Introduction

This publication provides state and local governments that issue tax-exempt bonds and borrowers or other users of bond proceeds (funds derived from the sale of bonds) an overview of the general federal tax law rules that apply to municipal financing arrangements commonly known as “qualified private activity bonds.” Certain exceptions or additional requirements to these rules, which are beyond the scope of this publication, may apply to particular financing arrangements. This publication is intended to help issuers meet federal tax law requirements to ensure that interest earned by bondholders is exempt from taxation under Internal Revenue Code (IRC) Section 103.

This publication is an overview of the rules; it isn’t official guidance that you may rely on for planning purposes. It refers to IRC sections, Income Tax Regulations (Treas. Reg.), revenue procedures and other official guidance. Please refer to the official guidance for the rules that apply to qualified private activity bonds. Unless otherwise indicated, references in this publication to section numbers are references to sections of the IRC.

For publications that discuss the general rules that apply to governmental bonds or qualified 501(c)(3) bonds, see IRS [Publication 4079, Tax-Exempt Governmental Bonds](#), IRS [Publication 4077, Tax-Exempt Bonds for 501\(c\)\(3\) Charitable Organizations](#) and [IRS Publication 5271, Complying with Arbitrage Requirements: A Guide for Issuers of Tax-Exempt Bonds](#). For an overview of an issuer’s responsibilities in a conduit financing arrangement, see IRS [Publication 5005, Your Responsibilities as a Conduit Issuer of Tax-Exempt Bonds](#). The IRS also provides detailed information at [IRS.gov/bonds](#).

See also [More Information](#), at the end of this publication.

Background

State and local governments receive direct and indirect tax benefits under the IRC that lower borrowing costs on their valid debt obligations. Because interest paid to bondholders on these obligations is not includable in their gross income for federal income tax purposes, bondholders are willing to accept a lower interest rate than they would accept if the interest was taxable. These benefits apply to many different types of municipal debt financing arrangements including bonds, notes, loans, lease purchase contracts, lines of credit and commercial paper (collectively referred to as “bonds” in this publication).

To receive these benefits, issuers must ensure that the requirements under the IRC are met, generally for as long as the bonds remain outstanding. These requirements include, but are not limited to, information filing and other requirements related to issuance, the proper and timely use of bond proceeds and bond-financed property, and limitations on how bond proceeds may be invested. Special additional rules apply to bonds that are private activity bonds for those bonds to be tax-exempt qualified private activity bonds. This publication describes rules that apply generally to all qualified private activity bonds. Requirements that apply to particular types of qualified private activity bonds are beyond the scope of this publication. For information about some of these unique requirements, visit [IRS.gov/bonds](#). For information specific to the use requirements for qualified 501(c)(3) bonds, see [Publication 4077, Tax-Exempt Bonds for 501\(c\)\(3\) Charitable Organizations](#).

This publication also addresses practices and steps an issuer and others using bond proceeds can take to protect the tax-exempt status of qualified private activity bonds. For example, because the

requirements and limitations generally apply at the time the bonds are issued and throughout the term of the bonds, this publication encourages issuers and beneficiaries of tax-exempt bonds to create procedures for monitoring compliance throughout the life of the bonds. For more information, see [Post-Issuance Compliance Monitoring](#).

Tax-Exempt Private Activity Bonds

Interest on a private activity bond is taxable unless the bond is a qualified private activity bond and meets other requirements, some of which apply to governmental bonds as well. In this section, we briefly discuss the tests for determining whether a bond is a private activity bond. This section also describes:

- rules an issuer must meet for interest on a private activity bond to be excluded from federal income tax, by describing rules that apply at issuance (including elections that need to be made when the bonds are issued) and rules that apply both at issuance and throughout the life of the bonds;
- rules that apply when modifications are made to bond terms;
- recordkeeping requirements; and
- rules that prevent certain bondholders from excluding interest even if all the other requirements for tax exemption are met.

These discussions include any special remedial action provision that applies to the particular requirement. If a deliberate action that results in a violation of any of the federal tax requirements cannot be corrected under these special remedial action provisions, issuers may be able to enter into a closing agreement under the Tax Exempt Bonds (TEB) Voluntary Closing Agreement Program (TEB VCAP) described in [Notice 2008-31, 2008-11 I.R.B. 592](#) (see [What To Do When You Discover a Violation](#)).

Testing for Private Activity Bonds

A state or local bond will be a private activity bond if, as of the bond issue date or at any time while the bonds are outstanding, the bond issue exceeds the limits set forth in either:

- the private business tests of IRC Section 141(b), which consist of the private business use test and private security and payment test, or
- the private loan financing test of IRC Section 141(c).

For a further description of the private business tests under Section 141(b) and the private loan financing test under Section 141(c), see [Publication 4079, Tax-Exempt Governmental Bonds](#).

Requirements Related to Issuance

Some Private Activity Bonds Need to Obtain Volume Cap Under Section 146. The IRC limits the amount of private activity bonds that may be issued. The volume cap limit of Section 146 restricts the amount of certain qualified private activity bonds that all issuers within a state may issue during a calendar year. Generally, a state allocates that limit or volume cap among issuers in the state. Within certain restrictions, state law determines how those allocations are made. If, during a given year, an issuing authority issues more qualified private activity bonds than its allocable volume cap, the tax-exempt status of those excess bonds is jeopardized. Not all private activity bonds are subject to the volume cap limitation. The following chart describes which qualified private activity bonds are subject to volume cap under Section 146. Certain other types of bonds are subject to volume limits under other IRC provisions.

