19	Java Class error message	11/7/12	Stakeholders need to check to make sure they are using the correct WSDLs on the port. There is additional functionality that is causing this error message. 24	Urban institute. New submissions giving a R8-MeF error indicating that there is a conflict in submissions.	11/8/2012	<p>The specific error encountered is</p> <pre>&lt;faultstring xml:lang="en-US"&gt;IDP Rule 'R8-MeF Invalid WSDL IDP Rule' aborted processing. The root element {http://www.irs.gov/a2a/mef/MeFStateServiceMTOM.xsd}GetNewSubmissionsRequest' found within the SOAP body does not match the name and namespace of any message defined in the WSDL file.&lt;/faultstring&gt;</pre> <p>IRS Resolution:</p> <p>Urban's request contained two parts and typical ones for this type contain one. The URL's local part was <a href="#">/a2a/mef/mtom/GetSubmissions</a>, while the action ended with <a href="#">GetNewSubmissions</a> matching the request. They must match. In other words your message body type isn't valid for the URL you sent it to.</p> <p>Perhaps a better worded error message would have said something like:</p> <p><b>"The root element ... found within the SOAP body does not match the name and namespace of the operation defined for the request's URL in the WSDL file".</b></p> <p>The current wording is misleading since that element is proper for a message in the WSDL file - just not the one for that URL. (11/8/12)</p>	ATS	Closed 11/8/12
25	F 1040-SS-PR-007. Error message states that Dependent SSN is invalid even though it's a test SSN.	11/8/2012	<p>The business rule that is causing this issue has been disabled in ATS. See the list of disabled ATS rules in item 26 below. (11/8/12)</p>	ATS	Closed 11/8/12
