associate chief counsel (litigation).

Transfer of the appeals division to Counsel should facilitate the flow of information and assistance between appeals officers and Counsel attorneys. As a result, we hope to develop a common approach to cases so we can make our best settlement offer earlier in the appeals process.

We also have adopted new procedures to bolster effectiveness and efficiency:

- Revenue Procedure 82-42 increases the flexibility of existing docketed case procedures by providing the maximum opportunity for appeals to resolve cases without trial.
- Increased emphasis on the simultaneous review of rulings, rather than sequential review, ensures adequate internal review with fewer delays.
- Small tax case procedures have been simplified to reduce paperwork and to accommodate the practical considerations encountered in dealing with unrepresented taxpayers in litigation.
- New procedures for setting priorities for development and clearance of regulations have been developed in coordination with the Department of the Treasury.
- The new settlement program in the tax shelter area has resulted in the closing of a significant number of tax shelter cases.

The office of Chief Counsel had an active role in assisting the Department of the Treasury and Congress in the development of the compliance portion of the Tax Equity and Fiscal Responsibility Act of 1982. Notable among the provisions that will aid the IRS's overall compliance effort are those relating to administrative summonses, entity audit of partnerships and penalties that provide, among other things, injunctive authority against promoters of abusive tax shelters.

Vigorous litigation to combat abusive shelters has resulted in notable litigating victories, which, together with the new settlement program, have brought about settlement of a large number of pending shelter cases. During 1982 the Tax Court docket increased from 46,167 cases to 53,440, only about 65 percent of last year's increase of 11,391.

We have set ambitious goals for ourselves—more settlements, more trials and more published rulings and regulations—while maintaining the high standards of practice that have always characterized the office of Chief Counsel.

Achievement of our goals depends on our most critical resource—the talented men and women who are the office of Chief Counsel. We value that resource most of all and accordingly have improved our system of incentive compensation and supported a strong program of continuing education. I look forward to the even more notable accomplishments I am confident this office will achieve in the coming year.

Kenneth W. Gideon
Chief Counsel for
the Internal Revenue Service

Collecting the Revenue

Returns Received

The IRS received and processed 170.4 million tax returns and supplemental documents during 1982. Over 95 million, or 56 percent, of all returns filed this year were individual income tax returns. Of these, 37.6 million individual taxpayers filed short Forms 1040A and 57.9 million used Forms 1040.

Tax Receipts

The IRS collected gross tax receipts of $632.2 billion in 1982, an increase of $25.4 billion, or 4.2 percent, over 1981. The increase was the smallest since 1976, mainly due to tax reductions under the Economic Recovery Tax Act of 1981 and the weakness of the economy.

Income taxes accounted for about two-thirds of all tax receipts. Individual income taxes of $352.6 billion reflected an increase of $19.8 billion, or 5.9 percent, over the prior year. Corporation income tax receipts were $66 billion, down $7.7 billion, or 10.5 percent.

Social security, self-employment, federal unemployment and railroad retirement taxes totaled $168.7 billion, up $15.8 billion, or 10.4 percent, from 1981. The rise reflects an increase in the social security tax rate from 13.3 to 13.4 percent on Jan. 1, 1982, and an increase in the taxable earnings base from $29,700 in 1981 to $32,400 in 1982.

Excise taxes declined to $36.8 billion, a drop of $3.6 billion, or 9 percent, from last year.

Estate and gift taxes increased by $1.2 billion, or 17.8 percent, to $8.1 billion.

Refunds

The IRS in 1982 paid a total of $75.2 billion in refunds to 74.5 million taxpayers. In 1981, 73.6 million refunds totaling $63.3 billion were paid. This year refunds to 71.6 million filers of Forms 1040 and 1040A were $55.1 billion, including interest. Individual refunds averaged $769, compared to an average of $679 paid to 71.3 million individual taxpayers in 1981.

	Type of return	*1981*	*1982*

Earned Income Credit

Low-income taxpayers who maintain a home for themselves and at least one dependent may claim earned income credits. In 1982, 6.5 million taxpayers claimed $1.8 billion in earned income credits. Some of these taxpayers received earned income credits in their paychecks rather than waiting for a refund after filing their individual income tax returns for the tax year. This year employers reported on 25,319 employment tax returns that $4.3 million in earned income credits had been paid in advance.

Penalties and Interest

Under the law the IRS levies penalties, such as those for failure to pay taxes due and to deposit federal tax deposits, paying with bad checks, late filing, negligence and fraud. There were 26.3 million penalties assessed in 1982, totaling $5.1 billion.

The law also provides that taxpayers who fail to pay their taxes on time will be charged interest on any balance due. This year $1.3 billion in interest was assessed on individual returns, with abatements totaling $99.1 million. Interest assessed on business returns totaled $3.7 billion, of which $803 million was abated.

[1]Includes presidential election campaign fund amounting to $40,956,589.
[2]Includes presidential election campaign fund amounting to $39,030,357.
[3]Estimated collections of individual income tax withheld are not reported separately from old-age, survivors', disability and hospital insurance (OASDHI) taxes on wages and salaries. Similarly, collections of individual income tax not withheld are combined with OASDHI taxes on self-employment income. The amount of OASDHI tax collections shown is based on estimates made by the Secretary of the Treasury pursuant to the provisions of section 201(a) of the Social Security Act as amended and includes all OASDHI taxes. The estimates shown for the two categories of individual income taxes were derived by subtracting the OASDHI tax estimates from the combined totals reported.

Presidential Election Campaign Fund

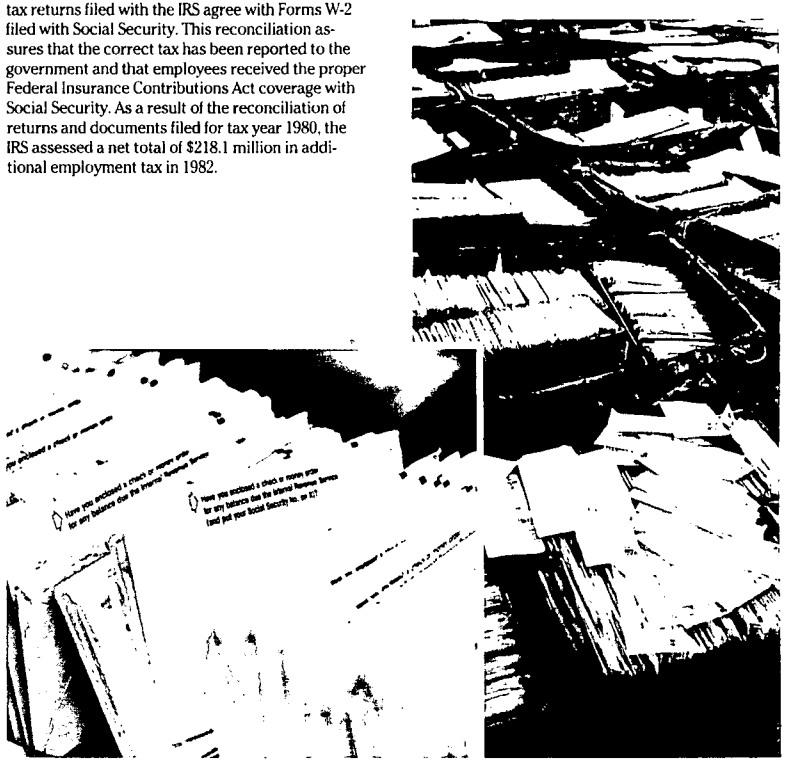
This year 25.7 million individual income tax returns, or 27 percent, had designations for the presidential election campaign fund. Designations amounted to $39 million, compared to $41 million designated in 1981 on 27 million individual tax returns, or 28.7 percent of those processed. The cumulative amount credited to the fund since it was started in 1972 is $326.2 million.

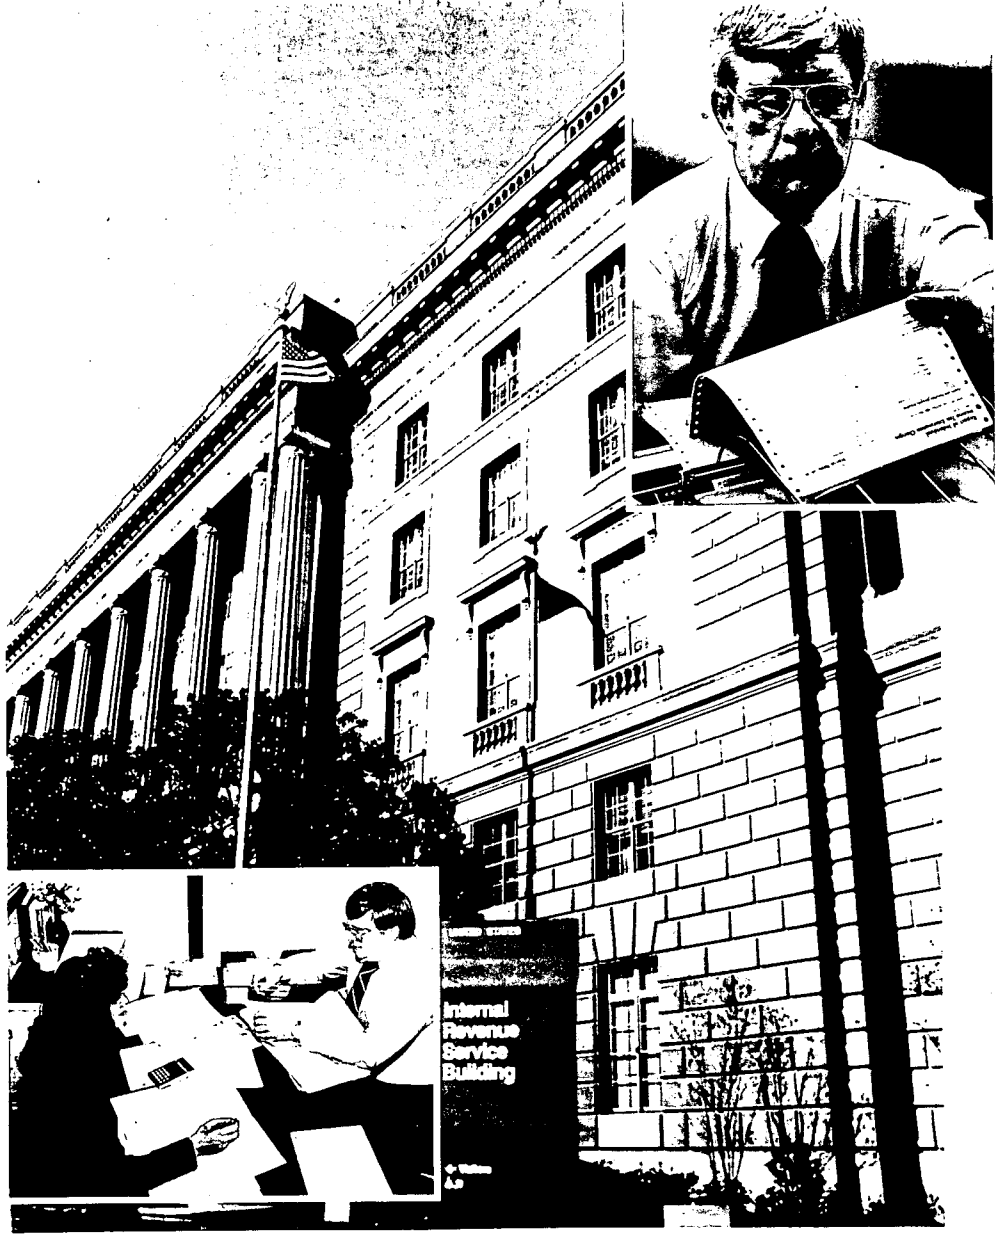
Combined Annual Wage Reporting

Combined annual wage reporting reduces the reporting burden on employers while still satisfying the requirements of the IRS and Social Security Administration. The reconciliation portion of this program ensures that the amounts reported on employment tax returns filed with the IRS agree with Forms W-2 filed with Social Security. This reconciliation assures that the correct tax has been reported to the government and that employees received the proper Federal Insurance Contributions Act coverage with Social Security. As a result of the reconciliation of returns and documents filed for tax year 1980, the IRS assessed a net total of $218.1 million in additional employment tax in 1982.