Volume Cap Under Section 146

Type of Private Activity Bonds	Subject to Volume Cap?
Private activity bonds financing exempt facilities (Section 142):	
■ airports and spaceports	No
■ docks and wharves	No
■ mass commuting facilities	Yes
■ facilities for the furnishing of water	Yes
■ sewage facilities	Yes
■ governmentally owned solid waste disposal facilities	No
■ privately owned solid waste disposal facilities	Yes
■ qualified residential rental projects	Yes
■ facilities for the local furnishing of electric energy or gas	Yes
■ local district heating or cooling facilities	Yes
■ qualified hazardous waste facilities	Yes
■ governmentally owned high-speed intercity rail facilities	No
■ privately owned high-speed intercity rail facilities	Yes ¹
■ environmental enhancements of hydro-electric generating facilities	No
■ qualified public educational facilities	No
■ qualified green building and sustainable design projects	No
■ qualified highway or surface freight transfer facilities	No
■ governmentally owned qualified broadband projects	No
■ privately owned qualified broadband projects	Yes ¹
■ qualified carbon dioxide capture facilities	Yes ¹
■ qualified enterprise zone facilities (see Section 1394)	Yes
■ new empowerment zone facilities (see Section 1394(f))	No
Qualified mortgage bonds (Section 143(a))	Yes ²
Qualified small issue bonds (Section 144(a))	Yes
Qualified student loan bonds (Section 144(b))	Yes
Qualified redevelopment bonds (Section 144(c))	Yes
Qualified veterans' mortgage revenue bonds (Section 143(b))	No
Qualified 501(c)(3) bonds (Section 145)	No
Current refunding bonds ³ that do not exceed the outstanding amount of the refunded bonds	No ⁴
Current refunding bonds in excess of the outstanding amount of the refunded bonds	Yes

¹Volume cap required for only 25% of the bonds.

²The amount of volume cap allocated to an issuer is reduced when it establishes a mortgage credit certificate program under IRC Section 25.

³See the subsection below, [Requirements That Apply at Issuance and Throughout the Life of the Bonds - Limitations on Refunding Private Activity Bonds](#) for a definition of "current refunding."

⁴Maturity limitations apply for refundings of qualified mortgage revenue bonds and qualified student loan bonds.

Carryforward of Unused Section 146 Volume Cap. Subject to state law requirements, an issuer may elect to carry forward any unused volume cap allocation it received in a calendar year for three calendar years. This election may be made for each of the qualified private activity bond purposes subject to volume cap except for the purpose of issuing qualified small issue bonds. This election is made by filing IRS [**Form 8328, Carryforward Election of Unused Private Activity Bond Volume Cap**](#), by the earlier of (1) February 15 following the year in which the unused amount arises, or (2) the date of issue of bonds pursuant to the carryforward election. Once Form 8328 is filed, the issuer may not revoke the carryforward election or amend the carryforward amounts shown on the form. TEB VCAP is also available to issuers to resolve errors made on Form 8328 that can't be corrected under [**Revenue Procedure 2005-30, 2005-22 I.R.B. 1148**](#). See also description in TEB VCAP Scope in IRM 7.2.3.

Private Activity Bonds Need to Meet the Public Approval Requirements. IRC Section 147(f) generally provides that, prior to issuance, qualified private activity bonds must be approved by (1) the governmental entity issuing the bonds or on behalf of which the bonds were issued and (2) each governmental entity having jurisdiction over the area in which the bond-financed facility is to be located (although for bonds financing certain airport and high-speed intercity rail facilities, only the entity issuing the bonds must approve them). However, if more than one governmental unit within a state has jurisdiction over the entire area within the state in which the facility is located, only one unit need approve the issue. Current refunding bonds that meet certain maturity and principal amount limits are exempted from the public approval requirement (see [**Limitations on Refunding Private Activity Bonds**](#), for the definition of current refunding bonds).

Approval may be accomplished by either voter referendum or by an elected representative of the governmental entity approving the issue after a public hearing following reasonable notice to the public. IRC 147(f) and Treas. Reg. Section 1.147(f)-1 define the specific rules for this requirement.

Special Remedial Action for Failure to Meet Public Approval Requirements. If an issuer fails to comply with the public approval requirements, the issuer may be able to cure the defect. Treas. Reg. Section 1.147-2 provides that issuers may use the remedial action rules under Treas. Reg. Section 1.142-2 (available to correct nonqualified uses of proceeds) to cure noncompliance with the public approval requirement (see [**Special Remedial Actions for Nonqualified Use**](#)).

Issuers Must File Form 8038, Information Return for Tax-Exempt Private Activity Bond Issues. Issuers of qualified private activity bonds must comply with certain information filing requirements under IRC Section 149(e) by filing [**IRS Form 8038**](#) by the 15th day of the second calendar month following the quarter in which the bonds were issued. For example, the due date of the return for bonds issued on February 1 is May 15. Issuers must file Form 8038 at Internal Revenue Service Center, Ogden UT 84201.

