

MANUAL TRANSMITTAL

Department of the Treasury
Internal Revenue Service

3.41.267

SEPTEMBER 3, 2025

EFFECTIVE DATE

(01-01-2026)

PURPOSE

- (1) This transmits revised IRM 3.41.267, Optical Character Recognition Scanning Operations, Affordable Care Act Information Return Processing on Service Center Recognition/Image Processing System.

MATERIAL CHANGES

- (1) Editorial corrections made throughout the IRM as follows:
 - Updated processing valid tax years to 2022 through 2025.
 - Updated delinquent return date ranges for the new processing year to 2026.
 - Updated Naked links.

EFFECT ON OTHER DOCUMENTS

This supersedes IRM 3.41.267 dated December 04, 2024 (effective January 01, 2025).

AUDIENCE

Taxpayer Services, Submission Processing, Data Conversion Operations

James L. Fish
Director, Submission Processing
Taxpayer Services

3.41.267

Affordable Care Act Information Return Processing on Service Center Recognition/Image Processing System

Table of Contents

- 3.41.267-8 Unit Production Card (UPC) Inputs for Batch/Block Tracking System (BBTS)

3.41.267.1
(01-01-2020)
Program Scope and Objectives

- (1) This program provides human intervention for data verification of electronic data record created by optical recognition engines for the purpose of data capture from paper returns filed with the IRS.
- (2) **Purpose:** This IRM provides instruction on processing of paper filed Affordable Care Act information returns (ACA IRP) on the Service Center Recognition/Image Processing System (SCRIPS). This instruction converts taxpayer data reported to electronic data records to fulfill the filing requirement.
- (3) **Audience:** Submission Processing Data Conversion Operation personnel including: clerks, peripheral operators, leads and supervisors. These instructions apply to all campuses.
- (4) **Policy Owner:** The Director of Submission Processing.
- (5) **Program Owner:** Mail Management Data Conversion Section, Return Processing Branch (an organization within Submission Processing).
- (6) **Primary Stakeholders:** Service and Enforcement, ACA Implementation, Compliance Strategy and Policy and Small Business/Self Employed (SB/SE), Operations Business Support, and Office of Servicewide Penalties.
- (7) **Program Goals:** Convert processable paper filed Affordable Care Act information documents to electronic data records.

3.41.267.1.1
(01-01-2018)
Background

- (1) Filers send paper information returns to IRS to fulfill their filing requirement and provide their taxpayer identification number (TIN). The IRS must convert the information present on the paper filings to an electronic data record. Employees input and validate the data present and IRS systems for these records during conversion to electronic data records.

3.41.267.1.2
(01-01-2022)
Authority

- (1) Authority for these procedures located in Title 26 of the United States Code (USC) or more commonly known as the Internal Revenue Code (IRC). The IRC receives amendments by acts, public laws, treasury determinations, rules, and regulations such as the following:
 - Information Reporting on Health Coverage by Insurers IRC 6055
 - Information Reporting on Health Coverage by Employers IRC 6056
 - Failure to File a Correct Information Return IRC 6721
- (2) Policy Statements for Submission Processing located in IRM 1.2.1.4, Policy Statements for Submission Processing Activities.

3.41.267.1.3
(01-01-2018)
Roles and Responsibilities

- (1) The Director, Submission Processing approves and authorizes issuance of this IRM.
- (2) The Planning and Analysis staff provides feedback and supports local management to achieve and effectively monitor scheduled goals.
- (3) The Operations Manager secures, assigns and provides training to perform the instruction.
- (4) The team manager assigns, monitors and controls the workflow to complete the work timely.

3.41 Optical Character Recognition Scanning Operations

- (5) The employee applies the instruction to the SCRIPS system to convert paper data to an electronic data record.

3.41.267.1.4
(01-01-2020)

Program Management and Review

- (1) **Program Reports:** Management uses these reports to monitor daily (IPS0698 throughout each workday) and weekly status of the program to completeness.
- IPS0083, Workstation Operator Statistics Program and Function Summary Report
 - IPS0698, Workflow Status
 - IPS01119, Run Balance Report
 - IPS06440, Throughput Statistics Report
 - PCC 2240, Daily Production Report - Program Sequence
 - PCC 6040, SC WP&C Performance and Cost Report
 - PCC 6240, SC WP&C Program Analysis Report
 - PCB 0440, Daily Workload and Staff Hours Schedule
 - PCB 0540, Weekly Workload and Staffing Schedule
- (2) **Program Effectiveness:** Management measures goals using standard documents per hour reports. Each function must complete inventory prior to the program completion date stated in IRM 3.30.123, Work Planning and Control - Processing Timeliness: Cycles, Criteria, and Critical Dates. Local Management ensures quality products conducting and monitoring quality reviews. Managerial or product review in Data Validation function performed each week on every employee and entered in Embedded Quality for Submission Processing System (EQSP). Managerial and product review supplement the quality review process.
- (3) **Annual Review:** Review the processes included in this manual annually to ensure accuracy and promote consistent tax administration.

3.41.267.1.5
(01-01-2018)

Program Controls

- (1) Management uses unit production cards (UPCs) to measure and record activity in each function of this program.
- (2) Management can use local reports to establish information to support daily program control. Local reports never replace the established official reports.

3.41.267.1.6
(01-01-2018)

Terms/Acronyms/Definitions

- (1) Locate terms and acronyms in this instruction in Exhibit 3.41.267-1, Terms/Acronyms/Definitions.

3.41.267.1.7
(01-01-2022)

Related Resources

- (1) The following table lists the IRM primary sources of guidance on the processing of paper filed forms under the Affordable Care Act program.

IRM	Title	Guidance on
IRM 3.10.5	Campus Mail and Work Control - Batch/Block Tracking System (BBTS)	utilizing BBTS to drop unit production cards for daily incoming receipts and production
IRM 3.10.72	Campus Mail and Work Control - Receiving, Extracting, and Sorting	receiving, extracting, sorting, and routing mail within the Submission Processing campuses

IRM	Title	Guidance on
IRM 3.10.8	Campus Mail and Work Control, Information Returns Processing	fine sorting, correspondence routing and disposition for Information Returns Program
IRM 3.13.62	Campus Document Services - Media Transport and Control	shipping of SCRIPS requests
IRM 3.41.274	Optical Character Recognition Scanning Operations, General Instructions for Processing via Service Center Recognition/Image Processing System	workstation functions, workstation keyboard, windows environment and general instruction for entering data from tax returns and related data through SCRIPS
IRM 3.41.275	Optical Character Recognition Scanning Operations, Scanner Operations on Service Center Recognition/Image Processing System	scanning returns on the SCRIPS scanner
IRM 10.5.1	Privacy and Information Protection - Privacy Policy	shipping of SCRIPS requests
Document 12990	Records and Information Management Records Control Schedules	time frame to destroy paper sample after conversion to electronic data records
Document 13056	Shipping Procedures for Personally Identifiable Information (PII)	shipping of image SCRIPS requests
Document 13144	Proper PII Shipping Procedures	shipping of SCRIPS image requests
Training 2335-series	Instructor's Corner for Submission Processing - SCRIPS	course material for SCRIPS entry, located at <i>Instructors Corner for Submission Processing SCRIPS</i>

- (2) IRMs present on Servicewide Electronic Research Program (SERP) at the following site: *Servicewide Electronic Research Program (SERP)*. Specific instructional links available on the IMF Data Conversion Research Portal located at *IMF Data Conversion Research Portal*.
- (3) IRM 3.13.62, Campus Document Services - Media Transport and Control, or IRM 10.5.1, Privacy and Information Protection - Privacy Policy, provides information on shipping Personally Identifiable Information (PII). This document is located at: *Postal and Transport Policy*.

3.41.267.2
(01-01-2018)
Introduction

- (1) This IRM section describes certain tasks necessary in the processing of Affordable Care Act information returns processing (ACA IRP) filed on paper with the Service Center Recognition/Image Processing System (SCRIPS).
- (2) Submit IRM deviations in writing following instructions from IRM 1.11.2.2, Internal Management Documents System - Internal Revenue Manual (IRM) Process, IRM Standards, and elevated through proper channels for executive approval.

3.41 Optical Character Recognition Scanning Operations

- (3) The Taxpayer Bill of Rights (TBOR) lists rights that already existed in the tax code, putting them in simple language and grouping them into 10 fundamental rights. Employees are responsible for being familiar with and acting in accord with taxpayer rights. See IRC 7803(a)(3), Execution of Duties in Accord with Taxpayer Rights, and additional information on the *Taxpayer Bill of Rights* site located at the following location: *Taxpayer Bill of Rights*.

3.41.267.2.1
(01-01-2025)

- (1) The instructions in this section apply only to the form types listed below for tax years 2022 through 2025:

Source Documents

Affordable Care Act Information Returns Processing (ACA IRP) Form, Title	Form Characteristics
Form 1094-B, Transmittal of Health Coverage Information Returns	transmitting one or more Form 1095-B, Health Coverage
Form 1094-C, Transmittal of Employer-Provided Health Insurance Offer and Coverage Information Returns	transmitting one or more Form 1095-C, Employer-Provided Health Insurance Offer and Coverage
Stand-alone Form 1094-C, Transmittal of Employer-Provided Health Insurance Offer and Coverage Information Returns (SA1094C)	with an entry in both corrected box (checked) and Part I, Line 19 box (checked)
Form 1095-B, Health Coverage	transmitted by Form 1094-B, Transmittal of Health Coverage Information Returns
Form 1095-C, Employer-Provided Health Insurance Offer and Coverage	transmitted by Form 1094-C, Transmittal of Employer-Provided Health Insurance Offer and Coverage Information Returns

3.41.267.2.2
(01-01-2018)

Program Codes

- (1) Use program code number 44320 for the processing functions of Affordable Care Act information returns instruction in this IRM.
- (2) Limit output files to approximately 200,000 data records of each form type ("B" and "C") to accommodate the receiving systems limitations.

Example: A valid output file consists of no more than 200,000 data records of form type "B" and 200,000 data records of form type "C."

3.41.267.2.3
(01-01-2022)

How to Use This Internal Revenue Manual (IRM)

- (1) Keystroke Combinations:
- Carets enclose keystroke combinations (e.g., <Enter>).
 - A hyphen separates multiple keystroke combinations (e.g., <Ctrl>-M). This means hold down the <Ctrl> key while pressing the M key.
- (2) Terms and Acronyms - Exhibit 3.41.267-1, Terms/Acronyms/Definitions, lists terms and the definitions of terms related directly and indirectly to ACA IRP SCRIPS processing.