Child and Spousal Support Collection Program

Beginning in 1982 the IRS offset $171.3 million from 273,423 individual income tax refunds to pay delinquent child and spousal support obligations. This refund offset action was required by the Omnibus Reconciliation Act of 1981. Under an inter-agency agreement between the IRS and the Department of Health and Human Services, the IRS acts as collection agent for state welfare agencies that supply the names and other pertinent data regarding persons delinquent in support payments.





Examination and Correction Results

The IRS examination program in 1982 resulted in recommendations for additional tax and penalties of $11.7 billion, compared to $10.5 billion in 1981. Individual and fiduciary income tax returns accounted for $3 billion, corporate income tax returns for $7.2 billion, estate and gift returns for $0.8 billion, employment and excise returns for $0.2 billion, and windfall profit returns for $0.5 billion.

The examination program also disclosed overassessments on 114,602 returns, resulting in refunds of $0.5 billion.

The IRS examined 1,732,232 returns in 1982. Revenue agents examined 554,154 returns at taxpayers' residences or places of business, a decrease of 2,930 returns, or 0.5 percent from 1981. Tax auditors examined 1,074,905 returns, mainly in IRS offices, a decrease of 136,785 returns, or 11.3 percent from last year. The remaining 103,173 returns were examined through correspondence from the service centers, a decrease of 58,345 from 1981.

Examination coverage of income, estate and gift tax returns was 1.63 percent, compared to 1.84 percent in 1981.

In addition to the examination program, the IRS verified or corrected 716,193 returns through correspondence from the service centers. This is a decrease of 97,830 returns, or 12 percent, from 1981. Recommended additional tax and penalties totaled $268 million, compared to $205 million in 1981.

Information Returns Program

As a result of the information returns program, the IRS notified over 2.9 million taxpayers in 1982 of potential discrepancies between income reported on their tax returns and income reported on information returns and sent notices of apparent failure to file tax returns to 2.1 million taxpayers.

The IRS received 664 million information documents in its tax year 1981 information returns program, including over 178 million Forms W-2 received and processed by the Social Security Administration and 50 million pre-1974 Series E savings bonds from the Bureau of Public Debt. There also were more than 435 million information returns received from businesses and organizations reporting interest, dividends and other payments.

The IRS will continue to match most information returns submitted on magnetic media to verify that correct amounts are reported on taxpayers' returns. Over 354 million of the information documents submitted last year were on magnetic media. Of the information returns submitted on paper, approximately 21 percent will be matched, and 82 percent of the combined magnetic media and paper receipts will be matched.

Unreported Income Programs

IRS unreported income programs have identified more than 37,729 returns, reflecting a noncompliance rate of 89 percent. The most significant programs in this area are district information gathering projects on unreported income, of which there are more than 360 nationwide. There also are 16 regional projects and one national project.

Tax Shelter Program

As of Sept. 30, 1982, 284,828 returns with tax shelter issues were in the examination process, an increase of 36,000 returns over the prior year. During 1982, 71,793 returns were closed after examination, with recommended tax and penalties totaling $954.2 million.

The Tax Equity and Fiscal Responsibility Act of 1982 (TEFRA) contained provisions to curb promotions of tax shelters and expedite processing of partnership returns. The Act provided penalties for the promotion or sale of schemes involving gross valuation overstatement or false or fraudulent representation of material matters and gave the IRS the right to enjoin any person from further sales or promotions of abusive shelters.

Because TEFRA provided for singular treatment of partnership tax items, administrative processing of cases will involve fewer repetitive reports and appeals. Judicial hearings also were limited under the Act.

Tax Protesters Program

The IRS had 30,956 protest returns under examination and had closed 10,378 returns as of Sept. 30, 1982, a 12.1 percent increase over the prior year.

Illegal forms of tax protest continue to be of concern to the IRS, which in 1982 improved procedures for identifying new schemes and examining tax returns of illegal tax protesters. The service centers began new procedures to identify protest returns during filing season return processing, and new audit technique guidelines, in conjunction with common scheme definitions, were issued to assist examiners in more effectively completing protest return examinations.

W-4 Program

The IRS aggressively pursued identification of employees who file incorrect withholding allowance certificates, Forms W-4, with employers to avoid having income tax withheld from wages. Where appropriate, the $500 civil penalty for filing false wage withholding information was asserted.

To enable taxpayers to match more closely their withholding to their expected tax liability, the IRS issued proposed regulations in 1982 that allow employees to take into consideration items that reduce tax liability, such as employee business and moving expenses, contributions to IRAs and losses. Final regulations issued in January require employers to submit to the IRS Forms W-4 received from their employees that claim in excess of 14 withholding allowances or exemption from withholding, if the employee's wages usually exceed $200 per week.

Fraud Program

The IRS continued to place heavy emphasis on fraud detection during the examination process, which produced an 8 percent increase in the number of fraud referrals submitted to the criminal investigation division. In turn, the number of examination division referrals for each 1,000 returns examined increased by 17 percent.

The amount of recommended civil fraud penalties, which equal 50 percent of the entire additional tax due if any part of the underpayment is due to fraud, increased by 22 percent.

Computer Assisted Examination Program

Computer techniques have increased the overall quality and efficiency of tax examinations. The IRS currently has a staff of 232 computer audit specialists trained in computer systems, hardware and program languages.

The IRS in 1982 expanded its use of scientific statistical sampling techniques in large corporate examinations, determining $37 billion in tax deficiencies in this manner.

The IRS has a total of 4,771 record retention agreements in effect with taxpayers. These agreements identify those machine sensible records that must be retained by taxpayers and made available to the IRS during an examination.

Large Corporations and the Industry Specialization Program

At the end of 1982 there were 1,438 large corporation cases in the coordinated examination program, and recommended tax deficiencies and penalties totaled $5.77 billion this year, compared to $4.33 billion in 1981.

The IRS improved the coordinated examination program this year by increasing taxpayer involvement in the examination process, eliminating or making discretionary several administrative and technical procedures and changing the team member and case manager rotation policy.

The industry specialization program included 13 designated industries and encompassed 652 coordinated examination cases, with 79 issues being coordinated. The IRS also is conducting industrywide examinations in two other industries.

Windfall Profit Tax

Windfall profit tax liabilities reported on excise tax returns processed through Sept. 30, 1982, amounted to $22 billion.

During 1982 the IRS initiated an examination program for windfall profit tax and completed 507 examinations, resulting in $0.5 billion in recommended additional tax and penalties. As of Sept. 30, 1982, there were 6,858 windfall profit tax cases in the process of examination.

International Enforcement

In 1982 international examiners trained in the international provisions of the Internal Revenue Code, tax treaties and foreign tax statutes examined 2,976 returns, and the tax value of their recommended adjustments and penalties reached a record high of $3.7 billion.

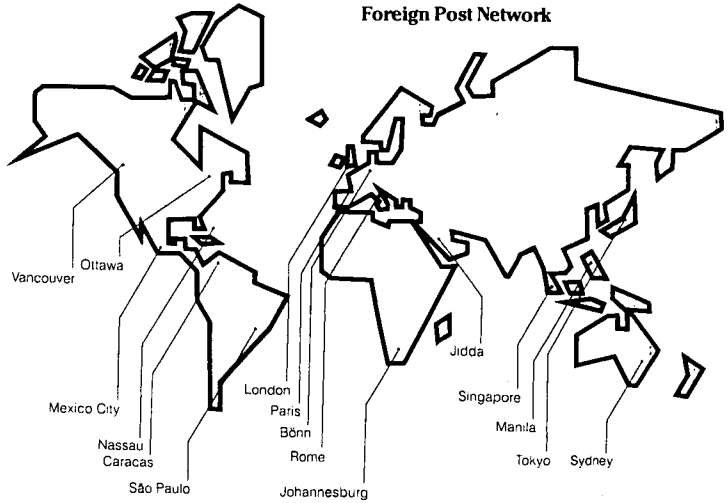
Approximately 290 international examiners in 15 key districts handle examinations of business operations outside the U.S.–the majority involving multinational corporations–and foreign controlled U.S. business operations where the books and records are maintained or can be made available in this country.

The Tax Equity and Fiscal Responsibility Act of 1982 strengthened compliance by penalizing taxpayers who fail to comply with certain foreign based IRS document requests, instituting information requirements for certain foreign owned corporations and modifying return requirements and due dates relating to foreign corporations and foreign trusts.

New procedures for examiners and publication of a revenue procedure dealing with taxpayers' responsibilities in international double taxation cases improved effectiveness and efficiency in processing requests for U.S. competent authority consideration.

The IRS has strengthened its international compliance activities with respect to tax havens by restructuring the examination issues within the international enforcement program to include tax-havens as the top priority and developing more effective training for international examiners.

Foreign Post Network



Industrywide Exchanges and Simultaneous Examinations

During 1982 the IRS expanded international cooperative activities with income tax treaty partners in the areas of industrywide exchanges of information and simultaneous examinations. Industrywide exchanges of information are being conducted with treaty partners in the aluminum, banking, grain, forest products, pharmaceutical and petroleum industries. In addition, the IRS has several simultaneous examinations in process. Both these activities have resulted in a better understanding of the worldwide economic operations of certain multinational taxpayers and promoted international tax compliance.

International Meetings

IRS executives attended two international meetings with representatives of income tax treaty partners to discuss issues that affect international cooperation. One meeting was with European tax treaty partners and the other with Pacific Basin treaty partners, including Canada.

Foreign Operations

The IRS Foreign Operations District completed over 18,000 examinations and recommended additional tax and penalties of nearly $160 million. It also collected $11.8 million in delinquent taxes and secured 4,545 delinquent returns from U.S. taxpayers located abroad.

As part of the IRS reorganization, the Foreign Operations District replaced the Office of International Operations. The new district for foreign operations remains in Washington, but is under the jurisdiction of the Mid-Atlantic Region. This change placed international operations at the field office level, assuring this area the same regional office management as other IRS field operations.

The Foreign Operations District administers the tax laws for foreign based taxpayers subject to U.S. taxes whose books and records are in another country. It also is responsible for federal tax matters of residents of U.S. territories, possessions and the Commonwealth of Puerto Rico. Cases involving foreign taxpayers whose books and records are located in the U.S. will now be handled, however, by the IRS district office with geographical jurisdiction.

The IRS continues to maintain 16 key foreign posts, managed by revenue service representatives who oversee the examination, collection and taxpayer service programs. They also serve as liaisons with foreign tax authorities in both treaty and non-treaty countries.

Research to Improve Compliance

The IRS is conducting several studies of ways to supplement the discriminant function, or DIF, system of selecting returns for examination. Various computerized selection systems to identify returns with high potential for unreported income are being studied, as are possible abuses of cash and noncash contributions. In addition, a study of the compliance

and return characteristics of direct sellers is planned.

The taxpayer compliance measurement program (TCMP) is the IRS's primary long-range research effort to measure overall taxpayer compliance and changes in patterns of noncompliance. This year the IRS concluded examinations for the TCMP survey of tax year 1979 Forms 1040 and 1040A filed in 1980 and continued TCMP examinations on corporations with assets under $10 million.

