NOTES

1. Income subject to tax

For most corporations, income subject to tax consisted of net income less statutory special deductions. However, certain of these deductions (a) could exceed net income resulting in no income subject to tax and (b) could occur on returns without net income and therefore without income subject to tax. Other exceptions applied to life and mutual insurance companies, related investment companies, real estate investment trusts, and to Small Business Corporations electing to have net income taxed through shareholders. See "Income subject to tax" in Explanation of Terms, STATISTICS OF INCOME--1967, CORPORATION INCOME TAX RETURNS.

2. Unused investment credit

Revisions were made to the Unused investment credit statistics too late to be included in the Source Book. Total Unused investment credit for 1967 amounted to $1,859,389 thousand. See, STATISTICS OF INCOME--1967, CORPORATION INCOME TAX RETURNS, for industry and various size distributions.

3. Income year 1967 covers corporation accounting periods ended July 1967 through June 1968.

4. See the report STATISTICS OF INCOME--1967, CORPORATION INCOME TAX RETURNS, for a discussion of these statistics including:

Changes in law