- (3) QUICK START - Each function (Original Entry Image (OE-Image), Data Validation Image (DV-Image)) begins with QUICK START instructions intended to speed access to a UW. For detailed data entry and validation instructions found in the following narrative, see IRM 3.41.267.9, General Correction Procedures, and the tables and transcription sheet exhibits in the back of this IRM. More general instructions appear in IRM 3.41.274, Optical Character Recognition Scanning Operations, General Instructions for Processing via Service Center Recognition/Image Processing System.

Reminder: Whenever IRM 3.41.274, Optical Character Recognition Scanning Operations, General Instructions for Processing via Service Center Recognition/Image Processing System, and this IRM conflict, follow this IRM.

- (4) Tables

Table Location	Table	Table Entries and Use
Exhibit 3.41.267-1	Terms/Acronyms/Definitions	provides the corresponding definitions for the provided listing of terms and abbreviations used throughout section 267 of chapter 41
IRM 3.41.267.1.7	Related Resources	lists related resources to use in conjunction with the instruction given
IRM 3.41.267.2.1 (1)	Source Documents Form list and form characteristics	lists each form name and title and states the characteristics of each form type
IRM 3.41.267.5 (3)	Workstation Operations Specific Key Functionality	lists specific keyboard keys and key combinations with the functionality of each listed
Exhibit 3.41.267-2	States, State Codes, and Zone Improvement Plan (ZIP) Codes Sorted by State	lists ZIP Code ranges sorted by the state
Exhibit 3.41.267-3	States, State Codes, and Zone Improvement Plan (ZIP) Codes Sorted by ZIP Code	lists states sorted by the ZIP Code range

3.41 Optical Character Recognition Scanning Operations

Table Location	Table	Table Entries and Use
Exhibit 3.41.267-4	Zone Improvement Plan (ZIP) Code, City, and State Exceptions	lists exceptions to the ZIP Code ranges
Exhibit 3.41.267-5	Alphabetical Listing of Major Cities with Major City Codes and Zone Improvement Plan (ZIP) Codes	lists major city codes for use with address entry
Exhibit 3.41.267-6	Affordable Care Act Information Return Transcription Sheets	lists screen prompt and instruction by form page for use in the OE and DV functions
Exhibit 3.41.267-7	Valid Characters	list valid characters and describes the characters allowed in fields present on the transcription sheets

(5) Transcription sheets:

- Exhibit 3.41.267-6, Affordable Care Information Return Transcription Sheets is transcription sheets for use in the OE and DV functions.
- Separate sheets for each form type and page number with screen prompts, description and instruction of each individual data field present on the documents is available.
- These sheets provide most of the information needed to process ACA IRP documents on SCRIPS.

3.41.267.3
(01-01-2022)
**Affordable Care Act
Information Return
Processing Document
Preparation**

- (1) Use IRM 3.41.275, Optical Character Recognition Scanning Operations, Scanner Operations on Service Center Recognition/Image Processing System, for instruction on scanning forms into SCRIPS.
- (2) Perform perfection on the UW by placing it in the proper succession (order) for scanning.

Example: A Form 1094-C, Transmittal of Employer-Provided Health Insurance Offer and Coverage Information Returns, has a blank page 2 and a completed page 2 followed by a page 3. Cover the entire blank page 2 or copy page 1, to make the work scannable for SCRIPS system.

- (3) If a condition exists prohibiting scanning of a processable UW, perform OE from paper process on the UW.

Note: Form 1094 (series) return must still undergo image only process for the retention copy.

3.41.267.3.1
(01-01-2026)
Coding of Late-Filed Submissions

- (1) Late filed Form 1094-B, Transmittal of Health Coverage Information Returns, and Form 1094-C, Transmittal of Employer-Provided Health Insurance Offer and Coverage Information Returns, submissions received from the IRP Sort function with an IRS Received Date stamp require the Delinquent Return Date (IRS received date) and Delinquent Return Indicator information processed.
- (2) Delinquent Return Indicator - Located in the "For Official Use Only" area (first

#

Delinquent Return Indicator	Definition of Indicator	Delinquent Return Date
	Assessed Return	No date entry
	Collection secured	No date entry
	Examination secured	No date entry
	Suppress notice indicator	No date entry
	Prepared by Civil Penalty Unit	No date entry
	Penalty assessment is automatic	Date entry Return date
blank	Timely filed - no date	No date entry

3.41.267.3.2
(01-01-2022)
Scanner

- (1) See scanner operator instruction in IRM 3.41.275, Optical Character Recognition Scanning Operations, Scanner Operations on Service Center Recognition/Image Processing System, for complete scanner operating instructions.
- (2) Select manual feed process from the transport console "**IRP-ACA**" menu to scan hand drop ACA IRP.

Note: The system assumes the first page is a Form 1094 (series) return.

- (3) Scan submissions Form 1094 (series) and all associated Form 1095 (series) again one submission at a time.

Note: The scanner does not reject any pages except mechanical rejects.

- (4) Press the <F3> key to denote the end of the submission and prompts “**Start New Batch, or Q to Quit.**”
- (5) Do not scan batches or boxes of work having many missing or invalid Form IDs on the submissions but return to IRP Sort function for correction. See IRM 3.41.267.4.1, Unprocessable UW Conditions, for instruction on defining invalid Form ID.

3.41.267.3.2.1
(06-27-2017)
Scanner Rejects

- (1) The scanner prints the reject code “**M**” (Mixed Document Type) or “**X**” to the left of the Document Locator Number (DLN) area on any form or page rejection.
- (2) A mixed document type submission received from the scanning function is one of the form types listed in IRM 3.41.267.2.1 (1), Source Documents.
- (3) Only non-conforming, mixed, invalid document types, or pages within the submission reject.

3.41.267.3.3
(01-01-2016)
Correspondence on Processable Returns

- (1) No entry is “**valid**” for use with this program.
- (2) Remove any entry present in the screen input if noticed.

3.41.267.3.4
(01-01-2019)
Post Document Preparation (Doc Prep) Required

- (1) Pull and return to the IRP Sort function daily any documents and Units of Work (UWs) SCRIPS cannot resolve listed on the IRP ACA Pull Document/ Submission Report. See IRM 3.41.267.12.9, Pull Unit of Work (Submission) Report for information on the report.
- (2) Send Integrated Data Retrieval System (IDRS) image requests daily by secure e-mail to the Unit manager of the requesting unit. Use *IUUD:IDRS Unit & USR Database* located at the following link to retrieve the e-mail addresses: *IDRS Unit Samp; USR Database*. Use “**ESTAB Request**” as the subject of the secure e-mail.

Note: An IDRS List Report is available under General Reports in the backend of SCRIPS for use on volumes. Local level can complete more actions or negotiate alternate distribution with requesting organizations barring excessive staff hour usage.

3.41.267.4
(01-01-2016)
Unprocessable Unit-of-Work

- (1) Return to the IRP Sort function all unprocessable documents requiring correspondence. The IRP Sort function corresponds with the filer concerning their submission and asks the filer to refile processable documents.

3.41.267.4.1
(01-01-2021)
Unprocessable Unit-of-Work Conditions

- (1) Consider the following conditions unprocessable:
 - You cannot determine what the taxpayer data is (foreign language, completely illegible).
 - You cannot determine the type of return.
 - You cannot determine the tax year of the return.
 - Invalid tax year on the Form 1094 series.

Example: SCRIPS does not process tax years equal to the processing year minus five or more.

- You cannot determine the tax year of the submission.

Example: The tax year on the transmittal and the tax year on all details do not match.

- When the name of the filer/employer on the transmittal document (Form 1094 (series)) has one or more of the first four characters present illegible, is entirely illegible, or missing and is not available from the first detail record.

Exception: For Form 1094-B, Transmittal of Health Coverage Information Returns, the filer is not available from the first detail record or any of the detail documents.

- The filer altered box titles.
- The submission is missing a transmittal (corresponding Form 1094 series return).
- Form ID is invalid, missing, in the wrong font, or in the wrong location on the submission or part of the submission.
- Units of work (UW) where 50 percent or more of the TINs (social security numbers (SSNs)) show only the last four-digits of the SSNs (appear redacted).

Example: If the SSN or a part of the SSN present is masked, hidden, represented by asterisk or, incomplete in any way consider it redacted.

- When any character in the filer or employer Taxpayer Identification Number/Employer Identification Number (EIN) on the transmittal is illegible or is missing and not available on the first detail.

Exception: For Form 1094-B, Transmittal of Health Coverage Information Returns, the filer is not available from the first detail record or any of the detail documents.

- When the EIN on the transmittal is equal to a repeating number or sequential numbers.

Example: A repeating EIN is 11-1111111, 22-2222222, etc., and a sequential EIN is 12-3456789.

- The submission is a Form 1094-B, Transmittal of Health Coverage Information Returns, with no corresponding Form 1095-B, Health Coverage, records.
- The employer EIN on Form 1094-C, Transmittal of Employer-Provided Health Insurance Offer and Coverage Information Returns, does not match the employer listed on Form 1095-C, Employer-Provided Health Insurance Offer and Coverage, transmitted and is noticed.

Caution: This does not apply to the “B” series.

- The submission is a Form 1094-C, Transmittal of Employer-Provided Health Insurance Offer and Coverage Information Returns, with no corresponding Form 1095-C, Employer-Provided Health Insurance Offer and Coverage, records “and” the corrected box “and” line 19 both do not contain a mark.

3.41 Optical Character Recognition Scanning Operations

3.41.267.4.2
(01-29-2019)

Unprocessable Unit-of-Work Disposition

- (1) Pull unprocessable units-of-work (UW) daily and returned to the IRP Sort unit for taxpayer correspondence or disposition.
- (2) A report titled, IRP ACA Pull Document/Submission Report, displays unprocessable UWs. Pull these daily and returned to the IRP Sort unit. See characteristics of the report in IRM 3.41.267.12.8, Pull Unit of Work (Submission) Report.

Exception: PULL IMAGE ONLY and PULL IMAGE ONLY - NO DLN require resolution in SCRIPS.

- (3) Tag each condition prior to forwarding to IRP Sort with the reason code given on the pull report for a specific UW to allow the determination of correspondence sent for these unprocessable documents.

Example: The site can choose to create a routing sheet and include pull document reason codes, circle the code for each UW and attach it when returning the unprocessable documents to IRP Sort unit.

3.41.267.5
(01-01-2022)

Workstation Operations

- (1) Refer to the IRM 3.41.274, Optical Character Recognition Scanning Operations, General Instructions for Processing via Service Center Recognition/Image Processing System, for a description of the items below and other items:
 - Keyboard Layout
 - Login/Logoff
 - Operator Statistics
 - Post-to-Close
 - Interrupt/Resume
 - Suspend/Resume
 - Status Line
 - Window Prompts
 - Key Functions
- (2) Whenever IRM 3.41.274, Optical Character Recognition Scanning Operations, General Instructions for Processing via Service Center Recognition/Image Processing System, and this IRM conflict, follow this IRM.
- (3) Each key or key combination description is the functionality while inside SCRIPS and does not apply to keyboard functionality on other programs. Below lists some function key descriptions.