In addition to TCMP, the IRS conducts other types of compliance research, some of which focus on specific Internal Revenue Code sections. During 1982 studies were completed on state income tax refunds, gains on sales of residences and changes in accounting methods. The IRS also began to develop computerized monitoring of age-65 exemptions and duplicate exemptions for dependents. Compliance research also was conducted on information returns and a study was completed to measure compliance in reporting of nonemployee compensation on Form 1099 NEC. Work continued on updating and expanding estimates of the various segments of the tax gap, last reported on in 1979.

Automated Computerized Examination System

The IRS in 1982 began developing an automated computerized examination system to increase the efficiency of the examination process, where the volume of paperwork now substantially cuts into the overall time available for examining returns. The automated system will allow examiners to conduct examinations by drawing tax return information from existing computerized data sources rather than the paper tax return. The system will compute the correct tax due and print an examination report. The IRS also will use the system for case control, report writing and updating the master file. Installation of the automated system will begin in 1985.

Collection

The IRS disposed of 2.4 million delinquent accounts and collected $7.4 billion in overdue taxes in 1982. Of that sum, $3.1 billion was collected in response to computer notices sent to taxpayers and $4 billion was collected on delinquent accounts. Overdue taxes of $331 million were collected when 1.7 million delinquent returns, involving $2.4 billion in additional assessments, were secured.

Service Center Collection

The service center collection branches, which handle computer return delinquency and balance due notices, are the first step in communication with taxpayers who have not filed their tax returns or paid their taxes. Many procedures that were previously performed in the districts were absorbed by the service center collection branches, including the monitoring of employers' monthly tax returns, insolvency case processing and the control, maintenance and monitoring of 100-percent penalty cases. Moving these additional programs to the service centers allowed the district offices to redirect resources to higher priority work.

District Collection

The district collection functions handle delinquent accounts or delinquent return investigations not resolved by notices from the service centers. In 1982 district collection functions served 1,058,452 notices of levy, filed 595,497 notices of federal tax lien and conducted 10,533 seizures.

Most delinquent accounts and delinquency investigations transferred to the districts are first worked by clerical and paraprofessional employees in the collection office functions, which in 1982 closed over 55 percent of delinquent accounts and over 64 percent of delinquent return investigations.

More difficult delinquent accounts and return investigations that cannot be resolved in the collection office function are referred to the collection field function. Last year revenue officers in the field function closed 379,458 delinquent return investigations and 984,997 delinquent accounts.

Efforts to Improve Collection

This year the IRS addressed rising collection inventories by initiating several new studies, programs and equipment procurements. These efforts coupled with increased staffing and numerous legislative changes, particularly new penalty and interest provisions, will help the IRS deal more effectively with increases in delinquent accounts and return delinquencies.

The IRS began a research project in 1982 to determine whether revenue yield can be increased if the accounts of identifiable groups of taxpayers are handled differently. A total of 50,000 individual income delinquent accounts are being handled in six different ways. All cases receive the same first notice of delinquency. Subsequently, the taxpayers are dealt with in one of six different ways, such as varying the timing of subsequent notices, using telephone calls instead of sending certain notices or offering installment agreements. Final results of the project will be available in 1984.

The IRS also conducted approximately 22,000 taxpayer compliance measurement program investigations of potential nonfilers of tax year 1979 income tax returns. The study measures the extent of nonfiling among individuals for whom the IRS has received wage or other income information returns and individuals who are on the master file computer system but have stopped filing. The data also will be used to improve the case selection system for potential nonfilers. The entire study will be completed in 1985, but the initial report will be ready in 1983.

The IRS monitors federal tax deposits and issues alerts when taxpayers do not make required deposits. As a result of improvements to this program, the IRS is now verifying federal tax deposit compliance of a greater number of taxpayers at an earlier point in time.

Returns compliance programs were conducted in three new areas during 1982. Approximately 15,000 leads were investigated to determine compliance of windfall profit tax filers. Another 2,000 leads were checked to determine compliance with the payment of two new excise taxes imposed by the Comprehensive Environmental Response Compensation and Liability Act of 1980. And a compliance program was begun to identify and contact employers not submitting W-4s to the IRS to determine if they were aware of and complying with the employment tax regulations.

Automated Collection System

The IRS will test an automated collection system in four districts in 1983. The system will be fully operational nationwide in 1984. The automated collection system is a virtually paperless computer processing and telephone system that will use only 20 call sites to complete the delinquent account and return delinquency case processing currently done by 71 local offices. The system contains many features, such as automatic dialing, direct entry of case history and immediate access to information, that will increase productivity and, at the same time, improve relations with taxpayers and their representatives.

Aside from the automated collection system, the IRS has made significant improvements in its telephone systems. In 11 districts, collection is using automatic call distribution systems that permit the answering of more calls in a more efficient manner. These systems also provide needed management information on which to base further decisions regarding equipment and staffing needs.

Criminal Investigation

The IRS criminal investigation division initiated 6,498 investigations of possible criminal violations of internal revenue laws during 1982. Prosecution was recommended in 2,297 of the 5,831 completed investigations. Grand juries indicted or U.S. attorneys filed informations on 1,844 taxpayers, and prosecution was successfully completed in 1,624 cases.

Taxpayers pleaded guilty or *nolo contendere* in 1,291 cases, and 333 were convicted after trial. Acquittals and dismissals totaled 65 and 145, respectively. Of the 1,585 taxpayers sentenced during the year, 917, or 58 percent, received prison sentences.

General Enforcement Program

Of the 6,498 investigations the IRS initiated this year, 4,423 were in the general enforcement program, which provides balanced geographical and occupational criminal tax enforcement. Priority enforce-

Results of direct enforcement on delinquent accounts and returns

	1981	1982
Delinquent taxes collected[1]		
From delinquent accounts	$3,435.3	$3,952.4
From notices	$2,148.6	$3,103.1
From delinquent returns secured	$ 285.4	$ 330.8
Delinquent returns secured[2]		
By collection	1,518.7	1,668.7
By examination	45.4	39.2
Additional tax, penalty and interest assessed on delinquent returns (Net of prepaid credits)[1]		
By collection	$1,803.1	$2,361.1
By examination	$ 54.1	$ 59.1

[1]millions
[2]thousands

ment efforts included investigations of multiple refund schemes, illegal tax protesters and promoters of fraudulent tax shelters.

The questionable refund program accounted for 358 investigations initiated and 249 prosecution recommendations. Indictments or informations were filed against 218 and convictions were obtained against 187. Of the 180 sentenced during the year, 76 percent received prison sentences.

The IRS began 629 criminal investigations of illegal tax protesters and obtained 111 indictments or informations. There were 114 convictions and 129 were sentenced, with 72 percent receiving jail sentences.

As of Sept. 30, 1982, the IRS had 201 open investigations of promoters and operators of fraudulent tax shelters. Federal grand juries have been established across the country primarily to consider tax-shelter related crimes, and during the year there were 40 indictments or informations and 33 convictions. Of the 27 sentenced, 74 percent received jail sentences.

Special Enforcement Program

The special enforcement program identifies and investigates those individuals who violate the tax laws while deriving substantial income from illegal activities. The IRS under this program initiated 2,075 investigations, gained 951 prosecution recommendations and won 555 convictions.

In its efforts against organized crime, the IRS emphasizes cooperation with other law enforcement agencies, provides assistance to grand jury investigations and participates in the federal strike force program coordinated by attorneys from the Department of Justice. The financial gain documented by the IRS in inter-agency investigations often provides the basis for seizing assets acquired with the profits of crime and convicting individuals of tax crimes when conviction on other illegal activities cannot be obtained.

The IRS also continued in 1982 to emphasize investigations of high-level drug traffickers, financiers and money launderers. As of Sept. 30, 1982, there were 807 such cases under investigation and another 262 undergoing IRS and Department of Justice review before indictment. During the year the IRS obtained 180 indictments or informations, 121 convictions and 103 sentencings in this area, with 76 percent receiving prison sentences that averaged over five years.

The IRS also participates in financial investigative task forces established by U.S. attorneys to coordinate federal law enforcement agencies' efforts against major narcotics organizations. The IRS is participating in an investigation in Florida of money launderers and corrupt bank officials who violate the currency laws while depositing proceeds from narcotics trafficking in financial institutions.

Employee Plans

The IRS issued 144,490 advance determination letters on the qualification of corporate and self-employed plans last year and examined 18,368 plans already in operation to determine their qualification, verify employers' allowable deductions for contributions to plans and assure that the rights and benefits of plan participants are protected.

The Economic Recovery Tax Act of 1981 (ERTA) made several important changes in the law pertaining to employee plans and caused a significant increase in employee plans workload. The IRS took several administrative actions to minimize this increase, including the issuance of Notice 82-3, which informed individuals, employers and plan sponsors of the major changes brought about by ERTA. The notice explained amendments that may be made to certain plans and the effect of these amendments on prior favorable determination, notification or opinion letters. Plan administrators thus were provided guidance for continued reliance on previously issued favorable letters, and eliminating the need to apply for new letters lessened the administrative and procedural burden on sponsors and employers choosing to take advantage of the provisions of ERTA.

Under the triennial reporting system adopted in 1980 by the IRS, the Department of Labor and the Pension Benefit Guarantee Corporation, plans file Forms 5500-C and 5500-K once every three years and Form 5500-R in the intervening years. Administrators and sponsors of small plans, however, indicated that filing Form 5500-R for two of the three years would be burdensome, so the IRS in 1982 agreed to accept Form 5500-C or 5500-K each year in place of Form 5500-R.

Through the coordinated compliance agreement, the IRS and the Department of Labor continued in 1982 to minimize the duplication of examinations. A joint IRS/Department of Labor task force also revised the agreement to improve coordination between the two agencies.

The IRS completed a taxpayer compliance measurement program (TCMP) for employee benefit plan returns to ensure compliance with the Employee Retirement Income Security Act of 1974 (ERISA). The IRS will use data gathered during the TCMP survey for planning future examination programs, improving the selection of returns for examination and identifying needed changes to the Forms 5500 series of employee plans returns and instructions. Under the program approximately 18,000 Forms

5500 and 5500C returns with plan years beginning in 1978 were examined.

A computer classification program became operational in 1982 to select for examination employee plans returns with a high probability of noncompliance under ERISA. The results of the TCMP survey will be integrated with this system to improve further the selection of employee plans returns for examination.

During the second year of the National Office post review program, which ended June 30, 1982, 1,581 cases were reviewed to ensure that all employee plans key district offices uniformly applied the law and IRS procedures when issuing determination letters on qualification of plans.

Exempt Organizations

The IRS exempt organizations activity in 1982 issued or revised 14 revenue rulings and procedures and 218 technical advice memoranda and examined 21,398 exempt organizations returns. The IRS also acted on 56,426 applications, reapplications and requests for rulings from organizations.

This year was the first in which exempt organizations used the revised Form 990, Return of Organization Exempt from Income Tax, which enables them to file the same form with both the federal and state governments. Thirty-one states and the District of Columbia now use the revised form.

The IRS also relieved some exempt organizations, other than private foundations, from filing annual information returns. For tax years ending on or after Dec. 31, 1982, only certain organizations with gross receipts not normally in excess of $25,000 will not be required to file an annual information return. Previously these organizations had to file if their gross receipts were normally in excess of $10,000.