An issuer may request an extension of time to file Form 8038 if the failure to file the return on time wasn't due to willful neglect. To request an extension, the issuer must follow [**Revenue Procedure 2002-48, 2002-37 I.R.B. 531**](#). These procedures generally require that the issuer: (1) attach a letter to the Form 8038 briefly explaining when the return was required to be filed, why the return was not timely submitted, and whether the bond issue is under examination; (2) enter on top of the letter "Request for Relief under section 3 of Rev. Proc. 2002-48"; and (3) file the letter and return at the Internal Revenue Service Center, Ogden UT 84201.

Private Activity Bonds Must Be in Registered Form. IRC Section 149(a) generally provides that any tax-exempt bond, including a qualified private activity bond, must be issued "in registered form"

unless the obligation is of a type not offered to the public or has, at the date of issue, a maturity date of not more than one year. The regulations describe what it means to be in “registered form.” Treas. Reg. Section 5f.103-1(c)(1) provides that an obligation issued after January 20, 1987, pursuant to a binding contract entered into after January 20, 1987, is in registered form if:

- the obligation is registered as to both principal and any stated interest with the issuer (or its agent) and that the transfer of the obligation to a new holder may be effected only by surrender of the old instrument and the issuer must either reissue the old instrument or issue a new instrument to the new holder; or
- the right to the principal of, and stated interest on, the obligation may be transferred only through a book-entry system maintained by the issuer (or its agent); or
- the obligation is registered as to both principal and any stated interest with the issuer (or its agent) and may be transferred through both above methods.

Only a Limited Amount of Private Activity Bond Proceeds May Be Used to Pay Issuance Costs.

Costs. The IRC limits the amount of proceeds that may be used to finance issuance costs. Under IRC Section 147(g), a private activity bond is not a qualified bond if the issuance costs financed by the issue (of which the bond is a part) exceed 2% of the proceeds of the issue. In the case of an issue of qualified mortgage revenue bonds or qualified veterans’ mortgage revenue bonds, where the proceeds of the issue do not exceed \$20 million, the issuance costs limitation is 3.5% of the proceeds of the issue. Issuers and borrowers of bond proceeds may finance issuance costs with funds other than the proceeds of the bond issue.

Under the regulations, “issuance costs” means costs incurred in connection with, and allocable to, the issuance of an issue. For example, “issuance costs” include the following costs, but only to the extent incurred in connection with, and allocable to, the borrowing:

- underwriters’ spread
- counsel fees
- financial advisory fees
- fees paid to an organization to evaluate the credit quality of an issue
- trustee fees
- paying agent fees
- bond registrar, certification and authentication fees
- accounting fees
- printing costs for bonds and offering documents
- public approval process costs
- engineering and feasibility study costs
- guarantee fees other than for “qualified guarantees”
- costs similar to those above

Issuers Must Make Certain Elections at Issuance. When an issuer considers actions it must take when it issues bonds, it should consider whether it wants to make any elections. Various provisions of the IRC and regulations require that the issuer make certain elections in writing and retain elections as part of the bond documents. Many elections have to be made on or before the issue date of the bonds. Some elections may be made by either the issuer or a conduit borrower. Others must be made by the actual issuer of the bonds. The IRS frequently observes that issuers make their written elections in the tax and/or arbitrage certificate prepared pursuant to Treas. Reg. Section 1.148-2. Once made, elections cannot be revoked without IRS permission.

Examples of elections include:

- waiving the right to treat a purpose investment as a program investment
- waiving the right to invest in higher yielding investments during any temporary period

- the issuer of a pooled financing issue electing to apply rebate spending exceptions separately to each conduit loan
- applying actual facts rather than reasonable expectations for certain provisions under the two-year spending exception from rebate
- excluding the earnings on a reasonably required reserve fund from available construction proceeds under the two-year spending exception from rebate
- treating a portion of an issue as a separate construction issue under the two-year spending exception from rebate
- electing to pay 1.5% penalty in lieu of arbitrage rebate
- electing to treat portions of a bond issue as separate issues

Requirements That Apply at Issuance and Throughout the Life of the Bonds

Proceeds Must Be Used for Qualified Purposes. Private activity bonds are used for a qualified purpose if 95% or more of the net bond proceeds are to be used for one or more defined qualified purposes. The qualified purposes are described in IRC Sections 142 through 145 and 1394. For purposes of the 95% requirement, issuance costs financed with bond proceeds are generally treated as **not** being used for a qualified purpose. For a description of issuance costs, see [Only a Limited Amount of Private Activity Bond Proceeds May Be Used to Pay Issuance Costs.](#)

Qualified purposes and the relevant IRC Section are:

- Section 142 – exempt facilities, such as:
 - airports and spaceports
 - docks and wharves
 - mass commuting facilities
 - facilities for the furnishing of water
 - sewage facilities
 - solid waste disposal facilities
 - qualified residential rental projects
 - facilities for the furnishing of local electric energy or gas
 - local district heating or cooling facilities
 - qualified hazardous waste facilities
 - high-speed intercity rail facilities
 - environmental enhancements of hydro-electric generating facilities
 - qualified public educational facilities
 - qualified green building and sustainable design projects
 - qualified highway or surface freight transfer facilities
 - qualified broadband projects
 - qualified carbon dioxide capture facilities
- Section 143 – qualified mortgages and qualified veterans' mortgages
- Section 144 – qualified small issue manufacturing facilities, qualified small issue farm property, qualified student loans and qualified redevelopment projects
- Section 145 – qualified 501(c)(3) bonds. (The special rules that generally apply to qualified private activity bonds financing 501(c)(3) exempt purposes are covered in [Publication 4077, Tax-Exempt Bonds for 501\(c\)\(3\) Charitable Organizations.](#))
- Section 1394 – qualified enterprise zone facilities and qualified empowerment zone facilities