Function Key	Description
<F5>	Allows you to move the entry field to a different place relative to the area on the scanned image.
<F7>	Allows you to go back and review previous documents or previous pages in the unit-of-work.
<Insert>	Places the cursor in Overstrike Mode. The keyboard is normally in Overstrike Mode; however, <Insert> removes the keyboard from Overstrike Mode.

Function Key	Description
<Ctrl>-<Shift>-<Delete> <Ctrl>-<Shift>- <Ctrl>-<Delete>	Deletes a unit-of-work.
<Ctrl>-<Shift> and arrow keys (←→↑↓arrows)	Allows you to move the image strip when it is not lined up. Holds the position for the current image.
<Ctrl>-D	Copies the data from the same field on the previous document.
<Page Up>	ACA IRP: Allows you to move between page 1, page 2 and or page 3(s) of Form 1094-C, Form 1095-B and Form 1095-C.
<Page Down>	ACA IRP: Allows you to move between page 1, page 2 and or page 3(s) of Form 1094-C, Form 1095-B and Form 1095-C.
<Shift>-<Print Screen>	Prints the current screen on the monitor. Caution: Release the Print Screen button first and then the shift key. The printing action begins upon the release of the Print Screen keystroke.
<Ctrl>-M	Enlarges the size of the scanned image appearing above the entry field.
<Ctrl>-L	Reduces the size of the scanned image appearing above the entry field.

3.41.267.6
(01-01-2016)
**Forms Identification (FI)
Function**

- (1) Non-conforming form is when the scanner does not recognize all documents or all pages of the document. These include photocopies of official documents, official forms but for some reason do not meet the official specifications for measurement, homemade documents of varying formats or documents without or with invalid form identification numbers in the upper right-hand corner of the page. The **FI** function allows the manager/work leader to identify the form (or the page of the form) to avoid rework at the scanner. The **FI** screen displays an image and an entry template on the right. The entry template permits the operator to select what form type the image is, or to delete a single image or an entire submission from further processing. The menus shown on the screen depend on how your supervisor profiled you.

Example: The FI option appears grayed out on the Workstation Main Menu if not in your profile.

3.41.267.6.1
(01-01-2022)
**Forms Identification (FI)
QUICK START**

- (1) From the Workstation Main Menu, select the numeric code for Original Entry (OE).
- (2) From the Original Entry (OE) Selection Menu, select the numeric code for Form Identification Selection Menu.

3.41 Optical Character Recognition Scanning Operations

- (3) From the Form Identification Selection Menu, select the numeric code for the type of **FI** needed.
- (4) The first group of images, from a UW requiring identification, opens.
- (5) If an incorrect option is selected from the Form Identification Selection Menu, press the **<Ctrl>-P** key combination to set post-to-close and press **<F9>** to suspend, before entering any data, to return to the Form Identification Selection Menu.

Note: Notify your supervisor.

- (6) Press the **<Ctrl>-P** post-to-close key combination to end **FI** after completing the current UW.
- (7) The system returns to the Form Identification Selection Menu when you complete the last image identification in the UW.

3.41.267.6.2
(01-01-2025)

Form Identification (FI) Processing

- (1) The system assigns a six-digit sequence number instead of a document locator number (DLN) to documents it cannot identify. This number assists in locating the UW when researching documents. Once the form type/page is identified, the system assigns a DLN to the document.
- (2) Identify the image by entering the proper number or letter selection from the template in the form identification menu selection. The tables below appear on the SCRIPS workstation directly below each other.

Form 1094 Series

Menu Option	Form/Page/(Form ID)	Menu Option	Form/Page/(Form ID)
A	Form 1094-B pg1 (110116)	B	Form 1094-C pg1 (120118)
		C	Form 1094-C pg2 (120218)
		D	Form 1094-C pg3 (120316)

Form 1095 Series

Menu Option	Form/Page/(Form ID)	Menu Option	Form/Page/(Form ID)
1	Form 1095-B pg1 (560118)	3	Form 1095-C pg1 (600120)
		4	Form 1095-C pg1 (600118) Note: Do not use.

Menu Option	Form/Page/(Form ID)	Menu Option	Form/Page/(Form ID)
2	Form 1095-B pg3 (560318)	5	Form 1095-C pg3 (600320)
		6	Form 1095-C pg3 (600318) Note: Do not use.

Press the <Enter> key to complete a selection.

- (3) Press <F9> to suspend the document for the person working suspense to research when you cannot identify the image. If the image is unprocessable, press “X” to remove the document from further processing.
- (4) Suspend the document for the supervisor if the image is a form type other than ACA IRP (such as Form 1040 or Form 941) by pressing <F9>. The person working suspense pulls the documents for proper routing before pressing “X” to remove the document from further processing.
- (5) If multiple form types exist in a submission, research is needed to determine if the submission requires deleting. Deleting the entire submission is sometimes more efficient, than removing many single documents. Delete submissions by pressing the <Ctrl>-<Shift>-<Delete>, <Ctrl>-<Delete>, or <Ctrl>-<Shift>- key combination.
- (6) Press the <Ctrl>-P post-to-close key combination to set post-to-close to end the session. The system returns you to the Original Entry (OE) Selection Menu when you complete the last image in the UW.

3.41.267.7
(01-01-2016)
**Original Entry (OE)
Function**

- (1) Use the OE function to manually key enter data from both scanned images and from paper documents. The menus shown on the screen depends on how your supervisor profiled you.

Example: This option is grayed on the Workstation Main Menu if it is not in your profile.

3.41.267.7.1
(01-01-2022)
**Original Entry (OE)
Image QUICK START**

- (1) From the Workstation Main Menu, select Original Entry (OE).
- (2) From the Original Entry (OE) Selection Menu, select OE Image Selection Menu.
- (3) From the OE Image Selection Menu, select IRP ACA OE Image.
- (4) From the IRP ACA OE Image Selection Menu, select one of the following:
 - 1 - All IRP ACA OE Image
 - 2 - Form 1094-B OE Image
 - 3 - Form 1094-C OE Image
- (5) After the selection is entered press <Enter> as prompted or press <Alt>-X to exit to previous menu.

3.41 Optical Character Recognition Scanning Operations

- (6) The first individual document in a UW requiring OE opens. See Exhibit 3.41.267-6, Affordable Care Act Information Return Transcription Sheets.
 - a. The scanned image of the document displays on the left side of the workstation screen.
 - b. The right side of the workstation screen is where the data is input in the specific field window.
- (7) If an incorrect option is selected, press the **<Ctrl>-P** post-to-close key combination and then suspend this UW. Notify your supervisor.
- (8) If the last data entered is not the last field of the page and there is no other data present on the page, press **<F6>** key to release a document and display the next template.
- (9) Press the **<Ctrl>-P** post-to-close key combination to end OE from Image.
- (10) The system returns you to the Original Entry (OE) Selection Menu when you complete the last document in the current UW.

3.41.267.7.2 (01-01-2017) Original Entry (OE) Image Processing

- (1) The Status Line at the bottom of the screen displays the following information:
 - a. The program field is **44320** for ACA IRP documents.
 - b. The DLN field is the DLN of the document displayed.
 - c. The document field is the relative count of the document.

Example: If it is the first document in a unit-of-work with 250 documents, the document field shows a count of **1 of 250**.

- d. The Pg. field is the relative count of the page of the document.

Example: If it is Form 1094-C, Transmittal of Employer-Provided Health Insurance Offer and Coverage Information Returns, page 1, the Pg field shows **1 of 2** or **1 of 3** depending on the length of the return filed; Form 1094-C page 2 shows as **2 of 2** or **2 of 3** depending on the length of the return filed.

- e. The Status Line is **"IN"** when the insert mode is on and **"NU"** when the numeric mode is on.

- (2) In OE from Image, you manually enter information into the template using a scanned image of the return as a source.

3.41.267.7.3 (01-01-2022) Original Entry (OE) From Paper Quick Start

- (1) From the Workstation Main Menu, select Original Entry (OE).
- (2) From the Original Entry (OE) Selection Menu, select OE Paper Selection Menu.
- (3) From the OE Paper Selection Menu, select IRP ACA OE Paper Selection Menu.
- (4) From the IRP ACA OE Paper Selection Menu, select the form type:
 - 1 - Form 1094-B OE Paper
 - 2 - Form 1094-C OE Paper
- (5) After the selection is entered press **<Enter>** as prompted or press **<Alt>-X** to exit to previous menu.

3.41.267.7.4
(01-01-2019)

**Original Entry (OE) From
Paper Processing**

- (6) If the wrong program is selected and the first page of the first document is not complete, press the **<Esc>** key to cancel the entry. You return to the IRP ACA OE Paper Selection Menu.
- (1) In OE from Paper, the workstation operators manually enter information into the system and eliminate all transport processing. The operators need the paper IRP ACA units-of-work to perform OE from paper. SCRIPS assigns a DLN for each document entered from paper but does not print them on the documents. As each new IRP ACA document is processed, the system displays the DLN of the document in the DLN field of the Status Line at the bottom right side of the screen.
- (2) After selecting the form type from the IRP ACA OE Paper Selection Menu, your first prompt is for the form year, followed by the system reminder window "Enter amounts as DOLLARS ONLY."
- (3) A blank Form 1094-X template is displayed for the first document in the block with the Sequence Number field displayed for entry. The first document must begin with sequence number "00."
- (4) The Status Line at the bottom of the monitor screen displays the following information:
- The Program field shows **44320** for IRP ACA documents.
 - The DLN field shows the DLN of the current document.
 - The SUB field shows the relative count of submission work.
 - The Status Line shows **"IN"** when the insert mode is on and **"NU"** when the numeric mode is on.
- (5) Write the DLN assigned by the system in the upper right-hand corner of the paper document (either the Form 1094-X or Form 1095-X as determined at the site location). The system assigned DLN is shown in the DLN field of the Status Line.

Reminder: Writing the DLN for the Form 1094-X is necessary so subsequent operators can retrieve the UW.

- (6) After entering Pg. 1 (or 2), your next prompt is "Is a page 2 (or 3) present?" Never enter a page without significant taxpayer data, not considered processable, or is a page not data captured such as the instruction pages or duplicate taxpayer forms.

Exception: Form 1094-B, Transmittal of Health Coverage Information Returns, has a Pg 1 ONLY, therefore the system moves straight into a Form 1095-B, Health Coverage, template.

- If "Yes," a page 2 (or 3) template is presented.
- If "No," you see a prompt "Is next document Form 1095-X?"