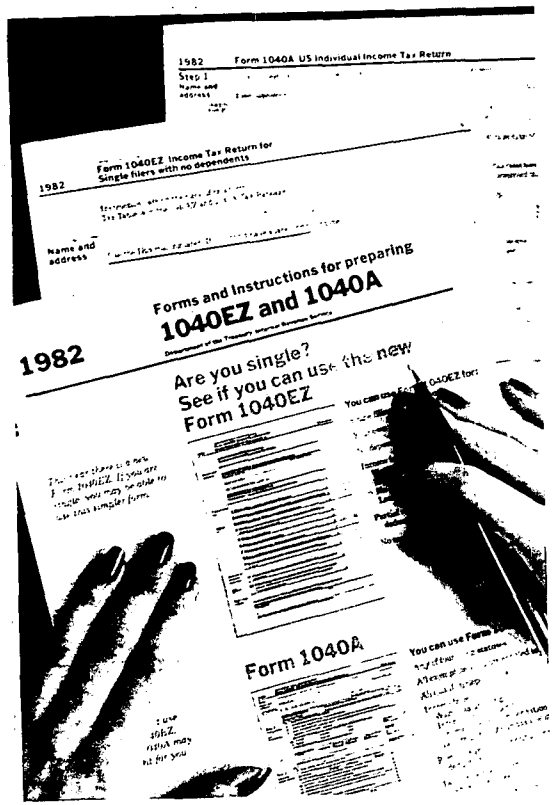
The Department of the Treasury announced on Jan. 8, 1982, that it was unable to support the legal authority of the IRS's enforcement of public policy in denying tax exemption to racially discriminatory private schools. In addition, the Department of Justice asked that the court of appeals decisions in the *Bob Jones University* and *Goldsboro Christian Schools* cases be vacated as the issue was now moot. The U.S. Supreme Court had granted *certiorari* in these cases in October 1981. Subsequently the U.S. Court of Appeals for the District of Columbia, in the case of *Wright v. Regan*, enjoined the IRS from granting or restoring exempt status to any racially discriminatory private school, thus precluding the carrying out nationwide of the Jan. 8, 1982, policy change. Proposed legislation then was submitted to Congress that would provide express authority to deny tax-exempt status to racially discriminatory private schools and the organizations operating them. The Department of Justice later reversed its request of Jan. 8 and asked the Supreme Court to hear the *Goldsboro* and *Bob Jones* cases. On April 19, 1982, the Supreme Court agreed.

The IRS continued to operate in 1982 under congressional budget restrictions prohibiting it from formulating or carrying out any rules, guidelines, court orders or similar measures regarding private schools, unless these were in effect prior to Aug. 22, 1978.

The full U.S. Court of Appeals for the District of Columbia found, in the case of *Taxation with Representation v. Regan*, that the different lobbying restrictions for section 501(c)(3) charities and section 501(c)(19) veterans' organizations resulted in unequal treatment that was unconstitutional. The appeals court remanded the case to the district court to consider either removing the section 501(c)(3) lobbying limitation or removing the section 501(c)(19) provision permitting lobbying.

A U.S. district court judge refused to dismiss for lack of standing a suit filed by Abortion Rights Mobilization, Inc., alleging that the Catholic Church violates the provisions of its tax exemption by campaigning for anti-abortion candidates. The plaintiffs allege violations of the First and Fifth Amendments, claiming that the IRS has failed to enforce against the Catholic Church the restrictions on political activity by charities.

Assisting Taxpayers



Write, Call or Walk In

The IRS during 1982 received about 39.2 million telephone, 8.1 million walk-in and 138,000 written inquiries from taxpayers requesting information about their tax rights and obligations. The IRS overall responded to 47.4 million requests for assistance, an increase of more than 2.6 million inquiries from 1981.

Nearly 57 percent, or 27 million inquiries, occurred between Jan. 1 and April 24: 22 million telephone calls, 5 million walk-in inquiries and 46,000 pieces of correspondence. During this same period, a quality check of 155,000 telephone responses and returns prepared with the assistance of IRS employees found an overall accuracy rate of 98 percent.

Toll-Free Telephone Assistance

Nearly all of the telephone calls received during the 1982 tax return filing period were made through the toll-free telephone system that allows taxpayers throughout the country to call the IRS for information without paying long-distance charges. Front-line assistors answered almost 89 percent of these calls.

Those calls requiring computer research or more advanced technical assistance were referred to IRS employees who have received specialized training in those areas. This year the IRS answered 3.3 million taxpayer account and problem resolution referrals and 2.3 million technical referrals.

Special equipment allows hearing-impaired taxpayers throughout the U.S., Puerto Rico and the Virgin Islands to receive toll-free tax assistance, and 1,914 taxpayers received such assistance in 1982.

Walk-In Service

Walk-in taxpayer assistance was offered at inner-city, business-district, suburban and rural locations in 539 permanent offices and 76 temporary offices opened especially for the filing period. Over 38,000 banks and Postal Service locations also helped distribute more than 290 million tax forms and instructions.

The IRS provided foreign language assistance at 187 of its 615 taxpayer service offices. Spanish language assistance was offered at 142 of these offices by 552 employees, while 97 offices and 393 employees helped taxpayers in other languages.

Problem Resolution Program

The problem resolution program resolved 256,496 individual taxpayer problems in 1982. Problem resolution officers oversaw the program in each of the IRS's 60 districts, 10 service centers and seven regions, while the taxpayer ombudsman, who is on the Commissioner's immediate staff, administered the program nationwide.

The problem resolution program's major emphasis this year was on remedying systemic and procedural weaknesses. As a result, tax return filing requirements and IRS-initiated correspondence were made clearer for taxpayers.

Disaster Assistance

The IRS provided help in preparing amended returns and casualty loss claims and in getting refunds to taxpayers faster in 94 counties in 20 states affected by floods, hurricanes, tornadoes and other emergencies and major disasters in 1982.

Educating Taxpayers

The IRS in 1982 provided instructional materials for nearly 5 million students as part of its "Understanding Taxes" course, which helps young people understand their tax rights and obligations. The IRS sponsored workshops for 31,000 small-business owners and over 550 institutes for tax practitioners.

Approximately 113,000 U.S. taxpayers in 55 cities in 37 foreign countries also sought IRS assistance, and another 1,712 taxpayers attended 54 overseas tax seminars. The IRS conducted nine military tax schools overseas that attracted 669 participants, who then helped armed services personnel prepare their own tax returns.

Through the volunteer income tax assistance program, the IRS recruits, trains and supports volunteers who assist with the preparation of tax returns for low-income, elderly, non-English speaking, handicapped and military taxpayers. This year 304,000 federal income tax returns were prepared by 33,000 volunteers. The tax counseling for the elderly program, begun in 1980, authorizes the IRS to enter into agreements with non-profit organizations to provide free tax help to individuals age 60 and over, using volunteers who are reimbursed for out-of-pocket expenses. During 1982, 12,000 volunteers prepared 116,000 federal income tax returns through this program.

Informing Taxpayers

A three-hour IRS tax clinic, entitled "Your Tax Return: The Bottom Line on Improving Your Form," was aired nationally by 184 public broadcasting stations during this year's filing season. The program, viewed in approximately 3.1 million households, focused on how to complete a tax return as well as other helpful tips and filing information. The program also encouraged viewers to call a toll-free number with their questions.

IRS public service announcements received an estimated $5.5 million of free network and local television air time. The IRS also sent taxpayer information materials to many national and specialized publications. Subjects covered included various tax credits, appeal rights and an explanation of new tax legislation.

The National Office and 76 field locations in 1982 issued 6,805 news releases and responded to over 24,000 media inquiries.

Forms and Publications

The simplification of tax forms is an important part of the IRS's effort to reduce the paperwork burden imposed on taxpayers. The IRS will introduce for the 1983 filing period the new Form 1040EZ, which has fewer lines and is easier to complete than Form 1040A. The form can be used by an estimated 22 million single taxpayers.

The IRS also simplified or improved a number of other forms, including Schedule A for Form 1040 and Form 941.

IRS public hearings in Honolulu, Jacksonville, Fla., and St. Paul, Minn., provided many suggestions on how to simplify the tax forms and instructions. The IRS received other suggestions in response to the Commissioner's message in this year's tax form packages and to a notice published in the Federal Register. The IRS has adopted a number of these suggestions and is considering others for possible inclusion in future years' forms.

The IRS distributed many taxpayer information publications free of charge, including 3.9 million copies of "Your Federal Income Tax," 1.7 million copies of the "Tax Guide for Small Business," 741,000 copies of the "Farmer's Tax Guide" and 96,000 copies of the "Tax Guide for Commerical Fishermen." Additional tax materials were furnished to 8.3 million taxpayers, 241,000 tax practitioners and 438,000 employers. The IRS publishes more than 90 booklets—three in Spanish—on specific tax topics.

Internal Audit

IRS management actions on 1982 internal audits resulted in additional revenue and cost savings of $1.39 billion and long-term actions to implement internal audit recommendations will realize an additional $656 million. All of these additional revenues and cost savings will have recurring benefits.

The IRS spent approximately 85 percent of its direct internal audit time in 1982 reviewing the processing of returns, collection of tax revenues and enforcement of the tax laws. More than 53 percent of internal audit time was devoted to 62 coordinated audits, which evaluated IRS programs on a national or regional basis and resulted in more efficient operations, more effective programs and procedures and stronger internal controls.

The IRS distributed abstracts of internal audit findings to its officials monthly to alert them to areas that may need increased management attention. Top management also received reports on the implementation and effectiveness of actions taken in response to General Accounting Office reviews of IRS activities.

Internal Security

The internal security division's investigations to protect the integrity of the IRS resulted in the arrest or indictment of 95 taxpayers and tax practitioners and 272 current or former IRS employees. There were convictions or guilty pleas in the cases of 121 individuals arrested or indicted in 1982 or earlier. Of these convictions, 18 were for bribery and 21 for assault, while the rest involved conspiracy to defraud the government, embezzlement, impersonation of a federal officer, narcotics and other offenses.

The internal security division completed 5,495 background investigations of employees during the year and conducted police record checks on all persons considered for temporary appointments. These investigations and record searches resulted in the rejection of 72 job applicants and administrative actions against 332 employees. Internal security also conducted 902 investigations of alleged employee misconduct, with 74 resulting in exoneration of the employees involved.

Assaults and threats against IRS employees increased from 455 in 1981 to 485 in 1982.

Integrity Program

To assist managers in deterring waste, fraud and abuse, IRS Inspection completed 50 audits of areas particularly susceptible to integrity violations, such as activities where cash is handled and where control weaknesses increase the potential for integrity breaches. These audits resulted in the strengthening of controls over the collecting and depositing of delinquent taxes and the handling of salary checks and returned refund checks.

Inspection conducted internal control seminars nationwide to increase employee recognition of integrity matters, develop a better understanding of the role and responsibilities of Inspection and increase management's awareness of its internal control responsibilities. It also conducted 451 integrity probes and tests of high-risk IRS activities.

In addition, 27,349 employees were advised of potential corruption hazards through awareness presentations, internal control seminars and conferences with all levels of management.

Disclosure

The IRS responded to 13,083 Freedom of Information and Privacy Act requests in calendar year 1981. The freedom of information reading room processed an additional 20,500 requests for documents. Disclosures were made to federal, state and local agencies in accordance with provisions of the Internal Revenue Code. Among these disclosures were 4,635 made to the Department of Justice for enforcement of nontax statutes, 213,039 to federal, state and local agencies for child-support enforcement and 73,452,561 to state tax agencies for state tax administration purposes.

Director of Practice

The office of director of practice was transferred this year from the Department of the Treasury's office of general counsel to the IRS. The principal responsibility of the director of practice is the administration and enforcement of the regulations governing representation of taxpayers before the IRS. In addition, the director of practice has parallel duties concerning practice before the Bureau of Alcohol, Tobacco and Firearms and serves as executive director of the joint board for the enrollment of actuaries established under the Employee Retirement Income Security Act of 1974.

