6 TE/GE Reporting Systems Codes

EP/EO Determination System (EDS)

EDS is an inventory control and letter generation system for Exempt Organizations (EO) and Employee Plans (EP) determination letter applications. Organizations and plan sponsors submit applications to EO or EP to determine if they meet the law requirements of the Internal Revenue Code. Data entered is added to the Inventory Control System (ICS). This information allows EP and EO to manage their workload, generate correspondence (usually a favorable determination letter), and add the applicant to the EO/BMF or EPMF.

Before the applicant is added to the EO/BMF or EPMF, the data entered must be validated by MPS (campus subsystem). Once the data passes the validity checks it is added to the campus database files to wait for the weekly posting cycle to Master File and the monthly extract to DCC.

Database Files of MPS

PCCF — The Plan Case Control File contains the plan characteristics, entity information, filing requirements and the final disposition of each application. The data on the PCCF can be accessed via the unique case number and file source generated by CSS.

POIF — The Plan/Organization Index File is an abbreviated record of the PCCF. The POIF is used to retrieve the case number when only limited data such as the File Folder Number, EIN, Name Control and on EP Cases, Plan Number is available.

The EP and EO data is stored in one database file. EP and EO cases are identified by a file source. File Sources are:

EP — Employee Plan Case

EO — Exempt Organization Case

Two types of records are added to the PCCF: an opening record and a closing record. The opening record will be in status 51 — Area Office Receipt and will stay in that status until the closing record is added. The closing record is sent to ECC-DCC and the master files. Command codes are available for research through IDRS. These command codes are:

PLINF — Displays specific information from the PCCF. The case number must be used with the file source EP or EO to display the data. If the case number is unknown the command code PLINQ may be used to obtain it. PLINF with a definer of “blank” will display the history of status 51 and the final closing. PLINF with definer E will display the complete entity data.

PLINQ — Accesses one or more records from the POIF based on the search data entered. The case number is obtained to be used with PLINF. PLINQ without a definer searches for EP records and a definer of “O” searches for EO records.

For complete details on the subsystems of EDS in the area office, refer to IRM 7.14, EP/EO Determination System (EDS) Employee Plans User Manual or IRM 7.22, EP/EO Determination System (EDS) Exempt Organizations User Manual.

Beginning in 2010, check the EFAST website at *www.efast.dol.gov* for information on filing and appropriate addresses.

(2) EPMF Delinquency Investigations

EPMF delinquency investigations are also processed through IDRS. (14) EP AIMS Push Codes

020 — Delinquent Return BMF/EPMF

021 — Substitute 5330 BMF
025 — Inadequate Records Notice BMF
036 — Substitute for Return BMF/IMF
041 —Current Return Pick-up BMF
049 —Joint Investigation
081 — Future Year Return BMF/EPMF

When a request is made through AIMS to post a transaction code, TC424, to the Master File (BMF, IMF, EPMF), if the Master file does not reflect the posting of the return (TC150), entering a Push Code from the above list, with the exclusion of Push Code 036, on the Form 5597 will post the TC 424 and 3 digit Push Code on AIMS and MF. The Push Code will allow the skeletal AIMS account (TC424) to remain active and will hold at MF for up to 26 months. If the return (TC 150) does not post on MF within that time frame, then the TC 424 will reverse shutting down the AIMS account and posting the closing on MF (TC421). If the return posts in the interim, an AIMS opening will automatically be generated, be extracted and a good AIMS account (TC420) will appear.

Note: Using a Push Code 036 will automatically generate a TC 150 and TC 420 on Master File, Push Code 036 can be used for all MFT's except for MFT 74 and 76.

(3) Status Codes - Master File and AIMS

These codes are used to reflect the current (and possibly the past) rating of an account. Both Master File and AIMS status codes are listed and defined below.

It should be noted, that any similarity between the value or definition of these two sets of codes is purely coincidental. Master File Status Codes for Exempt Organizations are used to define the rating of the organization as to its qualifications under specified Internal Revenue Code Sections, whereas, AIMS Status Codes are used to identify a specific type of EO return (MFT and Tax Period) of an organization that has been controlled for reporting purposes into the Examination Stream.

Master File (EO/BMF) Status Codes

Definition of an "Active" Organization: for purposes of counting an organization as an active EO Division customer, an active organization is one that has either received a favorable IRS determination letter that is currently in effect or has filed an EO return that is subject to EO Division compliance oversight**.**