Response Choice If	Action Then
"Yes"	A Form 1095-X is presented asking for a sequence number. Note: When entering a Form 1095-X, the different DLN in the Status Line is like a 1099 detail document in regular IRP versus the 1096 DLN.
"No"	Presentation is the next sequence number prompt for the same document type.

- (7) After entering all documents press the **<Esc>** and **<F8>** keys to end OE from paper or press **<Ctrl>-P** (post-to-close) while entering, but before releasing the last document in the UW. The system returns you to the IRP ACA OE Paper Selection Menu.

3.41.267.7.5
(01-01-2018)

Releasing a Unit-of-Work in Original Entry (OE)

- (1) For **OE Image**, when you release the last document in a UW, this also releases the UW:
- If **<Ctrl>-P is pressed** before releasing the UW, the OE Selection Menu opens.
 - If **<Ctrl>-P is not pressed**, another UW opens.

3.41.267.7.6
(01-01-2022)

Selecting a Specific Unit-of-Work in Original Entry (OE)

- (1) A specific ACA IRP unit-of-work is selected for OE by following these steps:
- Select the numeric code for Original Entry (OE) from the Workstation Main Menu. The Workstation Main Menu closes, and the Original Entry (OE) Selection Menu opens. The menus shown on the screen depend on how your supervisor profiled you.
 - Enter the numeric code for OE Select Block from the Original Entry (OE) Selection Menu. The Original Entry (OE) Selection Menu closes, and the Open Block/Unit of Work window opens.
 - Enter the 14-digit DLN from the Form 1094 (series) return from the Open Block/Unit of Work window.
 - Press the **<Enter>** key. The Open Block/Unit of Work window closes and the selected UW opens. If the block is not available, an error message is displayed indicating the block is not available.

Example: A message is displayed if you previously worked on the block, or if another operator is currently working on the Block/UW.

- Enter data using IRM 3.41.267.9, General Correction Procedures, and Exhibit 3.41.267-6, Affordable Care Act Information Return Transcription Sheets, and other instruction in this IRM on the open designated Form 1094 (series) document.
- Press the **<Ctrl>-P** post-to-close key combination and then suspend the UW if an incorrect UW is selected for the Open Block/Unit of Work menu then notify your supervisor.

3.41.267.8
(01-01-2018)
**Data Validation (DV)
Function**

- (1) The DV function is used to manually correct data from scanned images. The menus shown on the screen depend on how your supervisor profiled you.

Example: This option is grayed on the Workstation Main Menu if it is not in your profile.

- (2) The Status Line at the bottom of the screen displays the following information:
 - a. The DLN field shows the DLN of the document displayed.
 - b. The SUB field shows the relative count of the document.

Example: If it is the first document in a UW with 80 documents, the SUB field shows a count of **1 of 80**.

- c. The Pg. field shows the relative count of the page of the document.
Example: If it is Form 1094-C, Transmittal of Employer-Provided Health Insurance Offer and Coverage Information Returns, page 1, the Pg. field shows **1 of 3**, page 3 shows as **3 of 3**.
- d. The Status Line shows “**AU**” when the automatic mode is on, “**IN**” when the insert mode is on, and “**NU**” when the numeric mode is on.

Note: AUTO indicator turns the AUTO mode on and off. When AUTO is on, the cursor automatically moves from the current field to the next field requiring perfection. When AUTO is off, the cursor manually moves through every field using the cursor movement keys. A Select Block or Suspended Block in DV requires the operator to restore the AUTO on mode using **<Ctrl>---<A>**.

3.41.267.8.1
(01-01-2022)
**Data Validation (DV)
From Image QUICK
START**

- (1) From the Workstation Main Menu, select the numeric code for Data Validation (DV).
- (2) From the Data Validation (DV) Selection Menu, select the numeric code for DV Selection Menu.
- (3) From the DV Selection Menu, select the numeric code for IRP ACA DV Selection Menu.
- (4) From the IRP ACA DV Selection Menu, select the numeric code needed. The menus shown on the screen depend on how your supervisor profiled you.
 - 1 - All IRP ACA DV
 - 2 - Form 1094-B DV
 - 3 - Form 1094-C DV
 - 4 - All Scanned IRP ACA DV2
- (5) The first UW opens, and the cursor stops at the first highlighted field when the AUTO is on. Use the exhibits and the general correction procedures in this IRM to apply corrections.
- (6) If an incorrect option is selected from the IRP ACA DV Selection Menu before entering any data, press **<Ctrl>-P** post-to-close, press **<F9>** to suspend and return to the DV Selection Menu. Notify supervisor.
- (7) After entering the last field on document, if AUTO is off, press the **<F6>** key to release the document and display the next template.

- (8) Press the **<Ctrl>-P** post-to-close key combination to stop a new block from appearing once the current UW is completed.
- (9) The system returns you to the Data Validation (DV) Selection Menu when you release the last document.

3.41.267.8.2
(01-01-2022)

Selecting a Specific Unit-of-Work in Data Validation (DV)

- (1) A specific **UW** of ACA IRP documents, is selected for DV by following these steps:
 - a. From the Workstation Main Menu, select the numeric code for Data Validation (DV). The Workstation Main Menu closes, and the Data Validation (DV) Selection Menu opens. The menus shown on the screen depend on how your supervisor profiled you.

Example: This option does not display on the menu if it is not in your profile.

- b. From the Data Validation (DV) Selection Menu, enter the numeric code for DV Select Block. The Data Validation (DV) Selection Menu closes, and the Open Block/Unit of Work window opens.
- c. Enter the 14-digit DLN from Form 1094 (series) document.
- d. Press the **<Enter>** key. The Open Block/Unit of Work window closes and the selected UW opens.
- e. The first document needing correction opens.
- f. Enter data using Exhibit 3.41.267-6, Affordable Care Act Information Return Transcription Sheets, and other exhibits, as needed, in this IRM.
- g. A suspended UW in DV requires the operator to restore the "AUTO ON" mode.

Reminder: If after entering the DLN, the screen goes white for a second and then returns to the menu, the block is technically worked. The system ran through all the system checks resulting in no errors.

- h. If an incorrect UW is selected from the Open Block/Unit of Work menu, press the **<Ctrl>-P** post-to-close key combination and suspend the UW. Notify your supervisor.
- (2) Use menu option IRP ACA DV2 Select Block to correct blocks exceeding threshold checks previously entered.

3.41.267.9
(01-01-2022)

General Correction Procedures

- (1) Use these procedures as a guide during the Original Entry (OE) and Data Validation (DV) functions. Not all items apply to specific situations in either function. Correction is needed to fields not highlighted if a correction made to a highlighted field creates an error. Sight verify any field with any incorrect characters. If the system stops on a field, sight verify and correct all incorrect items present in the field.
- (2) If you reach the maximum field length while entering data, the cursor, in most cases, automatically moves to the next field. Remove or correct incorrect characters inadvertently entered in the next field.
- (3) Any checkbox present on any form type requires sight verification if the system reads the box as marked.
- (4) The **<Ctrl>-4** (Override key) is not enabled for field character type, tax year, or invalid date of birth (MMDDYYYY).

Example: Invalid dates: 01321980, 13011980, 00011980, 01020080 or a date before 01011902.

- (5) Date of Birth (DOB) fields require entry in MM, DD, YYYY format. When the taxpayer entry YY is present and the century (taxpayer intent) is determined entry the YYYY. An entry missing any of the combination “**is not**” a DOB. Do not enter any data in the field if you cannot determine all three things.
- (6) Error Messages—Messages found in the Prompt Area with information giving helpful hints to correct the error. Most error messages consist of two lines with the first line displaying the error message and the second information to help resolve the error condition.
- (7) An asterisk (*) at the upper right-hand corner of the normal proper placement of the numerous check boxes present on the return represent the skip key stop points.

Caution: Taxpayer generated forms may not have the checkbox placement in the correct location. Do not mistake the skip box asterisk for taxpayer entries during OE or DV operations.

- (8) While working in OE Image or DV Image, if you cannot determine the data for any field (except the Street Address, City fields) from the image because it is illegible or the image is incomplete, suspend the UW and pull the paper document for verification.
- (9) While working in OE Image or DV Image, do not enter data marked out or crossed through by the filer. Do enter data written in or placed on the document in different font.
- (10) Press the <F11> key to view the entity information from a Form 1094-B, Transmittal of Health Coverage Information Returns, or Form 1094-C, Transmittal of Employer-Provided Health Insurance Offer and Coverage Information Returns, while the transmitted form is displayed for reference. It also displays the entity information from the transmitted form while a Form 1094-B, Transmittal of Health Coverage Information Returns, or Form 1094-C, Transmittal of Employer-Provided Health Insurance Offer and Coverage Information Returns, is displayed.
- (11) In certain situations, the scanner may read a name or address or even a city without spaces or spread over the name line or address fields. If the system read the name and address correctly, leave as is.

Note: If the scanner reads a line correctly but placed the information in an incorrect field, move the information as scanned to the correct entry field using <Shift> up and down arrows. Moving an address to the correct field does not require updates to standard abbreviations.

- (12) The <Ctrl>-<F7> combination key function provides the operator the ability to access the last edited field or the last flagged field of the previous document.
- (13) Taxpayer identification number, social security number or employer identification number fields, presented as 1-xxx-xx-xxxx-0 or 1-xx-xxxxxxx-0, or any variation thereof, is entered as xxxxxxxxx, omitting the leading and ending numeric.

3.41 Optical Character Recognition Scanning Operations

- (14) If detail documents (Form 1095 series) presented consecutively have the same responsible individual or employee and the same covered individuals duplicated, enter one document and void the duplicate(s).
- (15) For more information on function keys refer to the table in IRM 3.41.267.5 (3), Workstation Operations, or IRM 3.41.274, Optical Character Recognition Scanning Operations, General Instructions for Processing via Service Center Recognition/Image Processing System, Exhibit 3.41.274-1, Function Key Use and Description by Form Type.
- (16) Cross field validations occur on certain conditions and require sight validation and verification. Follow the screen prompts to allow systemic determination of the disposition of the UW. See the table below for these conditions.