During the year the director of practice took 81 disciplinary actions against attorneys, certified public accountants, enrolled agents, enrolled actuaries and others because of misconduct in practice before the IRS. These actions included 11 disbarments, 38 suspensions, 31 reprimands and one resignation, and 14 were the result of formal hearings before an administrative law judge. The allegations of misconduct that gave rise to the disciplinary actions were received from the IRS, taxpayers, professional organizations and tax practitioners.

Computer Services

The IRS made a major effort in 1982 to introduce state-of-the-art technology to its work processes to improve productivity and reduce the labor-intensive nature of basic processing activities. An automated collection system and an automated examination system are under development.

The three-phase, long-range plan to replace the IRS's obsolete computer equipment used for tax return processing is proceeding on schedule in its third year. The first phase of the equipment replacement program is the service center replacement system. In March 1982 equipment was installed in the pilot service center in Memphis, Tenn. The IRS will install equipment in the other nine service centers by 1984, with full implementation scheduled for January 1985. In addition to increased reliability and greater workload capacity, the new computer equipment will provide automated error correction and unpostable resolution, thus reducing paper and manual processing and accelerating returns processing.

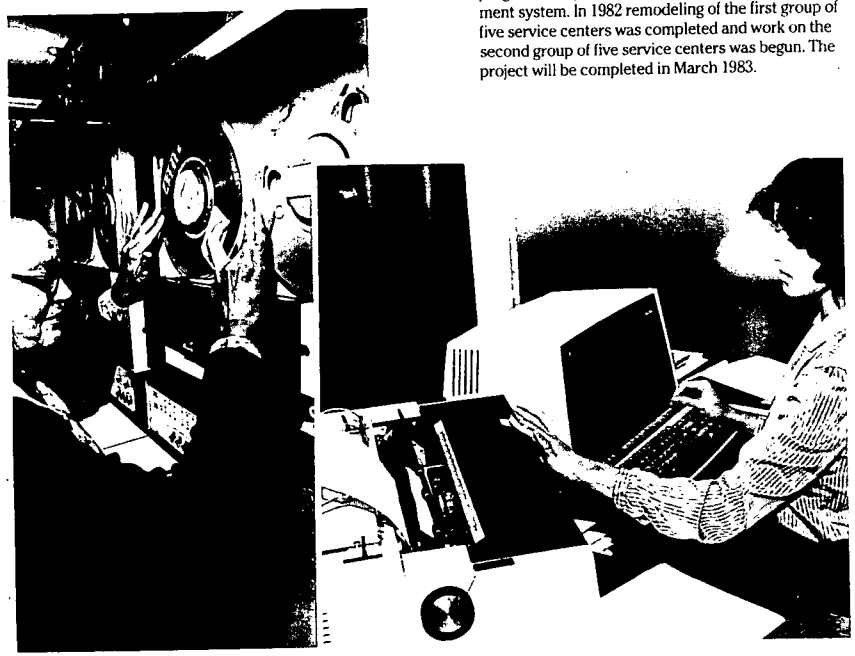
The IRS awarded a contract in March 1982 for the second phase of the equipment replacement program, the microfilm replacement system, which will automate the current research process and improve the privacy protection of taxpayer data. Implementation at all service centers is scheduled for June 1983.

The third and final phase of the equipment replacement program is the master file replacement system, which will modernize equipment at the National Computer Center. The IRS awarded a contract for this system in June 1982, and implementation is scheduled for January 1983.

Another equipment modernization effort that is well underway is the replacement of the service center direct data entry system with a distributed input system. The original equipment was installed in 1968. The new system is scheduled for nationwide implementation in January 1984.

Computer Site Preparation

The IRS in 1980 embarked on a major building program in support of the service center replacement system. In 1982 remodeling of the first group of five service centers was completed and work on the second group of five service centers was begun. The project will be completed in March 1983.



Master File

The number of taxpayer accounts on the individual master file had grown to 122.3 million by July 1982, a 2.3 percent increase over July 1981. The business master file as of July had grown to 23.6 million active and inactive accounts, a 5.4 percent increase over July 1981. During the year ended June 30, 1982, the National Computer Center processed 522.8 million individual and business master file transactions.

Management Information Systems

A management information systems staff was established under the assistant commissioner (human resources) to oversee development of a consolidated and uniform management information system to improve the IRS's decision-making capabilities.

Statistics of Income

The IRS issued statistics of income (SOI) publications in 1982 on individual income tax returns for 1979 and 1980, partnership returns for 1978 and 1979, sole proprietorships for 1979 and 1980 and corporate income tax returns for 1978 and 1979. Corporate source books for 1978 and 1979 and four issues of the quarterly SOI Bulletin also were issued. The SOI Bulletin contains selected data formerly contained in preliminary SOI reports, which have been discontinued. It also presents key data in advance of, or instead of, the more detailed SOI reports.

SOI publications can be obtained from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

This year the IRS published another report in the international income and taxes series on foreign income and taxes reported on U.S. tax returns for 1976-1979. The IRS provided statistical data to the Department of the Treasury's office of tax analysis and the congressional Joint Committee on Taxation for use in estimating revenue and analyzing existing and proposed legislation and to the Bureau of Economic Analysis of the Department of Commerce for use in updating the national income and product accounts.

Cash Management

Improvement of IRS cash management procedures this year resulted in interest savings to the government. A significant achievement was the acceleration of the daily cash deposit cycle from 72 to 48 hours. This also was the third successive year in which the IRS reduced the time period needed to deposit all of the April 15 tax receipts.

Postage Savings

The presorting of individual and business tax packages, resulting in lower, third-class bulk-mail rates, along with eliminating the forwarding of tax packages outside of local post-office areas, reduced IRS's postage costs by approximately $6.6 million in 1982. As a result, the IRS held postal cost increases to 15 percent, while postage rates increased by an average of 35 percent.

Training

Training for new revenue officers was substantially revised to meet the needs of the approximately 1,600 new revenue officers hired nationwide in June and July. One of the most important changes in the material was the addition of a classroom case management exercise that simulates the real work of the revenue officer occupation. Revenue agent and tax auditor training courses were revised to incorporate the Economic Recovery Tax Act of 1981. The IRS developed a new special agent basic training program that uses a self-instruction training phase at posts of duty to reduce significantly both travel and per-diem costs.

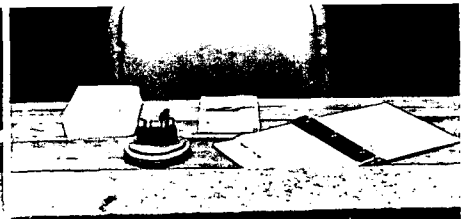
The IRS also is going to test training service center employees through the use of computers. A computerized training course on the processing of corporate tax returns will be tested at the Austin Service Center in 1983. In addition, the IRS developed new training programs to support increased automation of work processes.

Helping Other Countries

The IRS provided long-term tax administration advisory assistance in 1982 to Egypt, Jordan, Liberia, Saudi Arabia, Sierra Leone and Trinidad and Tobago. Short-term projects were conducted for Costa Rica, Haiti, Honduras and Jamaica. The Agency for International Development funded the projects, except those in Saudi Arabia and Trinidad and Tobago, which were funded by their respective governments.

This year 230 officials from 67 countries visited the IRS for orientation and observation programs. Since 1963 over 6,580 visitors from 145 countries have participated in these programs. The IRS also presented two seven-week seminars in tax administration management for tax officals from eight countries and participated in training workshops in Mexico City and Caracas.

IRS executives addressed various assemblies and conferences of the Inter-American Center of Tax Administrators (CIAT) and the Caribbean Organization of Tax Administrators, and IRS Commissioner Egger was elected to the CIAT Executive Council.



Appeals

Appeals officers held conferences with taxpayers at 36 appeals offices, 61 suboffices, and, to minimize taxpayer inconvenience, over 500 other locations across the country to resolve cases administratively. Although there was a slight decrease in the number of nondocketed appeals cases this year, there was an increase of 44 percent in docketed cases, with docketed and nondocketed case receipts together increasing from 58,505 in 1981 to 63,215 in 1982. Ending inventory increased from 39,254 cases in 1981 to 48,862 in 1982, and proposed additional tax liability in inventory increased from $11.5 billion to $12.2 billion.

The appeals division developed new procedures to achieve more settlements earlier. Revenue Procedure 82-42 made time limitations on appeals settlement jurisdiction in docketed cases more flexible, allowing appeals generally to keep a case as long as progress is being made toward settlement. The division also has served as a focal point in the effort to achieve settlements of shelter cases under the new settlement policy, which allows most tax shelter cases to be settled for out-of-pocket expenses. Appeals has settled 71.1 percent of the tax shelter cases deemed appropriate for settlement.

Settlement of docketed cases increased from 57.1 percent in 1981 to 65.2 percent in 1982 as a result of changes in docketed case procedures that enhance settlement opportunities. Appeals settled 85.4 percent of nondocketed cases this year, compared to 82.7 percent last year.

Of cases with proposed deficiencies exceeding $1 million, appeals settled 77.3 percent, up from 68.6 percent last year. Although these large cases account for 85.3 percent of total dollars in inventory, they comprise only 2.6 percent of total cases in inventory.

Small cases involving deficiencies of less than $2,500 comprise 30.3 percent of total cases in inventory, but they account for less than two percent of total dollars in inventory. Of these small cases, 85 percent were settled by appeals, up from 83.4 percent last year.

Criminal Tax

The criminal tax division and attorneys in the various field offices in 1982 reviewed 2,297 recommendations for prosecution and 1,535 requests for initiation of grand jury investigations and spent 20,912 hours providing pre-referral legal assistance to the criminal investigation division. Among the cases the criminal tax division handled that resulted in indictments, guilty pleas or convictions were those involving the promoters of an abusive coal tax shelter that produced over $150 million in improper deductions for approximately 1,000 investors, a nationally known tax protest advocate involved in the sale and promotion of mail-order ministries, the leader of a worldwide evangelical movement who failed to report interest income, a large corporation and its former president who conspired to evade corporate income taxes by artificially inflating the cost of goods sold and the promoter of a family trust plan that more than 2,000 persons across the nation purchased.

In June 1982 the Supreme Court granted *certiorari* to a case involving the issue of whether the IRS examination process is "preliminary to" a judicial proceeding. The Court's resolution of this issue will significantly affect the IRS's ability to obtain access to grand jury materials for civil purposes.

The criminal tax division instituted a noncomplex case review procedure to speed up the legal review of prosecution referrals in cases that historically have had few legal problems. The division continued to try to eliminate overage cases. At the end of September 1982 there were 47 overage cases, down from 64 a year earlier. Over the last two years the division has reduced overage cases by 84 percent.

Receipt and disposal of criminal tax matters

Prosecution cases received from criminal investigation	
Total opened	2,297
Total closed	2,396
Counsel declined	102
Department of Justice declined	191
U.S. Attorney declined	283
Prosecutions completed	1,820

Total rendered	86
Pending end	36

Disclosure Litigation

The disclosure litigation division advises the IRS on the availability and uses that can be made of taxpayer information.

Of major significance in 1982 was the ruling of the Western District Court for Washington in *Long v. IRS* that source data from the taxpayer compliance measurement program is exempt from disclosure because it would seriously impair enforcement of the internal revenue laws.

The circuits are now split on the question of whether the IRS should be required to edit identifiers from return information of other taxpayers in response to Freedom of Information Act requests. In *Willamette v. United States*, the Ninth Circuit held that the IRS had to edit engineering valuation reports and other private sales data of taxpayers when a third party requested disclosure. The Seventh Circuit in *King v. IRS*, however, agreed with the IRS and held that disclosure of return information with identifiers removed would violate section 6103 and its legislative history.

The division helped establish and implement the plan for the publication of general counsel memoranda, actions on decisions and technical memoranda according to the requirements set forth in *Tax Analysts v. IRS*. The IRS is litigating the issue of whether it may defer the processing of individual requests for *Tax Analysts* documents until the documents have been indexed and made available for public inspection in accordance with the timetable set forth in the consent.