A qualified private activity bond issue can lose its tax-exempt status as of the issue date if, after the issue date, sufficient nonqualified use occurs to cause the issue to fail the use requirements. As a result, the issue becomes a taxable private activity bond issue. Generally, nonqualified use occurs when the issuer or other entity controlling expenditure or use of the proceeds or financed property takes an action that results in insufficient bond proceeds being allocated to the qualified purpose for which the bonds were issued. However, with respect to unspent proceeds, a failure to properly use those proceeds may occur as early as the date on which the issuer or other entity controlling expenditure of the proceeds reasonably expects that the bond proceeds won't be expended on the qualified purpose for which the bonds were issued.

Special Remedial Actions for Nonqualified Use. The regulations provide that an issuer that fails to use proceeds for a qualified purpose may, in certain cases, cure that failure using one of the prescribed remedial actions. Generally, these remedial actions consist of the redemption or defeasance of bonds. Additionally, if bond-financed personal property is disposed of exclusively for cash, remedial action may include the alternative use of the disposition proceeds to acquire replacement property within six months of the disposition date. Other remedial actions may be available to the issuer of qualified 501(c)(3) bonds.

The following regulations provide remedial actions available for certain qualified private activity bonds:

- Section 1.142-2 – exempt facility bonds
- Section 1.144-2 – qualified small issue bonds and qualified redevelopment bonds
- Section 1.145-2 – qualified 501(c)(3) bonds
- Section 1.1394-1(m)(4) – qualified enterprise zone facility bonds, qualified empowerment zone facility bonds and District of Columbia enterprise zone facility bonds

These regulations can be accessed through the IRS website under [**Tax Code, Regulations and Official Guidance**](#).

[**Revenue Procedure 2018-26, 2018-18 I.R.B. 546**](#), expands remedial actions available to issuers of tax-exempt private activity bonds by allowing alternative qualified uses of disposition proceeds through treatment of an eligible lease as a disposition for which the consideration is exclusively cash.

Proceeds May Not Be Used to Acquire Land or Other Existing Property. The IRC prohibits the use of proceeds of certain types of qualified private activity bonds for certain expenditures, even if those expenditures are associated with a qualified purpose. Under IRC Section 147(c), a private activity bond is not a qualified bond if (1) 25% or more of the net proceeds of the bond issue are to be used (directly or indirectly) for the acquisition of land (or an interest therein), or (2) any portion of the proceeds of the issue is to be used (directly or indirectly) for the acquisition of land (or an interest therein) to be used for farming purposes.

However, certain exceptions to this rule are available for first-time farmers (up to a specified inflation-adjusted amount), and for land acquired for certain environmental purposes in connection with an airport (but not a spaceport), mass commuting facility, high-speed intercity rail facility, dock or wharf. Also, the restriction on land financing does not apply to any qualified mortgage bond, qualified veterans' mortgage bond, qualified student loan bond, qualified 501(c)(3) bond or any exempt facility bond financing qualified public education facilities.

In addition to the restriction on financing land, generally, a qualified private activity bond won't be tax-exempt if any amount of the net proceeds is used for the acquisition of existing property unless the purpose of the acquisition is the first use of that property. This rule doesn't apply to

qualified mortgage revenue bonds, qualified veterans' mortgage revenue bonds or qualified 501(c)(3) bonds. Additionally, IRC Section 147(d)(2) provides an exception to this prohibition when certain rehabilitation expenditures are made.

Also, under IRC Section 147(e), no proceeds of private activity bonds may be used to finance any:

- airplane (other than aircraft equipped for, and exclusively dedicated to providing, acute care emergency medical services)
- skybox or other private luxury box
- health club facility (under an exception, qualified 501(c)(3) bonds may finance health club facilities)
- facility primarily used for gambling
- store the principal business of which is the sale of alcoholic beverages for consumption off premises

Special Remedial Action Rule. An issuer may be able to cure a prohibited expenditure that does not meet the exceptions noted above. Treas. Reg. Section 1.147-2 provides that issuers may use the remedial action rules under Treas. Reg. Section 1.142-2 to cure noncompliance for rehabilitation expenditures, acquiring property for environmental purposes and certain prohibited financings. See [**Special Remedial Actions for Nonqualified Use.**](#)

Proceeds Must Be Timely Allocated to Expenditures. Issuers and conduit borrowers are required to follow the rules for allocating bond proceeds. The issuer or other entity controlling expenditure of the proceeds of a qualified private activity bond issue must allocate those proceeds among the project expenditures in a manner demonstrating compliance with the qualified use requirements. These allocations must generally be consistent with allocations made for determining compliance with the arbitrage yield restriction and rebate requirements, as well as other federal tax filings. See [Proceeds are Subject to Investment Restrictions: the Arbitrage Yield Restriction and Arbitrage Rebate Requirements](#), below, for an overview of those rules.