Form Number	Field	Comparison Field(s)	Valid Condition	Invalid Condition(s) Requiring Sight Verification
Form 1094-C	Line 19	Part II Part III Part IV	1. L19 is blank PII, PIII and PIV is blank. 2. L19 is marked PII, PIII and PIV each has some or all data.	1. L19 is blank PII, PIII and PIV each or individually partially or fully populated. 2. L19 is marked PII, PIII and PIV is blank. 3. >sight verify
Form 1095-B and Form 1095-C Covered Individuals	SSN	DOB	1. SSN is present and no DOB is present 2. SSN is not present and a valid DOB is present 3. No SSN is present no DOB is present and no name is present	1. Partial SSN is present and no DOB is present 2. SSN is not present and an invalid DOB is present 3. No SSN is present no DOB is present and no name is present 4. >sight verify
Form 1095-B and Form 1095-C	All 12 months	one or more 'month' marked	All 12 months box is checked, and Jan through Dec boxes have no checks	All 12 months box is checked and one or more of Jan through Dec boxes have a check >sight verify
Form 1095-B	Page 3 SSN and/or DOB	Page 1 Line 2 and/or Line 3	Entries match data capture continues	Entry mismatch Page 3 is dropped >sight verify
Form 1095-C Tax Year 2019	Page 3 Employee SSN	Page 1 Line 2	Entries match data capture continues	Entry mismatch Page 3 is dropped >sight verify

- (17) The system performs threshold validations and places documents in DV2 when 50 percent or more of the SSNs and/or DOBs in the UW appear missing or invalid. This condition requires sight validation and verification. Turn the AUTO

off and arrow back to column A under covered individuals to correct erroneously entered name field data. Follow the screen prompts to allow systemic determination of the disposition of the UW. See threshold reason codes at IRM 3.41.267.12.9 (4).

Note: A pop-up notification appears at the beginning of the block, “This submission does not meet threshold validation criteria: Invalid SSN and DOB. It deletes after DV unless the field data is modified.” Press “OK” and proceed with sight verification.

3.41.267.9.1
(01-01-2019)
**Name and Address
Block Reader (NABR)**

- (1) Name and Address Block Reader is referred to as NABR. NABR is used to improve the accuracy of addresses captured by the scanner from IRP documents. The NABR accomplishes this improvement by comparing the address captured by the scanner with a database of addresses used by the United States Postal Service. SCRIPS uses NABR to run addresses through a Postal Database.
- (2) When validating a NABR change, ensure the system read the correct ZIP Code. Correct the data to match the image if the city and state do not match the image and a correct ZIP Code is not present in the data field.
- (3) The system prompts an operator to “Please verify” the following conditions:
 - State is determined by the system from the city present
 - State is determined from the ZIP Code present
 - City is updated by the system to a phonetic match
 - City is determined from ZIP Code
 - Acceptable city name used

Note: NABR does not appear in the bottom right-hand corner in the conditions listed above.

3.41.267.9.2
(01-01-2022)
Name Entry

- (1) Enter the information as shown on the document, in the provided name line or the first, middle initial, and last name/full name except as instructed below:
 - a. If the filer has submitted the same name twice on a form, enter it only once.
 - b. Space for a period.
 - c. Never enter two consecutive spaces.
 - d. If during sight verification a correction is made, or if in OE, enter the first name first and last name last.
 - e. Space within a true last name where shown.
 - f. Omit apostrophe (') if shown in name line. Do not space for an apostrophe.
 - g. Omit slash (/) if shown in name line. Space for a slash.
 - h. Enter a hyphen (-) where shown. Do not space before or after the hyphen.
 - i. Enter numerics present in the name line.
 - j. Enter ampersand “&” when present in the Form 1094 series name line or the Form 1095 series last name/full name line.
 - k. Data normally entered on Name line 2, such as; doing business as (DBA), in care of (C/O) or %, or also known as (AKA) is entered/placed behind the business name if a correction requires your intervention.

3.41 Optical Character Recognition Scanning Operations

Note: Do not enter %, DBA or AKA. If scanner reads DBA or TA (Trust Agreement) correctly and no other correction is needed, leave as is.

- I. Omit the designation only such as Trust Agreement (TA), DBA, AKA, Owner, Proprietor when entering data.

Note: Do not enter DBA or TA. If scanner reads DBA or TA correctly and no other correction is needed, leave as is.
Do not enter the designations or data for: Formerly known as (FKA), formerly DBA or any data after these designations.

- (2) Separate the name entered on the form to the first name, middle initial, and last name fields if able to determine the data when the filer does not place the names in the proper fields. Official forms have specific areas for first name, middle initial, and last name. If you cannot determine place the entire name present in the last name field.
- (3) Do not enter "No Middle Initial" (NMI), "No Middle Name" (NMN), or "No Last Name."
- (4) Always enter suffixes Jr., Sr., or Minor after the last name in the last name field. Omit suffixes such as MD, TP, and SP.
- (5) If only a single name appears consider it the last name and enter it in the last name field.

3.41.267.9.3
(01-01-2018)

Address Elements

- (1) Enter the information exactly as shown on the document except as instructed below or when the NABR has perfected the address. See IRM 3.41.267.9.1, Name and Address Block Reader (NABR):
 - a. Do not enter periods in the address field. However, acceptable punctuation such as slash (/) and hyphen (-) may be entered. If a period is present between two numbers enter a space for the period.
 - b. If an ampersand (&) is present in the street address enter as **AND**.
 - c. If an apostrophe (') is present omit the apostrophe and do not leave a space for the apostrophe.
 - d. If perfecting only part of the address, such as the state or ZIP Code do not go back to the street address to abbreviate or correct characters if the scanner picked up the street address as present on the document.

Exception: If the name of the street is a direction, the direction is spelled out. Do not abbreviate street names.

Example: 123 North Street is entered as 123 NORTH ST.

- e. If a document has a street address and a PO Box, enter both on the address line with the PO Box or (*) entered first. If the combination is too long, enter only the PO Box. Also, use abbreviations as necessary to limit this entry to 35 positions. Enter as much of the street address with abbreviations as possible.
- f. When two street addresses with the same city and ZIP appear, enter the first street address. If two addresses appear, including a PO Box and an address, with different city and ZIP Code, enter the first in the address, city, state and ZIP Code fields.
- g. Omit "**No, No., Num, #, or Number**" if it appears as a prefix to a house, apartment, Route, or PO Box number.

- h. If North, South, East or West is shown as part of the city name, use the standard abbreviation (such as N=North, S=South, etc.). **NEVER** use a Major City Code and the standard abbreviation together.

Example: West Miami enter as W MIAMI, not W MF.

- i. If the city has numerics, enter as alphas.

Example: 29 Palms enter as TWENTY NINE PALMS.

- j. Abbreviate only the last designation present if multiple street designations appear.

Example: 1234 Circle Road Drive is entered as: 1234 CIRCLE ROAD DR

- k. If correcting or transcribing an address field add ST, ND, RD or TH to a numbered street when there is a street designation such as Road or Street.

Note: 102 S. 38 Road is entered as 102 S 38TH RD

- l. If the street address is not determined or is blank, enter “Z” in the Address field. If the city is not determined or is blank, enter “ZZZ” in the City field and leave the State and ZIP Code fields blank.

- m. Enter standard abbreviations for states and territories as shown in Exhibit 3.41.267-2, States, State Codes, and Zone Improvement Plan (ZIP) Codes Sorted by State, and Exhibit 3.41.267-3, States, State Codes, and Zone Improvement Plan (ZIP) Codes Sorted by ZIP Code.

- n. If there is no state, but a ZIP Code is present, enter the ZIP Code as shown and press <Enter>. This generates the state code for this ZIP Code in the prompt area. Follow the screen prompt to accept this code or to enter a different code.

- o. If there is no ZIP Code (or the ZIP Code is less than or more than five digits) but a state is present, press the <Enter> key in the ZIP Code field. The system generates the default ZIP Code for this state.

Note: DO NOT generate the default ZIP Code without first entering the ZIP Code “if” present on the form.

- p. If the system finds the ZIP Code entered and present on the form does not match the state code present, the system asks, “Is this a foreign address?” If the answer is “Yes” the system continues by presenting fields for a foreign address entry, Province (17 characters), Foreign postal code (35 characters). If the answer is “No” the system corrects the ZIP Code upon pressing <Enter>.

Note: DO NOT generate the default ZIP Code without first entering the ZIP Code present on the form.

- q. Enter foreign street addresses in the street Address field, foreign city in the City field, foreign province in the State/Province field, and country and foreign postal code in the ZIP/Foreign Postal Code field. Use abbreviations as necessary to limit this entry to 35 positions.
- r. Enter Army Post Office (APO), Diplomatic Post Office (DPO) and Fleet Post Office (FPO) addresses with the proper two-character state code followed by the corresponding unique five-digit ZIP Code.
- s. When an APO, DPO or FPO is used, do not enter any other data in the City field.

3.41 Optical Character Recognition Scanning Operations

- t. If the ZIP Code is out of range on APO, DPO or FPO addresses, enter 34001 for Miami, 09001 for New York and 96201 for San Francisco or Seattle.
- u. When APO, DPO or FPO is put in the City field, the state code field must correspond with the tables below.

Valid Zone Improvement Plan (ZIP) Code for APO, DPO and FPO

State Code	ZIP Code Range	Geographic Location
AA	340	Americas
AE	090-098	Europe
AP	962-966	Pacific

Example:

EXAMPLE:	ENTER AS:
APO New York, NY 091XX	APO AE 091XX
FPO San Francisco, CA 962XX	FPO AP 962XX

3.41.267.9.4
(02-19-2016)

Transmittal Taxpayer Identification Number (TIN)

- (1) Each transmittal Form 1094 (series) return must have a complete nine-digit (numeric) employer identification number (EIN) present as a processable UW.
- (2) If the EIN is a single repeating digit such as 111111111, 222222222, etc., or sequential 123456789 then the submission is considered unprocessable.
- (3) If no EIN is present and an SSN format is present suspend the UW. The format for EIN is NN-NNNNNNN and the format for SSN is NNN-NN-NNNN.
- (4) If the TIN/EIN is missing, illegible, or has more than or less than nine-digits on Form 1094-C, Transmittal of Employer-Provided Health Insurance Offer and Coverage Information Returns, and it is found on the first detail document or determined enter the EIN from the first detail document (Line 8) in the field.

Reminder: You cannot secure the filers EIN for Form 1094-B, Transmittal of Health Coverage Information Returns, from the details Form 1095-B, Health Coverage.

- (5) If the complete EIN for a transmittal is not found on the return submission delete the UW by placing nine zeros (000000000) in the EIN field.

3.41.267.9.5
(04-23-2018)

Money Amount Fields

- (1) Money fields consist of dollars only.
- (2) Enter money amounts as follows:
 - a. If a dollar amount is present and no cents, enter dollar amount.
 - b. If a dollars and cents amount is present, enter the dollars only.

Note: Do not round the dollars up or down based on cents if present.

- c. If a dollar amount is present and it is followed by a line, dash or hyphen, enter the dollar amount.
- d. If a dollar amount is present and the cents is lined through, enter dollar amount.
- e. If a dollar amount of 0 or 00 is present enter a single 0.
- f. If money amount is a **negative** zero (e.g., -00, -0.00, -00.00, etc.), remove it. Press **<F3>** to clear the field, and then press the space bar then **<Enter>**.