General Legal Services

The general legal services division handles nontax legal matters. In 1982 the division interpreted computer contracts for the service center replacement system, providing technical and legal information to procurement officials. It also developed standardized evaluation criteria and award factors for selection of expert witnesses that conform to established procurement procedures yet allow trial attorneys to select expert witnesses more on the basis of technical competence and testimonial skills than cost.

The division advised the Department of Justice this year that, under statutes making it a felony to impede or obstruct IRS employees in carrying out their duties, criminal charges could be brought against taxpayers who file baseless "common law" liens against property owned by IRS employees.

One of the forfeiture actions initiated by the division involved an expensive foreign car that was forfeited to the federal government as a result of its being the subject of a fraudulent sale and leaseback scheme using back-dated documents to claim certain tax benefits.

General Litigation

The general litigation division advises the IRS in collection and assessment matters. Among the significant cases dealt with this year was *United States v. Brigham Young University*, in which the Tenth Circuit enforced a John Doe summons to obtain the names of persons who had made in-kind charitable contributions to the university. The court held that the IRS's discovery that 162 gifts of silver futures contracts to the school were overvalued provided a reasonable basis for the belief that some contributions of other property to the school may similarly have been overvalued.

In *United States v. Landsberger*, the Eighth Circuit affirmed a district court order enjoining the promoter of a foreign double trust from further sale and promotion of the scheme. The Tax Equity and Fiscal Responsibility Act of 1982 (TEFRA) reinforced the IRS's ability to obtain injunctions against promoters of abusive tax shelter schemes.

In *Columbus Trade Exchange*, the Sixth Circuit upheld a John Doe summons to obtain the names of the members of a barter exchange. The court held that the government's statistics on the failure of

members of other barter exchanges to report income and the tendency to report the income in the wrong year provided a reasonable basis for believing the members of the Columbus Trade Exchange may have failed to comply with the internal revenue laws.

TEFRA reduced delays in summons enforcement, since taxpayers no longer will be able to stay enforcement of a third-party recordkeeper summons simply by notifying the recordkeeper not to comply. Instead, objecting taxpayers have to file suit to quash the summons. TEFRA also clarified the Supreme Court decision in *United States v. LaSalle National Bank* by providing that the IRS may use summonses for criminal purposes as long as a referral to the Department of Justice is not in effect.

Tax Litigation

The tax litigation division assures that the legal position of the IRS is consistently presented in all refund cases and cases litigated in the Tax Court, and attorneys from the division argue most of the Tax Court motions—approximately 1,000 a year—set for hearing in Washington, D.C.

The division improved its efficiency in handling the increasing number of Tax Court cases. With a staff approximately the same size as last year's, it increased case closings 29 percent during the year. This increased productivity resulted primarily from the establishment of streamlined procedures for handling small cases and the development of case precedents in significant tax shelter areas to facilitate settlement.

The special trial attorney program finished the year with 169 groups of cases in its inventory, including many of the largest tax shelter groups in the country. For instance, approximately 1,400 separate cases, referred to generally as the London options cases, were consolidated and set for trial in Los Angeles on Jan. 31, 1983.

On June 15, 1982, the Supreme Court in *Diedrich v. Commissioner* upheld the government's long-standing position regarding the income taxation of a net gift transaction, holding that a donor who makes a gift of property on condition that the donee pay the resulting gift tax realizes taxable income to the

[2]Disposals include cases tried, settled and dismissed.
[3]Amount in dispute includes claims for refund of taxes, penalties and interest and counterclaim amounts.
[4]Amount of taxes, penalties and assessed interest sought as a refund.
[5]That portion of the amount sought as a refund, which was not refunded to the taxpayer.

extent that the gift taxes paid by the donee exceed the donor's adjusted basis in the property. The Supreme Court in *Jewett v. Commissioner* also upheld the government's position that the gift of a contingent remainder interest must be disclaimed within a reasonable time after the donee learns of the creation of the interest, instead of when the interest vests upon the death of the life tenant years later. The Supreme Court has granted *certiorari* in *Tufts v. Commissioner* to resolve a conflict in the circuits over whether nonrecourse liabilities in excess of fair market value of property are includable in the amount realized when the property is sold or exchanged.

The Tax Court rejected the government's argument in *Smith v. Commissioner* and *Jacobson v. Commissioner* that the taxpayers' equally balanced positions in long and short silver futures were integrated transactions resulting in no economic loss, but accepted the government's argument that the taxpayers in this particular case did not enter into the transaction to make a profit. And in *Brannen v. Commissioner*, the Tax Court determined that the purchase and exploitation of the movie in question was an "activity not engaged in for profit" and disallowed all deductions claimed in connection with the tax shelter scheme.

Regional Counsel

As a result of the reorganization, regional counsel now supervise appeals offices through the regional directors of appeals. The IRS's 837 appeals officers handled 52,877 cases and of those settled a total of 42,143 cases administratively in 1982. Attorneys in regional and district counsel offices represented the IRS before the Tax Court, provided advice to the IRS criminal investigation division and, upon request, to the United States attorneys, advised the IRS on legal matters involving the collection of taxes, summons enforcement and labor relations and performed numerous other in-house and courtroom legal services for the IRS.

Corporation and Individual Tax

The corporation and individual tax divisions issue revenue rulings, revenue procedures, letter rulings and technical advice memoranda that apply the tax laws to particular situations.

During the year the rulings divisions issued 290 revenue rulings and procedures and acted on 32,369 requests for letter rulings and technical advice, including 21,999 requests for changes in accounting methods and periods.

Significant revenue rulings issued this year held that earnings on investments underlying annuity contracts will be taxed currently to the policyholder rather than deferred through an annuity arrangement and that a partner will recognize gain on the forced sale of mortgaged real estate to the extent the partner's share of the mortgage exceeds his basis in his partnership interest, even though no gain is recognized on the involuntary conversion at the partnership level. Several revenue rulings relating to all-savers' certificates also were published.

The divisions dealt with questions about safe harbor leasing, such as when property is considered placed in service and how the investment tax credit is applied in strip transactions, and helped develop cases involving the sourcing of income of drug companies operating in Puerto Rico.

The corporation tax division oversees the activities of the Commissioner's art panel, which in 1982 recommended adjustments of 35 percent in $50 million in estates, valuations and charitable deductions claimed for contributions of paintings and sculpture. It also oversees the Commissioner's art print panel, which recommended reductions of 95 percent in $120 million in deductions taxpayers claimed for publishing ventures.

To free up personnel time to address more complex legal and accounting problems, certain common recapitalizations were made a no-ruling area, and revenue procedures were published that removed the requirement for the Commissioner's advance consent on changes in method of accounting relating to vacation pay and bad debts.

To increase efficiency and get rulings out quicker, the rulings divisions set up target deadlines for reconciliation of proposed legal opinions between themselves and the interpretative division and established a procedure for resolution of issues when disagreement occurs at any level in the decision process. The divisions also adopted standard ruling letters for certain high-volume areas, such as charitable remainder trusts and limited partnership classifications, revamped revenue ruling review procedures to ensure early issuance of significant rulings and expanded to 12 courses the continuing education program for upgrading attorney technical skills.

Employee Plans and Exempt Organizations

The employee plans and exempt organizations division prepares regulations and provides legal advice to the IRS on issues involving employee plans and exempt organizations.

During 1982 the division proposed amendment of existing regulations to adjust benefit limitations for inflation and limit benefits that the 25 most highly compensated employees can receive in the event of early termination of an employee plan. It also proposed regulations on how an employee may elect under qualified cash or deferred arrangements that his employer contribute part of his compensation to a profit-sharing or stock-bonus plan so that the employee does not have to include the amount in his income.

The division advised the IRS and the public on what constitutes unrelated business income and what qualifications an organization must have in order to be an exempt organization. It drafted a revenue procedure that identifies which states satisfy the dissolution provision requirements of section 501(c)(3) and a revenue ruling that concludes that, with certain statutory exceptions, section 403(b) annuity contracts must be purchased from insurance companies. It also published a set of questions and answers to explain new individual retirement account rules.

Interpretative

The interpretative division provides legal assistance to the IRS and other divisions of Chief Counsel on most substantive and procedural tax law issues. The division also serves as a focal point for the coordination of IRS litigating and ruling positions.

To respond more quickly to ruling requests, the interpretative division implemented a new procedure for simultaneously developing, along with the rulings divisions, selected technical issues related to ruling requests.

The division prepared legal memoranda on the issue of whether life insurance companies or policyholders were the owners of mutual fund shares held by the companies in connection with wrap-around annuity contracts and on whether "excess interest" credited to life insurance reserves, maintained with respect to certain deferred annuity contracts, is a dividend to policyholders. It also determined that under section 465 an investor who purchased the title to a used motion picture and to film exploitation rights should be treated as if he had borrowed the amount of a note on a nonrecourse basis when the investor's liability on the note is contingent on the IRS's allowing the tax benefits.

The division participated on boards reviewing taxpayer appeals from adverse rulings under section 367 and provided legal advice on a number of corporate issues that became the subjects of proposed legislation.

Legislation and Regulations

The development of tax regulations comprises the bulk of the legislation and regulations division's work. The division also assists the Department of the Treasury and Congress in the drafting of tax law provisions, reviews proposed revenue rulings and drafts of forms and publications to ensure they are consistent with legislation and regulations and gives technical advice to the Department of the Treasury in the negotiation of tax treaties.

The division published regulations this year that extensively revised the previously proposed regulations for distinguishing debt from equity interests of corporations. It proposed regulations on the method by which an affiliated group of corporations that includes a life insurance company and a nonlife company should determine the group's consolidated taxable income. Before 1981 combined life/nonlife groups were not permitted to file consolidated returns.

Other regulations dealt with the computation of the 90-percent net-income limitation on windfall profit, withholding of income tax and social security and railroad retirement taxes from payments of sick pay, procedures for converting existing stock options to incentive stock options, simplified procedures for computing the price index for valuing a LIFO pool, all savers' certificates and safe harbor leasing.

The division also participated in the development and drafting of proposals for the Tax Equity and Fiscal Responsibility Act of 1982 and in negotiating and drafting tax treaties with foreign governments.

Operations

The operations division coordinates personnel and budget matters and provides general administrative support to the office of Chief Counsel.

During 1982, the division undertook an automation and computerization effort to improve efficiency in managing cases. The office of Chief Counsel in 1983 will test a computer system for case tracking and collecting and analyzing management information. This system will track case development, enable attorneys to identify cases with similar issues and provide managers with statistical information useful in allocating attorney resources.

A tracking system also is being developed to monitor legislation projects, with implementation planned for early 1983. This system will display a description of the project and its status and produce statistical reports from information that will be available to Treasury Department officials through the Treasury's executive information system. Other tracking systems for processing interpretative matters, employee plans and exempt organizations matters and tax cases on appeal will be operating early in 1983.

An automated system for jacketing Tax Court cases has increased productivity, and a subscription control system for Chief Counsel's library has improved cost control.