An issuer must account for the allocation of proceeds to an expenditure not later than 18 months after the later of the date the expenditure is paid or the date the project, if any, financed by the issue is placed in service. This allocation must be made in any event by the date 60 days after the fifth anniversary of the issue date or the date 60 days after the retirement of the issue, if earlier.

Proceeds are Subject to Investment Restrictions: the Arbitrage Yield Restriction and Arbitrage Rebate Requirements. Issuers of tax-exempt bonds, including qualified private activity bonds, are generally subject to investment, or arbitrage, limitations under IRC Section 148. Failure to comply with those arbitrage limitations will result in the bonds being arbitrage bonds and interest on the bonds being taxable.

In general, arbitrage is earned when the gross proceeds of an issue are used to acquire investments that earn a yield that is materially higher than the yield on the bonds of the issue. Earning arbitrage is permitted in certain circumstances, including those where arbitrage may be earned but must be paid, or rebated, to the U.S. Department of the Treasury. In some cases, an issuer may be able to reduce the yield on an investment for arbitrage purposes and thereby avoid an arbitrage violation by making a yield reduction payment to the U.S. Department of the Treasury. See [**Where and When To File Arbitrage Rebate and Yield Reduction Payments**](#), for information on how to make yield reduction payments.

An issuer must comply with two general sets of arbitrage rules: (1) the yield restriction requirements of Section 148(a) and (2) the rebate requirements of Section 148(f). An issuer may meet one of these

sets of rules, but still have arbitrage bonds because it failed the other. Even though interconnected, both sets of rules have their own distinct requirements. The following is an overview of the basic requirements of these two general rules. Additional requirements or exceptions, beyond the scope of this publication, may apply in certain instances.

An issuer's reasonable expectations on the issue date regarding the amount and use of gross proceeds of the issue are used to determine whether an issue consists of arbitrage bonds. In addition, if an issuer or any person acting for the issuer takes a deliberate, intentional action to earn arbitrage after the issue date, that action will cause the bonds of an issue to be arbitrage bonds if that action, had it been reasonably expected on the issue date, would have caused the bonds to be arbitrage bonds. Intent to violate the requirements of IRC Section 148 is not necessary for an action to be intentional.

Yield Restriction Requirements. The yield restriction rules of IRC Section 148(a) generally provide that the direct or indirect investment of the gross proceeds of bonds in investments earning a yield materially higher than the yield of the bond issue causes the bonds to become arbitrage bonds. The chart below describes when the yield on particular investments will be "materially higher" (the chart shows the permitted yield spread between the yield on the bond issue and the yield on the particular investment; any spread beyond that stated is materially higher):

“Materially Higher” Limits

Type of Investments	Materially Higher When Spread Exceeds
General rule (when other rules below don't apply)	1/8 of one percentage point
Investments in a refunding escrow	1/1000 of one percentage point
Investments allocable to replacement proceeds	1/1000 of one percentage point
Program investments (other than qualified mortgage loans or qualified student loans)	1.5 percentage points
Student loans	2 percentage points
Mortgage loans	1.125 percentage points, calculated as required under IRC Section 143(g)
Investments in tax-exempt bonds	Generally, no yield limitation (but for qualified 501(c) (3) bonds, tax-exempt bond investments must not be subject to the alternate minimum income tax)

Certain exceptions are available under the yield restriction rules. The investment of proceeds in materially higher yielding investments does not cause the bonds of an issue to be arbitrage bonds: (1) during a temporary period (for example, three-year temporary period for capital projects and 13 months for restricted working capital expenditures); (2) as part of a reasonably required reserve or replacement fund; and (3) as part of a minor portion (an amount not exceeding the lesser of 5% of the sale proceeds of the issue or \$100,000). Whether or not the arbitrage yield restrictions rules apply, issuer should consider whether the rebate requirements apply.

Rebate Requirements. The rebate requirements of IRC Section 148(f) generally provide that, unless certain earnings on “nonpurpose investments” allocable to the gross proceeds of an issue are rebated to the U.S. Department of the Treasury, the bonds in the issue will be arbitrage bonds. Generally, nonpurpose investments are investment securities such as Treasury bonds, bank

deposits or guaranteed investment contracts, and so on, and do not include “purpose investments.” A purpose investment is an investment that the issuer acquires to carry out the governmental purpose of an issue. Examples of purpose investments include the payment obligations created when an issuer loans proceeds of a qualified 501(c)(3) bond to a 501(c)(3) hospital or leases a manufacturing facility financed with proceeds of a qualified small issue bond to a private corporation.

The arbitrage that must be rebated is based on the excess (if any) of the amount actually earned on nonpurpose investments over the amount that would have been earned if those investments had a yield equal to the yield on the issue, plus any income attributable to the excess. Under Treas. Reg. Section 1.148-3(b), the future values (as of the computation date) of all earnings received and payments actually or constructively made on nonpurpose investments are included in determining the amount of rebate due. See [**Where and When to File Arbitrage Rebate and Yield Reduction Payments**](#), below, for information on how to make rebate payments.