- (3) Do not enter negative amounts (identified with a minus (-) before the amount or the amount is within brackets).
- (4) If two or more money amounts appear on the same line, press **<F3>** to clear the field and then enter the first dollar amount present.
- (5) If the money amount is illegible, suspend the UW as "Poor Quality Image" (**<F9>**; press **"S"**; select "Poor Quality Image").
- (6) If after suspending for "Poor Quality Image" you still cannot determine the correct money amount from the physical document, press **<F3>** to clear the field and then press the space bar then **<Enter>**.
- (7) If a code or other non-monetary entry is present in a monetary field press **<F3>** to clear the field, then press the space bar followed by **<Enter>**.

3.41.267.9.6
(01-01-2017)

Deleting a Unit-of-Work or Submission

- (1) To delete a filer's entire submission (or UW, or transmittal), enter nine zeros in the EIN (Line 2) or **"00"** in the tax year of the Form 1094 (series) return.
- (2) Pull and send the deleted Form 1094 (series) and all the associated detail documents back to the IRP Sort function. Deleting a submission is usually a procedure used by a manager or work leader.
- (3) Always delete a submission if:
 - The detail document Form 1095-C, Employer-Provided Health Insurance Offer and Coverage, line 7 and 8, Applicable Large Employer Member (Employer), does not match the employer present on Form 1094-C, Transmittal of Employer-Provided Health Insurance Offer and Coverage Information Returns.
 - The filer changed box titles.
 - The tax year is not clear.
 - The tax year of the transmittal and all the detail documents do not match.
 - The tax year is invalid including future tax years.
 - The incorrect detail document type is selected during "FI."
 - The Form 1094 (series) return is missing either the name (Line 1) or EIN (Line 2) of the filer or employer.

Exception: On Form 1094-C, Transmittal of Employer-Provided Health Insurance Offer and Coverage Information Returns, if Line 1-2 is blank and Line 9-10 is not blank, SCRIPS moves the Line 9-10 entity data to Line 1-2 entity data systemically after operator verification of the data fields.

3.41 Optical Character Recognition Scanning Operations

- The Form 1094 (series) return first four characters of the filer or employer name is illegible and is not retrievable within the submission.

3.41.267.9.7
(01-01-2022)

Voiding a Supporting Detail Document

- (1) A supporting detail document is a Form 1095 (series) only.
- (2) Void an individual detail Form 1095 (series) document if:
 - The void box on the top of the form is marked.
 - The form is crossed out or the word VOID is written over or across it.

Note: The void box marked by the filer or employer makes all data on the form invalid.

 - The void box and corrected box both appear checked.
 - The only data on the document (detail) present is the Part I entity data **AND** the detail is not marked corrected (the CORRECTED box is not marked).
 - The form is a summary record in the submission.

Example: The form is marked by the filer as a “summary, total, or subtotal” form.

 - The form is blank.
 - Detail documents (Form 1095 series) presented consecutively with the same responsible individual or employee and the same covered individuals duplicated, enter one document and VOID the duplicate(s).
 - The printed physical form is missing data due to improper printing of the form by the taxpayer.
 - One or two Form 1095-C documents have a different employer than the rest of the documents.
 - You can determine several Form 1095-C documents do not belong in the submission.
- (3) DO NOT void a document (detail) if the system misread and placed an “X” in either the void or corrected boxes when one is not present on the document.

3.41.267.10
(01-01-2018)

Re-Imaging Form 1094 Series Returns

- (1) The <F12> key allows you to flag or mark a Form 1094 (series) return to go to Image Only processing.
- (2) Perform Re-image (Image only) processing when the true and complete image is not clear or complete.
- (3) Re-image the return if any page of the return has processable taxpayer entries and the following exist:
 - Skewed, folded or otherwise unreadable
 - Scanned in backwards

3.41.267.11
(01-01-2018)

Form 1094 Series Image Only Processing

- (1) SCRIPS scanning function for image only processing and archiving is done for submissions processed for re-imaging (the <F12> key is used) or processed using OE paper. Only a true and complete image is taken for this purpose. To allow for retrieval of the image in the future, the DLN is key entered with each image. The menus shown on the screen depend on how your supervisor profiled you.

Example: This option is not present on the Data Validation Function Menu if it is not in your profile.

3.41.267.11.1
(01-01-2022)
Form 1094 Image Only

- (1) From the Workstation Main Menu, select Data Validation (DV).
- (2) From the Data Validation (DV) Selection Menu, select IRP ACA Form 1094 Image Only.

- (3) A Form 1094 Image Only block opens with up to 100 records/returns.

Note: 100 records or returns equal more than 100 images due to multiple page records/returns.

- (4) If an image is not recognized by the scanner, a window opens allowing you to identify the image and page of each image of Form 1094-B, Transmittal of Health Coverage Information Returns, or Form 1094-C, Transmittal of Employer-Provided Health Insurance Offer and Coverage Information Returns. You can remove a single image or entire block from further processing. The window offers the options below:

DV Image Only Selection

Screen Selection	Form/Page/ (Form ID)
A	Form 1094-B pg. 1 (110116)
B	Form 1094-C pg. 1 (120118)
C	Form 1094-C pg. 2 (120218)
D	Form 1094-C pg. 3 (120316)
X	Remove

- a. If the image is not either form type/page number, then press <F12> to remove the document from further processing.
 - b. Press <Ctrl>-<Shift>-<Delete> or <Ctrl>-<Shift>- key combination to remove the entire block.
 - c. If the image is identified as a Form 1094 series form type page 1 then the DLN is entered. If the document is removed or not a page 1, a DLN is not assigned or entered.
- (5) If the record/return is the same block number, only the two-digit sequence number is entered. If the block number changes, then enter the 14-digit DLN.
 - (6) Whenever a 14-digit DLN is entered, the DLN is validated by requiring you to enter it twice. Each component of the DLN (i.e., the File Location Code, Tax Class, Document (Doc) Code, Julian Date, Blocking Series, Sequence Number and Year Digit) undergoes validation. Any invalid component generates an error message explaining the error.

3.41.267.12
(01-01-2020)

**Supervisor Section
Affordable Care Act
Return Program Reports**

- (1) The following is a listing of the Affordable Care Act information return reports available on SCRIPS:
 - IRM 3.41.267.12.1, Document Locator Number (DLN) Output Report
 - IRM 3.41.267.12.2, Assigned Document Locator Number (DLN) Report
 - IRM 3.41.267.12.3, Cumulative Document Locator Number (DLN) Assignment Report
 - IRM 3.41.267.12.4, Workflow Status Report
 - IRM 3.41.267.12.5, Override Report
 - IRM 3.41.267.12.6, Inventory Report
 - IRM 3.41.267.12.7, Production Report
 - IRM 3.41.267.12.8, Run Balancing Report
 - IRM 3.41.267.12.9, Pull Unit of Work (Submission) Report
 - IRM 3.41.267.12.10, Throughput Statistics Report
 - IRM 3.41.267.12.11, Workstation Operator Statistics - Program and Function Summary Report

- (2) The following subsections have the content found on the report.

3.41.267.12.1
(01-01-2016)

**Document Locator
Number (DLN) Output
Report**

- (1) The title of the report is IRP ACA DLN Output Report (IPS01118).
- (2) The report reflects the entire production for the site for a given time frame.
- (3) The report has the following:
 - a. Service Center
 - b. Run Date
 - c. Page number
 - d. Program number
 - e. DLNs and a notation if it is a transmittal DLN or detail DLN
 - f. File Location Code (FLC), Tax Class and Document Code (TAX/DOC), Julian date, Block number and Volume

3.41.267.12.2
(01-01-2016)

**Assigned Document
Locator Number Report**

- (1) The title of the report is IRP ACA Assigned DLN Report (IPS03339).
- (2) The report reflects production for the individual scanner for a given time frame.
- (3) The report has the following:
 - a. Program number
 - b. Run Date and Time
 - c. Scanner Job ID
 - d. Start Time
 - e. End Time
 - f. DLNs and a notation if it is a transmittal DLN or detail DLN
 - g. File Location Code (FLC), Tax Class and Document Code (TAX/DOC), Julian date, Block number and Volume
 - h. The summary page for the scan job by document code and form type

3.41.267.12.3
(05-03-2017)

**Cumulative Document
Locator Number (DLN)
Assignment Report**

- (1) The title of the report is IRP ACA Cumulative DLN Assignment Report (IPS11110).

- (2) The report reflects the total number of DLN assignments by form type and form page time frame.
- (3) The report has the following:
 - a. Doc Code - Document Code
Four-digits, digit one and two is the document code
Digits three and four represent the page number
 - b. Form
Form number followed by page number (P1, P2, P3, etc.)
 - c. Volume
 - d. Total
 - e. End Time

3.41.267.12.4
(01-01-2020)
Workflow Status

- (1) The title of the report is Workflow Status (IPS0698).
- (2) This report lists the task/sub-task number, the sub-task description, blocks at the sub-task, total documents for the block, and documents ready for the sub-task. This report also has percentages for system capacity used under the following three categories: General, IRP, and IRP/ACA/K1/941/940/Stand-Alone.
- (3) This report is used to monitor documents and system capacity throughout each workday.

3.41.267.12.5
(01-01-2018)
Override Report

- (1) The title of the report is IRP ACA Override Report (IPS11100).
- (2) The report reflects the total count of override keystrokes for a given time frame.
- (3) The report has the following:
 - a. Function Code
 - b. Doc Code - Document Code
two-digit number
 - c. Field Number
 - d. Field Description
 - e. Override Count
 - f. End Time

3.41.267.12.6
(01-01-2016)
Inventory Report

- (1) The title of the report is Inventory Report (IPS03350).
- (2) The report reflects inventory for a given time frame reflecting the carry over form volume on SCRIPS.
- (3) The report has the following:
 - a. Initial Inventory
 - b. Process Date
 - c. Returns Input
 - d. Returns Deleted
 - e. Returns Output
 - f. Carry Over Inventory
 - g. End Time

3.41.267.12.7
(02-19-2020)

Production Report

- (1) The title of the report is IRP ACA Production Report (IPS11120).
- (2) The report reflects the following scanned volumes and year to date output totals.
- (3) The report has the following:
 - a. Service Center
 - b. Run Date and Clock Time
 - c. Page number
 - d. Scanned volumes by document code and form type for today, subtotals and totals
 - e. Output volumes by document code and form type and deletes for year to date along with cumulative, subtotals and totals
 - f. Status summary for all functions for today/current and year to date cumulative
- (4) This report records ACA IRP production through the processing year and, as possible, daily activity and aids in validating production volume. Use this report for analyzing production reports for accuracy.
- (5) Site staff generates the IRP ACA Production Report late Friday or early Monday weekly and e-mails it by close of business Monday (or first workday of the work week) to National Office at *IT SCRIPS PO every week.