Bows and arrows, 11 percent	7,192	7,673
Firearms (other than pistols and revolvers), 11 percent [25]	51,704	34,846
Shells and cartridges, 11 percent [25]	40,365	23,405
Black lung, total [27]	237,097	426,620
Underground mined coal - $1.00 per ton	103,690	234,103
Underground mined coal - 4 percent of price per ton	21,406	32,413
Surface mined coal - 50¢ per ton	77,428	128,717
Surface mined coal - 4 percent of price per ton	34,573	31,388
Fuel economy, $200 to $1,200 [28]	778[R]	1,716
Alcohol sold as but not used as fuel, 40¢ per gallon up to and 30¢ over 150 proof	883[R]	324
Other [29]	-800[R]	465
Special fuels, total	**587,485**	**628,825**
Noncommercial aviation gasoline, 3 cents per gallon [30]	3,917	422
Noncommercial aviation fuel other than gasoline, 7 cents per gallon [30]	11,806	606
Diesel and special motor fuels, 4 cents per gallon (in some instances 2 cents per gallon)	553,107	598,840
Inland waterway fuel, 6 cents per gallon [31]	18,656	28,756
Other [29]	*	-
Miscellaneous excise taxes, total	**19,773,803**	**24,813,053**
Telephone and teletypewriter exchange services, 1 percent [32]	998,503	919,749
Transportation of persons by air, 5 percent [32]	1,280,732	1,154,863
Transportation of property by air, 5 percent [32]	14,214	-117
Use of international air-travel facilities, $3 per person [30]	31,883	72
Coin-operated gaming devices, $250 per device per year [34]	169	102
Wagering taxes, total	13,163	16,647
Occupational tax, $500 per year	1,074	1,290
Wagers, 2 percent of amount wagered	12,089	15,357
Use tax on highway vehicles weighing over 26,000 pounds, $3 per 1,000 pounds per year (installment privileges permitted)	266,225	257,329
Use tax on civil aircraft, $25 per year with an additional 2 cents per pound on nonturbine engine powered over 2,500 pounds or 3 1/2 cents per pound on turbine engine powered [30]	6,656	547
Firearms transfer and occupational taxes [25]	794	680
Foreign insurance, 1¢ or 4¢ per dollar of premium	74,882	68,276
Exempt organizations, total	89,886	98,526
Net investment income, 2 percent	84,045	93,188
Self dealing, 5 percent on self-dealer, lesser of $10,000 or 2 1/2 percent on foundation manager	2,576	227
Excess business holdings, 5 percent on foundation	44	36
Taxable expenditures, 10 percent on foundation, lesser of $5,000 or 2 1/2 percent on foundation manager	150	142
Failure to timely file certain information returns, $10 per day up to a maximum of $5,000	1,910	3,311
Failure to distribute income, 15 percent of undistributed income	1,158	1,819
Investments that jeopardize charitable purpose, 5 percent on foundation, lesser of $5,000 or 5 percent on foundation manager	4	4
Employee pension plans, total	4,485	7,492
Excess contributions to an IRA, 6 percent of excess amount	956	936
Tax on underdistributions from an IRA, 50 percent of underdistribution	153	130
Prohibited transactions, 5 percent of prohibited transaction	1,140	3,053
Tax on excess contributions to an HR-10 plan, 6 percent of excess amount	81	77
Failure to meet funding standards, 5 percent of funding deficiency	1,120	1,567
Tax on excess contributions to custodial account, 6 percent of excess amount	40	99
Failure to file registration statement, $1 per day up to $5,000	55	80
Failure to file notification of change, $1 per day up to $5,000	6	3
Failure to file statement required by section 6047 or 6058, $10 per day up to $5,000	932	1,541
Failure to file individual statement, $50 for each failure	-	*
Failure to furnish actuarial report, $1,000 for each failure	*	2
Failure to provide IRA reports, $10 for each failure	*	4
Black lung benefit trusts, excess contributions, 5 percent of excess amount	*	2
Taxes on lobbying expenditures, 25 percent of taxable lobbying expenditures	10	*
Windfall profits, total, 27.5 percent to 70 percent of windfall profit [35]	16,930,548	22,035,927
Quarterly return amounts	16,925,988	21,989,960
Annual return amounts	4,560	45,967
Environmental taxes, total [37]	61,264	252,903
Petroleum, 0.79 cent a barrel	10,878	38,952
Chemicals, 22 cents to $4.87 per ton	50,386	213,951
Other [29]	388	54
Unclassified excise taxes [17]	**5,697,884**[R]	**-3,044,455**

Table 3.—Internal revenue collections by principal sources
(In thousands of dollars)

Fiscal year	Total internal revenue collections	Income and profits taxes: Total	Income and profits taxes: Corporation income and profits taxes[2 5 10]	Income and profits taxes: Individual income taxes[3 5 10 20]	Employment taxes[3]	Estate and gift taxes[23]	Alcohol taxes[13]	Tobacco taxes[13]	Manufacturers' excise taxes	All other taxes[36]
	(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)

* Transition quarter.

Footnotes for Tables 1–3

* Less than $500.
[R] Revised.

Note: Detail may not add to totals due to rounding. State and district data for 1982 are not directly comparable with years prior to 1981. For the most part, beginning with 1981, amounts are classified by state and district based on where taxpayers reside rather than, as for 1980 and prior, where taxpayers made payments.

1. The receipts in the various states do not indicate the federal tax burden of each since in many instances taxes are collected in one state from residents of another state. For example, withholding taxes reported by employers located near state lines may include substantial amounts withheld from salaries of employees who reside in neighboring states. Also, the taxes of some corporations are paid from a principal office, although their operations may be located in another state or throughout several states.

2. Includes taxes on unrelated business income of exempt organizations.

3. Collections of individual income tax not withheld include old-age, survivors', disability and hospital insurance taxes on self-employment income (SECA). Similarly, the collections of individual income tax withheld are reported in combined amounts with old-age, survivors', disability and hospital insurance taxes (FICA) on salaries and wages. Estimated separate national totals for individual *income* tax and for *employment* taxes are shown in the text table, Gross internal revenue collections, on page 6 and are used in obtaining national totals for individual income taxes and for employment taxes in table 3.

4. Self-employment tax and taxes imposed by the Federal Insurance Contributions Act are applicable with respect to Guam and American Samoa. Amounts of such taxes collected in Guam and American Samoa are combined with similar taxes reported for "Foreign Operations District—Other."

5. Includes fiduciary income tax collections of $2.6 billion.

6. The Foreign Operations District was established in 1982, replacing the Office of International Operations.

7. The Houston District was established in 1981 to cover certain counties formerly part of the Austin District.

8. Tax payments made to banks under the federal tax deposit (FTD) system are included in the internal revenue collections for the period in which the FTD is purchased. However, such payments are not classified by internal revenue districts (nor by tax subclasses to which excise tax payments relate) until the IRS applies them to taxpayers' liabilities.

9. Represents credits allowable on income tax returns for certain gasoline and lubricating oil tax payments and for excess payments under the Federal Insurance Contribution Act (FICA).

10. Designations by taxpayers of a portion of their taxes to the presidential election campaign fund are not collections as such because they do not affect taxpayer liability. Transfers of amounts to this fund are made on a national basis only and therefore have no effect on district and regional collection data.

11. Represents amounts offset against outstanding tax liabilities other than those for Forms 1040 and 1040A on which the credits are claimed.

12. Includes amounts contained in the national totals but not classified by state or district as of Sept. 30, 1982. Also includes amounts transferred to a special account for the Northern Mariana Islands and adjustments made by the Department of the Treasury to individual income tax withheld and FICA and to unemployment insurance taxes.

13. Amounts of internal revenue taxes collected on Puerto Rican products transported to the United States or consumed on the island (less refunds, drawbacks and expenses) are returned to the Treasury of Puerto Rico under provisions of sections 7652(a)(3) and 5314(a)(4) of the Internal Revenue Code of 1954. The gross amounts are included in overall collection results (tables 1 – 3).

14. Refer to table 2 for components.

15. Detail does not add to total because total includes amounts of miscellaneous collections not shown separately.

16. Includes manufacturers' excise taxes on pistols and revolvers, fishing rods, bows and arrows, firearms and shells and cartridges.

17. Contains, among other items, amounts paid into depositaries but not yet classified into excise detail from Forms 720, *Quarterly* Federal Excise Tax Returns, filed. Generally, Forms 720 are filed and type of excise tax identified and reported in the quarter following the quarter of payment into a depositary. The data shown primarily reflect windfall profit tax amounts. Negative figures result from the classification of amounts previously reported as unclassified.

18. For tax years beginning after 1978, the Revenue Act of 1978 (Public Law 95–600) replaced the old corporate system of normal tax, surtax and surtax exemption with a new rate structure graduated from 17 to 46 percent of taxable income. The lowest rate was reduced to 16 percent for tax years beginning in 1982 by the Economic Recovery Tax Act of 1981 (Public Law 97–34).

19. Individual income tax rates: effective Jan. 1, 1965, graduated rates from 14 to 70 percent of taxable income. A 10-percent per-annum surcharge added for individuals by Public Law 90–364, effective April 1, 1968, was extended to Dec. 31, 1969, at the same annual rate (Public Law 91–53), extended to June 30, 1970 (Public Law 91–171) at a 5-percent annual rate and then discontinued. The Economic Recovery Tax Act of 1981 reduced the range of rates from 12 to 50 percent, effective for taxable years beginning in 1982. Includes SECA taxes of 9.3 percent on net earnings up to $29,700 for 1981 and of 9.35 percent up to $32,400 for 1982.

20. Rates of tax are as follows: income tax graduated withholding from 15 to 39 percent on wages in excess of exemptions, effective Jan. 1, 1979, under Public Law 95–600. The Economic Recovery Tax Act of 1981 reduced the rates to 15 to 37 percent, effective Oct. 1, 1981, and the lowest rate to 14 percent, effective July 1, 1982. A combined FICA tax rate of 13.3 percent was in effect on salaries and wages up to $29,700 for calendar year 1981 and of 13.4 percent up to $32,400 for 1982.

21. Railroad retirement taxes are divided into two tiers for both employers and employees. The tier I tax rate for 1981 was 8.65 percent each on the first $2,475 of monthly compensation and 6.7 percent on the first $2,700 for 1982. Tier II taxes for employees were increased from 9.5 percent to 11.75 percent and established for employees at 2 percent, effective Oct. 1, 1981, on the first $1,850 of monthly compensation for 1981 and $2,025 for 1982.

22. Employers of one or more persons in each of 20 calendar weeks or who paid wages of $1,500 or more in any calendar quarter taxed 3.4 percent on taxable portion of wages up to $6,000. This tax is reduced by credits for unemployment contributions paid to states up to 2.7 percent of FUTA tax.

23. Prior to Jan. 1, 1977, estate tax rates were graduated from 3 percent on the first $5,000 of net estate in excess of a $60,000 exemption to 77 percent on portion over $10 million; gift taxes were three-fourths of the estate tax schedule for corresponding brackets with a $30,000 exemption subject to a $3,000 annual exclusion for each donee. Beginning Jan. 1, 1977, the separate rates for estates and gifts were replaced by unified rates of tax graduated from 18 to 70 percent. The separate exemption amounts were replaced by a unified credit of $47,000 to be phased in over a five-year period ending in 1981. The Economic Recovery Tax Act of 1981 raised the credit to $192,800 to be phased in over a five-year period ($62,800 credit for 1982). Also, the Act raised the annual gift tax exclusion from $3,000 to $10,000, effective Jan. 1, 1982, and provided for annual rather than quarterly returns and payments.

24. Repealed effective Jan. 1, 1980 (Public Law 96–39).

25. FY 1982 amount contains adjustment of -$8,537,000 to correct data for FY 1981.

26. FY 1982 amount contains adjustment of -$8,659,000 to correct data for FY 1981.

27. Rates increased from 50 cents and 2 percent on underground mined coal and 25 cents and 2 percent on surface mined coal, effective Jan. 1, 1982 (Public Law 97–119).