There are, however, spending exceptions to the general rebate requirements that apply to qualified private activity bonds. Whether these exceptions apply depends on the timing of expenditure of required amounts of proceeds, as follows:

Spending Exceptions

Spending Period	Spending Exception
Six months	IRC Section 148(f)(4)(B) and Treas. Reg. Section 1.148-7(c) provides an exception to rebate if the gross proceeds of the bond issue are allocated to expenditures for governmental or qualified purposes that are incurred within six months after the issue date.
18 months	Treas. Reg. Section 1.148-7(d) provides an exception to rebate if the gross proceeds of the bond issue are allocated to expenditures for governmental or qualified purposes which are incurred within: (1) at least 15% within 6 months after the issue date; (2) at least 60% within 12 months after the issue date; and (3) 100% within 18 months after the issue date.
Two years	IRC Section 148(f)(4)(C) and Treas. Reg. Section 1.148-7(e) provides an exception to rebate for construction issues financing property to be owned by a governmental entity or 501(c)(3) organization when certain available construction proceeds are allocated to expenditure: (1) at least 10% within 6 months after the issue date; (2) at least 45% within 12 months after the issue date; (3) at least 75% within 18 months after the issue date; and (4) 100% within 24 months after the issue date.
Note: Issuers may still owe rebate on amounts earned on nonpurpose investments allocable to proceeds not covered by one of the spending exceptions, which may include earnings in a reasonably required reserve or replacement fund.	

Where and When to File Arbitrage Rebate and Yield Reduction Payments. Issuers of tax-exempt bonds file IRS [**Form 8038-T, Arbitrage Rebate, Yield Reduction and Penalty in Lieu of Arbitrage Rebate**](#), to make:

- yield reduction payments
- arbitrage rebate payments
- payments of a penalty in lieu of rebate
- payment in connection with the termination of the election to pay a penalty in lieu of rebate
- payment of the penalty for failure to pay arbitrage rebate on time

A yield reduction payment and/or arbitrage rebate installment payment is generally required to be paid no later than 60 days after the “computation date” to which the payment relates. An issuer of a fixed yield issue may treat any date as a computation date. An issuer of a variable yield issue may treat the last day of any bond year ending on or before the latest date for making the first rebate payment (generally not later than five years after the issue date) as a computation date. Thereafter, the issuer must consistently treat either the end of each bond year or the end of each fifth bond year as a computation date. Generally, a “bond year” is a one-year period that ends on the date that the issuer selects. If the issuer does not make a timely selection, the bond years for the issue end on each anniversary of the issue date and on the final maturity date.

Recovering an Overpayment of Rebate. If an issuer pays more than the required rebate, it may ask to recover the overpayment. In general, a request for recovery of overpayment of arbitrage rebate may be made when the issuer can establish that an overpayment occurred. An overpayment is the excess of the amount paid to the U.S. Department of the Treasury for an issue over the sum of the rebate amount for the issue as of the most recent computation date and all amounts that are otherwise required to be paid under Section 148 as of the date the recovery is requested.

The request can be made with the IRS by completing and filing IRS [**Form 8038-R, Request for Recovery of Overpayments Under Arbitrage Rebate Provisions**](#). An issuer must file a Form 8038-R no later than the date that is two years after the final computation date for the issue. For more information, see Treas. Reg. 1.148-3(i) and [**Revenue Procedure 2024-37, 2024-41 I.R.B. 755**](#).

Special Remedial Action for Failure to Timely Pay Arbitrage Rebate. An issuer that fails to timely pay arbitrage rebate will be excused from having its bonds be arbitrage bonds if the failure isn't due to willful neglect and the issuer submits a Form 8038-T with a payment of the rebate amount owed, plus penalty and interest. The penalty may be waived under certain circumstances. For more information, see Treas. Reg. Section 1.148-3(h)(3) and [**Revenue Procedure 2005-40, 2005-28 I.R.B. 83**](#).

Private Activity Bonds are Subject to Maturity Limitations. IRC Section 147(b) places limits on the maturity of qualified private activity bonds. A private activity bond is not a qualified bond (and therefore will not be tax-exempt) if the average maturity of the bond issue exceeds 120% of the average reasonably expected economic life of the facilities being financed with the issue. This requirement doesn't apply to qualified mortgage bonds, qualified veterans' mortgage bonds or qualified student loan bonds. Working capital expenditures are ignored when determining the economic life of facilities.

Private Activity Bonds May Not Be Federally Guaranteed. IRC Section 149(b) provides that any tax-exempt bond, including a qualified private activity bond, will not be treated as tax-exempt if the payment of principal or interest is directly or indirectly guaranteed by the federal government

or any agency or instrumentality of the federal government. Exceptions to this general rule include guarantees by certain quasi-governmental entities administering federal insurance programs, and federal guarantees for qualified residential rental projects, home mortgages and student loans. There is an exception for payment of rent, user fees, or other charges by the United States in exchange for use of a spaceport by the United States. Additional exceptions apply to bond proceeds that are invested in U.S. Treasury securities or held in a bona fide debt service fund, a reasonably required reserve or replacement fund or a refunding escrow, and investments during a permitted initial temporary period.

A Private Activity Bond May Not Be a Hedge Bond. IRC Section 149(g) states that hedge bonds will not be tax-exempt unless certain requirements, described below, are satisfied. A “hedge bond” is any bond that is part of a bond issue that fails either of the following requirements:

- The issuer must reasonably expect that 85% of the spendable proceeds of the issue will be used to carry out the qualified purpose within the three-year period beginning on the date the bonds are issued (“spendable proceeds” means proceeds from the sale of the issue, less the portion invested in a reasonably required reserve or replacement fund or as part of a permitted “minor portion”).
- Not more than 50% of the proceeds of the issue are invested in nonpurpose investments having a substantially guaranteed yield for four or more years.