3.41.267.12.8
(02-19-2016)

Run Balancing Report

- (1) The title of the report is IRP ACA Run Balancing Report (IPS01119).
- (2) The report reflects the entire production for the site for a given date.
- (3) The report has the following:
 - a. Service Center
 - b. Run Date
 - c. Page number
 - d. FTP File ID number
 - e. The file name (i.e., OCR1010B for forms in the B series and OCR1010C for forms in the C series)

3.41.267.12.9
(01-01-2026)

Pull Unit of Work (Submission) Report

- (1) The title of the report is IRP ACA Pull Document/Submission Report (IPS00812).
- (2) The report lists submissions and documents to pull (or counted as deleted) for a date range.
- (3) The report has the following:
 - a. Service Center
 - b. Run Date and clock time
 - c. Page# - Number
 - d. Block#
 - e. Doc DLN/Seq# - Document DLN Sequence number
 - f. App - Application FI, OE or DV
 - g. SEID - Standard Employee Identification

Note: An SEID of 000000 represents the SCRIPS system and creates the action based on programming and or specific responses to questions posed to the clerk.

- h. Date/Time
- i. Reason

(4) The reason is one of the following pull document report codes:

Reminder: See IRM 3.41.267.4.2, Unprocessable Unit-of-Work Disposition, to determine the disposition of the UWs and documents pulled. Most of the pull report work requires forwarding to IRP Sort for correspondence as unprocessable documents. Tag each condition prior to forwarding to IRP Sort.

Report Reason	Condition
SINGLE ORIGINAL Form 1094-C	Stand-alone Original Form 1094-C
CONSECUTIVE PARENT	Two consecutive Form 1094-X
MISSING PARENT NAME	Name missing from Form 1094-B (Line 1) or Form 1094-C (Line 1 and Line 9) transmittal return
MISSING PARENT EIN	Missing valid nine-digit EIN on Form 1094 series return
MIXED SUBMISSION	Mixed form types Example: Marked "Remove" in FI.
INVALID TAX YEAR	Invalid Tax Year
PULL IMAGE ONLY	Marked "Remove" in Image Only Note: Requires rescanning.
PULL	<F12> is pressed to remove document in OE/DV
PULL STANDALONE Form 1094-B	Stand-alone Form 1094-B
PULL IMAGE ONLY - NO DLN	<F12> is pressed in Image Only on recognized document Note: Requires rescanning.
DEL UW - INVALID SSN/INVALID DOB	Threshold: Form 1095-B – Line 2/Line 3
DEL UW - INVALID DOB	Threshold: Form 1095-B – Line 3
DEL UW - INVALID ORIGIN OF POLICY	Threshold: Form 1095-B – Line 8
DEL UW - INVALID EINS	Threshold: Form 1095-B – Line 11
DEL UW - INVALID SSN/INVALID DOB	Threshold: Form 1095-B – Line 23(b)-40(b) SSN/DOB
DEL UW - INVALID DOB	Threshold: Form 1095-B – Line 23(c)-40(c) DOB
DEL UW - INVALID MONTH COMBO	Threshold: Form 1095-B – Line 23(d)-40(d) Months Covered
DEL UW - INVALID NAME	Threshold: Form 1094-C – Line 1

Report Reason	Condition
DEL UW - INVALID MISSING NAME/ SSN	Threshold: Form 1095-C – Line 1/Line 2
DEL UW - INVALID SSNS	Threshold: Form 1095-C – Line 2
INVALID PLAN MONTH	Threshold: Form 1095-C – Plan Month
DEL UW - INVALID SSN/INVALID DOB	Threshold: Form 1095-C Tax Year ≥ 2022 = Line 18-30(b)-Line 18-30(c)
DEL UW - INVALID DOB	Threshold: Form 1095-C Tax Year ≥ 2022 = Line 18-30(c)

- (5) Physically pull only documents on the Pull Document Report for correspondence, Re-imaging or routing to some other function for action. Do not physically pull the following:
- Blank pages
 - Instruction pages
 - Duplicate pages deleted by clerks
 - Extraneous pages sent by the filer when the UW is sent to output successfully

3.41.267.12.10
(05-03-2017)

**Throughput Statistics
Report**

- (1) The title of the report is Throughput Statistics Report (IPS06440).
- (2) The report reflects processing function productions for a given date range.
- (3) The report rows reflect the following process functions: Scandriver, Transport/ Sync, OE Crossover, Form Identification, Block Verification, OE Image, OE Paper, Program Validation, Data Validation, QR Summarization, Block Output, Image Archive, Backup Image Archive and Block Purge.
- (4) The report has the following:
- a. Service Center
 - b. From and to date range and clock time
 - c. Run Date and clock time
 - d. Page Number
 - e. Processing Function
 - f. Total Blocks
 - g. Total Documents
 - h. Process Time
 - i. Documents Per Hour

3.41.267.12.11
(05-03-2017)

**Workstation Operator
Statistics Program and
Function Summary
Report**

- (1) The title of the report is Workstation Operator Statistics Program and Function Summary Report (IPS00803).
- (2) The report displays the number of documents processed in each function for a given date range.
- (3) Process function listed on the report rows: 460, 470, 480, 47X, and 48X.
- (4) The report has the following:
- a. Service Center

- b. From and to date range
- c. Run Date and clock time
- d. Page Number
- e. Function Code
- f. Program Number
- g. Number of Documents
- h. Process Time
- i. Total Keystrokes
- j. Keystrokes Per Hour
- k. Documents Per Hour
- l. Summary by Programs

3.41.267.13
(01-01-2018)
Block Status Window

- (1) The Block Status window shows a more detailed status of the blocks/UWs in the search criteria data entered in the Block Search Criteria window.
- (2) A change of operational parameters of blocks/UWs is completed in the Block Status window. Depending on the parameter, a change to the parameter for individual blocks/UWs or multiple blocks/UWs is completed at the same time.
 - 1. Press the <Alt>-A key combination for selection of all blocks eligible for selection. This excludes blocks in a status of "DELETE" or "DONE." The result is a check symbol mark on selected blocks in the Block Selected for Update column.
 - 2. Press the <Alt>-A key combination again to deselect all blocks if you choose to not perform updates on the selected blocks.
 - 3. Press the <Alt>-X key combination if you choose to cancel the blocks selected and close the Block Status window.
- (3) Block status monitoring (IPS0697) window shows a more detailed status of the blocks/UWs.

3.41.267.13.1
(01-29-2019)
Output Verification Audit

- (1) An output verification process ran on all UWs prior to output systemically suspends any UW with invalid conditions in the UW, after DV.
- (2) Report UWs with invalid conditions appearing on the Block Status Monitoring window (IPS0697) to System Administrators (SA) for researched by the contractor.
- (3) A separate ticket is opened for each unique eleven or fourteen-digit DLN present on the report.
- (4) The reason is one of the following pull document report codes:

Reason Code	Status	Output Verification Audit/ Description
DUPDLN	SUSPND	Duplicate DLN across a block (11-digit DLN) the block is previously output and therefore is a duplicate DLN

Reason Code	Status	Output Verification Audit/ Description
BADDLN	SUSPND	DLN is not 14 characters in length not numeric or where characters four or five not valid document code
BADDOC	SUSPND	The block/UW has one or more documents not properly completed in the sub-task. document status between one and 699 (700 is "normal")
BADTIN	SUSPND	TIN not nine characters in length not numeric
BADUW	SUSPND	Stand-alone Form 1094-B submission stand-alone Form 1094-C submission, original (not corrected) submission with no valid (non-deleted) documents
BADDAT	SUSPND	Form 1095-X document with a valid status and VOID box checked Form 1094-B with no filer name, box 1 (a required field) question marks on a non-voided document in any field with any documents with a field equaling a status > 10 (not perfected) on a non-voided document
	DELETE	Form 1094-C with no Applicable Large Employer (ALE) member name, box 1 (a required field)

3.41.267.14
(01-01-2019)

Purging Documents

- (1) Purge from SCRIPS the files including the document images, American Standard Code for Information Interchange (ASCII data), and statistical information once the blocks/UWs of documents process through SCRIPS and reach "accepted" by down-stream processing, and the transmittals have moved to archive.

Note: Accepted means the output files and "the returns in those files" clear all error conditions.

- (2) It is recommended a system purge occur a minimum of two weeks after the output date.
- (3) Purge only those blocks/UWs available for purge. The system keeps track of blocks/UWs available for purge and only allows you to purge those blocks/UWs. SCRIPS does not allow any blocks waiting for Quality Review (QR) Block Summarization or flagged for Quality Review to purge.
- (4) Do not purge files for reports before six weeks.

Exception: Reports allow deletion after seven working days however six weeks is the preference.

- (5) A deleted document and/or block/UW is removed from the system when the form type is purged. The remainder of the form types on SCRIPS operate in the same manner.

Example: Information return document (UW) is removed when an information return block purge is performed.

- (6) A purge for the form type is initiated and activated before removal of deleted documents/blocks/UWs from the system. If you open a purge window but do not select any blocks for purge, the deleted documents/blocks/UWs do not leave the system. Until the deletion is properly done documents/blocks/UWs remain on the system.
- (7) Retained for 30 days after data is verified as converted to tape per Document 12990, Records and Information Management Records Control Schedules, Record Control Schedule (RCS) 29, item 85, Information Returns, the physical documents (UWs scanned in the SCRIPS area). If systemic issues exist for downstream systems a longer period is enforced by headquarters staff.