28. The previously reported FY 1980 figure has been revised to $324,000.

29. Includes amount collected or adjusted for taxes that have been repealed or have expired.

30. Expired Sept. 30, 1980.

31. Tax increased from 4 to 6¢ per gallon, effective Oct. 1, 1981 (Public Law 95–502).

32. Rate reduced from 2 to 1 percent, effective Jan. 1, 1982 (Public Law 97–34).

33. Rate reduced from 6 to 5 percent, effective Oct. 1, 1980.

34. Repealed effective June 30, 1980, by the Revenue Act of 1978 (Public Law 95–600).

35. Transfers of machine guns, short-barreled firearms, silencers, etc., $200 each; certain guns with combination shotgun and rifle barrels and other special types of firearms, $5 each. Occupational taxes are levied on manufacturers, importers or dealers in firearms and are included in the amounts shown.

36. Lowest rate reduced from 30 to 27.5 percent, effective Jan. 1, 1982 (Public Law 97–34). Windfall profit tax amounts shown in these tables are incomplete because they reflect only amounts from returns processed by the end of the reporting period. For comprehensive detail on windfall profit taxes, refer to the SOI Bulletin (IRS Publication 1136), which is published quarterly.

37. Taxes effective April 1, 1981 (Public Law 96–510).

38. Contains windfall profit tax amounts of $16.9 billion for FY 1981 and $22 billion for FY 1982 (refer to footnote 36 for cautionary information about these figures).

Table 4.—Amount of internal revenue refunds including interest
(In thousands of dollars)

Internal revenue regions and districts, states and other areas. (States represented by single districts indicated in parentheses; totals for other states shown at bottom of table.)	Total (1)	Corporation income (2)	Individual income (3)	Employment taxes[1] (4)	Estate (5)	Gift (6)	Excise (7)
United States, total[2]	75,201,750	17,974,112	55,101,831[3]	1,578,178	173,914	6,926	368,788[4]
North-Atlantic Region	10,456,843	3,479,814	6,765,800	168,403	24,488	551	17,788

(f) Texas	5,870,825	1,662,977	3,869,074	96,248	16,365	298	25,663

[1] Includes withheld income tax, FICA, railroad retirement and FUTA refunds and credits.
[2] Amounts may not add due to rounding.
[3] Includes earned income credits refunded, amounting to $1.2 billion.
[4] Includes credits for gasoline and lubricating oil tax payments.
[5] Includes credits for excess payments under the federal old age and survivors', federal disability and federal hospital funds, amounting to $338 million.
[6] Includes refunds issued in September 1982 minus refund reversals received in September 1982 that were not classified by district before Sept. 30, 1982 (the end of the fiscal year). For accounting and comparative purposes, the data included in this table must agree with the actual transactions affecting the refund and interest appropriation accounts for the fiscal year.
[7] Includes refunds of special fund receipts (Puerto Rico account 20x5737), amounting to $183,000.
* Less than $500.

Table 5.—Number of internal revenue refunds issued

Internal revenue regions and districts, states and other areas. (States represented by single districts indicated in parentheses; totals for other states shown at bottom of table.)	Total (1)	Corporation income (2)	Individual income (3)	Employment taxes (4)	Estate (5)	Gift (6)	Excise (7)

[1] Includes refunds issued in September 1982 minus refund reversals received in September 1982 that were not classified by district before Sept. 30, 1982 (the end of the fiscal year). For accounting and comparative purposes, the data included in this table must agree with the actual transactions affecting the refund and interest appropriation accounts for the fiscal year.
[2] In table 4, Amount of internal revenue refunds including interest, refund amounts are given for these credits. Where a dash (–) is shown on this table the number of these types of refunds that were issued is counted above by district along with all of the other refunds issued. Where a zero (0) is shown there are no refunds for these types of taxes.
[3] The source of this information is the Bureau of Customs. The Bureau does not provide the count of the number of refunds issued for this item.

Table 6.—Number of returns filed by internal revenue regions and districts, states and other areas

Internal revenue regions and districts, states and other areas. (States represented by single districts indicated in parentheses; totals for other states shown at bottom of table.)		Total tax returns (1)	Individual income tax (2)	Estimated tax (3)	Fiduciary (4)	Partnership (5)	Corporation income tax (6)	Estate tax (7)

Note: Amounts may not add due to rounding. With the exception of estimated tax, penalties can apply to any tax year. Abatements can apply to any tax year.

[1] Includes taxpayer identification number, failure to report tips and miscellaneous.

[2] Includes Forms 1120, 990C and 990T.

[3] Includes Forms 940, 941, 942, 943 and CT-1.

[4] Includes Forms 1041A, 5227, 990PF, 4720, 990, 4638, 2290, 11, 11B, 11C, 720 and 730.

[5] Includes negligence and miscellaneous.

[6] Includes Forms 1041, 1065 and individual retirement account file.

Table 15.—Appeals division receipt and disposition of cases not before the Tax Court (Nondocketed)

A. Progress of work

Status	Number of cases[1] (1)	Amount stated in revenue agents' reports (in thousands of dollars): Deficiency and penalty (2)	Over assessment (3)
Pending Oct. 1	26,785 *	9,230,835	210,193
Received	41,177	3,855,945	166,665
Disposed of, total	37,976	2,223,789	82,736
By agreement	29,986	2,581,234	76,737
Unagreed: (overassessments, claims, excise, employment and offer-in-compromise rejections)	1,230	80,978	2,324
By taxpayer default on statutory notice	2,437	121,330	213
Petition filed, transferred to Counsel	4,323	440,247	3,462
Pending Sept. 30	29,986	9,862,991	294,122

B. Results

Status	Number of cases[1] (1)	Appeals determination (in thousands of dollars): Deficiency and penalty (2)	Over assessment (3)
Disposed of, total	37,796	1,276,524	176,374
By agreement	29,986	1,067,271	172,958
Unagreed (overassessments, claims, excise, employment and offer-in-compromise rejections)	1,230	85,493	1,445
By taxpayer default on statutory notice	2,437	112,781	145
Petition filed, transferred to Counsel	4,323	10,979	1,826

[1] A case represents taxpayers grouped together by tax periods with common or related issues that may be heard and disposed of together.
* Data revised from previous annual report.

Table 16.—Appeals division receipt and disposition of income, estate and gift tax cases petitioned to the Tax Court (Docketed)

A. Progress of work

Status	Number of cases[1] (1)	Amount stated in statutory notices (in thousands of dollars): Deficiency and penalty (2)	Over assessment (3)
Pending Oct. 1	11,739 *	1,598,266	17,973
Received	22,038	1,506,342	3,719
Disposed of, total	14,901	713,342	12,373
Agreed in appeals	8,448	468,138	10,916
Dismissed, lack of jurisdiction	1,274	4,451	5
Unagreed, transferred to Counsel's sole jurisdiction	5,179	240,753	1,453
Pending Sept. 30	18,876	2,391,266	9,319

B. Results obtained in dispositions

Method	Number of cases[1] (1)	Appeals determination (in thousands of dollars): Deficiency and penalty (2)	Over-assessment (3)
Disposed of, total	14,901	568,534	3,806
Agreed in appeals	8,448	322,764	3,537
Dismissed, lack of jurisdiction	1,274	5,017	6
Unagreed, transferred to Counsel's sole jurisdiction	5,179	240,753	163

[1] A case represents taxpayers grouped together by tax periods with common or related issues that may be heard and disposed of together.
* Data revised from previous annual report.

501(e) Cooperative hospitals	112	106
501(f) Coop. service orgs. of operating educational orgs.	-	-
521 Farmers' cooperatives	2,960	2,791
Total	**851,012**	**841,440**

*This figure does not represent a true universe of section 501(c)(3) organizations because certain organizations, such as churches, their integrated auxiliaries and conventions or associations of churches, need not apply for recognition of exemption unless they desire to receive a ruling. When issued the ruling letter goes to the central organization, but it covers all of its subordinate units. Only the central organization is established on the exempt organizations master file where it is counted as one entity in the figure as stated above. However, this one ruling may represent a large number of subordinate units, as in the case of larger religious sects. An exception are subordinate units considered nonintegrated auxiliaries, which are established and included in the above figures since they may be required to file information returns as prescribed under section 6033.

*This figure represents actual IRS operating costs from FY 1975, exclusive of reimbursements received from other agencies for services performed. While the operating cost figures for fiscal years prior to 1975 may in some cases include reimbursements, those amounts are small and do not alter the cost figures in column 3.
–Economic stabilization program average positions included in 1972, 1973 and 1974.
–Federal energy program average positions included in 1974.
–1972 adjusted by 3,990 average positions to reflect the AT&F transfer—July 1972. AT&F included in years 1948–71.
–Eleven average positions transferred to office of the Secretary in 1965. Twenty average positions transferred to office of the Secretary in 1963.

William Orton
New York
July 1, 1865 / Oct. 31, 1865

Edward A. Rollins
New Hampshire
Nov. 1, 1865 / March 10, 1869

Columbus Delano
Ohio
March 11, 1869 / Oct. 31, 1870

Alfred Pleasonton
New York
Jan. 3, 1871 / Aug. 8, 1871

John W. Douglass
Pennsylvania
Aug. 9, 1871 / May 14, 1875

Daniel D. Pratt
Indiana
May 15, 1875 / July 31, 1876

Green B. Raum
Illinois
Aug. 2, 1876 / April 30, 1883

Walter Evans
Kentucky
May 21, 1883 / March 19, 1885

Joseph S. Miller
West Virginia
March 20, 1885 / March 20, 1889

John W. Mason
West Virginia
March 21, 1889 / April 18, 1893

Joseph S. Miller
West Virginia
April 19, 1893 / Nov. 26, 1896

W. St. John Forman
Illinois
Nov. 27, 1896 / Dec. 31, 1897

Nathan B. Scott
West Virginia
Jan. 1, 1898 / Feb. 28, 1899

George W. Wilson
Ohio
March 1, 1899 / Nov. 27, 1900

John W. Yerkes
Kentucky
Dec. 20, 1900 / April 30, 1907

John G. Capers
South Carolina
June 5, 1907 / Aug. 31, 1909

Royal E. Cabell
Virginia
Sept. 1, 1909 / April 27, 1913

William H. Osborn
North Carolina
April 28, 1913 / Sept. 25, 1917

Daniel C. Roper
South Carolina
Sept. 26, 1917 / March 31, 1920

William M. Williams
Alabama
April 1, 1920 / April 11, 1921

David H. Blair
North Carolina
May 27, 1921 / May 31, 1929

Robert H. Lucas
Kentucky
June 1, 1929 / Aug. 15, 1930

David Burnet
Ohio
Aug. 20, 1930 / May 15, 1933

Guy T. Helevering
Kansas
June 6, 1933 / Oct. 8, 1943

Robert E. Hannegan
Missouri
Oct. 9, 1943 / Jan. 22, 1944

Joseph D. Nunan, Jr.
New York
March 1, 1944 / June 30, 1947

George J. Schoeneman
Rhode Island
July 1, 1947 / July 31, 1951

John B. Dunlap
Texas
Aug. 1, 1951 / Nov. 18, 1952

T. Coleman Andrews
Virginia
Feb. 4, 1953 / Oct. 31, 1955

Russell C. Harrington
Rhode Island
Dec. 5, 1955 / Sept. 30, 1958

Dana Latham
California
Nov. 5, 1958 / Jan. 20, 1961

Mortimer M. Caplin
Virginia
Feb. 7, 1961 / July 10, 1964

Sheldon S. Cohen
Maryland
Jan. 25, 1965 / Jan. 20, 1969

Randolph W. Thrower
Georgia
April 1, 1969 / June 22, 1971

Johnnie M. Walters
South Carolina
Aug. 6, 1971 / April 30, 1973

Donald C. Alexander
Ohio
May 25, 1973 / Feb. 26, 1977

Jerome Kurtz
Pennsylvania
May 5, 1977 / Oct. 31, 1980

Roscoe L. Egger, Jr.
Indiana
March 14, 1981