Section 149(g)(3)(B) provides an exception to the general definition of a hedge bond if at least 95% of the net proceeds of the issue are invested in tax-exempt bonds that are not subject to the alternative minimum tax. For this purpose, amounts held either: (1) in a bona fide debt service fund or (2) for 30 days or less pending either reinvestment of the proceeds or bond redemption, are treated as invested in tax-exempt bonds not subject to the alternative minimum tax. Additionally, a refunding bond issue does not generally consist of hedge bonds if the prior issue met the requirements for tax-exempt status and issuance of the refunding bonds furthers a significant governmental purpose (for example, realize debt service savings, but not to otherwise hedge against future increases in interest rates).

Even if an issue otherwise meets the definition of a hedge bond, it will generally still be tax-exempt if two requirements are satisfied. First, at least 95% of the reasonably expected legal and underwriting costs associated with issuing the bonds must be paid within 180 days after the issue date and the payment of such costs must not be contingent on the disbursement of the bond proceeds. Second, on the date of issuance the issuer must reasonably expect that the spendable proceeds of the issue will be allocated to expenditures for governmental or qualified purposes within the following schedule:

- 10% within one year after the date of issuance,
- 30% within two years after the date of issuance,
- 60% within three years after the date of issuance, and
- 85% within five years after the date of issuance.

Limitations on Refunding Private Activity Bonds. Qualified private activity bonds may be currently refunded. The Tax Cuts and Jobs Act (2017) repealed the exclusion from gross income for interest on bonds issued to advance refund another bond. The repeal applies to advance refunding bonds issued after December 31, 2017. A bond is classified as an advance refunding if it is issued more than 90 days before the redemption of the refunded bonds. Under Treas. Reg. Section 1.150-1(d)(1), a refunding bond issue is an issue the proceeds of which are used to pay principal, interest,

or redemption price on another issue (a prior issue), as well as the issuance cost, accrued interest, or capitalized interest on the refunding issue, a reserve or replacement fund, or any similar costs properly allocable to that refunding issue.

Refunding bond issues generally derive their tax-exempt status from the prior issue they refund; if the prior issue was not tax-exempt, the refunding bonds generally cannot be tax-exempt.

Private Activity Bonds May Not Be Used for Abusive Tax Transactions

The IRS is engaged in extensive efforts to curb abusive tax shelter schemes and transactions.

What Happens When the Terms of a Private Activity Bond are Modified?

If the terms of a private activity bond are significantly modified, the bond will be treated as reissued. When qualified private activity bonds are reissued, either actually or in a deemed reissuance, the new bonds must be retested as of the date of the reissuance to determine if all the federal tax requirements are met for the “new” issue. These include the requirements that apply when bonds are issued, such as timely filing of the Form 8038. See [**Issuers Must File Form 8038, Information Return for Tax-Exempt Private Activity Bond Issues.**](#)

A deemed reissuance may arise if material changes are made to the bond terms, such as when a bondholder and issuer agree, directly or indirectly, to a significant modification of the terms of any bonds. See [**Reissuance of Tax-Exempt Obligations: Some Basic Concepts**](#) for examples of significant modifications. If deemed reissued, the modified bonds are deemed exchanged for the original bonds. In general, the date the issuer and bondholder enter into the agreement to modify the bond terms is treated as the date of issuance of the new bonds, even if the modification is not immediately effective. At reissuance, the modified bond must meet any tax law requirements that apply upon its early retirement in connection with the reissuance, including the acceleration of any arbitrage rebate or yield reduction payment that is due. See [**Proceeds Are Subject to Investment Restrictions: the Arbitrage Yield Restriction and Arbitrage Rebate Requirements.**](#)

See also [**Where and When to File Arbitrage Rebate and Yield Reduction Payments.**](#) For more information on the reissuance rules, see [**Reissuance of Tax-Exempt Obligations: Some Basic Concepts.**](#)

Issuers Must Retain Records to Show That Requirements are Satisfied

IRC Section 6001 and Treas. Reg. Section 1.6001-1(a) generally provide that any person subject to income tax, or any person required to file a return of information with respect to income (for example, the issuer filing information returns relating to its bond issues), must keep books and records that are sufficient to establish the amount of gross income, deductions, credits or other matters required to be shown by that person in any return. See [**Frequently Asked Questions**](#) for more information.

Certain Holders May Not Exclude Interest on Qualified Private Activity Bonds from Taxable Income

Even if a private activity bond meets all other requirements for tax exemption, the IRC may prohibit certain holders from excluding interest income from tax. Generally, the entity that benefits from qualified private activity bonds may not also receive an exclusion from tax for interest that it receives while holding those bonds. Specifically, IRC Section 147(a) provides that a private activity

bond is not a qualified bond (and therefore will not be tax-exempt) during any period it is held by a person who is a substantial user of the facilities financed with the bond or by a person “related” to a substantial user. Generally, a substantial user of a facility includes any nonexempt person who regularly uses a part of the facility in a trade or business. See Treas. Reg. Section 1.103-11(b) for the rules to determine whether a person is a substantial user. IRC Section 147(a)(2) governs whether a person is treated as a “related person” to a substantial user.

