GENERAL BUSINESS PURPOSE

What is the general business purpose of this system? Provide a clear, concise description of the system, application or database, the reason for the system, and the benefits to the IRS to use the information, and how the information will be used.

The Payoff application is intended to be used by taxpayers by telephone to find out the amount (calculated with penalty and interest included) of any outstanding balances they may currently have with the IRS. The balance quoted is based on today's date plus ten (10) days (the default date). Taxpayer may enter new Payoff date within next 120 days and they are provided an address to submit payment to IRS.

PII DETAILS

Does the system use, collect, receive, display, store, maintain, or disseminate IR Code 6103 taxpayer information: or any other type of Sensitive but Unclassified (SBU) information or PII such as information about IRS employees or outside stakeholders?

Yes

Does the system use, collect, receive, display, store, maintain, or disseminate Social Security Numbers (SSN's) or tax identification numbers (i.e., last 4 digits, etc.)?

Yes

What types of tax identification numbers (TIN) apply to this system?

Social Security Number (SSN)

List the approved Treasury uses of the SSN:

Legal/statutory basis (e.g., where collection is expressly required by statute)

Explain why the authorized use(s) above support the new or continued use of SSNs (or tax identification numbers).

Payoff requires the use of SSN's because no other identifier can be used to uniquely identify a taxpayer. SSNs are permissible from Internal Revenue Code (IRC) 6109, which requires individual taxpayers to include their SSNs on their income tax returns.

Describe the planned mitigation strategy and forecasted implementation date to mitigate or eliminate the use of SSN's (or tax identification numbers).

The Office of Management and Budget Circular A-130 requires that federal agencies develop a mitigation or elimination strategy for systems that use SSNs, which the Service continues to develop strategies to meet. An exception to that requirement is

when the SSN is uniquely needed to identify a user's record. Payoff requires the use of SSN's because no other identifier can be used to uniquely identify a taxpayer at this time.

Does this system use, collect, receive, display, store, maintain or disseminate other (non-SSN) PII (i.e., names, addresses, etc.)?

Yes

Specify the PII Elements:

Name
Mailing Address
Phone Numbers
Date of Birth
Tax Account Information

Does this system use, collect, receive, display, store, maintain, or disseminate SBU information that is not PII?

Yes

Specify the types of SBU from the SBU Types List:

Official Use Only (OUO) or Limited Official Use (LOU) - Information designated as OUO or LOU is information that: is exempt under one of the statutory Freedom of Information Act exemptions; is prohibited by other laws or regulations; would significantly impede the agency in carrying out a responsibility or function; or would constitute an unwarranted invasion of privacy.

Are there other types of SBU/PII used in the system?

Yes

Describe the other types of SBU/PII that are applicable to this system.

The system uses the dollar amount of a payment to determine the status of the payment made.

Cite the authority for collecting SBU/PII (including SSN if relevant).

PII for federal tax administration is generally Internal Revenue Code Sections 6001, 6011, & 6012e(a)

SSN for tax returns and return information is Internal Revenue Code Section 6109

Has the authority been verified with the system owner?

Yes

BUSINESS NEEDS AND ACCURACY

Explain the detailed business needs and uses for the SBU/ PII, and how the SBU / PII is limited only to that which is relevant and necessary to meet the mission requirements of the system. If SSNs (or tax identification numbers) are used, explicitly explain why use of SSNs meets this criteria. Be specific.

The PII items above are collected from the taxpayer to authenticate them prior to providing them with tax related information. This information represents the least amount of data needed to authenticate the individual, identify possible ID theft without any more information on user as possible using existing IRS command codes.

How is the SBU/PII verified for accuracy, timeliness, and completion?

Accuracy: Authentication must include data in a prescribed format and must meet a variety of validation criteria that ensure proper validation to the appropriate account. Taxpayers are authenticated to view their Amended Return status on the IRS's Master Files before status information is returned to them. Timeliness: The Amended status reflects the current processing time of Amended Returns throughout IRS. Completeness: Amended Return transactions are received in a required record format.

PRIVACY ACT AND SYSTEM OF RECORDS

The Privacy Act requires Federal agencies that maintain a system of records to publish systems of records notices (SORNs) in the Federal Register for records from which information is retrieved by any personal identifier for an individual who is a US citizen, or an alien lawfully admitted for permanent residence. The Privacy Act also provides for criminal penalties for intentional noncompliance.