This Page Intentionally Left Blank

Exhibit 3.41.267-1 (01-01-2022)

Terms/Acronyms/Definitions

TERM/ACRONYM	DEFINITION
ACA IRP ACA-IRP ACA IRP IRP-ACA	Affordable Care Act form types in the Form 1094 (series) or Form 1095 (series) of returns. Reminder: These instructions cover only form types listed in IRM 3.41.267.2.1, Sources Documents.
ALE	Applicable Large Employer employs 50 or more full-time equivalent employees alone, is the controlling group entity or common owner of multiple business entities with employees as defined under aggregation rules.
ALE Member	Applicable Large Employer Member is part of a group business entity and employs 50 or more full-time equivalent employees.
Alpha Character	A character (letter) of the alphabet.
Alphanumeric Field	A field with both alpha and numeric characters.
APO	Army Post Office.
Application	Refers to the system used for form type processed (i.e., IRP, ACA-IRP, Schedule K-1s, Form 940, Form 941, Stand-alone Schedule Rs).
ASCII	American Standard Code for Information Interchange, is the most common character encoding format for text data in computers and on the internet.
Block DLN	The first 11-digits of 14-digit document locator number (DLN) consisting of a two-digit file location code, tax class, (tax class is always "5" for ACA IRP), two-digit document type, three-digit Julian day, three-digit block number. Also see DLN.
Capture	The process of obtaining images of a document for character recognition and operator use.
Character	Any symbol or alpha (special or numeric) representing information.
Character Recognition	The process of converting information from paper images to digital data form.
Corrected Document	A return with the corrected box marked or a filer notation such as the word amended or corrected notated on the return.
Cursor	A vertical line showing the position where the next entry is keyed.
Data Fields	Those fields other than entity fields on all documents listed such as: money amounts, dates, indicators, covered individuals, etc.
Detail Document	Every Form 1095 (series) also referred to as supporting return or document or a child return.
DLN (Document Locator Number)	A 14-digit document locator number consisting of a two-digit file location code, tax class, (tax class is always "5" for ACA IRP), two-digit document type, three-digit Julian day, three-digit block number, two-digit sequence number and a year digit. Also see Block DLN.

Exhibit 3.41.267-1 (Cont. 1) (01-01-2022)

Terms/Acronyms/Definitions

TERM/ACRONYM	DEFINITION
DOB (Date of Birth)	A date consisting of a month, day and year combination. Caution: Any of the three missing means the remaining combination is not a DOB. Do not enter anything in the field without all three things present or determined.
Document Code (Doc Code)	The fourth and fifth position of each DLN identifying the type of return the electronic data record has captured. The following is the document code - form number and form title for ACA-IRP. <ul style="list-style-type: none"> • 11 - Form 1094-B, Transmittal of Health Coverage Information Returns • 12 - Form 1094-C, Transmittal of Employer-Provided Health Insurance Offer and Coverage Information Returns • 56 - Form 1095-B, Health Coverage • 60 - Form 1095-C, Employer-Provided Health Insurance Offer and Coverage
DPO	Diplomatic Post Office.
EIN	An employer identification number (a nine-digit number) typically identifies an entity such as a corporation, a trust, a nonprofit association, or a sole proprietor whose module resides on the business master file. Usually in NN-NNNNNN format.
Employee	A recipient listed in Part I of Form 1095-C, Employer-Provided Health Insurance Offer and Coverage, issued by their employer (ALE).
Entity/Entity Fields	The part of the document where the TIN, name, and requests an address present for the entries.
Field	Specific area provided for data entry.
Filer	The entity listed on the transmitting Form 1094 (series) always a business entity with a corresponding employer identification number (EIN) or the employer.
Flag	A question mark used to designate an unrecognizable character, or an error within a field. <F12> also flags a Form 1094 series for re-image.
File Location Code (FLC)	A two-digit number designed to represent the Service Center where processing action occurs. The action is a transaction representing a return filing or subsequent compliance action.
Form Identification Number (Form ID)	A six-digit number located at the top right of each page of a SCRIPS ACA IRP document. <ul style="list-style-type: none"> • First two-digits = Document Code • Third and fourth digit = Page number of the return • Fifth and sixth number = Year the template (layout or landscape placement) is last updated/changed
FPO	Fleet Post Office.
Function Keys	The upper row of keys on the SCRIPS keyboard. The function keys <F1> through <F12>.

Exhibit 3.41.267-1 (Cont. 2) (01-01-2022)

Terms/Acronyms/Definitions

TERM/ACRONYM	DEFINITION
Highlighting	A three-dimensional shadowing of a template field used to direct attention to the field. Used in OE to show the current cursor position. Used in DV to show the current cursor position, and the current field with the error. The <Ctrl>-5 function key highlights the corresponding field on the image template.
Image Strip	A section of the true and complete image magnified and displayed above the template. The image strip displayed is a magnified version of the corresponding field highlighted on the image. Pressing <Ctrl>-3 toggles the image strip on and off. Reminder: The Image Strip will not display if the form required Form Identification (FI) during scanning.
Key Combination	Keystroke commands requiring two or more simultaneous key presses. Example: Press <Ctrl>-P or post-to-close means to press and hold the <Ctrl> key and then press the <P> key before releasing the <Ctrl> key.
Menu	A list of operations/options the workstation operator selects.
Message Window	A window appearing within the main window. It usually appears in the center of the screen. The system uses these windows to relay messages to the operator.
NABR	Name and Address Block Reader compares the address captured from the scanner and the United States Postal Service database of addresses.
Non-Conforming Form	A form the scanner cannot recognize.
Numeric Character	A number ranging from 0 to 9. A digit.
Original Document	A return without a corrected box marked, amended or corrected notated by the filer on the return.
Prompt	A message or statement displayed requiring an operator response.
Recipient	The individual taxpayer listed in Part I of the Form 1095 (series) return who is the employee or responsible individual.
Responsible Individual	The entity listed in Part 1 of Form 1095-B, Health Coverage, who is the holder, controller or owner of the insurance policy.
SA Form 1094C	Stand-alone Form 1094-C, Transmittal of Employer-Provided Health Insurance Offer and Coverage Information Returns, with no details. See IRM 3.41.267.2.1 (1), Source Documents, for more information.
Sequence Number/ Serial Number (SN)	A two-digit number located at positions 12 and 13 within the DLN and uniquely identifies the document.

Exhibit 3.41.267-1 (Cont. 3) (01-01-2022)**Terms/Acronyms/Definitions**

TERM/ACRONYM	DEFINITION
Sight-Verify	Examine a highlighted field in DV. If correct, release the field. If incorrect, correct the field. Also, called verify.
Social Security Number (SSN)	A nine-digit number issued to an individual by the Social Security Administration. The IRS uses this number to process tax documents and returns. Usually in NNN-NN-NNNN format.
Special Characters (symbols)	*, &, /, -, %, #, ?, etc. Note: Ampersand "&" is not considered a special character in the name line entry.
Status Line	A strip of information found along the bottom right side of the main working window below the prompt area. This shows the program number, DLN/SN, document count, and AUTO, Insert and Numeric indicators.
Submission	A Form 1094 (series) return with associated detail documents, Form 1095 (series), or a SA Form 1094C. Also, called a unit of work (UW).
Template	A window with fields for data entry. The template mirrors the actual form layout, to the fullest extent possible.
TIN	Taxpayer Identification Number. Either an EIN or an SSN.
Transmittal (Parent document) (Parent return)	A Form 1094-B, Transmittal of Health Coverage Information Returns, or Form 1094-C, Transmittal of Employer-Provided Health Insurance Offer and Coverage Information Returns, filed with the IRS.
True and Complete Image	The image the system displays for data entry or validation purposes. If available, the system always displays it on the left half of the monitor screen.
Unit-of-Work (UW)	A group of ACA IRP documents with one Form 1094 (series) transmittal and corresponding Form 1095 (series) returns or one SA Form 1094C as defined. SCRIPS controls a unit-of-work by the Form 1094 (series) 14-digit DLN.
YYTY	The tax year processed normally current year minus one.
YYPY	The current processing year normally the current year. Term used to eliminate dates on form prompts changing each year.

Affordable Care Act Information Return Transcription Sheets

OE/DV Screen Prompt	Description	Instructions Form 1094-B, Transmittal of Health Coverage Information Returns
Corr. Ind	Correspondence Indicator	DO NOT enter any codes present from the last two For Official Use Only boxes. Press <Enter> .
Line 1- Filer's Name	Filer's name	Enter the full name shown. If any character in the name is illegible enter a space for the illegible character. If the name is missing and is not present delete the UW from the system. Press <Enter> .
Line 2-EIN	Employer identification number (EIN)	Enter the nine-digit EIN present. Caution: Delete the UW by entering all zeros in the EIN field when: - the TIN is missing or is more than or less than nine-digits - any digit is illegible, and the filer entity is not present on the first detail - single repeating digit such as 11111111, 22222222, etc., or sequential 123456789 is entered as the EIN.
Line 3-Name of Contact	Name of person to contact	Enter the full name shown. If any character in the name is illegible enter a space for the illegible character. If the name is missing and is not present press <Enter> .
Line 4-Contact Phone	Contact telephone number	Enter up to the first twelve numbers if present. Is blank, 7, 10, or 12 numerics. Note: Extensions optional.
Line 5-Address	Street address	Enter the street address from the form. If a foreign address, enter the address.
Line 6-City	City or town	Enter the name of the city. If a foreign address is present, enter the city.
Line 7-State/Province	State or province	Enter the two-character code for the state listed on the document. If a foreign address, enter the province.
Line 8-Zip/Foreign Postal Code	Country and ZIP or foreign postal code	Enter the five-digit ZIP Code. If missing, press <Enter> to bypass this field. If a foreign address, enter the Country and/or foreign postal code.
Line 9-Total Form 1095-B	Total number of Forms 1095-B submitted with this transmittal	Enter the number present on the document.

Exhibit 3.41.267-6 (Cont. 2) (01-01-2026)

Affordable Care Act Information Return Transcription Sheets

OE/DV Screen Prompt Page 1	Description Page 1	Instructions Form 1095-B, Health Coverage - Page 1
Tax Year	(located top right-hand of form)	<p>The tax year is a must enter field entry.</p> <ul style="list-style-type: none"> Enter the tax year printed/present in the upper right-hand corner of the form. Requires two consecutive matching and valid entries to leave the field. <p>Reminder: Valid tax years: 2025, 2024, 2023, and 2022.</p> <ul style="list-style-type: none"> Enter “00” when an invalid tax year is present, or the year does not match the transmittal. Then select “yes” when prompted to delete the return. <p>Note: The system 1) recognizes the tax year present and 2) presents the year for site verification before releasing from the field.</p>
Void	VOID Box	<p>Enter “X” if marked.</p> <p>Note: Consider all data invalid if the filer marks the void box, writes void on the form, marks through the entire form or the SCRIPS operator has voided the return due to duplication within the submission.</p>
Corrected	CORRECTED Box	Enter “X” if marked.
Line 1-Resp. First Name	First name	<p>Enter the first name if present or you can determine it. If any character in the name is illegible enter a space for the illegible character.</p> <p>Do not leave two consecutive spaces.</p> <p>If it is not possible to determine first, middle initial and last name place the entire name in last/full name.</p>
Line 1-Resp. Middle Initial	Middle initial	Enter the middle initial if present or you can determine it.
Line 1-Resp. Last/Full Name	Last name/Full name	<p>Enter the last name.</p> <p>If any character in the name is illegible, enter a space for the illegible character.</p> <p>Do not leave two consecutive spaces.</p> <p>If it is not possible to determine first, middle initial, and last name place the entire name in this field.</p> <p>Enter suffixes after the last name entry.</p>