The substantial user prohibition of Section 147(a) does not apply to qualified mortgage bonds, qualified veterans’ mortgage bonds, qualified student loan bonds or qualified 501(c)(3) bonds.

Post-Issuance Compliance Monitoring

In this section, we discuss the importance of issuers and other parties monitoring compliance with the IRC requirements and suggest steps an issuer and others may take to monitor bond issues.

Protecting Against Post-Issuance Violations

Issuers and users of bond proceeds may be concerned with how they can further protect the tax-exempt status of their qualified private activity bonds. Reliance solely on bond documents and tax and/or arbitrage certificates provided when the bonds are issued will not likely provide the assurance an issuer desires. To gain greater confidence that bonds are in compliance with federal tax laws, an issuer may adopt, or ask the entity borrowing bond proceeds or controlling the financed property to adopt, post-issuance monitoring procedures. Issuers and other users of bond proceeds that establish and follow comprehensive written monitoring procedures to promote post-issuance compliance generally are less likely to violate the federal tax requirements related to their bonds, and are more likely to find any violations earlier, than those issuers and other users without procedures. Early discovery of a violation is a factor IRS considers in determining the appropriate resolution under its TEB VCAP. For information on procedures and other options to assist issuers and other users of bond proceeds in their tax compliance responsibilities, see [Publication 5005](#),

Your Responsibilities as a Conduit Issuer of Tax-Exempt Bonds.

Steps to Better Monitoring

In formulating procedures, issuers and other users of bond proceeds may consider:

- designating one or more officials to assist in post-issuance compliance,
- designating one or more officials to assist with examinations of the bond issue,
- providing training or other technical support to designated official,
- designating time intervals within which compliance monitoring activities will be completed, and
- timely completing remedial actions (including requests under TEB VCAP) to correct or otherwise resolve identified noncompliance.

The following chart identifies particular areas for compliance monitoring procedures.

Compliance Procedures

Type of Procedures	Description of Procedures for Post-Closing Matters	Where Responsibility is Discussed in this Publication
Information Return Filing	Procedures to ensure timely filing of information returns, including procedures concerning amended and late filed returns	Tax-Exempt Private Activity Bonds – Requirements Related to Issuance – Issuers Must File Form 8038, Information Return for Tax-Exempt Private Activity Bond Issues
Change in Use of Proceeds or Bond-Financed Property	Procedures to timely identify and remediate deliberate actions	Tax-Exempt Private Activity Bonds – Requirements That Apply at Issuance and Throughout the Life of the Bonds – Proceeds Must Be Used for Qualified Purposes
Reissuance	Procedures to satisfy tax requirements when a modification in terms results in a reissuance for federal income tax purposes	Tax-Exempt Private Activity Bonds – What Happens When the Terms of a Private Activity Bond are Modified?
Elections	Procedures for timely federal income tax elections	Tax-Exempt Private Activity Bonds – Requirements Related to Issuance – Issuers Must Make Certain Elections at Issuance
Allocation of Proceeds	Procedures for the timely expenditure and accounting for use and investment of bond proceeds	Tax-Exempt Private Activity Bonds – Requirements That Apply at Issuance and Throughout the Life of the Bonds – Proceeds Must Be Timely Allocated to Expenditures
Arbitrage Compliance	Procedures for the timely computation and payment of arbitrage rebate and yield reduction payments	Tax-Exempt Private Activity Bonds – Requirements That Apply at Issuance and Throughout the Life of the Bonds – Proceeds Are Subject to Investment Restrictions: the Arbitrage Yield Restriction and Arbitrage Rebate Requirements
Record Retention	Procedures for the maintenance of records	Tax-Exempt Private Activity Bonds – Issuers Must Retain Records to Show That Requirements are Satisfied
IRS Contacts	Procedures concerning contacts from the IRS	Post-Issuance Compliance Monitoring – Steps to Better Monitoring

See [**TEB Post-Issuance Compliance: Some Basic Concepts**](#) for more information.

What To Do When You Discover a Violation – TEB Voluntary Closing Agreement Program

IRS is committed to resolving federal tax violations with the issuer. The TEB Voluntary Closing Agreement Program provides remedies for issuers of tax-exempt bonds, tax credit bonds, and direct pay bonds that voluntarily come forward to resolve a violation of the IRC that cannot be corrected under self-correction programs described in the regulations or other published guidance.

[**Notice 2008-31, 2008-11 I.R.B 592**](#), provides information and general guidance about TEB VCAP.

[**Internal Revenue Manual section 7.2.3**](#) provides general procedures under which TEB will enter into closing agreements. Closing agreement terms and amounts may vary according to the degree of the violation as well as the facts and circumstances surrounding it.

Issuers must use IRS [**Form 14429, Tax Exempt Bonds Voluntary Closing Agreement Program Request**](#), to submit a request and provide the required information. While the IRS generally enters into closing agreements with the issuer of the bonds, in certain cases other parties to the bond transaction (including an entity borrowing the bond proceeds) may also participate in the negotiations and jointly execute the agreement.

For more information about this program, including requirements for submitting a request, case processing procedures, and resolutions standards, see [**IRM section 7.2.3**](#). See [**Tax Exempt Bonds Voluntary Compliance**](#) for more information on TEB VCAP administrative procedures and resolution standards.
